**Identifiers—**\*Malaysia

The traditions of the Chinese press in Malaysia go back 160 years to Malaysia's first Chinese-language newspaper, considered by scholars as the first modern periodical anywhere. Since then, this press has aided Christian missionary efforts in China and Southeast Asia, helped develop permanent Chinese communities in the Malay peninsula, called for both reformist and revolutionary movements in China, fought against the Japanese during World War II, and supported the formation of a Malaysian state—all the while trying to retain valuable aspects of Chinese culture. Currently, the Malaysian Chinese community is served by 26 newspapers (23 are dailies), a few local magazines, a Chinese section of Radio Malaysia, and a daily Chinese newscast and limited drama on television. Readership of Chinese papers is the highest of any ethnic press in the country. In the future, most of the Chinese papers, falling under the ownership of Alliance government parties, will have to report according to government standards and, while Chinese broadcasts could be diminished because of language restrictions, it would be a long time before Chinese would be discarded as a broadcast language. **Identifiers—**\*International News

Research conducted during the past 20 years reveals that, except for the "New York Times," "Christian Science Monitor," and "Wall Street Journal," United States daily newspapers are not known for outstanding international news coverage; that European, English, Canadian, Latin American, and Asian newspapers use disproportionately larger amounts of international news than their American counterparts; and that the United States is covered much more thoroughly in the press abroad than foreign nations are reported in the United States press. In trying to account for these facts, it may be seen that in the United States international news coverage and usage are: often determined by considerations of international diplomacy, national government and military policies, and historical-cultural heritage; often crisis oriented; often affected by censorship policies and image building activities of other countries; affected by a dwindling corps of adequately trained correspondents abroad and by globally blind editors cemented to their swivel chairs stateside; and guided by an

American public not generally noted for being cosmopolitan or well informed on world affairs. (JM)

Descriptors—\*Educational Research, \*Learning, \*Learning Characteristics, \*Learning Processes, Learning Theories, Secondary Education, \*Teaching Methods

Three design strategies directly related to the development of instructional materials for rule learning were investigated. In the first of two experiments using both male and female tenth grade students, the degree of divergence between instances showed that contrasting irrelevant features resulted in better performance than matching irrelevant features. The data analysis from experiment 2 showed that when two contextually similar rules were learned simultaneously, student performance was superior to that of students who learned the rules successively. When the students were provided with an analysis of how a given instance represented the application of a grammatical rule, performance was better than without this analysis. The results were discussed in relationship to a prescriptive theory of instruction. (Author/LL)

A Programmed Approach to the Remediation of Communication Skills at Santa Rosa Junior College.  
Pub Date Jan 75

Note—44p.; Ed.D. Practicum, Nova University  
**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**  
Descriptors—\*Communication Skills, Composition Skills (Literary), Descriptive Writing, Doctoral Theses, \*English Instruction, Expository Writing, \*Individualized Programs, Junior Colleges, \*Programed Instruction, \*Remedial Instruction, Sentence Structure, Transformation Generative Grammar

This practicum describes the development of an individualized approach to the remedial English program, including production of materials, implementation of an experimental section, and evaluation of the project. Two courses were combined: English for students needing intensive help and English for students with somewhat better skills. All students began working with transformational based materials to develop effective sentence structure and moved on to workbooks which presented principles for writing narrative-descriptive, expository, and argumentative essays. All students were urged to progress as quickly as possible, with 100 students expected to complete

the program in one semester and 105 expected to take two semesters. Little group instruction took place. Pretest and posttest scores, grades, and student questionnaires indicated significant improvement in writing skills and a generally favorable attitude toward the program, with dissatisfaction in the grammar component. Recommendations include changes in the method of teaching grammar, development of additional or alternate language skills units, and more group activities to complement the individual work. Descriptors—Community Colleges, Composition (Literary), \*Composition Skills (Literary), \*English Instruction, Higher Education, Junior Colleges, Student Interests, Student Rights

Of the various accomplishments of the Conference on College Composition and Communication during the 1970's, three decisions have been outstanding: organizing and assisting two-year college English teachers, supporting the racism and bias committee, and adopting the resolution on the students' right to their own language. These decisions, with their roots in the 1950's and 1960's, are aiding composition instruction to develop into a college course with its own integrity in which students learn to control their own ideas and to write by catching, examining, and keeping their experiences. There are many good approaches for helping students to realize that what they have to say counts and that writing is not to be done according to a formula. (JM)

A Comparative Analysis: The Structure and Function of Task-Oriented Communication within Complex Organizations.  
Pub Date 75

Note—25p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (Ottawa, Ontario, August 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—\*Communication (Thought Transfer), Data Analysis, Data Processing, \*Feedback, \*Information Processing, Intercommunication, \*Organizational Communication, Organizations (Groups)

The research presented in this paper demonstrates that Katz and Kahn's (1966) distinction between people-processing and object-processing organizations is a useful classification scheme that can help explain differences in organizational communication systems. To assess the usefulness of Katz and Kahn's scheme, data derived from a sample of more than 4,000 organizations in Wisconsin were analyzed to determine whether the structure and function of communication systems used by people-processing and object-processing organizations vary systematically. The analysis focused on variances in measures of the structure and function of the water-use (task-oriented) communication systems used by these different types of organizations. The research findings support the proposition that an organization's through-put will significantly influence the structure and function of the organization's task-oriented communication system. Object-processing organizations in this study scored significantly higher on the data acquisition index than people-processing organizations. Also, the evidence indicates that object-processing organizations place much more emphasis on data transportation than do people-processing organizations, probably due to the immediate demands of the marketplace. Identifiers—\*Indiana

The purposes of this bibliography are to bring together materials that relate to the history of newspapers in Indiana and to assess, in a general way, the value of the material. The bibliography contains 415 entries, with descriptive annotations, arranged in seven sections: books; special materials; general newspaper histories and lists of publications; periodicals; Indiana histories and related monographs; county histories; and directories, almanacs, and gazetteers. An index of authors and subjects concludes the bibliography. Material was gathered from Indiana and other periodicals, Indiana history books, and Indiana county and local histories (masters theses or doctoral dissertations about Indiana journalism are not included). Document Not Available from EDRS

Descriptors—\*Editing, Graphic Arts, Higher Education, Journalism, Layout (Publications), \*Newspapers, Photography, Printing, \*Production Techniques, \*Staff Utilization, \*Technological Advancement

Designed to teach college students how to edit, this book provides an overview of skills required to produce the newspaper, emphasizing the editing of copy, the writing of headlines, and layout and production techniques. The author discusses several theories about how to edit newspapers; the importance of staff organization on metropolitan dailies, medium-sized dailies, and small-town papers; the role of the editor-in-chief; different views of what constitutes standard English; picture cropping; the introduction of cathode ray tubes and optical character readers; the function of headlines; and the preparation of copy obtained from the news wires. Special attention is given to technological advancements that are being implemented by the newspapers, and the production of newsmagazines is covered. A glossary of newspaper terminology and a bibliography are appended. (RB)

Document Not Available from EDRS

Descriptors—\*Advanced Placement, \*Advanced Placement Programs, Advanced Students, Doctoral Theses, Educational Research, \*English Instruction, Program Descriptions, \*Program Effectiveness, \*Program Evaluation, Secondary Education

Identifiers—Tennessee (Memphis)

The purpose of this study was to determine whether students enrolled in Advanced Placement (AP) English in the senior year in the Memphis (Tennessee) City School System entered college immediately on graduation in greater proportions than students who were enrolled in other senior English courses. It was concluded that the number of students enrolled in AP courses remained relatively constant over a period of years, AP English students in the Memphis Schools resembled other students cited in the literature on such courses; and the probability that a student enrolled in an AP English course compared to a student enrolled in a regular senior class would request a transcript to be sent to a college was significant at a very high level of confidence. Recommendations based on the results of the study are included. (Author/RB)

Literary-Vocational Relationships in the American Educational Context, From 1820: Implications for Instruction.  
Pub Date 75

Note—297p.; Ph.D. Dissertation, University of Kansas

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-30,042, Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

Descriptors—Curriculum Development, Doctoral Theses, \*Educational History, Educational Philosophy, \*Educational Theories, \*General Education, Higher Education, Junior Colleges, \*Literature Appreciation, Secondary Education, \*Vocational Education

In order to locate means to enhance student vocational preparation through the study of literature, literary-vocational relationships are identified or inferred in selected aspects of the American educational context. The first two chapters introduce the study and survey background influences, while the third and fourth chapters examine the historical background through the 19th and 20th centuries, including the ideas of Thoreau, Greeley, Emerson, Channing, and Dewey. The fifth chapter reviews suggested combinations within the context of specialized education (junior colleges and workers' educational movements), and the sixth chapter states the findings of the study, concluding that correlation of liberal, including literary, education with vocational education has a value justification and a practical basis. Fourteen literary-vocational relationships are described, including ideas for lessons and course development based on the use of such materials as vocational booklists and the ballads and songs generated historically within various occupations. Descriptors—\*Composition (Literary), Course Content, Course Descriptions, Doctoral Theses, English Instruction, Junior Colleges, \*Laboratory Techniques, Language Skills, \*Rhetoric, Teacher Education, \*Teaching Methods, \*Writing Skills, Written Language  
Identifiers—\*Writing Laboratories

The purpose of the monograph described in this thesis is to give teachers methods and a theoretical base for experimenting with the teaching of writing in a laboratory classroom situation at the junior college level. The course, which can be taken by two or more people independently, or with an instructor, provides the opportunity for participants to experiment with theories and methods they have learned. The course also includes ways for participants to generate and criticize standards for evaluating the writing process. The benefits of the writing laboratory include flexibility in terms of helping individual students meet specific goals in writing, separation of the act of writing from the evaluation of the finished product, and experimentation that allows for never-ending possibilities for growth. The Effects of a Program in Black English on the Attitude of Elementary Teachers toward Non-standard Speakers.

Pub Date 75

Note—152p.; Ed.D. Dissertation, University of New Orleans

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-29,852, Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

Descriptors—Doctoral Theses, Elementary Education, Elementary School Teachers, \*Language Instruction, \*Language Programs, Language Research, Language Usage, \*Negro Dialects, \*Nonstandard Dialects, \*Teacher Attitudes, Teacher Education

Identifiers—\*Black English

The purpose of this study was to investigate the effects that an instructional program in Black English would have on the acquisition of knowledge of Black English phonology and grammar by teacher participants, and the attitudes of teacher participants toward the speakers of Black English. The sample consisted of two groups from the

same basic population. Analysis of covariance for the posttests of knowledge of Black English phonology and grammar indicated a significant difference beyond the .001 level. It was concluded that knowledge of Black English phonology and grammar can be acquired by teachers if the rules and patterns governing Black English are taught in a planned program; experimental subjects had a more positive attitude toward speakers of Black dialect than did the control group; there is a significant positive relationship between knowledge of Black English phonology and attitude toward speakers of Black English; and there is a significant positive relationship between knowledge of Black English grammar and attitude toward speakers of Black English. The Canon of English School Fiction: A Survey of Novels Currently Recommended to Students in the Secondary Schools of Pennsylvania, 1975.

Pub Date 75

Note—439p.; D.Ed. Dissertation, The Pennsylvania State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-1375, Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

Descriptors—Doctoral Theses, \*English Instruction, Fiction, Literary Analysis, Literary Criticism, \*Literature Appreciation, \*Novels, Reading Interests, Secondary Education, \*State Surveys, Teacher Attitudes  
Identifiers—\*Pennsylvania

The two primary objectives of this dissertation were to describe the 48 novels taught in English classes in a specific secondary school in Pennsylvania and, through a survey, to determine whether these novels were unique or representative of novels taught in other Pennsylvania schools. The description of each novel includes a critical summary, the edition, the setting, major and minor characters, point of view, a short criticism appropriate to high school English classes, discussion questions, teacher suggestions, and lists of audio, visual, and audiovisual aids and selected critical articles. Survey results from 106 teachers in 43 high schools and from the English teachers and students in the school teaching the novels show that at least 32 of the 48 novels are considered valuable and represent a solid, representative group. The group is conspicuous by the almost total absence of English novels. The survey results also include teachers' judgments concerning the reading and interest levels of the 48 novels; their value for high school students; the weaknesses, strengths, and scope of the list; and suggestions of novels which should be added or excluded. Curricular Deliberation about "Hamlet": An Exercise in the Practical.

Pub Date 75

Note—50p.; Ph.D. Dissertation, The University of Chicago

Available from—The University of Chicago Photoduplication Dept., 5801 S. Ellis Ave., Chicago, Illinois 60637 (Write for price)

**Document Not Available from EDRS**

Descriptors—\*Curriculum Development, \*Curriculum Planning, Doctoral Theses, \*English Curriculum, English Instruction, Literary Analysis, \*Literary Criticism, \*Literature Appreciation, Secondary Education, Teaching Methods  
Identifiers—\*Hamlet

This study attempts to clarify and exploit Joseph Schwab's recent and current work on "practical" and "eclectic" curriculums in a simulated deliberation about a concrete curricular question, How might "Hamlet" be taught to one group of high school juniors? By exemplifying curricular deliberation, it aims to clarify Schwab's doctrine and to make it accessible to a wider audience. Schwab argues that four commonplace-subject matter, student, teacher, milieu—ought to be examined and exploited in curriculum construction. Finally, the dissertation moves to produce four defensible "Hamlet" curriculums. (Author/RB)

Descriptors—\*Bilingualism, Doctoral Theses, Educational Policy, Elementary Secondary Education, English (Second Language), \*English Instruction, \*History, \*Language Instruction, Language Research, Language Usage, Tagalog

Identifiers—\*Philippines, Pilipino

This study examines those factors that have contributed to the introduction and development of the teaching of English in the Philippine educational system. By virtue of its educational policy, the American colonial administration started using it as a medium of instruction. Optimism ran high among Filipino leaders, especially the nationalists, that someday English would be the common language. But doubts about achieving the goal were raised in the first extensive educational survey in 1925. A shift in language policy began to appear in 1934 and by 1946 Tagalog was viewed as the basis for a common language. The school system was headed for bilingualism with the adoption of a language policy in the late 1950's. Under attack in the Constitutional Convention in 1971 and by pro-English elements, Filipino survived as an official language. The new Society under President Ferdinand Marcos has emphasized the need for bilingualism. This study shows that the teaching of English in the Philippines has been intertwined with the political, economic, educational, and cultural life of the country. (Author/RB)

Teaching Strategies for Enabling Elementary Pupils to Develop Inductively the Literary Concepts of Plot, Theme, Characterization, and Setting.

Pub Date 75

Note—204p.; Ed.D. Dissertation, Memphis State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-26,039, Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

Descriptors—Behavioral Objectives, Characterization (Literature), Child Development, \*Children's Literature, Doctoral Theses, \*Educational Strategies, Elementary Education, \*Inductive Methods, \*Literary Analysis, \*Literary Conventions, Motifs

The purpose of this study was to develop teaching strategies that are designed to enable elementary pupils to form literary concepts through inductive processes. This research has four phases in its design. In the planning phase, a theoretical base for designing the strategies is developed from a synthesis of four areas of research and theory: concept formation and levels of questioning; child development and its implications for the development of teaching strategies; advantages and limitations of behaviorally stated objectives; and the literary concepts of plot, theme, characterization, and setting. The three other phases are the construction of teaching strategies consistent with the planning rationale, applications of each strategy to literary models on the two levels of maturity and scholastic aptitude, and evaluation of a sample of the strategies and applications by a jury of experts in the field of children's literature. It was concluded that strategies constructed according to this design may be used to enable pupils to develop literary concepts, a strategy developed according to this design may be applied to books of any developmental or scholastic level, and behaviorally stated objectives may be formulated for competencies prerequisite for forming a literary concept. A Correlational Study of Wisconsin State Senators: Their Role in the Communication Process.

Pub Date 75

Note—26p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (Ottawa, Canada, August 1975)

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Communication (Thought Transfer), Government (Administrative Body),

Higher Education, Mass Media, \*News Reporting, \*Political Issues, Press Opinion, \*Public Opinion, State Surveys

Identifiers—\*State Senators, Wisconsin

The main objective of this constituency study was to determine the level of awareness and corresponding opinions of constituents with regard to three issues. Thirty-three Wisconsin state senators served as subjects along with 1,650 Wisconsin citizens who were interviewed via telephone regarding their views. The political public relations environment in a rural setting is one of high surveillance. Rural senators become quite accurate in their assessment of the voting public, and opinion agreement seems to become a precondition to reelection. Urban senators, on the other hand, do not display the same sensitivity to constituents. They come into office about as discrepant from the views of their constituents as are new rural senators, and they seem to stay that way. The results of this study are presented in both narrative and table format. (RB)

**Using the Aftton Scale of Acceptable Written Expression to Decrease Disparity in Teachers Assigning a Level to Pupils' Written Expression.**

Pub Date 74

Note—218p.; Ph.D. Dissertation, Saint Louis University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-26,315, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Composition (Literary), Doctoral Theses, Educational Research, Elementary Education, \*Evaluation Methods, Language Skills, \*Measurement Instruments, \*Test Validity, \*Writing Skills, Written Language

Identifiers—\*Aftton Scale

The problem of this study was to find criteria, and a model, for judging written expression at the elementary level which can produce concordance of teacher judgments and be a possible basis for prescriptive teaching. Such a model was developed by the Aftton School District. This study attempts to determine its utility. Twenty-four essays were randomly chosen from levels 4, 5, and 6 and rated by 20 teachers. It was hypothesized that there would be little concordance in the ratings by teachers using no criteria, more concordance using the "Aftton Scale," and still more concordance when the "Scale" and the orientation manual of the "Scale" were used. All three hypotheses were rejected. It was concluded that the "Aftton Scale" is useful if reduction of disparity is not the main objective. The "Aftton Scale" would also be useful in teacher training, instructing students in what must be taught at each level, and what would be acceptable from the good pupil. (Author/RB)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Fantasy, \*Futures (of Society), Literary Criticism, \*Literary Genres, Literary Perspective, Literature, \*Science Fiction

This booklet discusses the development of science fiction, tracing its origins to the time of the industrial revolution. Many of the people of this time realized that life was changing and would continue to change, that there were new forces at work in the world, and that humankind should exercise some forethought about the direction in which change was going. Mary Shelley's "Frankenstein" is often thought of as the first science fiction novel. Other writers discussed include Edgar Allan Poe, Nathaniel Hawthorne, Fitz-James O'Brien, Jules Verne, and H.G. Wells. In 1926, Hugo Gernsback founded the first science fiction magazine, called "Amazing Stories." The state of science fiction today is also discussed, as well as science fiction and the movies, the possibilities of science fiction, the readers of science fiction, and the different perspectives of science fiction. **Stylistics and the Teaching of Literature.**

Pub Date 75

Note—126p.

Available from—Longman Group Limited, 5 Bentinck St., London, W1M 5RN, England (\$5.75 paper)

Document Not Available from EDRS

Descriptors—Communication (Thought Transfer), Higher Education, Language, \*Linguistics, \*Literary Analysis, \*Literary Criticism, Literature, \*Teaching Methods

Identifiers—\*Stylistic Analysis

The primary purpose of this book is to present a discussion of a stylistic analysis approach to the study of literature and a demonstration of its possible relevance to the teaching of literature. Stylistics is defined as the study of literary discourse from a linguistics orientation and is distinguished from literary criticism and linguistics in that it links the two and has no autonomous domain of its own. The topics discussed include: literature as text, literature as discourse, the nature of literary communication, literature as subject and discipline, exercises in literary understanding, and stylistic analysis and literary appreciation. It is concluded that stylistic analysis is valuable because it can help readers relate a piece of literary writing to their own experience of language and consequently extend that experience. (TS)

**The Social Effects of Advertising as Perceived by Advertising Executives, Businessmen, and the General Public.**

Spons Agency—Georgia Univ., Athens. Office of General Research.

Pub Date 74

Note—77p.

EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage

Descriptors—\*Authoritarianism, \*Business, Higher Education, Mass Media, Media Research, Personality, \*Publicize, \*Social Attitudes, Social Behavior, \*Social Factors

This study attempts to compare the perceptions and self-reported behavior of high, middle, and low authoritarian advertising executives, business executives, and members of the general public concerning the social effects of advertising. For the advertising sample, a total of 393 men and women were selected according to their executive positions in advertising agencies in Atlanta. The questionnaires used for this study and the methods of statistical analysis are described. The findings of the study are examined in terms of the three groups of subjects in four ways: perception of advertising social effects, perceived advertiser behavior, advertising executive self-reported behavior, and biodata differences by area of specialty subgroups. The analysis of the data is described and among the conclusions were that business executives are most critical of advertising's social effects as well as advertiser behavior; and advertising executives, business executives, and the general public express a great deal of awareness concerning the potential negative social effects that advertising can precipitate. The appendix includes 15 mean score comparisons as well as copies of the questionnaires. (TS)

**The Impact of Mass Media.**

Pub Date 75

Note—179p.

Available from—Hayden Book Company, Inc., 50 Essex St., Rochelle Park, New Jersey 07662 (\$4.75 paper, \$7.99 cloth)

Document Not Available from EDRS

Descriptors—Educational Resources, Higher Education, \*Mass Media, Newspapers, News Reporting, Periodicals, \*Political Influences, Propaganda, Publicize, Radio, \*Social Influences, \*Socioeconomic Influences, Television, Textbooks

In order to bring the student's contemporary environment into the classroom for study and to avoid topicality, this book provides general principles by which to evaluate current media offerings, outlines the patterns from which media materials are cut for public consumption, and focuses the student's attention on the mass media themselves. Each of the chapters (except the first

and fourth) contains suggestions for teachers to use in advance preparation. Chapter topics are: growing up with the media, influences of mass media, the impact of advertising, the format of contemporary media, pattern setting in print media, pattern setting in electronic media, and publicity and propaganda in the media. Also included are a brief section on producing a multimedia report, lists of trade magazines and professional journals and of teaching resources, an article about accuracy in the media reprinted from the "Congressional Record," and a selected bibliography. Hey, Mom, Who Put the Television in the Closet?

Pub Date 75

Note—18p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (65th, San Diego, California, November 26-29, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Behavior Problems, \*Children, Elementary Education, \*Environmental Influences, Programming (Broadcast), \*Publicize, \*Television, \*Television Commercials, Viewing Time  
Results of the staggering number of hours which children spend watching television (an average of 54 hours a week for a preschooler, who will have accumulated a total of 5000 hours by first grade) may be seen in the influence children—swayed by commercials—have over their mothers' grocery choices and in the dramatic increase of both wild behavior and extreme passivity of school children. During the Saturday morning hours of tawdry animated cartoons, children are bombarded with frequent interruptions for commercials advertising artificially flavored and colored snacks, candy, cereals, soft drinks, and flashy toys. (Only three countries in the world allow any advertising with children's programs and only the United States allows more advertising with children's programs than with adult programs.) Furthermore, children—even very young ones—spend the bulk of their viewing time watching adult programs, most of which feature violence, crime, mystery, and brutality. There are a number of effective steps which schools, teachers, and parents may and must take to reduce children's viewing time and to promote critical and selective viewing among children. (JM)

Case for an Emphasis in Business Communications: Findings from Profile/75.

Pub Date 17 Aug 75

Note—21p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (Ottawa, Canada, August 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Business Communication, \*Employment Opportunities, Higher Education, Industrial Relations, Job Market, Job Training, \*Journalism, \*Occupational Surveys  
Business communications, a career field tangential to that of journalism, was shown in a major research survey during 1975 to be an attractive, alternative profession for journalism majors. A questionnaire mailed to the membership of the International Association of Business Communicators contained 261 items, including demographics; questions on salaries, promotions, staff size, job satisfaction, and the types of media the communicators help produce; a section on concern about the national economic situation: items on media use; and a section on career preparedness. Resulting data show that journalism schools provide the necessary training for their graduates to excel in business communications, that the field of business communications offers attractive salaries over a wide range of industry types, and that its practitioners are generally well satisfied and secure in their jobs. Nine tables of findings are included. (JM)

A Codification of Principles of Advising Secondary School Student Publications.

Pub Date Aug 75

Note—18p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (Ottawa, Canada, August 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Faculty Advisors, \*Guidelines, Journalism, Publications, School Publications, Secondary Education, \*Student Publications

In order to provide secondary school publications advisors with a succinct, single source of guidelines for effective advising, a statement of principles was prepared and submitted to an expert jury. This jury agreed with the statement but offered suggestions for revision and reorganization. Items in the statement are organized in one group of journalistic skills and one group of educational principles necessary for effective advising. Another component of written material, concerning characteristics of effective publications, was also prepared for advisors and approved by the same jury. Future action should include dissemination of such statements to secondary school administrators. (Appended to this paper are the statements of principles of advising secondary school student publications and lists of the values of such publications and of the characteristics of effective secondary school student publication.) Immediate Versus Delayed Reward in Newspaper Reading.

Pub Date 69

Note—11p.

Journal Cit—Acta Sociologica; v12 n4 1969 (Reprint)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Behavioral Science Research, Higher Education, Journalism, Media Research, News Media, \*Newspapers, \*News Reporting, \*Positive Reinforcement, \*Reading Habits  
Identifiers—Himmelstrand (Ulf)

The objective of the present study was to explore whether the concepts of immediate and delayed reward have any relevance to the content of the newspaper. In his theory of instrumental and expressive activities, Himmelstrand suggests that instrumental activities tend to have a cumulative structure while expressive activities will have a differential structure. The results presented here support Himmelstrand's hypothesis, but further studies into the motivational basis of the use of mass media are needed before we can be sure about the instrumental nature of the reading of delayed reward news. Four Institutional Views of Advertising—Perspectives for Understanding. Advertising Working Paper Number 1.

Illinois Univ., Urbana. Coll. of Communications.

Pub Date Mar 75

Note—34p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Business Education, Communications, Distributive Education, Educational Objectives, Higher Education, \*Institutional Role, \*Marketing, Merchandise Information, \*Publicize

Identifiers—Carey (James), Norris (Vincent), Potter (David), Sandage (C H)

In this paper, the first in a series of working papers on various significant aspects of advertising, the author examines in depth the writings of four essayists who have looked at advertising from the institutional viewpoint. James Carey sees advertising's basic institutional function as market information and the secondary function as social control; Vincent Norris views the institution's function as being an instrument of attempted market control for producers. David Potter sees the institution as an instrument of social control in an abundant society; and to C. H. Sandage, the institution's purpose is to inform and persuade people in order to help achieve abundance. (JM)

Media, \*Research, Research Criteria, Social Influences

The contents of this book focus on various aspects of studies in communications, examining relevant criteria for their disciplined study, evaluating present research and criticism, and suggesting future directions of inquiry in the field of communications. Part one concerns the technology, viewpoints, and categories of communications; part two discusses the cultural, critical, and analytical approaches to the press, cinema, and broadcasting; part three focuses on the societal controls on communications—industries, legalities, and audiences; and part four suggests some ways in which a cross-discipline of communications studies may best be constructed. Lists of recommended readings and notes are included for each chapter, and an index is provided. (JM)

Deception in Advertising: A Receiver Oriented Approach to Understanding.

Pub Date 75

Note—21p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 3, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Communication (Thought Transfer), \*Definitions, Government Role, Higher Education, Literature Reviews, \*Measurement Instruments, \*Models, Persuasive Discourse, Propaganda, \*Publicize, Research Methodology  
Identifiers—\*Deception

The purpose of this paper is to examine deception in advertising from a behavioral perspective, and to attempt to formulate a definition that can guide both research and governmental regulation. Whether or not an advertisement is said to be "deceptive" depends on the definition of deception being used. The position advocated here is that the focus of any definition must be the receiver of the message. Based on the analysis of veridical preception, a definition of deception in advertising is offered. An approach to measuring deception is also offered. The techniques are all seen as screening techniques, although by their regular use, advertisers should improve the ability of their advertisements to reach their stated objectives as well as reduce the amount of deception. Generating Literary Appreciation (Among High School and College Students). Report 1.

Wisconsin Univ., Milwaukee. Coll. of Letters and Sciences.

Pub Date 14 Jul 70

Note—29p.

EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.

Descriptors—Creativity, Educational Interest, Higher Education, \*Literature Appreciation, \*Motivation, \*Reading Interests, Relevance (Education), Secondary Education, Seminars, Summer Institutes

The seminar summarized in this report was held at the University of Wisconsin (Milwaukee) in July 1970 as part of the summer program of the Center for Twentieth Century Studies. Moderator for the seminar, for which the general topic was the appreciation of literature as one of the arts, was Robert F. Roeming, director of the Center. Each of the four participants presented a different approach to the discussion: Herbert Kubly discussed ways in which the aspects of creativity can contribute to literature appreciation; Haskell M. Block stressed the importance of actively relating literature to the student's experience; Julius Weinberg dealt with the relevance of the study of literature; and Leslie F. Cross commented on maintaining a clientele for contemporary authors. A question and answer session, with remarks from the audience, conclude the report. (JM)

Descriptors—\*Creative Writing, English Instruction, Ethnic Studies, Higher Education, \*Language, Literature, \*Poetry, \*Poets, Secondary Education

This booklet contains the proceedings of a seminar in which poets demonstrated through readings and analysis of their works how poetry, combining appeals to both reason and emotion, can develop and refine individual awareness of the world and nature around us. The primary participants in the program were Bruce Cutler, Dolores Kendrick, and May Miller Sullivan. These poets attempted to demonstrate through their readings ethnic distinctions and qualities which can be introduced into the classroom through poetry. The second section of the booklet contains questions and comments from the audience as well as the poets' responses. And in the third section, several poems by Dolores Kendrick are printed. (TS)

Descriptors—Composition (Literary), \*Composition Skills (Literary), Descriptive Writing, \*English Instruction, Essays, \*Expository Writing, Learning Laboratories, Paragraph Composition, \*Remedial Instruction, Secondary Education

Reading students whose reading skills are being improved need to learn expository writing in order to be able to organize and express thoughts on paper. This document presents a systematic approach for teaching writing as part of the total communication process and consists of five units. "The Expository Paragraph," designed for use in

a skills laboratory, includes an outline, supplementary material, and exercises. "The Interior Development of the Paragraph" may be used in the English classroom or the skills laboratory and does not rely on any audiovisual aids. "The Expository Essay," for use in the junior year of English, is self-paced, based on personal experience rather than on literature, and uses no audiovisual materials. "Structure of Expository Composition" diagrams the relationship and similarities between the paragraph and the essay, and "Composition Materials" lists materials appropriate to particular skills which are available in the skills lab of the author. **Descriptors**—Anthologies, Censorship, Communication (Thought Transfer), \*Communication Problems, Films, Freedom of Speech, Higher Education, Instructional Materials, \*Mass Media, \*Newspapers, Publicize, Radio, Secondary Education, Sex Stereotypes, \*Television

The primary purpose of this book is to help the public become more aware and critical in their selection and appraisal of the media. Part 1 consists of a single essay by Theodore Peterson that gives a historical perspective on the development of the mass media in the United States. Part 2 deals with the print and electronic media: magazines, photo essays, newspapers, books, television, radio, popular music, and film. Part 3 examines the media from the point of view of their major roles as informers, entertainers, and persuaders. Part 4 treats the broader implications of the media and their impact on our society as well as the possibilities for the future. Most of the articles and illustrations reprinted in this edition were published in the 1970s. They present a variety of viewpoints on the mass media by such writers as Michael Arlen, Jack Anderson, Nicholas Johnson, Stanley Kauffmann, Richard Reeves, and Alvin Toffler. Among the new topics considered in this edition are media freedom and accessibility, sexism in the media, and sportscasting. Each section ends with questions designed to stimulate discussion or to serve as topics for composition. (TS)

Pub Date 75

Note—19p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (65th, San Diego, November 27-29, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Abstract Reasoning, Cognitive Development, Higher Education, Literary Criticism, \*Literary Influences, \*Literature Appreciation, Logical Thinking, \*Moral Values, \*Personal Values, Student Reaction, Thought Processes, Values

In reviewing the ancient, well-worn debate on the relationship between literature and values, it may be seen that the current pedagogical theory of developing response to literature is parallel to the argument for helping students articulate their own values. Two approaches to clarifying values are the values clarification approach (Louis Rath, Merrill Harmon, and Sidney Simon) and the moral development approach (Lawrence Kohlberg). The goal of values clarification activities, in which students choose among options on rating scales, values continuums, value statements, etc., is to help students become aware of their own values. Kohlberg's approach, based on a theory of logical and cognitive development, defines six stages of moral reasoning as bases for student development from one stage to a higher one. Both of these approaches suggest a number of ways for helping students gain an awareness of their own values and of the processes of moral reasoning in responding to literature. (JM)

**Identifiers**—\*Picture Books

This dissertation explored the extent and kind of sex-role stereotyping in popular, prestigious, and sex-role defining children's picture books printed between 1959 and 1972. The sample consisted of two categories of popular children's picture books, best-selling golden books and "New York Times" children's best-sellers, one category of Caldecott award winners, sex-role picture books, and women's liberation children's books. The basic instrument used in this dissertation was a checklist of 33 research-based male and female sex-role standards. The ratios of male and female characters to male and female stereotypes were compared. It was found that there was a male majority of total characters in all standard and sex-role definition books throughout the period under study; from 1959 to 1972 female stereo-

types were disproportionately in excess of female characters in sex-role definition books and in all standard books with the exception of Caldecott award winners; in the pre-women's liberation period male and female frequent stereotypes were equally distributed in both standard and sex-role definition books, but in the post-women's liberation period these frequent stereotypes became overwhelmingly female in all but women's liberation books. **A Study of Relationships between Goals for the Teaching of Literature and Teachers' Attitudes towards the Major Categories of Written Student Responses to Literature.**

Pub Date 75

Note—179p.; Ph.D. Dissertation, The Florida State University

Available from—University Microfilms, P. O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-2667, Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors**—Bias, Doctoral Theses, Educational Objectives, English Instruction, \*Literary Analysis, \*Literature, \*Literature Appreciation, Secondary Education, \*Teacher Attitudes, \*Teacher Response

**Identifiers**—\*Literature Interpretation

This study investigated certain characteristics of the attitudes of classroom teachers of English toward written student response to literature. Specifically, the study attempted to determine the preference or lack of preference for categories of student response to literature, using four categories: engagement-involvement, perception, interpretation, and evaluation. The preferences were assessed for secondary English teachers in general, for teachers in groups (age, teaching experience, educational background, stated goals for literature instruction), and for individual teachers. A survey questionnaire was developed to provide the basis for identifying the preferences of teachers toward the four categories. From the findings of this investigation, it appears that there are statistically significant patterns of response preferences evidenced by English teachers, both individually and collectively. Teachers in general consistently ranked interpretation as the most preferred response, and evaluation as the least preferred response. (TS)

**The Relative Effectiveness of the Classroom Discussion Approach and the Tutorial Approach to Literature for the Development of Adolescent Ego Identity.**

Pub Date 75

Note—297p.; Ph.D. Dissertation, Fordham University

Available from—University Microfilms, P. O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-4190, Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors**—\*Bibliotherapy, \*Discussion (Teaching Technique), Doctoral Theses, English Instruction, Group Reading, \*Individual Instruction, Literature, \*Reading Achievement, Reading Instruction, Secondary Education, \*Self Concept

The major purpose of this study was to ascertain the relative effectiveness of the classroom discussion approach and the tutorial approach in using literature for the development of ego identity among adolescents of high, average, and low reading achievement levels. The sample consisted of 184 ninth and tenth grade students enrolled in a northern New Jersey secondary school. The instrument selected as the pretreatment and post-treatment measure was the High School Form of the Index of Adjustment and Values, which yielded a self-identity score. The investigator divided the classes into high, average, and low reading achievement levels. One class from each reading achievement level was randomly selected for assignment to the classroom discussion approach or the control group. Ten students at each reading achievement level were randomly assigned to the tutorial approach. Teachers were instructed in the methods of approach. Some of the findings were: (1) for the components of self-identity and self-acceptance, the discussion group scored significantly higher than the other groups, while the tutorial group was higher than the control group; (2) for the components of self-identity

and self-acceptance, the high reading achievement level group scored significantly higher than the others. (Author/MKM)

**Language Functions Exploration of First Grade Students as Observed in Informal Classroom Environments.**

Pub Date 75

Note—309p.; Ph.D. Dissertation, The Ohio State University

Available from—University Microfilms, P. O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-3526, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Child Language, \*Classroom Environment, Classroom Games, Classroom Research, Doctoral Theses, Grade 1, \*Language Research, \*Language Usage, Learning Activities, Primary Education, Teacher Behavior, \*Teacher Role

The variety of language produced in school was examined with regard to the functions for which children use language and to elements of the context, emphasizing activities in which children engage and the expectations held by teachers and children. Language data was gathered from twelve children who wore a concealed, wireless recorder and were observed as they carried on activities in natural settings. Children and teachers were later interviewed. Tapes were transcribed and analyzed using a category system developed from Halliday's seven categories for functions of language: instrumental, regulatory, interactional, personal, imaginative, and heuristic. Levels were defined within the informative and heuristic categories. Language was examined in six different work situations and in peer and teacher/child interactions. Analysis of the data suggested that the informal classroom offers potential for the development of a comprehensive range of language functions and that a key to reaching this potential is the teacher's role. **"General Systems Theory," "Modern Organizational Theory," and Organizational Communication.**

Pub Date Oct 73

Note—16p.; Paper prepared for a course in Speech Communication, SUNY at Buffalo, October 1973

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Organizational Climate, \*Organizational Communication, Organizational Effectiveness, \*Organizational Theories, \*Systems Approach, \*Systems Concepts

In "modern organizational theory" communication is the focal point for the application of systems analysis to the functioning of an organization. "Systems" have been defined as interacting elements. If the elements interacting are entirely internal, the system is closed; while if the interaction is among internal and external elements, the system is open. Since scholars investigate the behaviors—and their consequences—of the communicative processes within an organization, the use of the open systems approach for this investigation permits more accurate examination of the information diffusion which coordinates, controls, and evaluates the activities of persons within an organization. **Communication in Educational Environments: A Basic Course.**

Pub Date 75

Note—44p.; Paper presented at the Annual Meeting of the Speech Communication Association (61st, Houston, Texas, December 27-30, 1975)

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Communication (Thought Transfer), Communication Skills, Course Content, \*Course Descriptions, Higher Education, Interaction, Preservice Education, \*Social Relations, \*Speech Education, \*Teaching Guides

Identifiers—\*Speech Communication

This teaching guide is designed to prepare prospective teachers to assume the communication tasks demanded by today's interactive educational environments. This guide is designed to be both theoretical and pragmatic, attempting to

provide prospective teachers with the underlying rationale for the use of certain communication strategies and the practical, experiential use of those strategies. The course method and content are directed toward the special communication needs of the prospective teacher of any discipline. Students have an opportunity to develop an understanding of communication concepts applicable to the classroom as well as communication skills useful to them as persons working in other aspects of the educational environment. Course content is developed through readings, lectures, discussions, structured experiences, and student presentations. (RB)

**An Empirical Investigation of a Belief Comparison Change Model.**

Pub Date 75

Note—56p.; Paper presented at the Annual Meeting of the Speech Communication Association (61st, Houston, Texas, December 27-30, 1975)

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—Attitudes, Behavioral Science Research, \*Beliefs, \*Communication (Thought Transfer), Higher Education, \*Models, \*Persuasive Discourse, Research Methodology, \*Social Attitudes

An important area for communication researchers has been the relationship between persuasive messages and their impact on attitudes, beliefs, and behavior. A model is presented to clarify the relationship between persuasive messages and attitudes. In an effort to establish the validity of the model, six hypotheses are set forth concerning the relationship in question. Three of the six hypotheses derived from the model are confirmed, providing some support for the research utility of the model. It is concluded that the model has some utility and accuracy, but more research is needed. The nature of the direction the research should take is outlined. (The results of this study are presented in table, graph, and narrative format.) (RB)

**A Model of the Selective Exposure Phenomenon.**

Pub Date 75

Note—35p.; Paper presented at the Annual Meeting of the Speech Communication Association (61st, Houston, Texas, December 27-30, 1975)

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Behavioral Science Research, \*Communication (Thought Transfer), \*Conceptual Schemes, Higher Education, \*Information Seeking, Information Sources, Literature Reviews, \*Models, \*Predictor Variables, Theories

Identifiers—\*Selective Exposure Phenomenon

This paper reviews the literature concerning a conceptual model that specifies the antecedent variables that produce selective exposure and the mediating variables that justify why a person selectively exposes himself or herself to information. Two advantages accrue from the model described in the literature. First, the model enhances the development of a theory for predicting accurately the existence of selective exposure. Second, the model increases the ability to control the selective exposure phenomenon. The author concludes by saying that this model is still in the preliminary stage of development and may undergo further alterations. (RB)

**Verbal Behavior and Politics.**

Pub Date 76

Note—361p.

Available from—University of Illinois Press, 54 East Gregory, Champaign, Illinois 61820 (\$12.95 cloth)

Document Not Available from EDRS

Descriptors—\*Behavior, \*Communication (Thought Transfer), Oral Communication, Persuasive Discourse, Political Attitudes, Political Influences, Political Socialization, \*Politics, \*Research, \*Verbal Communication

This book illustrates how and why knowledge of verbal behavior is important to an understanding of politics by analyzing and describing verbal behavior studies pertaining to politics. Chapters in the first part of the book discuss the various characteristics of verbal behavior: the importance of verbal behavior in politics, construction of

political messages, functions and effects of verbal behavior, inferences drawn from verbal behavior, and analysis and measurement of verbal behavior. Chapters in part 2 analyze behavior in selected political settings, each chosen because of its intrinsic political importance and because it illustrates a different facet of verbal behavior (e.g., political elites, public assemblies, and small bargaining groups). A bibliographical essay provides a brief guide to the sources likely to prove the most helpful to a reader delving more deeply into various aspects of verbal behavior in political contexts. Author and subject indexes are included. (JM)

**Children and Communication: Verbal and Non-verbal Language Development.**

Pub Date 76

Note—316p.

Available from—Prentice-Hall, Inc., Englewood Cliffs, New Jersey 07632 (\$9.95 cloth)

Document Not Available from EDRS

Descriptors—\*Child Language, \*Communication (Thought Transfer), Elementary Education, Instructional Materials, \*Language Development, \*Language Usage, Nonverbal Communication, Oral Communication, \*Teaching Models

This book takes a broad look at children learning to communicate with words, sentences, body language, and touch. It shows how children learn to communicate effectively in everyday situations by selecting the most appropriate communication strategies—the verbal and nonverbal language which they feel are best suited to the situation. Part 1 examines the forces that affect the development of children as communicators. Part 2 probes children's progress with words, sentences, and meanings. Part 3 explores the nonverbal language children use. Part 4 offers a model of communication instruction that includes activities, materials, and ideas for the classroom. (RB)

315: Another Dimension of "Equality."  
Pub Date 75

Note—15p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (November 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Broadcast Television, \*Freedom of Speech, Higher Education, \*Mass Media, \*Political Influences, \*Political Issues, Politics, Speech

Identifiers—Communications Act 1934, \*Equal Time, First Amendment

This paper discusses the equal time law: Section 315 of the Communications Act of 1934. Section 315 is the major legislation governing the use of the broadcasting media in the area of politics. The underlying philosophy of the law is that people have a right to a full and complete disclosure of conflicting views of news of interest. The essence of the law is that if a broadcaster allows one candidate for public office the use of broadcast facilities, an equal opportunity to all other candidates for the same office must be afforded. Many of the problems with this law are discussed including the fact that stations are not required to provide any air time at all for candidates running for public office, sometimes there are a large number of candidates running for a particular office, and the incumbent usually has an advantage over the challenger due to news coverage of both political and nonpolitical activities while the incumbent is in office. A case study of the Humphrey-McGovern debates during the California Presidential Primary in 1972 is presented and discussed. The results and conclusions of the study and recommendations based on the conclusions are presented. (TS)

Descriptors—Behavioral Objectives, \*Communication (Thought Transfer), \*Educational Games, Educational Strategies, Game Theory, Higher Education, \*Language Arts, \*Teaching Techniques, Theater Arts

The game design procedure outlined in this article assures the designer of an educational game which will help students to learn the material stated in the game's objectives and will provide the teacher with a means of testing the student's ability to meet those objectives. Steps involved in the design are: determining the behavioral objective or objectives of the game, developing a pretest and posttest, making a rough outline of the game content, selecting game format ideas, writing instructions for playing the game, testing the game in an informal situation, and constructing the final form of the game. A great variety of game types may be designed using this technique, and games may be designed for behavioral objectives which have many broad purposes relating to teaching communication, theatre, and the language arts. Instructional discussion is a classroom teaching method by which students move through material to a predetermined, new understanding by building on each other's contributions and by utilizing the more experienced learner's (the teacher's) past experiences with the material. This article describes both the characteristics and the planning of instructional discussion, outlines seven levels of questions which can generate productive interaction (memory, translation, interpretation, application, analysis, synthesis, and evaluation), and provides a pattern which may be followed by teachers first attempting to use this strategy. Costumes for Nursery Tale Characters.  
Pub Date Feb 76

Note—87p.

Available from—Plays, Inc., Publishers, 8 Arlington Street, Boston, Massachusetts 02116 (\$8.95 cloth)

Document Not Available from EDRS

Descriptors—\*Characterization (Literature), Childrens Books, \*Childrens Literature, \*Clothing Design, Fiction, \*Patternmaking

Identifiers—\*Nursery Tales

In this book, the author illustrates and describes ways to make a variety of costumes and accessories with a minimum of sewing for children from about five to twelve years old. The instructions for most of the costumes shown in this book are based on a simple one piece tunic pattern which has only two seams and which may be made to fit all sizes and styles by altering necklines and sleeves and by varying lengths. Although the theme of the book is nursery tale dress, the patterns and ideas should enable readers to create other costumes. Full instructions are given for Robin Hood, Friar Tuck, Little Miss Muffet, Cinderella, the Fairy Godmother, Hot Cross Buns, Little Red Riding Hood, the Wolf, the Queen and Knave of Hearts, the Frog Prince and the Princess, Wee Willie Winkle, Goldilocks and Baby Bear, Little Bo-Peep, Aladdin, Mary Mary Quite Contrary, and Puss in Boots. Suggestions are also given for dressing other nursery tale characters by varying and interchanging parts of the costumes in the book. (JM)

A Viewer Survey of the Expanded WBGU-TV Audience, Bowling Green, Ohio.

Corporation for Public Broadcasting, Washington, D.C.

Report No—CPB/OCR-309

Pub Date Aug 74

Note—59p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—\*Audiences, Behavior Patterns, \*Community Surveys, Higher Education, Programming (Broadcast), Public Opinion, \*Public Television, Television Research, \*Television Viewing, Viewing Time

Identifiers—Ohio (Bowling Green), \*WBGU

Contained in this report are the results of a telephone survey conducted among 961 households in the television market for Bowling Green, Ohio. The purpose of the survey was to determine the characteristics of the viewing audience for WBGU. WBGU—owned by Bowling Green State University—became the public television station for a 19-county area in northwest Ohio in March 1973. The survey indicates that WBGU-TV attracted one out of ten households throughout the expanded viewing area after its power was expanded. In those areas reached by WBGU-TV before its power was increased, more than 15 percent of the households were weekly viewers. The audience expanded despite lack of familiarity with the station in previously unreached areas, UHF channel location, and reception problems related to incorrect antenna orientation. (The results of this survey are presented in both narrative and table format.) (RB)

Report No—CPB/OCR-406

Pub Date 74

Note—45p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Audiences, \*Behavior Patterns, \*Community Surveys, \*Educational Television, Higher Education, Programming (Broadcast), Public Opinion, \*Public Television, Television Research, \*Television Viewing, Viewing Time

Identifiers—California (San Diego), \*KTEH

This study examines the characteristics of the KTEH viewing community. KTEH is an educational television station serving the San Diego area. Eleven paid interviewers dialed 1582 telephone numbers selected randomly from the telephone books for metropolitan San Diego to obtain the data. It was concluded that the relatively low public awareness of KTEH's existence is a factor against which future growth can be measured. The low ratings of high-school sports and local meetings may not rule out the utility of such programs in an area where other stations are providing a great variety of program content. The strong indication that people want more educational material, plus coverage of state government in action, suggest the potentially important role for the station. (The results of this survey are presented in both narrative and table format.) (RB)

Descriptors—\*Audiences, Behavior Patterns, \*Broadcast Television, \*Commercial Television, \*Community Surveys, Higher Education, Programming (Broadcast), Public Opinion, Television Research, \*Television Viewing, Viewing Time

Identifiers—California (Sacramento), \*KVIE

Contained in this report are the results of a telephone survey conducted in February 1974 among households in the metropolitan television market for Sacramento-Stockton, California. During evening hours, paid interviewers dialed 1775 telephone numbers selected randomly from telephone books. The purpose of the survey was to determine the nature of the Sacramento television market and the role of station KVIE. It was concluded that KVIE could increase its membership by increasing its use of air-time for membership appeals. An appropriate and realistic goal (assuming no increase in audience size) might be 20,000 total members in the next few years. The station has a high awareness level and a good image within the area surveyed, except perhaps in Stockton. KVIE has a solid base for growth and support, and also has large untapped potential. (The results of the study are presented in both narrative and table format.) (RB)

Comparative Strategies of the Black and "Chicano" Movements in Achieving Economic and Social Justice.

Pub Date 76

Note—31p.; Paper presented at the Annual Meeting of the World Population Society Western Region (Long Beach, California, January 1976)

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Changing Attitudes, \*Civil Rights, Economic Status, Equal Opportunities (Jobs), Higher Education, \*Justice, \*Mexican Americans, \*Minority Groups, \*Negroes, Social Development, Social Values, Sociocultural Patterns

Identifiers—Black Movement, Chicano Movement

Frequently references to spokesmen and issues of the Chicano movement for social and economic equality refer to prior experiences of the black American mass social movement. Through examining both mass social movements, it becomes obvious that exact comparisons are misleading. Numerous similarities in economic, social, and political suppression and exploitation have been experienced by both movements; but significant differences between the two movements make such comparisons inaccurate and misleading. First, linguistic and cultural differences are pronounced; second, different attitudes exist toward family structure and responsibilities; third, differences in attitudes of society in general have resulted largely from the historical distinction between a "conquered" people and a "captured" or "kidnapped" people. Effects of these differences justify unique remedies rather than merely adapting those techniques used to resolve black American needs as solutions to resolve Chicano economic and social needs. Language Strategies in Media Content Directed to Urban Black Primary Children: A Content Analysis of Selected Books, Films and Television.

Pub Date 74

Note—283p.; Ph.D. Dissertation, Case Western Reserve University

Available from—University Microfilms, P. O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-5051, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Childrens Books, \*Content Analysis, Doctoral Theses, Elementary Education, Fiction, Films, \*Language, Language Research, \*Mass Media, Media Research, \*Negro Dialects, \*Negro Stereotypes, Primary Education, Television

The purpose of this study was to ascertain the awareness and application of Black English features by writers and producers of materials for young children which represent black characters in a fictive setting. The study was limited to materials which were available to inner city children in Cleveland, Ohio, through libraries. Fifty-three fiction books, eleven films and/or sound filmstrips, and selected episodes from four television programs were examined for the presence of specified contextual elements which would affect the language strategy and structure used by the characters. Each of the media was also examined for the application of certain phonological, grammatical and lexical features of Black English. Some of the conclusions reached were that through contextual elements, books reveal a similarity in setting, family composition, number of children, sex of the main character and socio-economic level; while films present a generalized portrait of the urban setting, they do not give more than minimum contextual details; and television programs showing black characters tend to portray stereotypes. A Study of the Relationship between Values and Listening Comprehension.

Pub Date 75

Note—95p.; Ph.D. Dissertation, Purdue University

Available from—University Microfilms, P. O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 76-575, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—College Students, Doctoral Theses, Higher Education, \*Language Research, \*Listening Comprehension, \*Values

This study was designed to examine the relationship between values and listening comprehension. Subjects were 146 freshman and sophomore

basic speech students at Eastern Michigan University during the 1971 summer session. The listening sub-test of the Sequential Tests of Educational Progress (STEP) and the Allport, Vernon, and Lindzey Study of Values were administered to all of the subjects. No significant differences in listening comprehension of groups of subjects with different values were discovered. The results also indicated that the scores on the sub-tests of the Study of Values are not a good predictor of listening comprehension behavior as measured with the STEP Test. Finally, the fifteen subjects with the highest and lowest score in the economic and religious value categories were tested to determine if those who had listened to a message which was congruent with their salient value category would have a significantly higher mean score on a listening comprehension test over this message than the three other groups. No such significantly higher score was found. (Author/MKM)

**A Procedure for Developing an Articulated Educational Program for a Middle School or Junior High School.**

Pub Date 75

Note—100p.; Submitted in partial fulfillment of the requirements for Doctor of Education, Nova University

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors—\*Articulation (Program), \*Change Strategies, Educational Improvement, Elementary Secondary Education, Experimental Programs, \*Middle Schools, \*Program Descriptions, \*Program Development, Tables (Data)

Identifiers—Pennsylvania (Philadelphia)

The purpose of this practicum was to develop and implement an articulated educational program for an urban middle school. In his discussion, the author identifies a number of programs that contribute to poor articulation and suggests activities that can overcome these problems. Heart of the practicum was an effort to improve articulation between one middle school and the four elementary schools and four secondary schools attended by most of its entering and graduating students. All the schools were located in Administrative District 1 of the Philadelphia School District. Data measuring the effects of the articulation project were generated through the use of surveys, student questionnaires, and official school records. The data presented suggest that a program similar to the one described in this report can effectively reduce articulation problems in an urban middle school. (JG)

**The Concept of Control Related to Decisions Under Appointed and Elected School Boards.**

Pub Date [75]

Note—15p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Board of Education Policy, \*Boards of Education, Community Control, \*Decision Making, Educational Policy, Elementary Secondary Education, Governance, Policy Formation, \*Political Influences, Politics, School Community Relationship

This study examined a school district before and after its school board changed from appointed status to elected status to determine if there were significant differences in the board's handling of constituent demands. School board minutes were examined and demands were analyzed for a six-month period under the appointed school board, then compared to demands for six months under the elected school board. Results of the analysis showed significant differences in the control functions of the appointed and elected school boards in 6 of 15 demand areas. Of these, the elected school board was more responsive in the three areas of new teaching methods, student behavior, and community services. There were distinct differences in the control functions performed by the appointed and elected boards. However, only demands for new teaching methods were both quantitatively and qualitatively different under the elected board. There was strong evidence that the school board does exert political control in processing its decisions. This seems to disagree with some earlier studies, but the earlier studies concentrated only on money demands. By broadening the spec-

trum of demands analyzed, the present study found significant differences in political control functions that earlier studies had missed. (Author/JG)

Descriptors—\*Educational Finance, Elementary Secondary Education, Equalization Aid, Finance Reform, Fiscal Capacity, \*Foundation Programs, Management Systems, School District Spending, \*School Taxes, \*State Aid, \*Statistical Data, Tables (Data)

Identifiers—Educational Overburden, \*Minnesota

This report consists mainly of four separate issue papers, each prepared by an individual committee of the Minnesota School Task Force. Topics of the papers include educational management systems, Minnesota's state foundation aid program, school tax levy limitations, and educational overburden. In addition to the issue papers, the report also contains some additional comments and dissenting remarks prepared by individual members of the task force. Each issue paper contains a study summary, the committee's recommendations for action, and a discussion of the problem areas. The foundation aid and levy limitation papers each have an appendix of relevant statistical data. Each of the issue papers is organized so that the casual reader can get the gist of the paper by reading the first few pages of it. (Author/JG)

Identifiers—PERT, PREM, \*Preparing Regular Educators for Mainstreaming, Program Evaluation and Review Technique

This publication describes the Program Evaluation and Review Technique (PERT) network for the Preparing Regular Educators for Mainstreaming (PREM) project. PREM is a competency-guided program being developed at the University of Texas at Austin to prepare educators to meet the needs of exceptional children in the regular classroom. PERT is an administrative device for the improvement of the planning, controlling, and decision-making activities experienced in project development. This publication presents the PERT network developed for use in the three-year PREM project. Estimated expenditures of time for various activities and planned completion dates for different events are outlined. In an attempt to channel resources for the most effective utilization of time and energy, the critical path for the completion of the activities is provided. Also included are flow charts illustrating both intracluster and intercluster functioning. (Author/JG)

Descriptors—Administrative Personnel, Administrator Evaluation, Administrator Qualifications, \*Administrator Selection, \*Board of Education Role, \*Chief Administrators, Elementary Secondary Education, Guidelines, Job Applicants, \*Private Schools, \*Trustees

This publication is intended primarily to guide private school trustees in the task of finding, selecting, and hiring a new headmaster or superintendent for their school. However, part of the content is aimed at prospective candidates for such jobs, so the booklet has some value for them, as well. The booklet is organized in two major sections. Section 1 is addressed to the board of trustees and offers specific suggestions on how to recruit and evaluate applicants for the headmaster position. Section 2 is addressed to candidates for the job of headmaster and discusses various points they should consider in deciding whether to pursue or accept such a job. The appendix presents actual examples of various documents, letters, and descriptions that illustrate key steps in the hiring of a private school headmaster. (JG)

Descriptors—\*Computer Oriented Programs, Elementary Secondary Education, Facility Inventory, Flow Charts, \*Management Systems, Program Descriptions, \*Property Accounting, \*Recordkeeping, \*Records (Forms), Systems Development

This publication presents performance flow charts and other accompanying forms that are elements of an economical computerized continuing inventory system. The system described here is intended to serve school systems as an adequate fixed asset system and to provide a computerized inventory model that offers support for costs of future educational program designs and contributes to budget preparation by school systems. The inventory design consists of two subsystems, one for fixed assets and one for materials and supplies. The sample forms presented are applicable to both of these subsystems and include inventory reports, burglary/vandalism/loss reports, maintenance of inventory records, new acquisition/file update records, equipment checkout forms, forms for permanent transfer or disposal of fixed assets or supplies, and forms for making miscellaneous record changes. In addition, group and item classifications are explained along with a plan for numbering inventory items, and an explanation of how to develop a catalog of item labels with identifying numbers is provided. A sample computer printout is also included. (Author/JG)

**On Alternatives to Busing.**

Pub Date Dec 75

Note—11p.; Speech given at the National Conference on Alternatives to Busing (1st, Louisville, Kentucky, December 5-6, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Bus Transportation, Civil Rights, Elementary Secondary Education, Integration Methods, \*Racial Integration, \*School Integration, \*Social Change, \*Sociocultural Patterns, Voluntary Integration

According to the author, people who favor compulsory assignment of children to schools on the basis of race base their position on the assumptions that Americans will make no progress toward an integrated society except under compulsion, and that the proof of an integrated society is the even distribution of minorities throughout society. In this paper, the author offers arguments and statistics to refute these two assumptions. He presents demographic evidence of a recent trend toward greater racial equality and asserts that this trend makes radical solutions like compulsory busing unnecessary. And the fact that members of many racial and ethnic groups tend to cluster together voluntarily, he argues, shows the folly of striving for the equal distribution of minority groups throughout our society. **Systems Theory and Education's Goals.**

Pub Date Jan 75

Note—6p.; Paper presented to Society for General Systems Research (New York City, January 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Conceptual Schemes, \*Educational Administration, \*Educational Objectives, Educational Theories, Management Systems, \*Program Planning, \*Systems Approach, \*Systems Concepts

Identifiers—\*General Systems Theory

Education is criticized both for failure to accomplish its objectives and for the inappropriateness of those objectives. Perhaps there is a need for an educational system that is not directed toward specific, predetermined goals. It seems that educators have adapted the engineering and management applications of general systems theory. Instead of extending systems theory to education, educators have adapted and adopted other field's applications. Almost all these borrowed applications are linear program models capable of attaining one specific product. The a priori establishment of relatively fixed objectives is characteristic of most "systems" instruction, but useful goal statements are hard to come by in education. A possible alternative is to adapt general systems theory itself, rather than its applications. Both summative and formative feedback may be used to refine and redefine goals, rather than to simply accept or reject the entire engineered system, as is often done now. Instead of trying to agree on where education should be pointing learners, educators can agree on mechanisms for making all decisions within the operating system. (Author/JG)

**Compulsory Racial Balance in the Schools.**

Pub Date 5 Dec 75

Note—16p.; Speech given at the National Conference on Alternatives to Busing (1st, Louisville, Kentucky, December 5-6, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Bus Transportation, Civil Rights, Elementary Secondary Education, Integration Methods, \*Racial Integration, Racially Balanced Schools, \*Residential Patterns, \*School Integration, Social Change, \*Voluntary Integration

In this paper, the author analyzes what has happened since 1954 in the area of school integration and suggests what he feels are appropriate policies for the future. He identifies two major changes that have affected school integration since 1954—a change in residential patterns that has increased segregation in recent years, and a change in the idea of what constitutes desegregation. The courts have changed the "rules of the game," he argues, by confusing the essentially different goals of eradicating legally sanctioned segregation and overcoming the educational handicaps of blacks that have resulted from official and unofficial discrimination. The author asserts that, because of white flight to the suburbs, efforts to achieve compulsory racial balance in the schools will succeed only where there is sufficient community support for the idea. A more realistic alternative, he suggests, is to attack the effects of residential discrimination by adopting a voluntary "integrating transfer" plan that permits children to attend any school in their metropolitan area, so long as they transfer to a school with a smaller proportion of persons from their race. Descriptors—Administrator Attitudes, Educational Finance, Elementary Secondary Education, \*Federal Aid, \*Federal Programs, Literature Reviews, \*National Surveys, Questionnaires, \*School Districts, \*Tables (Data)

This booklet examines the impact of federal funding on small school districts in the United States and is intended to provide information that will be useful to local school districts as well as to the state and federal agencies responsible for allocating federal funds. Much of the data for the study was gathered through a survey question-

naire that was distributed to all public school districts with enrollments of 5,000 or less that also hold membership in the Association of School Business Officials. Chapter 1 briefly discusses the background, purpose, and design of the study; chapter 2 describes in detail the research design and methodology; chapter 3 reviews and examines relevant literature on the development and role of federal aid to education; chapter 4 presents and interprets findings of the study; and chapter 5 presents the authors' conclusions and recommendations based on review of the literature and analysis of responses to the survey questionnaire. Pub Date 75

Note—207p.

Available from—Parker Publishing Company, Inc., West Nyack, New York 10994 (\$14.95)

**Document Not Available from EDRS**

Descriptors—\*Administrator Guides, Administrator Role, \*Construction Costs, Construction Programs, \*Educational Facilities, Educational Finance, Elementary Secondary Education, \*Facility Planning, School Buildings, \*School Construction, School Improvement, School Maintenance

This book discusses each of the specific phases of a school building program from recognition of the need to build through the occupancy and maintenance of the building. The presentations offer practical examples in the areas of preplanning, development of educational and architectural specifications, selling and financing school buildings, constructing and equipping facilities, and school maintenance. Throughout the book, realistic, simplified approaches to problem-solving are presented, and the advantages and disadvantages of alternative solutions are discussed. Individual chapters focus in turn on developing educational specifications, financing and selling the need for educational facilities, remodeling and renovating old buildings, designating major responsibilities and architectural specifications, evaluating methods and materials for constructing new facilities, dealing with the various trades and specialties involved in a school construction or remodeling project, and maintaining educational facilities. This publication is part 1 of a three-part report of the 1975-76 Educational Research Service National Survey of Salaries and Wages in Public Schools. This volume reports 1975-76 school data on salaries scheduled by public school systems for 22 selected professional positions. Included are salary data for central office administrators such as superintendents, associate superintendents, and subject-matter supervisors, as well as similar data for professional staff assigned to individual schools, including classroom teachers, principals, and librarians. The survey collected data on salaries scheduled and salaries paid for 22 selected professional positions and 10 selected support positions in public school systems throughout the United States. The sample for the survey was randomly selected from all public school systems enrolling 300 or more pupils. The 742 responding school systems reported data covering approximately one-third of all public school employees. Salary data in each volume are presented and

analyzed according to four categories of school system enrollment, four levels of per-pupil expenditure, eight geographic regions, and for each individual school system arranged alphabetically by state. (Author/JG)

This publication is part 3 of a three-part report of the 1975-76 Educational Research Service National Survey of Salaries and Wages in Public Schools. This volume reports 1975-76 school year data on salaries or annual earnings for five selected clerical positions, as well as hourly wage rates of instructional teacher aides, noninstructional teacher aides, building custodians, cafeteria workers, and bus drivers. The survey collected data on salaries scheduled and salaries paid for 22 selected professional positions and 10 selected support positions in public school systems throughout the United States. The sample for the survey was randomly selected from all public school systems enrolling 300 or more pupils. The 742 responding school systems reported data covering approximately one-third of all public school employees. Salary data in each volume are presented and analyzed according to four categories of school system enrollment, four levels of per-pupil expenditure, eight geographic regions, and for each individual school system arranged alphabetically by state. **Compulsory Schooling: The Legal Issue.**

Pub Date [75]

Note—9p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Attendance, Delinquents, Elementary Secondary Education, \*School Attendance Legislation, School Law, Schools, \*Truancy

An examination of the school laws in the 50 states reveals that 47 have penalties that can result in forced incarceration for young people who do not attend school. In a five-year period, 341 young persons were committed to Maryland juvenile institutions for the crime of truancy. During the same time, 2,699 young people were committed to institutions because they were considered to be "Children in Need of Supervision" (CINS), which includes truants, runaways, and children deemed to be ungovernable. It is reasonable to assume that some of the people who were committed for being runaways and ungovernable have had problems with truancy. Thirty-four percent of all Maryland delinquents committed were in the CINS category. If students were not compelled to attend school, the monetary savings from truant officers and their staffs, vandalism, and incarceration of young people would be more than enough to achieve the American dream of free public education for all of our people. Further, there would be more money for compensatory and specialized educational programs that are often prohibitively expensive with the present law. (Author/RT)

Identifiers—\*California

Chapter 966, Statutes of 1970, authorized the Superintendent of Public Instruction to exempt no more than five school districts from existing statutory provisions establishing minimum class-size standards and reporting requirements. The purpose of the exemption was to enable selected districts to establish pilot programs using differentiated staffing patterns without loss of state funds. The five districts selected to begin the program in the 1971-72 school year were Cupertino Elementary, Fresno Unified, Newport-Mesa Unified, Ocean View Elementary, and San Jose Unified. San Jose requested to be dropped from the program in 1973 and was replaced by Monrovia Unified. Each district has submitted a report listing its objectives, describing its program and activities, and summarizing its results. Summary descriptions are presented in Appendix A of this report. Four basic objectives have been common to all five districts—to reduce the pupil-adult ratio by increasing the number of adults in the classroom, to individualize instruction to meet the unique educational needs of each child, to increase community involvement in the schools, and to increase the reading and mathematics achievement of students in participating schools. All five districts reported successful programs. (Author/IRT)

Descriptors—Building Materials, Child Development, \*Community Involvement, \*Construction (Process), Construction Needs, Environmental Education, \*Facility Guidelines, Financial Support, Found Spaces, Play, \*Playground Activities, \*Playgrounds, Safety, Site Development  
A discussion of the reasons for communities to work together in planning and building a

playground opens this resource guide. Following are practical considerations involving dealing with bureaucracies, acquiring playground space, raising funds, locating materials, and beginning construction. In the nuts-and-bolts sections of the book the options are identified: the type of frames and their uses, ways to organize whole structures, how to use tools safely, and how to help people work efficiently. Ways are shown to provide for the three principal types of play: active, climbing, and quiet play. Sample forms for materials, contract considerations, basic needs, and material-ordering are included. The final chapter offers some specific examples to enhance children's environments in ways other than playgrounds, along with suggestions for providing play experiences for children with special needs. Drawings and photographs of existing playgrounds accompany the text. A bibliography is also included. (Author/MLF)

**Identifiers**—\*Oregon (Eugene)

In the spring of 1975 the Eugene (Oregon) school board appointed a task force to make a comprehensive study related to all aspects of possible closure of small schools. Consideration was given to population and enrollment trends; economics; building condition; school size; school design; neighborhood and community implications; program capacity; staffing; alternatives in personnel, support programs, and facilities; and criteria for evaluation of low enrollment schools. Among the group's recommendations were that no elementary school be closed at the time; that the school board set a standard for the amount of non-classroom-space necessary for effective operation of an elementary school; that alternative use of extra space in any of the 31 elementary schools be actively sought; that whenever enrollment at any school drops below 75 percent of program capacity, a committee determine the best use of all parts of that school; that alternative use for buildings be found before any schools are closed; that small neighborhood schools accessible on foot be maintained even at some additional costs, and that when new schools are constructed, buildings be designed for an enrollment of 200 to 350 students. **Identifiers**—Australia

The comments contained in this paper are excerpts from intensive interviews with 27 teachers in open area primary schools, asking their recommendations for architectural changes in future open area schools and in traditional type schools to accommodate open education techniques. They were also asked, "Would you like to see this school more open or less open?" The respondents are not represented as a typical group of teachers, but were chosen for their extreme attitudes for and against teaching in open area schools. All respondents were teaching in western Australian open area schools of a post-1968 design. The appendix contains floor plans and text describing school design developments in the region to 1972. This book is a compilation of papers prepared for a 1975 conference on the delivery of special education services. Because conference participants were from states where problems of distance and low population density complicate the delivery of special education programs, a multifaceted approach was used to address these two critical problems. The 11 individual articles that compose the book focus on the future trends and current difficulties educators must face in developing programs for handicapped children. The articles include "Economic Outlook for Human Service Delivery in Rural America," "A Statewide Plan for Special Education," "Problems and Issues in a Rural Cooperative," "The Southwest Regional Educational Service Agency for Mainstreaming Handicapped Children," "Implementing Early Education Programs for Handicapped Children," "A Look at Regional Centers Serving Handicapped Children," "ESEA Title III and Its Implications for Service Handicapped Students," "A Model for Training Leadership Persons in Rural and Sparsely Populated Areas," "Trends in School Finance and Budgeting," "Personnel Management in Rural/Sparsely Populated Areas," and "Evaluating Need for Special Education Service in Sparsely Populated Areas." **Descriptors**—\*Administrator Role, \*Board of Education Role, Boards of Education, Educational Planning, Elementary Secondary Education, \*Guidelines, Industrial Relations, \*Labor Problems, State Legislation, Teacher Employment, \*Teacher Strikes

**Identifiers**—\*Ohio

This manual is intended to aid school board members in developing an organizational structure within the school district management team that will facilitate efficient and effective response to teacher strikes. In addition to discussing the development of an appropriate organizational structure, the manual also provides tactical advice, presents checklists of important planning questions, and lists sources of additional assistance for school board members faced with the possibility of a teacher strike. Rather than presenting a complete strike plan, it attempts to guide board members and administrators in formulating their own strike plan appropriate to the particular needs of their district. Although the manual was prepared specifically for school boards in the state of Ohio, most of its content will be equally useful to board members in other states as well. (JC)

**Descriptors**—\*Educational Experience, \*Educational Objectives, Educational Quality, Educational Research, Elementary Secondary Education, Guidance, Guidance Counseling, Guidance Services, \*Individual Development, \*Individual Needs, Self Actualization

The objective of this survey study was to find some tentative answers to the question of how well educational programs are meeting the needs of students. The study design included several unique features intended to increase both the validity and the practical applicability of the results. The first feature was to establish an empirical framework for evaluation of the effectiveness of an individual's educational experience. The framework included the formulation of a set of categories that include all aspects of activities and experiences that define the quality of life in America. The second was to utilize the participants in the Project TALENT national survey to provide a longitudinal perspective on the individuals studied. The third was to select a nationally representative sample of persons who were 15 years old in 1960. The fourth was the adoption of these 30-year-olds' quality of life and their performance in present roles as the criteria against which to evaluate the effectiveness of their educational experiences. The last was using the individual as the unit of analysis. The five defined problem areas were vocational guidance, quality of teaching, individualization of instruction, the curriculum, and personal support and counseling. Extensive appendices are included. This report sets forth the Office of Education's activities for 1974. The first two chapters contain the mandated assessment of the condition of edu-

cation in the nation and a brief statement of basic program objectives. The next three chapters describe programs administered by the Office of Education under the headings of equal opportunity for education, educational quality, and other programs. The remaining sections describe the Office of Education's management and nonprogram activities, as well as the advisory councils and committees, and present selected education statistics. Allocations to the states are listed under broad categories. The appendixes itemize the allocations to states and list the functions, meeting dates, and membership of advisory councils and committees. Tables and figures supplement the text. (MLF)

**Descriptors**—Administrator Attitudes, Corporal Punishment, Discipline, Discipline Policy, \*Discipline Problems, \*School Surveys, \*Secondary Education, State Surveys, \*Student Behavior, \*Tables (Data)

**Identifiers**—\*Georgia

This paper compares data collected in a 1974 survey of discipline problems in Georgia secondary schools with data from a similar survey conducted by the same investigators in 1961. The 1961 survey examined 20 types of student misbehavior that had been identified in earlier studies; the 1974 survey included those 20 plus 13 additional items. The revised survey questionnaire was sent to the principals of 341 Georgia secondary schools during the spring of 1974, and a total of 266 (78 percent) responded. This compared to an 81 percent response rate in 1961. Although there were some definite differences between data from the two surveys, the most common types of student misbehavior in 1961 were also the most common in 1974. Included in the paper are a number of data tables that summarize responses to both surveys and facilitate comparisons between them. (JG)

**A Taxonomy of Administrative Absenteeism.**

Pub Date [76]

Note—7p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Administrative Personnel, \*Behavior Theories, \*Conceptual Schemes, Educational Administration, \*Leadership, Leadership Qualities, \*Leadership Styles

Hiring an administrator with those tangible elements listed in a job description does not ensure that the chosen individual will be an effective administrator. Too often the key element of "administrative presence" is missing. An "administratively present" leader is able to conceptualize within his system, interact with the human elements of the system, and actualize his concepts in such a way that the human elements understand and support the actualization. The important opposite of administrative presence is "administrative absenteeism." Three types of administrative absenteeism are commonly observed in educational systems. Physical absenteeism entails the physical absence of the leader from his assigned leadership role. Psychological absenteeism often involves a leader who adheres rigidly to an absolute set of beliefs, and is further manifested by a gap between what the leader believes and what his staff believes. Philosophical absenteeism manifests itself in deep-seated philosophical differences between the leader's belief system and the belief system of some or all of the other individuals composing the educational team. **But How Do You Know Their Opinions Count: The Influence of Knowledge About Community Opinions on School Board Opinions.**

Pub Date Jan 76

Note—4p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Board of Education Policy, \*Boards of Education, \*Changing Attitudes, Community Attitudes, \*Community Surveys, \*Educational Attitudes, Elementary Secondary Education, Questionnaires, School Community Relationship, Tables (Data)

**Identifiers**—\*Massachusetts

In June 1975, a rural Massachusetts school board developed a comprehensive six-page questionnaire and mailed it to all community residents 17 years of age and older. The questionnaire solicited demographic data, as well as respondents' opinions on a wide range of school-related topics. Besides being administered to the community, the questionnaire was twice administered to the school board—once before the community survey and once after the board was aware of the community's responses. Comparison of individual board member's responses on the first and second administration showed that their opinions did change considerably; of these changes, 56 percent were made so as to align with major community opinions. Comparison of the opinions of the total school board showed that the board moved from 78 percent agreement with community opinion in the first administration to 85 percent agreement in the second administration. **Identifiers**—Delaware (Wilmington)

This paper starts from the assumption that the typical grading systems used by most American secondary schools need overhauling and discusses the implementation of an alternative student evaluation system that is individualized, noncompetitive, and nonpunitive. Most of the paper describes a performance-based, criterion-referenced student evaluation system developed at Concord High School in Wilmington, Delaware. The Concord system employs formative evaluation, which results in interim progress reports of a student's work in each subject area, and summative evaluation, which summarizes a student's work for an entire course and evaluates his level of achievement. Both the formative and summative evaluations evaluate students on an individual, noncompetitive basis, without using traditional grades, grade point averages, or class rankings. Samples of both the formative and summative evaluation report forms developed at Concord are included. The author emphasizes the importance of contacting college admissions officers before implementing an alternative student evaluation system; he reports that 90 percent of the colleges surveyed indicated their acceptance of the new Concord system. **Descriptors**—Academic Achievement, Elementary Secondary Education, Human Relations Programs, \*Instructional Innovation, Open Education, \*Open Plan Schools, Perception, \*School Environment, School Size, \*Teacher Administrator Relationship, \*Teacher Attitudes, Team Teaching

A teacher self-report instrument, the Learning Climate Inventory (LCI), was used to gather teacher perceptions about their administrators, peers, and teaching job. An observational checklist was used on the same large sample. Data were gathered from 700 classrooms and 867 teachers in 30 schools in Tulsa and Oklahoma City, Oklahoma, and Fort Worth, Texas. The researcher's goal was to find the relationship between the spatial characteristics of public school classrooms and alternative modes of teaching and the staff's perceptions of the learning climate. The findings reveal that alternative teaching modes do increase in more open-spaced classrooms. Also, teachers tend to view open-space, high-achieving, smaller schools with ongoing human relations programs for staff as more open. (Author/MLF)

The methodological difficulty of evaluating alternative programs in specific, measurable terms is described. Based on an alternative program at Talawanda High School in Oxford, Ohio, the writer attempted to develop a model for evaluating an alternative program. The following evaluation procedures were selected: (1) attendance and grades prior to and during the two semesters of the project year; (2) two sets of pretest and posttest questionnaires administered to 25 students in the primary population and parents; (3) four sets of open-ended questionnaires filled out by students, parents, community agencies, and teacher advisors at the end of the project year; (4) nine-week anecdotal reports by the students; and (5) spot-check interviews with students, parents, community agencies, and teacher advisors throughout the project. **Automated Retrieval of ERIC Materials: Implications for Canadian Educators.**

Pub Date Jun 74

Note—16p.; Paper presented at the Annual Meeting of the Canadian Society for the Study of Education (Toronto, Ontario, June 6-8, 1974)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Bilingualism, \*Data Bases, Educational Research, \*Information Processing, \*Information Retrieval, \*Information Systems

**Identifiers**—\*Canada

The disadvantages for Canadians using the ERIC system are (1) fledgling Canadian computer information systems are deprived of their financial support; (2) Canadian research included in ERIC can not necessarily be retrieved by country of origin; (3) of the 200 journals indexed in Canadian Education Index (CEI), only 26 are to found among the 600 in ERIC's Current Index for Journals in Education (CIJE); and (4) policies regarding the inclusion, exclusion, and manner of indexing documents are beyond Canadian control. Solutions to some of these problems include (1) more systematic and exclusive utilization of the ERIC system, (2) creation of a Canadian "clearinghouse" indexing all Canadian documents for ERIC, and (3) creation of a bilingual Canadian data collection and index-

ing system. Considering the complexity of the situation involved in creating an all-Canadian system, interim dependence is deemed necessary for one to three years on the ERIC data base searched via an existing U.S. online retrieval system. (MLF)

**An Autocatalytic Model for the Diffusion of Educational Innovations.**

Pub Date Jan 76

Note—54p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—\*Adoption (Ideas), \*Diffusion, Educational Change, \*Educational Innovation, Graphs, Information Dissemination, Literature Reviews, \*Models, \*Prediction, Tables (Data) Identifiers—\*Autocatalytic Diffusion Model

This paper reviews a number of past studies in the field of diffusion research, describing the major features of each diffusion model and discussing its value for predicting the spread of educational innovations. Following this review, the author presents a new autocatalytic diffusion model based on the mathematical models of epidemiologists and chemists. This autocatalytic model is adapted to the study of educational innovations, and then the model is applied to historical data and used to predict the life cycle of six different educational innovations. The predicted life cycles matched the actual historical data very well in five of the six cases. The author also uses the model to project the future adoption life cycle of the semester system in Ontario secondary schools, an innovation that is still in the process of adoption. (JG)

Pub Date Jan 76

Note—37p.; Paper prepared as part of a research project, entitled, "Configurations of Change: Institution Building as Focus"

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Change Strategies, Conceptual Schemes, \*Innovation, \*Institutional Role, \*Models, \*Organizational Change, Organizational Effectiveness, \*Organizational Theories Identifiers—\*Esman Model, Institution Building

The definitional and conceptual structure of the Esman model of institution building is described in great detail, emphasizing its philosophic and process assumptions and its latent dynamics. The author systematically critiques the Esman model in terms of its (1) specificity to the universe of institution building, (2) generalizability across societies and cultures, (3) ability to discriminate between varied institution building situations and tasks, (4) utility for strategizing and engineering, (5) ability to focus not only on the client system but also on the nature and structure of the system of advice, (6) ability to include dual focus on internal organizational design and external institutional interfaces, (7) mobility in shifting analysis between molecular and molar configurations, and (8) utility for explanation and operationalization. The author concludes that although the Esman model has made a valuable contribution to the study of institution building in the past, the time is ripe for a new conceptual leap in the field. **Evaluation of the Relationship Between School Size and School Costs.**

Irvine Unified School District, Calif.

Pub Date Mar 75

Note—20p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Average Daily Enrollment, \*Cost Effectiveness, Educational Administration, \*Educational Finance, Elementary Secondary Education, Expenditure Per Student, School District Spending, \*School Size, \*Student Costs, \*Tables (Data)

Identifiers—California (Irvine)

This publication analyzes the relationship between school size and per-pupil school costs,

based on estimated 1974-75 financial data for the Irvine Unified School District in California. Table 1 presents current operating and maintenance costs for 1974-75 at existing elementary, middle, and high schools in the district. Tables 2, 3, and 4 project cost data for three different sizes of elementary, middle, and high schools respectively, based on cost factors identical to those used in the actual 1974-75 district budget. Table 5 projects detailed operating and maintenance costs for three hypothetical schools that use an alternative staffing model designed to reduce administrative costs. Cost data are presented for a 450-student elementary school, 600-student middle school, and 1,000-student high school. (JG)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Capital Outlay (for Fixed Assets), Cost Effectiveness, Educational Finance, Equal Education, Equipment, \*Full State Funding, \*Purchasing, \*School Accounting, State Aid, \*State School District Relationship, Vocational Education

This paper is a discussion of alternative state approaches to aiding and costing capital outlay programs, particularly equipment purchases for vocational programs. Equipment costs for vocational programs tend to be a larger proportion of the total costs than in other programs. The paper includes a discussion of such topics as the magnitude of capital outlay expenditures, current state practices, theoretical and practical aspects of alternative state funding approaches, and, in particular, a discussion of the effects of including equipment depreciation costs in program cost differentials. **Collective Negotiations and Teachers' Salaries: Some Evidence from Wisconsin.**

Pub Date [75]

Note—13p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Collective Bargaining, Collective Negotiation, Correlation, Elementary Secondary Education, Multiple Regression Analysis, \*Socioeconomic Influences, \*State Surveys, \*Statistical Surveys, Tables (Data), \*Teacher Salaries

Identifiers—\*Wisconsin

This study investigated the relationship between collective negotiations and teacher salaries in Wisconsin public school districts. Data were collected from a random sample of 324 Wisconsin school districts with professional staffs ranging from 30 to 500 members. A six-indicator index was developed to measure the comprehensiveness of collective negotiations in each district. This negotiations index and 11 other determinant variables were studied in relation to 10 different measures of teacher salaries. Stepwise multiple regression analysis found negative correlations between the collective negotiations index and all levels of scheduled and actual teacher salaries. The authors concluded that collective negotiations do not have a significant positive effect on teacher salaries in Wisconsin and that a negative effect is likely. In addition, they found that socioeconomic conditions in a school district, especially level of personal income and percentage of urban population, have the strongest positive impact on teacher salaries. **Reform, Revise or Rebuild: The 3R's Relating School Budget to District and School Objectives.**

Pub Date Dec 75

Note—4p.;

Paper presented at the California School Boards Association/Association of California School Administrators Conference (December 12-14, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Budgeting, Educational Administration, Educational Needs, \*Educational Objectives, \*Educational Planning, Educational Programs, Elementary Secondary Education, Management by Objectives, \*Needs Assessment

In order to relate the school budget to district and school goals and objectives, a process must be established that will provide an orderly approach for the school and community to follow. First, a thorough needs assessment should be made of the school and community. From this assessment should follow a set of goals and needs that provide the broad guidelines for all school activities. To maintain individual school autonomy, each school should perform the goals and needs assessment. The needs assessment process should be tailored specifically for the needs and resources of the individual school and district. In order to carry out objectives and move towards established goals or needs, a set of programs will be necessary to link the school's activities to its goals, needs, and objectives. Finally, budget relates expenditures to the various programs. Cost accounting methods should be employed as necessary. Activities should be continually monitored to determine whether objectives are being met at the best cost-effective ratio. Goals, needs, objectives, programs, and budgets must be continually reviewed, because school needs will change. (Author/JG)

**Cost Accounting and Accountability: One Approach.**

Pub Date Jan 76

Note—23p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Accountability, Accounting, Cost Effectiveness, Elementary Secondary Education, \*Management Systems, \*Models, \*Program Descriptions, Records (Forms), \*School Accounting, Systems Approach, \*Systems Development

Identifiers—\*Daily Event Record

This paper outlines an approach designed to provide an accurate and efficient cost accounting system for use in schools and other social service organizations. In his discussion, the author presents a detailed step-by-step description of how to establish, plan, and operate the system. The basic element of the system is the Daily Event Record (DER), on which each staff member records how much time he devoted to different activities during the day. Appendix A contains a list of code numbers used on the DER to record different activities; Appendix B defines each of the activities represented by the code numbers; and Appendices C, D, E, and F present samples of the DER and other forms designed to consolidate and summarize data from a number of individual DERs. Identifiers—Canada, United States

Both English Canada and the United States are essentially liberal fragments of European society. But in Canada, liberalism must vie with touches of Toryism and socialism; as a result, the common good receives more formal attention than in the U.S. The extent of variation in local financial resources for education is potentially under the control of both state and provincial governments. However, in recent years, Canadian provinces have acted more decisively in educational finance than have American states. In Canada, equality means equality of condition; in the U.S., equality means equality of opportunity. The energy crisis and other global crises are forcing the U.S. and other liberal fragment societies to face the future they escaped when they split off from Europe. Reentry into the full political spectrum is likely to pose greater problems for the U.S. than for Canada, with its relatively wider political spectrum. The major hope in the U.S. lies in the continued redefinition of equality from equality of

opportunity to equality of condition. If this redefinition occurs, educational finance will probably be one of the first beneficiaries. (Author/JG)

Descriptors—Curriculum, \*Decision Making, Decision Making Skills, \*Educational Alternatives, Elementary Secondary Education, \*Open Education, Student Centered Curriculum, Student Needs, \*Student Role, \*Student School Relationship

Identifiers—\*Educational Choice

This paper examines the argument that increased freedom of choice for students will rid education of undesirable coercion, compulsion, and conformity. Throughout her discussion, the author emphasizes that merely allowing a child to choose does not guarantee his capacity to choose. The capacity to choose presupposes not only the existence of alternatives but the recognition of alternatives, the author argues, and a rational choice must be based on knowledge or belief about the consequences of the available options. Where these conditions are not met, decisions must be made arbitrarily; chance prevails rather than choice. Although permitting students to decide educational questions by chance may eliminate compulsion and coercion from education, conformity is likely to flourish. To eliminate conformity, educational decisions must truly be made by choice. And in order to accomplish this, the author asserts, institution of the right to choose must be accompanied by the capacity to choose. (JG)

**Power: The Anchor of Stability, the Lever of Change.** (Notes Towards a General Theory of Being and Society).

Pub Date Jul 75

Note—30p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Cultural Factors, Education, Individual Development, \*Individual Needs, Organizational Theories, \*Organizations (Groups), Political Power, \*Power Structure, \*Social Influences

This paper presents some initial work on a general theory of being and society, using power as the dynamic principle. Power is used to explain individual, group, and institutional behavior as well as the statics and dynamics of societies. The paper is addressed especially to educators because education is shown to be education in power. Distribution of educational goods in a society is a process of ascribing power to particular individuals, groups, communities, and classes. Significant educational change is a process of substituting old power arrangements with new ones, and educational policy-making is a development of statements by the elite in a society expressing intentions to direct and harness the power of education for particular outcomes. It is suggested that all individuals should develop their powers to the maximum, should learn to experience power without necessarily having to exercise it on others, and should exercise power with all moral compunctions. Descriptors—\*Architectural Barriers, \*Arts Centers, Civil Rights, Cultural Centers, \*Facility Case Studies, \*Facility Guidelines, \*Handicapped, Information Networks, Legislation,

Museums, Program Descriptions, Resource Centers

A handicapped person's choice of accessible arts activities is very limited. This report focuses on the people and places now developing facility, planning, and program solutions that enable the handicapped to participate in the arts to their fullest potential. The 131 stories about outstanding facilities and programs, current legislation, and technical and design consultants serve as a foundation on which other schools, art institutions, and community centers can build a humane, totally accessible environment for the arts. The appendixes contain resource material including partial lists of nature centers, trails, and fragrance gardens, and of agencies that are interested in removing architectural barriers to the handicapped and that have produced literature on the subject, and a selected bibliography on barrier-free design. Descriptors—\*Architectural Character, \*Building Conversion, Building Improvement, Cost Effectiveness, Cultural Centers, Federal Aid, Financial Support, Land Use, Preservation, Public Facilities, \*Rail Transportation, Resources, \*Shared Facilities

Identifiers—\*Railroad Stations

This second book furthers the advocacy position of its predecessor in putting old railroad stations to new uses for combined public and commercial purposes, including arts and educational centers, transportation hubs, and focal points for downtown renewal. Sixteen stations are described that have been converted by either nonprofit organizations, commercial developers, or in part by the federal government to be used for transportation centers. A large section of the book explains some of the intricacies of financing that should be understood by a nonprofit group before successfully developing a railroad station. The subjects include how to evaluate a project's economic feasibility, how to reduce the cost of both acquiring a property and operating it after conversion, how to determine the real cost of financing the project, and how to determine the marketability of the proposed conversion. Listed are 30 government agencies that can give financial help to commercial and nonprofit groups working to reuse stations. (Author/MLF)

**Five Ways to Save Money with Declining Enrollments.**

Pub Date [75]

Note—4p.; A related document is EA 007 889

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Administrator Guides, \*Cost Effectiveness, Decentralization, Elementary Secondary Education, \*Enrollment Projections, Enrollment Trends, Financial Policy, \*School Administration, Shared Facilities, Teacher Retirement

Identifiers—\*Declining Enrollments

Strategies are offered to assist school districts with declining enrollments in dealing with surplus space and restricted funds. Teachers can be hired on the basis of midyear projections; also some teachers can be employed on a one-semester basis. Considerable savings can be obtained by renting out surplus classrooms and office space to other governmental agencies and to private firms. Districts are advised to utilize each school as fully as possible and dispose of all empty buildings. Early retirement programs assist older teachers to have economic security, save the schools money, and release jobs for younger teachers. Savings can be effected by decentralizing budget accounts. The accounts establish limits for services and products, making the local school unit accountable. (Author/MLF)

Identifiers—\*Declining Enrollments

This paper examines the phenomenon of declining school enrollments from the viewpoint of the school district superintendent and discusses what steps the superintendent should take to cope with the problem. The author devotes much of his attention to the process of closing schools; he outlines specific strategies the board of education and superintendent can employ to help control community conflict, maintain the credibility of the board and district administration, and develop a community consensus. In addition, the author also points out the varied administrative ramifications of a school closure and offers a detailed outline of potential problems the superintendent must confront in order to successfully implement a school consolidation plan. Note—150p.

Available from—ETC Publications, 18512 Pierce Terrace, Homewood, Illinois 60430 (\$8.75)

**Document Not Available from EDRS**

Descriptors—\*Change Strategies, \*Educational Accountability, \*Educational Change, \*Educational Development, Elementary Secondary Education, Models, Organizational Change, \*Organizational Theories, Performance Based Education, Program Development, Program Effectiveness, Responsibility

The model proposed in this book specifies that there are four types of interrelated practices that determine the extent to which accountability is realized. These are (1) the identification of primary accountability agents and their respective program responsibilities, (2) the execution of internal program reviews by those program officers, (3) the completion of external program reviews by independent auditors including professionals and lay persons, and (4) the use of reviews to develop programs by introducing refinements and innovations. Each component of the model is described in detail and implications are drawn for both professional roles and organizational practices. The last chapter deals with procedures for implementing accountability systems in the local school setting. A bibliography is included and the appendix contains accountability checklists designed to provide information about the four components of the model. (Author/MLF)

Descriptors—\*Board of Education Policy, Boards of Education, \*Collective Bargaining, Collective Negotiation, \*Contracts, Curriculum, Elementary Secondary Education, Industrial Relations, Instruction, \*Occupational Surveys, Teacher Administrator Relationship, \*Teacher Attitudes

This report presents the findings of a study that examined how contracts between school districts and teacher organizations affect curriculum and instruction and how school board members and teacher leaders view the negotiation of curriculum and instruction matters. To gather data for the study, the authors first examined teacher contracts in 28 major school districts to see whether and to what extent they effect curriculum and instruction and then surveyed board members and teacher leaders in those districts about their views

concerning the negotiation of curriculum and instruction matters. Findings of the study show that although most of the contracts studied include provisions related to curriculum and instruction, many board members insist that they do not negotiate such matters. Board members also appear unclear as to whether curriculum and instruction matters are the responsibility of the board or the administration. Teacher leaders, however, unanimously feel that curriculum and instruction matters are important topics for contract negotiations. (JG)

Project AAMP: Administrator Abilities Matched to Problems.

Pub Date Aug 74

Note—14p.; Paper presented at the National Conference of Professors of Educational Administration (Marquette, Michigan, August 14-20, 1974)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—\*Computer Science, Educational Administration, Elementary Secondary Education, Information Processing, \*Management Information Systems, \*Management Systems, Models, \*Problem Solving, School Systems, \*Team Administration

The AAMP (administrative abilities matched to problems) system is simply one or more school administrator(s) designated by the school system's computer information system as having those abilities, preferences, and characteristics required to solve a particular system problem. An AAMP is formed on the basis of information provided concerning the characteristics of the problem in relation to the stored model of the school system and the stored information about each administrator. Once an AAMP is formed, the objective is to design a solution to the problem and to relate the solution to the existing school system. During the process of designing a solution, AAMP has available an information model of the school system as well as problem-related information from a variety of sources stored in or retrievable by the computer system. Effects of Humanism on Education and Educational Administration. Educational Research Report.

Andrews Univ., Berrien Springs, Mich. Dept. of Education.

Pub Date Jan 76

Note—57p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**  
Descriptors—Curriculum Development, \*Educational Administration, \*Educational History, \*Educational Philosophy, Educational Theories, \*Humanism, \*Humanistic Education, Humanization, Human Relations

This report summarizes the historical development of humanism from Petrarch and Boccaccio in the Renaissance to the present. The freedom of thought, self-expression, and creative activity that characterized the humanistic schools are considered to be the fundamental bases of education today. A brief description is given of brutalization and inhumaneness in education, typified at its worst by the English public schools of the 17th and 18th centuries. The concluding section of the work discusses the humanizing aspects of education as a greater personal concern for the student as an individual in his own right. To humanize educational administration, according to the authors, is to create a permissive atmosphere within which an individual can feel free to make his own unique contribution. (MLF)

Education is the crucial institution involved in sex-role socialization. The percentage of women in school administrative positions has declined. Schools have adopted modern corporation and military management models. Women unhappy about the status quo must learn about power, both theoretically and practically, in order to change their position in the world of education and find the tools for institutional change within the schools. Women can (1) collect the qualifications necessary to be a legitimate contender for a place in the school power hierarchy; (2) summarize the research negating that administration is a male job; and (3) if necessary file legal complaints. Women in administration can provide a much-needed service by becoming participant observers and compiling handbooks and case studies of real experiences with power structures and leadership styles. This booklet presents strategies for making changes in educational policy to eliminate sex discrimination against girls and women. The first step is to organize, or form a coalition of organizations that provides credibility and resources. Second, to establish the case, a number of practices are listed that evidence discrimination in the areas of curriculum materials, course offerings, guidance and counseling, athletics, teacher and staff behavior, pregnant students, and school staff. Third, procedures for filing complaints of legal noncompliance are outlined. The fourth strategy is a model of five important recommendations to be included in a letter to the chief state school officer. The final strategy involves focusing on local school superintendents and pressing for an affirmative action plan. The second part of the booklet is a brief description of affirmative action programs in Kalamazoo, Michigan, and, at the state level, in Pennsylvania. (MLF)

This open letter suggests significant changes in the educational structure that state legislators can effect so that women will not be excluded from decision-making posts. Statistics are cited that indicate that a decreasing percentage of women hold positions in educational administration. In higher education, women hold an increasing percentage of instructorships but a decreasing percentage of full professorships. Policy changes are outlined in the areas of certification, school personnel, funding, curriculum, inservice training, appointment of women to policy-making boards, and state registries of educational personnel. Descriptors—Court Litigation, \*Educational Finance, Elementary Secondary Education, \*Finance Reform, \*Property Taxes, State Aid, State Programs

More than twenty experts present their views on the strengths and weaknesses of the property tax system, while comparing it with other possible revenue sources. Together, they develop a comprehensive theory and philosophy of the use of the property tax and land value taxation to finance public education. The contributors give thorough consideration to the impact of recent court decisions in California, Texas, and New Jersey on the use of the property tax to finance education, and they present three special studies of the specific problems of the Boston, Baltimore, and Chicago systems. The entire problem of the relation of the property tax and the land value tax to taxpayer ability to pay is analyzed in depth. The contributors give full consideration to alternative sources of educational support, and they examine the strengths and weaknesses of a uniform statewide property or land value tax. Their work makes clear their belief that the structure and administration of the property tax can be improved in virtually all areas of the country, but that we are not yet prepared to abandon the property tax as a major educational support source. The author makes three assumptions in discussing the effect of collective negotiations on teachers' sense of alienation: first, alienation is a multidimensional concept that, in this context, is taken to derive from within the organizational setting of the school system; second, school systems are organized as bureaucracies containing more or less the general characteristics of Weber's "ideal type" bureaucracy; and third, negotiations in school systems deal with both the centralization of authority and the rule structure of the organization. The conceptual scheme based on these assumptions is that teacher alienation from work, the sense of powerlessness and meaninglessness, is related to the extent to which the bureaucratic structure of the school provides the means for teachers to become involved in the decisions affecting the rules and regulations governing their work. The negotiation process is seen as a means whereby teachers may have increased input into the decision-making authority of the organization and, consequently, provide a rule structure that has more meaning to them. Three hypotheses are derived as a guide to further research. What is critical is the degree to which the negotiation process is truly a joint decision-making one and the nature of the rule structure that develops from the negotiations. (Author/IRT)

**Characteristics of the Cultural-Educational Cluster Concept of the Future in the United States.**

Pub Date Sep 75

Note—8p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Community Development, \*Community Education, \*Community Services, \*Educational Planning, Elementary Secondary Education, School Community Relationship, \*Shared Facilities

Throughout the history of the development of the concept of community, human delivery systems have, with the consent of the community members, been combined for efficiency. Current societal pressures would seem to indicate that successful planning and implementation of the cultural-educational cluster concept will probably begin in a nonpolitical, nonprivate sector area. In most cases, the central institution will be the public educational system. The services to be clustered will need to be identified by a community planning group emerging from the community, service, and governmental sectors. For example, public health service, public welfare service, private secondary schools, drug abuse programs funded by private foundations, the urban education section of a local university, and the public school system can all combine to plan successfully the cultural-educational cluster project. Appropriately motivated, a community can conserve its resources, become fiscally responsible, and render a much higher proportion of good service to its citizens through the careful, coherent planning and implementation of the self-sustaining, self-sufficient cultural-educational services cluster. Identifiers—\*Alaska

Local high school programs represent a major change in Alaska's rural secondary school policy. This report examines the type of local high school program desired by the residents of three rural villages as a basis for designing village high school facilities. Each village is described by location, climate, population, housing, health facilities, average income and source, commercial employers, village governance system, and elementary school enrollment. Surrounding villages are identified and a prediction made of the number of students from these villages that would attend a local high school. Community interests and expectations are discussed and nine examples are listed of native culture courses requested in the villages that are not included in state curriculum guides. The facility recommendations include opportunities for basic subjects, music, homemaking, practical arts, physical education, and prevocational opportunities. In addition, schools should be constructed so that other career opportunities may be provided, and so that programs of the types requested by parents in the three villages can be offered. (MLF)

This paper is an inquiry into integration through a study of the literature. Criterion elements in the "American rationale" for integration are determined and an examination of whether integration has, can, or will satisfy the criterion elements is undertaken. The discussion centers about the concept of culture and the purpose of education—how beneficial or detrimental the integration movement can be. The inquiry focuses on northern urban America's difficulties, problems, and interests in segregation, desegregation, and integration. (Author)

In recent years the costs of school vandalism and the incidence of vandalism in the public schools have been rising. The study concerns itself with the application of production functions, Monte Carlo techniques, and Shannon's model of information theory to determine the most efficient use of preventive vandalism techniques in a large school system. The results of the study indicate the gain in efficiency of communication to administrative decision-makers as a result of the information processing and retrieval system employed by the researchers. There are no simple answers to the absenteeism problem, but the technical guides included in this document may provide a better understanding of the problem. These guides may be useful in determining the causes and indicating the ways in which a reduction in absenteeism may be achieved. Topics covered include a definition of absenteeism; a method of computing unexcused absence rates; a listing of the inschool, environmental, and personal reasons for absenteeism; and a set of procedures to combat unexcused absenteeism. These procedures include a lengthy list of steps management can take to improve attendance. (Author/IRT)

**Descriptors**—Community Control, Cultural Pluralism, Decentralization, Educational Change, \*Educational History, Elementary Secondary Education, \*Futures (of Society), \*Political Influences, \*Socioeconomic Influences, \*Urban Education

"Politics" is used in a broad sense to refer to the social, economic, political, and civil forces that impinge on the publicly financed school system. These forces are generated both from outside and inside the educational system. It is the author's view that the big cities and the school systems of most of these cities are in just enough trouble to force people to do something about them without delay and that citizens and educators will succeed in clearing up much of the trouble in the next 25 years. After a survey of the past, which shows that city schooling has improved, the author briefly discusses the present before moving to consider the future. He presents five elements to a successful resolution of the problems of big city education: (1) stabilization of school enrollment, (2) achieving a democratic pluralism in school policy and practice, (3) a metropolitan area civil-educational system, (4) an active role for teachers organizations in policy-making, and (5) broad-based planning and changes in the bureaucracy. **Educational Challenges.**

Pub Date 20 Feb 76

Note—10p.; Paper presented at the Annual Convention of the American Association of School Administrators (108th, Atlantic City, New Jersey, February 20-23, 1976)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Costs, \*Educational Finance, Elementary Secondary Education, \*Socioeconomic Influences, \*Urban Education

There are three very important factors that contribute substantially to urban fiscal problems in providing educational services. First, at the same time that the tax base for the cities' services is being eroded, the cities' residents are in need of and demanding greater expenditures for health services, welfare, sanitation, transportation, public housing, and all the other services required by an urban population. As a result, a smaller proportion of the city budget is available for public education than is available for educating the children in wealthier communities. Second, city education budget items are more costly than such items are elsewhere. Third, the socioeconomic characteristics of the urban school population require greater expenditure than other school populations. The combination of these factors results in less education per dollar in the city than in suburban or rural areas. (Author/IRT)

**Identifiers**—IDEA, Institute Development Educational Activities

The self-interests of the primary participants in the school and the common welfare as represented in the improvement of the American educational system are most likely to become one in the process of improving the school as a work place. This strategy was explored in the form of a collaborative enterprise. Eighteen schools in southern California and the research division of the Institute for Development of Educational Activities, Inc., (IDEA), engaged in the internal process of self-renewal in each school through sustained dialogue, decision-making, action, and evaluation on the part of the entire faculty under the leadership of the principal. This involved a network of schools within which ideas, resources, and practices were developed and exchanged; a continuous self-directed seminar in which the principals discussed their problems and developed

necessary leadership understandings, and skills; and a variety of pedagogical interchanges for teachers. (Author/MLF)

**Identifiers**—\*National Institute of Education, NIE  
One major unit of the National Institute of Education (NIE), the Dissemination and Resources Group, is specifically charged with the responsibility of facilitating dissemination and use of the entire corps of knowledge about education: the outcomes of research and development supported not only by NIE but by other organizations and agencies as well, and information about promising and effective programs and practices in the real world of the school building and the classroom. The Dissemination and Resources Group is obligated to provide educators information about the full range of alternative solutions to their problems, rather than advocating one solution above others, and is committed to working through existing educational agencies and institutions whenever possible. The strategy of the group has three elements: first, maintaining and improving access to the complete knowledge base about education (primarily through operation of the Educational Resources Information Center--ERIC); second, building capacity for dissemination and utilization of knowledge throughout the education community (primarily through support of state departments of education); and third, supporting research, development, and evaluation needed to facilitate achievement of the other two missions. Descriptors—Educational Objectives, \*Educational Research, \*Effective Teaching, Elementary Education, Learning, \*Mathematics Instruction, Performance Based Teacher Education, \*Reading Instruction, Students, \*Teacher Behavior, Teacher Certification, Teacher Qualifications

Although there are many qualifications, it appears from several major research undertakings that teacher behaviors are in fact related to student learning, but that specific behaviors may be less important than patterns of teacher behaviors and, further, that such patterns of behaviors are differentially effective for different students, grade levels, and subject matter areas. Teachers, to be effective when the criteria of effectiveness are related to student learning of basic skills, will organize instruction differently for different subject matter areas and for different grade levels. The important concern for student learning of basic skills at the elementary level is direct teacher instruction, which may involve different types of instructional organization. The important factor seems to be teacher instruction of the student and student attention to, and time spent on, instructional tasks. The organizational pattern and selection of materials that facilitate student attention to task and teacher involvement in instruction will be the most effective teaching procedures. Some research problems, such as measurement, are the concern of and need to be solved by researchers; others, such as the criteria of effective teaching, are the concern of and need to be addressed by all educators and concerned citizens. Identifiers—Music Therapy

Presented is a developmental curriculum for training potentially learning disabled preschool children. Part I includes introductory information such as a rationale for the program and suggestions for the parent-teacher. Provided are guidelines for eight curriculum areas: attention; sensory stimulation, reception, and response; adaptive behaviors (problem solving); gross motor skills; fine motor skills; perceptual-motor skills; conceptual skills; and social skills develop-

ment (including manners and self-help skills). Guidelines usually include the major focus, lesson objectives, developmental steps, developmental learning experiences, necessary equipment, and suggestions for additional activities. Activity resources and catalogues of appropriate materials are listed. Described in Part 2 are 102 activities (many of which were adapted from a music therapy curriculum) grouped by appropriate curriculum areas. Accompanying the curriculum is a Skills Achievement Profile designed as a sequential, behavior-oriented evaluation of the child's existing skills, and as a guide for development of an intervention program. Descriptors—Academic Achievement, Classroom Environment, \*Consultants, \*Delivery Systems, Elementary Education, Exceptional Child Research, \*Handicapped Children, \*Program Effectiveness, Rating Scales, \*Resource Teachers, Self Concept

Identifiers—\*Stratistician Generalist

Examined with 343 handicapped and 202 non-handicapped elementary grade children was the relationship between exposure to a stratistician-generalist program and scores on measures of teacher ratings, self-concept, student perception of classroom climate, academic achievement, as well as grade level, sex, and classification. The 17 stratistician-generalists were trained by the Rocky Mountain Regional Resource Center to serve as resources to regular classroom teachers, resource room teachers, special class teachers, and local school and district administrators. Of the 16 dependent variables used in the study, the following accounted for the most effective and consistent measures on which differences were observed: need of supervision, anxiety-depression, loneliness-rejection, misbehavior (self-rated), cognitive emphasis, variety-individualization, reading, and math. The design factors which accounted for the most variance were grade level and classification as handicapped or not handicapped with proportionally less variance accounted for by the design factors of sex and program status. Descriptors—\*Delivery Systems, Elementary Secondary Education, Exceptional Child Research, \*Federal Aid, Financial Support, \*Handicapped Children, \*Program Evaluation, State Programs, \*State Surveys

Identifiers—Elementary Secondary Education Act Title VI, ESEA Title VI, \*Oregon

Summarized are results of a survey to determine the impact of 133 projects funded through Elementary and Secondary Education Act Title VI-B funds on handicapped children in Oregon by examining the number of children being served, the number of staff, and the number of dollars being expended. Significant findings are listed such as that deaf, blind, and trainable mentally retarded populations would not have been served if Title VI-B had not been available between 1968 and 1970, and that 87 percent of projects funded for an academic year were still in operation compared to only 44 percent of projects funded for the summer only. Among the 11 recommendations are that Title VI-B monies be awarded as seed money only and that the new special education service priorities be established

every 3 years. General information includes report purpose, a summary of Title VI provisions, definitions of handicapping conditions, a description of eligible agencies, program purpose, program guidelines, evaluation model, and methodology. Seventeen tables are provided giving statistics such as the number and percentage of children served by handicapping condition. Five special projects are individually described including "A Study of the Extreme Learning Problem Program in Oregon." Appended are the questionnaire used in the survey and the cover letter. (DB)

Identifiers—Project FAST

Volume 1 of the final report of Project FAST consists of reports on 13 experiments concerning: (1) the application of associative learning strategies to the development of a basic sight vocabulary among mentally retarded children and adults, and (2) the development of text reduction techniques designed to facilitate comprehension and recall of written materials among visually handicapped and hearing impaired subjects. Six experiments with educable and trainable mentally retarded children cover topics such as the application of associative strategies to word recognition, the effect of reinforcement on word knowledge, the effect of pictorial stimuli on word recognition, and the effects of animation on word memory. Seven studies investigate such topics as the effect of a subjective deletion scheme on reading performance of Braille and regular print readers, the application of a subjective deletion scheme to film captioning for the deaf, and a comparison of two deletion schemes on three types of prose among blind and deaf students. Major conclusions reported are that learning and retention in word recognition tasks can be facilitated by the use of associative learning strategies; and that telegraphic prose is a viable alternative to traditional educational materials for the blind, but results were not as favorable with the deaf. Descriptors—Administration, \*Evaluation Methods, \*General Education, Interdisciplinary Approach, Organization, \*Program Evaluation, \*Research and Development Centers, Researchers, Success Factors

Presented is a paper on a strategy for in-house evaluations in the context of an educational research and development facility. The obstacles in conducting an evaluation of colleagues' programs are discussed, and a strategy is proposed which places the evaluator in the role of a coordinator, facilitator, and synthesizer of several separate research efforts in which colleagues in a variety of disciplines combine energies and interests to assess the program being examined. It is noted that recruitment and leadership are accomplished by persuasion and by assuring payoff to the researchers involved in the form of contributions to their own area of research. Tactics for organization and management are discussed in some detail. Preliminary results from ongoing research projects are seen to suggest that the evaluation effort was facilitated and its value increased by multidisciplinary contributions to the research. Identifiers—Presidents Committee on Mental Retardation

The report of the President's Committee on Mental Retardation deals with three goal areas: minimum occurrence of disability, adequate and

humane service systems, and assurance of full citizenship for the retarded. Considered in an initial section are the background, definition, prevalence, and incidence of mental retardation. Reviewed is research relating to prevention and described are the associations between mental retardation and such conditions as Tay-Sachs disease, rubella, lead poisoning, and prematurity. Among the service systems discussed are health services, vocational training, and programs of daily activity. An analysis of full citizenship covers such aspects as right to education, right to treatment, and right to payment for work, and addresses the effect of legislation, competency questions, and attitudes on the rights of the retarded. A final section reviews the economic impact of vocational rehabilitation and education and analyzes federal spending trends. (CL)

Collister, Larry

**A Comparison of the Long Range Benefits of Graduation from Special Vs. Mainstream School for Mildly Mentally Handicapped Students.**

Seattle Public Schools, Wash. Dept. of Planning, Research, and Evaluation.

Report No.—75-16

Pub Date Jun 75

Note—15p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Adults, \*Educable Mentally Handicapped, Employment, Exceptional Child Research, Followup Studies, Mentally Handicapped, \*Program Effectiveness, \*Regular Class Placement, Senior High Schools, \*Social Adjustment, Special Classes, \*Special Schools, Trainable Mentally Handicapped

Twenty-seven mildly and moderately mentally handicapped special education graduates from a special school and 23 mildly and moderately mentally handicapped special education graduates from a mainstream school were interviewed to determine long range benefits of each program. Interviews 1 and 2 years after graduation were designed to measure differences in employment skill levels, unemployment rates, job satisfaction, arrests and convictions, welfare assistance, financial independence, income level, and other variables. Data suggested that there was little difference in long range characteristics for either group, although the small sample size precluded drawing firm conclusions on either side of the question. Descriptors—Child Care Centers, Exceptional Child Research, Expressive Language, \*Language Development, \*Language Handicapped, \*Learning Modalities, Mentally Handicapped, Preschool Education, Receptive Language, \*Visual Learning

Identifiers—Minnesota Early Language Development Sequence

A language training approach employing a multimodality receptive language program was used with eight retarded preschool children to increase receptive language development and to stimulate verbal (expressive) language behavior. Day activity center teachers worked with the Ss three times weekly for 7 months using the Minnesota Early Language Development Sequence (MELDS) curriculum in a program combining two visual language systems: rebuses (picture words) and the vocabulary of American Sign Language. Results showed substantial gains in receptive language for all Ss and notable expressive language gains for half of the Ss. (SB)

Descriptors—\*Concept Formation, Custodial Mentally Handicapped, Emotionally Disturbed, Exceptional Child Research, Imitation, \*Language Development, Mentally Handicapped, \*Multiply Handicapped, \*Perceptual Motor Coordination, \*Sensory Training

Five severely retarded emotionally disturbed children (2-7 years old) were exposed to a pre-language sensorimotor program for 20 weeks. The program emphasized the use of exploratory behavior and gesture imitation. Results suggested that object permanence could be encouraged using these activities but that the approach used in training imitative behavior may have been inappropriate. (Author)

Descriptors—Administration, Elementary Education, Exceptional Child Education, Guidelines, \*Handicapped Children, \*Performance Based Teacher Education, \*Program Descriptions, Program Planning, \*Special Education Teachers, Teacher Certification, Teacher Role, Universities

Identifiers—Washington

Presented is a competency based teacher education (CBTE) program for training and certification of elementary level special education teachers which represents the program development phase of the Eastern Washington Special Education Consortium. It is explained that a student must be interviewed by a three-man review committee to reach each level of certification: preparatory level—the level a trainee reaches before being allowed to student teach; initial level (normally reached on the completion of B.A. degree requirements)—allows trainee to teach the handicapped; and continuing level (equivalent to the fifth year or a graduate program)—qualifies the trainee to act as an advisor within the training program. Following an introduction in Chapter 1 on the program's historical development, advantages of a special education CBTE program, a brief program description, and consortium by-laws, are six chapters covering program management; preparation program; and the implementation process in table form for elementary special education teachers at the preparatory, initial, and continuing levels. Included in the appendixes are program planning sheets for each of the three levels of certification, the estimated budget for first year operations, and a copy of "Guidelines and Standards for the Development and Approval of Programs of Preparation Leading to the Certification of School Professional Personnel". Descriptors—Administrative Personnel, \*Delivery Systems, Exceptional Child Education, \*Handicapped Children, \*Inservice Teacher Education, Material Development, Needs Assessment, \*Program Descriptions, Program Planning, Simulation, \*Special Education, Teachers

Described is a collaborative linkage and support system for delivery of training programs in special education aimed primarily at increasing capabilities of regular classroom teachers and public school administrators providing instructional alternatives for children with special needs. The program's four major objectives are outlined as identification of training needs of local schools through an assessment process; making an inventory of successful training practices in special needs for application to inservice education; development of gaming and simulation training materials in selected high need areas where programs are nonexistent; and implementation of training sessions through a college-community collaborative model. The bulk of the document is a program narrative which covers the topics of problem description, results and benefits of the proposal, approach of the study, geographic location of the collaborative project, and backgrounds of project personnel. The benefits of the proposed activities are noted as high impact on target population, the development of improved inservice dissemination models, commitment for continued support from local school systems, specific product outcomes, and cost-effectiveness. Appended are a letter of support, and overview of the principal's training program, and an outline of a school planning game. (Author/SB)

**Food Additives and Hyperkinesis: A Controlled Double-Blind Experiment. (Includes NIE Staff Critique).**

Pittsburgh Univ., Pa. Dept. of Psychiatry.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C. Office of Research.

Pub Date 75

Contract—NIE-C-74-0093

Note—59p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—\*Behavior Change, Diets, Elementary Education, Etiology, Exceptional Child Research, \*Hyperactivity, \*Nutrition, Parents, Research Design, Teachers

Identifiers—Feingold (Ben), Food Additives, Salicylates

Fifteen hyperkinetic children (6-12 years old) were involved in a pilot study to test B. Feingold's hypothesis that hyperkinesis may be caused by artificial flavors and colors in food. Prior to treatment, parents and teachers completed bi-weekly questionnaires regarding each Ss' behavior both on medication (pretreatment period) and when medication was discontinued (baseline period). Ss were randomly assigned to either the experimental (K-P) diet which eliminates artificial flavors, colors, and natural salicylates or a control diet for 4 weeks. The following month, each S was placed on the alternative diet. Following each diet condition, parents were interviewed, school reports were examined, and a judgment was made using the Clinical Global Impressions scale without knowledge of diet condition. Results showed that both parents and teachers reported fewer hyperkinetic symptoms on the K-P diet as compared to pretreatment baseline; that teachers noted a highly significant reduction of symptoms on the K-P as compared to the control diet but the parents did not; and that control diet ratings did not differ from the baseline period for either parents or teachers. Although findings suggested that the K-P diet may reduce hyperkinetic symptoms, results should be viewed cautiously until further research is completed. Concluded in a critique of the pilot study by the National Institute of Education was that the behavioral outcome measures were "soft" and pharmacology uncertain; that the experimental design was subject to certain problems; and that the sample size did not allow for much further analysis. Descriptors—\*Aurally Handicapped, Elementary Secondary Education, Exceptional Child Research, \*Filmstrips, Information Dissemination, Instructional Materials, \*Instructional Media, \*Language Programs, \*Programed Instruction

Identifiers—Final Reports, Project LIFE

Presented is the final report on Project LIFE (Language Improvement to Facilitate Education), a 12-year (1963-75) project which developed filmstrips and supplementary materials for teaching language to deaf children. General overview and historical review sections include information on project goals and objectives, administration agencies and associated individuals, and funding. Discussed is the rationale underlying the three instructional content areas: perceptual training, perceptual thinking, and language reading. The next three sections focus on a historical tracing of hardware development, marketing/dissemination, and evaluation of Project LIFE materials. Summarized in a final chapter on 1975 systems development accomplishments are the contents of a picture dictionary, 12 biography filmstrips, and 104 programed filmstrips on topics such as plants, health, and the universe. Appendixes include lists of Project LIFE field test centers, consultants, publications, research and evaluation studies, research and evaluation forms, and marketing and consultant critique information. Identifiers—Deinstitutionalization, National Association for Retarded Citizens

Provided in the first of four booklets on citizen advocacy for the mentally retarded is a general introduction to the concept. Advocacy is defined and traditional approaches including institutional practices are reviewed. The individual advocate-protégé relationship is seen to be the central feature of the citizen advocacy model serving mentally retarded people in institutions, in transition from the institutions, and in the community. Potential advocate roles include companion, guardian, and adviser. The support structure at the local and state levels is analyzed. The booklet concludes with a brief review of legislative and social factors responsible for current interest in advocacy. (CL)

The second of four booklets on citizen advocacy for the mentally retarded provides specific guidelines for implementing advocacy programs in state and local Associations for Retarded Citizens. Functions of the state office and the state advisory committee are reviewed, along with funding sources for state programs. Procedures involved in setting up a local office include establishing a study committee to investigate the feasibility of an advocacy program, deciding questions of insurance and incorporation, and hiring staff. Described are such local office functions as recruitment, screening, program monitoring, and service evaluation. Among nine program forms provided are a sample news release form and advocate's monthly summary. (CI.)

Identifiers—\*Project Head Start, Project OUTREACH

Described is a 4-week summer workshop, Project OUTREACH, designed to train Head Start personnel in the knowledge and skills necessary to identify handicapped or potentially handicapped children and to develop specific teaching strategies for the preschool handicapped child. It is explained that a unique aspect of the workshop was the coordination of 19 consultants. Reported are results of objective (one fourth of participants made significant gains in knowledge and skills) and subjective evaluations (80 percent of participants regarded the workshop as very informative or informative). Briefly described are the following topic areas: overview of early childhood and exceptional child education; assessment of child's existing skills; curriculum development; instructional methodology; development of psychomotor skills; language, speech and hearing development; selection, utilization, and production of materials; communication and working with families of handicapped children; and record

keeping. Appended are the objective evaluation instrument, evaluation forms, and a narrative summary of daily evaluations. (DB)

Descriptors—Administration, Bibliographies, Elementary Secondary Education, Exceptional Child Education, \*Gifted, Grouping (Instructional Purposes), \*Program Development, Research Reviews (Publications), \*Talent Identification, Values

Examined in five papers are issues involved in developing elementary and secondary school programs for the gifted and talented. Emphasized by E. Drews is the need for educating the gifted and talented toward more humanizing values, and reviewed are examples of experimental curricula and learning environments. A national administrator's perspectives on such problems as grouping procedures and community abdication of responsibility to the gifted and talented are presented by B. McLaughlin. Cited by A. Baldwin are teaching strategies for gifted disadvantaged students. Considered in B. Boston's paper are methods of identifying gifted and talented pupils and organizing programs. The roles of change agents and facilitators are among the topics covered in an interview with J. Gallagher. Listed are 21 current publications on the gifted and talented, and provided is a bibliography of approximately 150 references on such topics as creativity, guidance and counseling, and teacher training. Descriptors—Elementary Secondary Education, Exceptional Child Education, \*Handicapped Children, Higher Education, \*National Surveys, \*Performance Based Teacher Education, Program Descriptions, Questionnaires, \*Special Education Teachers, \*Teacher Education

Examined in a national survey of 258 special education teacher training programs in colleges and universities were program components of federally funded competency based (DBTE) programs and federally funded noncompetency based (NCBTE) programs. Department chairpersons answered mailed questionnaires specific for either a CBTE or NCBTE program. Findings included the following: More than 60 percent of chairpersons indicated that they administered categorical CBTE or NCBTE programs. The majority of students in both the CBTE and the NCBTE programs were in the bachelor's level programs. More students were enrolled in the area of mental retardation than any other category. The majority of CBTE programs were begun as a result of either federal funds or legislative man-

dates. The essential program components as listed by department chairpersons were similar for both CBTE and NCBE programs. Most CBTE programs had developed printed nonpublished instructional packages, whereas, most NCBE programs had not developed such materials. The most frequently mentioned strongest program components for the CBTE programs were learning packets, individual study, and practicum; while practicum was listed as the strongest program component for NCBE programs. Further research is recommended in such areas as delineation of the essential components relevant to CBTE. (DB)

**Identifiers—**Wisconsin (Wausau)

Summarized are activities of the Wausau District Public Schools (Wisconsin) toward developing a model for cost efficiency analysis in special education. The model links input-output analysis and task analysis features. Introductory information includes varying impressions of cost efficiency concerns and the current status of project development. Discussed are the following elements of a cost efficiency study model: input-application-output, feedback, outcome analysis, cost allocation, pupil accounting systems, technical support systems, and related technical issues. Application of these elements in a cost efficiency system design for a local education agency is described. Reported are outcomes of pilot tests of the model and its components including simulation of resource allocation and design of a student accounting registration procedure. Among project findings cited are problems encountered such as lack of efficient pupil accounting systems and areas in which progress was made—such as development of task analysis classifications for special education. Appendixes include: documentation, inputs and outputs for simulated resource allocations; a staff questionnaire; and a student registration form. (LS)

**Problems of Quality Control in the Use of Behavior Change Techniques in Public School Settings.**

Pub Date 75

Note—13p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors—**\*Behavior Change, \*Behavior Problems, Emotionally Disturbed, Exceptional Child Education, Guidelines, \*Higher Education, Intervention, \*Operant Conditioning, Practicums, \*Program Descriptions, Program Evaluation, Public Schools, Teacher Education

A program was designed to train college students in the use of behavior modification procedures with problem children in the classroom. Through application of social learning theory principles and operant conditioning, program trainees learned to reduce the inappropriate behavior of problem children in class, to prevent small difficulties from becoming future problems, and to maintain optimal levels of academic and social behavior. The training program consisted of four phases: pre-intervention training in observation and data collection, pre-intervention training in classroom contingency management, intervention strategy training and implementation training. Problems encountered during the pre-intervention phase (such as students "freezing" when being videotaped during role-playing practices) were usually resolved while the program was being conducted on the college campus. The majority of problems took place in the public school setting and generally stemmed from a reciprocal view of incompetency existing between classroom teachers and college students. To deal with problems, a set of guidelines was developed which related to the baseline data collection phase, the intervention/teaching phase, and the relationship between participating students and the school setting. (Appended is a list of errors commonly made by poorly trained teachers attempting to carry out behavior modification programs.) (SB)

**Descriptors—**Age Differences, \*Classification, \*Cognitive Development, Concept Formation, \*Early Childhood Education, \*General Education, Matrices, Research Projects, \*Serial Ordering

**Identifiers—**Piaget (Jean)

Matrix tasks to assess multiple classifications and multiple seriation skills were administered to 160 children (40 Ss each from preschool, kindergarten, first and second grade levels). Each child received six matrix subtasks (reproduction and transportation of cross classification I, double seriation, and cross classification II) in one of six orders of presentation. Preliminary analyses indicated a general absence of significant presentation order effects and an absence of sex differences. Grade level comparisons were significant for all subtasks except cross classification I transposition. Significantly superior performances on the reproduction when compared to the counterpart transposition subtask were shown for the cross classification I (first grade, second grade, and combined grades), double seriation (kindergarten, first grade, second grade, and combined grades), and cross classification II (first grade and combined grades) cases. The between matrix difficulties were that in both reproduction and transposition subtasks, cross classification II was more difficult than double seriation and cross classification I. Results suggested that development in classificatory abilities may lag behind relational abilities contrary to the structural prediction of orthodox Piagetian theory. (Author/SB)

**Identifiers—**\*Developmental Disabilities, \*Infant Stimulation Curriculum

Presented are a description and evaluation report of the Infant Stimulation Curriculum developed by the Developmentally Delayed Infant Education Outreach Project. The curriculum, for infants developmentally between birth and 36 months of age, is described in terms of characteristics (such as basis in the normal developmental pattern), rationale, philosophy, and format. Listed are objectives in the curriculum development process (such as a simple readability level), and provided is a flow chart of the development process. Reported are results of an evaluation of each of the seven objectives including such findings as a readability level of sixth grade, and an expert opinion that all behaviors as stated are in fact observable behaviors. Also reported are results of field testing the curriculum with 68 children at five sites for the following three goals: determine if the behaviors as expressed are observable, determine if the behaviors are sequenced approximately, and determine if the activities listed for each behavior are appropriate for the child's level of ability. Appended are the curriculum readability work sheet, a questionnaire soliciting curriculum critiquing feedback, a toys and materials list, the curriculum assessment tool instructions, results of the first field testing, the revised assessment tool, and results of follow-up field testing. # Identifiers—Developmental Disabilities, \*Infant Stimulation Curriculum

Presented is the Infant Stimulation Curriculum (developed by the Developmentally Delayed Infant Outreach Project) for parents and teachers to use with children who are developmentally between birth and 36 months of age. Published in a card format at a sixth grade readability level, the curriculum includes introductory cards providing information on the purpose of the curriculum, ways to adapt the curriculum to handicapped children, and how to use the curriculum to identify a child's behavioral level and stimulate development through eight stages for each of the following areas: coordination, locomotion, cognition, receptive language, expressive language, and socialization. Provided is a chart on which to record the child's progress. Each area is covered by 44 to 72 cards, each of which specifies an observable behavior and suggests two or more activities to stimulate the target behavior. Examples of behaviors are ability to put a small can into a larger can (stage 5 of cognition), ability to pull a 1/2" x 3" peg out of a pegboard (stage 4 of coordination) and ability to dry own hands after washing (stage 8 of socialization). Presented is the PARC (Pennsylvania Association for Retarded Citizens) Plan which resulted from a 3-month survey of Pennsylvania's institutional system and which was designed to improve living conditions and programs of state schools and hospitals serving the mentally retarded. Detailed are specific recommendations for the achievement of annual goals (from 1975 to 1980) in the following areas (goal examples are in parentheses): population (assess the needs of each resident in state schools and hospitals and develop individualized programs); staffing and staff training (develop an inservice training program); food services (achieve excellence in diet, food preparation, and food handling); linen and clothing service (provide clean, neat, fashionable, appropriate, individualized clothing as well as individual storage space); program (develop a uniform accountability procedure with a mechanism for correction of defects); housing (complete renovations to meet Life Safety Code and Medical Assistance requirements); health care (provide corrective and preventive measures for each individual); and monitoring (develop a uniform procedure for making and writing reviews of state schools). Included in each section is an implementation schedule for each program area and statements on the goals, actions required, funding sources, and PARC actions and responses for each year. A section on additional recommendations contains discussions of such topics as the development of family care training homes. (SB)

**Mainstreaming Special Needs Children Into Open Settings.**

Pub Date 75

Note—45p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—\*Educational Philosophy, Educational Programs, Elementary Secondary Education, Exceptional Child Education, \*Handicapped Children, Normalization (Handicapped), \*Open Education, \*Regular Class Placement, \*Special Education

Compared are principles of open education and special education, and described are six programs

in which handicapped children are being successfully mainstreamed into open education situations. Briefly described is the philosophy of open education, listed are 29 assumptions about children's learning or knowledge, and examined is the philosophy of special education. The following open and special education themes are considered: instruction, provisioning, diagnosis, evaluation, humaneness, seeking, self-perception, and assumptions. Other aspects discussed include the teacher-student relationship and physical space. Briefly described are six programs providing open education services to such children as the severely retarded, emotionally disturbed, disadvantaged, and learning disabled. Results of one program evaluation are given in terms of the children, the teachers, and the techniques. (DB)

**Descriptors**—\*Attitudes, Exceptional Child Research, \*Handicapped Children, \*Higher Education, \*Perception, Post Secondary Education, Semantic Differential, Student Attitudes  
 The perceptions of three groups (n=30) of bachelor level special education majors and doctoral candidates in education toward the mentally retarded and various other exceptionalities were measured after exposure to three types of treatment. Of the three groups, the control group received no treatment, experimental group I received negative treatment consisting of a 10-minute slide-tape presentation of various syndromes associated with profound retardation, and experimental group II received positive treatment consisting of a 10-minute presentation of selections recorded by a musically superior group of educable mentally retarded students. Among the findings from pre- and posttests on semantic differential scales were that the attitudes and perceptions of the advanced degree Ss were significantly more positive than those of preservice special education Ss, and that the label gifted was viewed most positive of all labels while severely retarded was viewed most negative. Provided are some of the proceedings of a conference on assessment of competency based teacher education (CBTE) programs in special education. Presentations by conference participants cover the following topics: research findings regarding evaluation and validation in performance based teacher education (Robert S. Soar); the New York state education department's assessment plans required in teacher education program proposals (Vincent Gazzella); the application of systematic observation methods (such as computer assisted teacher training) in research and training in special education (Melvyn I. Semmel); and models for research and development in performance based teacher education (Frederick McDonald). Summaries are provided of potential contributions and concerns regarding assessment processes of public school teachers (James G. Ward), public school administrators (Gilbert Duken and Michael Solimundo), and teacher education students (Karen Cochran, Nathan Glasper, Karen Kowalchuck, and Margaret Maxwell). Also included are worksheets (Patricia M. Kay) which are noted to be based on a model for building an internally valid assessment system. In a conference evaluation (Alice Kornblith and Cecile Segal), it is concluded that although the conference was well organized, more technical expertise and individual consultation were needed. (SB)

**Document Not Available from EDRS**

**Descriptors**—Exceptional Child Research, Negative Reinforcement, \*Operant Conditioning, Positive Reinforcement, Speech Handicapped, \*Speech Therapy, \*Stuttering, Timeout, \*Verbal Operant Conditioning, Verbal Stimuli

Presented is a series of studies in which the efficacy of applying operant conditioning methodologies to the problem of stuttering was examined. One requirement was that the designed therapeutic programs utilize only verbal contingent stimuli (reinforcers and punishers) in the traditional therapeutic setting (client and therapist seated together in a room). Studies deal with topics such as thematic content modification, client awareness of contingencies, the effect of timeout, and the identification of stuttering. Among major findings reported are that verbal contingent stimuli are effective in manipulating both the thematic content of Ss' speech and the manner of their speech in speech therapy interviews; that positive-type verbal reinforcers were the most effective contingent stimuli for modifying the form of the stuttering episode; and that timeout is an effective punishing type contingent stimulus in group therapy sessions for stutterers. Placement, \*Program Descriptions, Program Evaluation, School Services Identifiers—Final Reports

Outlined in a final performance report are the accomplishments, slippages, and spinoff developments of a prototype training program to prepare guidance counselors to work with deaf persons. The initial year of the program is reported to have been devoted primarily to curriculum planning, development of evaluation procedures, recruitment and selection of students, and development of instructional materials. Major activities listed for the program's implementation period include instruction and advisement of students, supervision of practicum, and program evaluation. Development of informational services, employment opportunities, and inservice training are among the areas described as spinoff developments. Appended are lists of the advisory committee, counselor-training program participants and their current positions, schools and organizations which have been provided with onsite consultation, and a suggested program of study. Document Not Available from EDRS

Descriptors—\*Administration, \*Aurally Handicapped, Definitions, Early Childhood Education, Educational Facilities, Educational Needs, Elementary Secondary Education, Exceptional Child Education, \*Guidelines, \*Program Descriptions, Public Schools, \*Regular Class Placement, Residential Schools

Provided primarily for regular class teachers and administrators is information on mainstreaming hearing impaired students. Reasons behind the movement toward regular class placement of hearing impaired pupils are noted and two basic views as to how it should be done are identified. Defined are relevant terms such as mainstreaming, hearing aid, and hearing impaired. A chapter on the influence of hearing impairment on education includes discussion of the nature of the hearing defect, and differences in educational needs of deaf and hard of hearing pupils. In a section on characteristics of successful mainstreaming, instructional settings and pupil characteristics are listed and five principles basic to mainstreaming (such as teach toward hearing world participation) are explained. Guidelines presented for making mainstreaming function include a model for preservice and inservice preparation, suggestions for regular class teachers and administrators, and information on professional roles and facilities. The second half of the book consists of descriptions of various complete and partial approaches to mainstreaming in 10 public school systems and four residential schools. The programs were chosen to represent a range of sizes and geographical locations. (LS)

Developing Imagination and Creativity in Children.

Pub Date Apr 75

Note—285p.; Photographs may reproduce poorly; Paper submitted in partial fulfillment of requirements for Ed.D. Degree, Nova University

EDRS Price MF-\$0.83 HC-\$15.39 Plus Postage

Descriptors—\*Creative Development, \*Creative Expression, Creative Thinking, Creativity, Elementary Education, \*General Education, \*Imagination, \*Inservice Teacher Education, Program Development, Program Effectiveness, Research Projects, Self Expression, Teachers, Teaching Methods, Workshops

Described are the development, implementation, and evaluation of six 3-hour inservice training sessions designed to help five participating teachers improve imagination and creativity in fourth, fifth, and sixth grade students. Content

areas for each session are outlined; activities including brainstorming and role playing are reviewed; and techniques for stimulating creative expression in writing, drama, play, art, and listening are detailed. Pre- and posttest scores on the Torrance Tests of Creative Thinking are presented along with observations drawn from classroom visits and teachers' anecdotal records. It is reported that the teachers exhibited an increased awareness of the need for encouraging creative behavior and the students demonstrated increased involvement in the creative aspects of learning. Included in the seven appendixes are the Torrance Tests of Creative Thinking, and a sample teacher log with photographs of children's creative activities. (CL)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III

Intended for the regular elementary classroom teacher serving learning disabled children, the activity guide provides suggestions in the areas of motor development, visual perception, auditory perception, and language development. Motor activities are grouped into the following categories: body image, balance, fine motor coordination, directionality, gross motor coordination, and activities of the Purdue Perceptual Motor Survey. Visual perception is considered in terms of visual reception, visual sequencing and directionality, visual memory, position in space, constancy of shape, figure-ground discrimination, and visual association. Aspects of auditory perception for which activities are provided include auditory awareness, figure ground perception, auditory reception, auditory discrimination, and auditory sequential memory. The final section, on language development, includes suggestions for improving verbal expression, the normal development of speech, written expression, and manual

expression. A short selected bibliography follows each chapter. (DB)

**Descriptors**—Content Analysis, Elementary Secondary Education, Exceptional Child Education, \*Handicapped Children, Information Dissemination, \*Instructional Materials, \*Instructional Media, \*Needs Assessment, \*Research Reviews (Publications), Teacher Education

A large number of studies were reviewed to assess special education media and materials in terms of content and format, teacher training, information, and distribution needs. Among findings related to content and format were that there was a need for instructional games and other manipulative materials across a variety of handicapping conditions, and that there was generally a high need for materials in language arts. Teachers' training needs were in such areas as child assessment and preparation of learning prescriptions for individual students. Person-to-person contact was found to be the most valued technique for teachers to obtain information about existing materials, and teachers preferred to receive information only about materials immediately available for use in their classrooms. Large numbers of teachers were not prone to use materials not immediately available, and there was some evidence that teachers more often use instructional materials which have been demonstrated in their own classroom or school rather than materials they have not seen demonstrated. Identifiers—Upper Midwest Small Schools Project

Presented are results of interviews conducted with 43 elementary teachers from nine schools having participated in the Upper Midwest Small Schools Project (UMSSP), a program of teacher workshops and diagnostic clinics on exceptionality in the regular classroom. A summary of teachers' responses regarding UMSSP and special students is presented along with statements supporting, neutral to, or not supporting the concept of integration. Discussed are three major recommendations concerning more course work relating to exceptional children, more direct contact and experience with the various systems for delivering educational services to exceptional children, and more contact with exceptional children. Appendixes include a copy of the interview questionnaire, letters sent to administrators of UMSSP schools, teacher statements regarding mainstreaming, teacher responses about problems with mildly retarded students in the regular class, and teachers' recommendations for teacher education. **Mental Retardation and the Law: A Report on Status of Current Court Cases, December 1975.**

President's Committee on Mental Retardation, Washington, D.C.

Pub Date Dec 75

Note—27p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—\*Civil Liberties, Classification, \*Court Cases, Due Process, Employment, Equal Education, Exceptional Child Education, Legal Responsibility, \*Mentally Handicapped

Reported are seven new court cases and updated information on 39 previously reported cases regarding the legal rights of the retarded. Analyzed are cases on the following topics (with sample cases in parentheses): classification (Steward, et al. v. Philips, et al.); commitment (Pate v. Parham and White v. Director of Michigan Department of Mental Health); education (California Association for Retarded Children v. State Board of Education); employment (Roebuck, et al. v. Florida Department of Health and Rehabilitation Services, et al.); guardianship (Schultz v. Borradaile); sterilization (National Welfare Rights Organization, et al. v. Weinberger, et al.); treatment (Burnham v. Department of Health of the State of Georgia); voting (Carrole, et al. v. Cobb, et al.); and zoning (City of Temple Terrace v. Hillsborough Association for Retarded Citizens, Inc.). The final section lists 61 closed cases in the following areas: architectural barriers, classification, commitment, custody, education, employment, guardianship, protection from harm, sterilization, treatment, and zoning. **Improving Occupational Programs for the Handicapped.**

Management Analysis Center, Inc., Washington, D.C.

Spons Agency—Bureau of Education for the

Handicapped (DHEW/OE), Washington, D.C.

Pub Date [75]

Contract—OEC-0-72-5226

Note—231p.

**EDRS Price MF-\$0.83 HC-\$12.71 Plus Postage**

**Descriptors**—Elementary Secondary Education, Exceptional Child Education, Guidelines, \*Handicapped Children, Interagency Cooperation, Job Placement, Needs Assessment, \*Program Descriptions, Program Design, \*Program Development, Program Evaluation, Regular Class Placement, Skill Development, Social Services, Vocational Adjustment, \*Vocational Education

Presented is a manual on improving occupational programs for the handicapped based on a study of 30 existing vocational education programs falling into one of three categories—modified programs for handicapped students in the regular classroom, special programs for the handicapped in segregated classrooms, or special programs for severely handicapped students in special classes or residential schools. Chapters on the following topics are included: laying the groundwork, designing a program, setting up a program, focusing on the student, meeting student needs, preparing for specific skill training, selecting type of vocational training, providing related or academic instruction, obtaining support-

tive and social services, assisting in transition to the work world, conducting job placement and follow-up, and achieving interagency, interdistrict and community coordination and cooperation. The bulk of the document consists of appendixes providing a checklist for program evaluation, abstracts of 30 programs studied in depth, detailed studies of three different kinds of programs, and the methodology used to develop the manual. **Descriptors**—Administration, Behavior Change, \*Computers, \*Delivery Systems, Early Childhood Education, Educational Accountability, Elementary Secondary Education, Evaluation Methods, Exceptional Child Education, \*Handicapped Children, \*Program Effectiveness, Program Evaluation, Special Education, Tutoring

Identifiers—\*Project SHARE

Presented is an overview of the operation of the special education systems used in Project SHARE (Sharing High Yield Accountability with Resource Educators). It is explained that the project grew out of a need to provide service for handicapped children in a sparsely populated area and that the only constants are daily measuring and diagnosing, charting on a standard behavioral chart, and the feedback system. Project components discussed include a resource flow chart, critical variables in administration and the child study system, the instruction and services system (focusing on skills of a tutor), diagnosis, samples of informal reading and math materials, and use of a standard behavior chart. The second half of the document consists of a computer evaluation of the special education program effectiveness (including cost effectiveness) in one school district. (LS)

Descriptors—Bibliographies, \*Blind, \*Case Studies, Diagnostic Tests, Elementary Secondary Education, Exceptional Child Education, Readiness (Mental), \*School Psychologists, \*Student Evaluation, \*Visually Handicapped, Workshops

Identifiers—American Foundation for the Blind

Described are the American Foundation for the Blind 2-day workshops for school psychologists which emphasized various techniques, adaptations, and specific information necessary for effective assessment and understanding of school-aged blind and visually handicapped children. The program and a list of participants for each of three workshops are provided. Workshop segments are noted to include presentations on the incidence and causes of blindness, potential problems, and techniques for assessment. A bibliography is given containing information on 55 publications on assessment and evaluation of the school-aged visually handicapped child. Appended are eight psychological reports (making up the major portion of the document) which include such information as the client's name; ad-

dress; age; visual acuity; diagnosis; reason for referral; general appearance, attitude, and behavior; achievement on tests; summary and recommendations; and test scores. Also appended are tables of norms for tests used in counseling blind individuals, a list of test publishers and distributors, and a sentence completion test form for use with the visually handicapped. Identifiers—Poland

Intended for teachers of severely and profoundly retarded children, the book presents principles of management and education used at a special day care center in Warsaw, Poland. It is stressed that the educational goal is to give the retarded child a chance to develop personally and to play a positive social role in the home and family structure with emphasis on socialization skills. Individual chapters focus on the following topics: guidelines for educational work in the day center, pupil characteristics, an individual therapeutic approach, teaching purposeful motor behavior (including socialization through rhythmic), education for socially oriented behavior, and developing verbal communication. Case studies, photographs, and actual dialogue are used to illustrate main points. (DB)

Identifiers—Elementary Secondary Education Act Title III, ESFA Title III, \*Project FAST

Described are components of Project FAST (Functional Analysis Systems Training) a nationally validated project to provide more effective educational and support services to learning disabled children and their regular elementary classroom teachers. The program is seen to be based on a series of modules of delivery systems

ranging from mainstream teachers working with building principals and parents (module 1) to consultants, specialists from the community, and community agencies (module 3). Stressed is the importance of training teachers in the following developmental objectives: observation of how the child goes about learning, analysis of what each task demands, analysis of the developmental level, prescription of the specific educational program, organization of the classroom, helping children in directing their own behavior appropriately, being receptive to support help, teamwork with peers and teamwork with parents. Explained is a model of a functional learning system which involves various information processing modes, activation through proprioception, symbolic coding of information, a scanning mechanism, and sensory feedback mechanisms. Also included are a flow chart of project implementation, and forms to use at the individual school or school district level. (DB)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, \*Project FAST

Presented is adopter/facilitator information of Project FAST (Functional Analysis Systems Training) to provide educational and support services to learning disabled children and their regular elementary teachers. Briefly described are the three schools in the Essexville-Hampton (Michigan) school district; objectives of the program; program inputs, processes, and outcomes and program schedule. Reported are program outcomes such as statistically significant increases in reading and mathematics achievement levels, a decrease in discipline problems, and expansion of the program to 201 classrooms in the Bay City Michigan, area. Also presented are criteria to be used in the selection of adopters including required target population characteristics, staffing requirements, instructional material requirements, financial resources, and training required of adopters. Part 2 focuses on facilitator information including a listing of available awareness materials (such as a film on Project FAST), product and process objectives, criteria to be used in the rejection of adopters (such as lack of administrative support), demonstration/visitation capability, training capability, and training schedule. **Descriptors**—\*Administration, Decision Making, Elementary Education, Exceptional Child Education, Information Dissemination, \*Learning Disabilities, \*Program Descriptions, \*Program Evaluation, \*Regular Class Placement

**Identifiers**—Elementary Secondary Education Act Title III, ESEA Title III, \*Project FAST

The final report (1974-75) of Project FAST (Functional Analysis Systems Training) contains objectives and evaluation data of the Essexville-Hampton (Michigan) program which is designed to provide efficient educational and support services to learning disordered children and their regular elementary teachers. The first part contains an introduction to the methods and purposes of the project. Described are the three modules for delivering educational services, nine basic teaching skills, a model of a learning system, and a flow chart of a delivery system which incorporates a change process. Listed are accomplishments such as reduction of the time lag between identification of pupils with learning problems and specific treatment, cost effectiveness, and demonstrated exportability. Evaluation data is provided for four performance objectives for each of two project goals—(1) the development and implementation of a demonstration and dissemination model, and (2) monitoring of project activities to show their impact on children. Information for each objective is presented in terms of source of information, analysis of data, date to be completed, and results. Evidence of effectiveness for 1973-74 is summarized and includes expansion of individual educational programs from 20 in 1971-72 to 149 in 1973-74. Appended is a description of a decision-making process for adopter districts to use to determine the goals and objectives for their district. (DB)

**Behaviorally Oriented Programs for Learning Disabled Children.**

Note—16p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Behavior, \*Behavior Change, \*Educational Accountability, \*Educational Methods, Educational Trends, Elementary Secondary Education, Exceptional Child Research, Individualized Instruction, \*Learning Disabilities, Operant Conditioning, Research Reviews (Publications)

Considered in the paper are the contributions of behaviorally and accountability based instruction and therapy approaches to the education of learning disabled students. Pointed out in a section on individualized instruction are advantages (such as shared knowledge of learning goals and ease of evaluation) as well as disadvantages (including neglect of the students' affective behavior and undue stress on overt behavior). An honest and open relationship in behavior modification programs between the modifier and those involved in the behavior change process is encouraged. Shortcomings of the traditional "medical model" approach are reviewed, and the implications of such recent trends as B. Bloom's "Mastery Learning" model and the attention research of D. Zeaman and B. House are discussed. (CL)

**Toward an Improved Regional Delivery System for Special Education Support Services in Massachusetts: Resource Linking System. Concept Paper.**

Pub Date Aug 75

Note—29p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Conceptual Schemes, \*Delivery Systems, Exceptional Child Education, \*Handicapped Children, Information Dissemination, Information Utilization, Inservice Teacher Education, \*Models, Needs Assessment, \*Regional Programs, \*Special Education, Technical Assistance

Proposed is a regional (Northeast) model to stimulate and draw together local and state services in a Resource Linking System for special education. It is explained that the model would provide the following five functions: appraisal of teachers' training needs, management and development of materials, field-based inservice training for teachers and administrators, technical assistance, and information dissemination. Detailed are the four main objectives of the model: (1) to analyze needs assessment data of local educators gathered from regional surveys; (2) to link available national, state, and regional resource systems to local services; (3) to train "peer enablers" (master teachers) to consult with local teachers or administrators; and (4) to provide a resource and knowledge utilization system for replication in other areas. **Comprehensive Needs Study of Individuals with the most Severe Handicaps. Executive Summary.**

Urban Inst., Washington, D.C.

Spons Agency—Rehabilitation Services Administration (DHEW), Washington, D.C. Office of Human Development.

Pub Date 10 Jun 75

Note—43p.; For the entire study report, see EC 081 472

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Architectural Barriers, Definitions, Demography, Employment, Exceptional Child Research, Exceptional Child Services, \*Federal Legislation, Financial Policy, Incidence, \*Needs Assessment, Rehabilitation Programs, \*Severely Handicapped, Sheltered Workshops, Transportation, \*Vocational Rehabilitation

The summary of the comprehensive needs study of individuals with the most severe handicaps presents major findings regarding definitions, incidence, needs, and current services for the severely handicapped. It is explained that information was gathered through data file analysis, client surveys, a review of the literature, and constituency impact assessments. Among findings reviewed are that the total U.S. population with most severe handicaps is 10,067,000; that age plays a crucial role in the impact of a disabling condition; that minimal efforts have been made by local governments to eliminate barriers in public housing and facilities; that transportation needs were second only to vocational placement in perceived need; that low employment rates are related to such factors as capital disincentives and employer discrimination; and that development of a weighted case closure system, reduction of caseload size and an intensive training program were felt to facilitate serving the severely handicapped. Among program and finance options suggested are consumer-run self-help organizations and a special revenue sharing plan. A final section analyzes key policy interpretations and the implications for such services as transportation, employment, health coverage, income maintenance, and consumer involvement. (CL)

**Identifiers**—\*Address (Speech), Japanese Linguistics Workshop

This paper examines the following points: (1) how Japanese personal pronouns are used according to the speakers' social constraints, and (2) differences between males and females of the same occupational group in their use of personal pronouns. The dialect analyzed is the speech of Japanese faculty members at the University of Hawaii. A speaker of Japanese must evaluate his addresses in terms of a vertical axis of power and a horizontal axis of solidarity and their respective positions before selecting the proper first and second person pronouns. Pronouns may change during a conversation as relationships are discerned. Analysis of the professors' speech revealed that men frequently use a very informal and intimate first person pronoun with friends or family; women use more polite and less intimate pronouns with their parents than men do. Both men and women used kinship terms ("mommy," "daddy") instead of personal pronouns with their children. In use of second person pronouns, all males used different pronouns depending on their addressee, while 60 percent of women varied their use and 40 percent did not. Kinship terms are often used with siblings and parents, and women use a more formal pronoun ending with family and friends. (CHK)

**Criterion Referenced Tests to Accompany "Artes Latinae," Level 1, Book 1. Tentative Edition.**

Philadelphia School District, Pa. Office of Curriculum and Instruction.

Pub Date 73

Note—41p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Achievement Tests, Classical Languages, \*Criterion Referenced Tests, \*Language Instruction, \*Language Tests, \*Latin, Objective Tests, Secondary Education, Second Language Learning

These tests are designed to measure the achievement of each pupil at the approximate midpoint of each unit in "Artes Latinae," Level 1, Book 1. They were produced in response to the need expressed by many teachers to provide a means of more frequent evaluation of pupil progress. Tests for 13 units are provided. They supplement the unit tests produced to accompany *Artes Latinae* by the Encyclopedia Britannica Education Corporation, and may also be used as classroom exercises. Test questions, which call for written responses, consist mostly of fill-in-the-blanks, questions to be answered in Latin, descriptions to be made, nouns to be declined, syntactic and morphological changes, and English words with Latin roots to be identified. Nearly all questions and exercises are accompanied by drawings to aid in responding. (SCC)

**Ordinal Expressions in Japanese. Papers in Japanese Linguistics, Vol. 2, No. 1.**

University of Southern California, Los Angeles.  
Dept. of Linguistics.

Pub Date 73

Note—18p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Descriptive Linguistics, \*Japanese, Language Usage, Linguistic Theory, \*Morphology (Languages), Nominals, Number Concepts, \*Numbers, \*Number Systems, Semantics, \*Syntax

**Identifiers**—Cardinal Numbers, Japanese Linguistics Workshop, \*Ordinal Numbers

The varied forms and semantic factors of Japanese ordinal expressions are related to one another in a coherent system. In Japanese, the cardinal number form is a numeral compound in construction with a referent. The numeral compound consists of a number and a numeral adjunct. Numeral adjuncts are derived from bound forms, or numeral suffixes, and free forms, or count nouns. Underlying the behavior of Japanese ordinals is a basic division of two types of sequences: quantitative (open-ended and composed of independent members) and constitutive (closed, with interlocking and interdependent members). The form associated with quantitative sentences consists of a "me" ordinal modifying by means of the particle "no" a class noun or a noun denoting a container. Numeral adjuncts in quantitative sentences specify four kinds of units: container, partitive, collective, and generic. In constitutive sentences the ordinal affixes "-me," "-dai," and "-banme" are used, where "dai" has a more formal connotation than "me" and "banme." A number of special constitutive sequences such as standard measures, time units, appellatives, and quasi-appellatives are grouped and explained separately. (CHK)

**Descriptors**—Descriptive Linguistics, \*Japanese, \*Language Classification, \*Language Styles, \*Language Variation, Oral Communication, Speech Skills, \*Standard Spoken Usage

**Identifiers**—Japanese Linguistics Workshop

This paper investigates the treatment of Japanese speech levels and styles (known as "keigo") in previous studies and discusses the problems involved. An attempt is made to reconstruct the classification of speech levels and styles in modern colloquial Japanese. Speech styles change according to age, social status, sex, and the relationship of the speakers. "Keigo" may be classified into three types: the exalted, the humble, and the polite. The writings of several linguists on "keigo" are summarized, and they reveal a controversy over treatment of polite or elegant words. The following reconstruction of speech classifications is suggested: Speech consists of two components: level and style. Level has subdivisions of honorific and neutral, while the honorific level is further classified into exalted, humble, and polite. The exalted is used to show a speaker's respect for the action or state of a person in higher status. The humble shows humility with respect to the action or state of the speaker or listener. The polite shows a speaker's decision to speak politely or carefully through his expression on the topic. Each level is further modified by informal or formal style, conveying directly the speaker's evaluation of the listener. (CHK)

**Identifiers**—\*Modern Literary Tibetan, NDEA Title VI

This textbook is designed to teach modern literary Tibetan and to serve as a grammar and handbook of standard Tibetan. The development of modern written Tibetan has been so influenced by printed materials from many surrounding countries that it is vastly different from classical Tibetan. Borrowings of vocabulary, style, and grammar have created a new written form of the language. This volume is designed to be used as a year's course in learning modern literary Tibetan, and may be used as a self-taught course. In Part 1, the basic features of the grammar are introduced, and the ability to apply these to reading passages is developed. Part 1 will give the student a command of the basic morphological and syntactic features of the modern written language and a basic vocabulary of 1-2,000 items. Part 2 consists of a series of reading selections from Tibetan, Chinese, Sikkimese, and Bhutanese materials, with translation, vocabulary, and explanatory notes. Aspects of Tibetan grammar and style are explained through these writings, which are taken from recent publications on politics, science, arts, news, and history. Interlinear translation is used throughout, along with a fluent English translation. (CHK)

**Identifiers**—\*Piaget (Jean)

This paper reports the findings of an investigation into the development of the use and understanding of locative and temporal prepositions in 94 children aged from 18 months to 8 years. The research was carried out as part of the Project "Language Development in Pre-School Children," directed by Gordon Wells, at the University of Bristol, School of Education. The research represents an attempt to integrate the theoretical and methodological orientations of linguistic semantics and Piagetian theory in the study of the acquisition of a limited domain of word-meanings. Detailed analyses are presented of particular strategies utilized by children at various ages and stages of development in the comprehension and production of spatial and temporal relational terms. It is suggested that such strategies result from specific interactions between the developing systems of language, cognition and perception, the overall forms of which are determined by the socio-cultural context of the use of the relational terms. In conclusion, partial critiques are presented of one-sided applications of semantic features theories and Piagetian theory in previous explanations of the acquisition of spatial and temporal relational terms. tional Materials, Language Guides, \*Language Instruction, Manuals, \*Pattern Drills (Language), \*Phonotape Recordings, Scripts, Secondary Education, \*Second Language Learning

The tape scripts in this Hebrew instruction manual are intended to accompany audio tapes prepared for use at level 2 in New York City secondary schools, to present and drill grammatical structures. The scripts provide the teacher with a variety of grammar drills; enable the teacher to use the drills with or without tapes; permit review of specific parts of a tape; provide reading practice for previously mastered audiolingual material; present a list of practice vocabulary; and provide material to facilitate independent study programs. A table of contents helps to categorize the script in relation to the tapes and pinpoints the language structure to be taught. Each script is organized with syllabus number and topic followed by a list of vocabulary to be introduced. Procedures for script and tape use are suggested. Ten tape scripts follow, focusing on Hebrew verbs. (CHK)

**Identifiers—**PIRATS, Whitworth College (Washington)

The modern, miniaturized computer as in information processor has radically altered the logic of three commonplaces regarding computer-based learning: (1) that the machine exerts a dehumanizing effect on the educational process, (2) that computers are too expensive to prove cost-effective in education, and (3) that the computer's facility in reiterating lessons violates the principle of individualization. The specific computer-assisted instruction (CAI) system at Whitworth College suggests point-for-point counter-arguments: (1) that careful CAI lesson design can actually enhance the humanization of

course material, (2) that time-shared minicomputer systems have dramatically reduced user costs, and (3) that a computer-driven lesson sequence can prove to be unique (and thus individualized) each time it is run. The computer therefore can be humane, feasible, and can serve as a semi-intelligent extension of the instructor. The paper includes comments by student users plus a brief discussion of how instructors determine the appropriateness of curricular material for CAI. (Author)

This paper is concerned with the treatment of anaphoric phenomena in a semantically based transformation grammar. It is argued that account of anaphora in terms of coreference are no better than accounts in terms of identical NPs; instead, it is proposed that a unified account of anaphora, which covers both quantified and unquantified NPs, may be given in terms of identity of bound variables within a system that employs the device of abstraction operators. **Identifiers—**\*Questions

This article describes phonological and semantic characteristics associated with the surface structure of some Japanese sentence intonations. The aim of the long-term study is to show the place of intonation in the total system of Japanese grammar. This particular part of the study is limited to the group of intonations which are characterized by the "the terminal pitch rising." The prosodic features which are possible correlates of certain grammatical functions were isolated and quantified, using a spectrograph. The samples were provided by four speakers of standard Japanese, with every informant making five recordings of each sample item. A total of eight different intonations were identified in the terminal rising group. Direct questions in Japanese, of which there are two types, both terminating with a rising intonation, were used to demonstrate the role of this type of intonation. The conclusion is that the question in Japanese is a response-eliciting function, specified by a terminal rising intonation. The unique logical order between question and answer is attributed to the basic function of intonation. Intonation is primarily tied in with the concurrent statement, and the response which is signaled by the rising intonation refers strictly to the affirmation or negation of that statement. **Identifiers—**Count Nouns, Mass Nouns

This study is based on a sample of about 100 languages with numeral classifiers. An attempt is made at reconstructing the dynamics of the process by which such systems arise, develop, and decay. Among the hypotheses advanced are the following: (1) numeral classifiers involve the overt expression of one kind of quantification, namely, counting by units; (2) the numeral classifier construction is modeled after the measure construction with mass nouns and hence arises in languages with previous mass-count noun distinction; and (3) the classifier in a numeral classifier language has the same function as a singulative does in a language with a collective-singulative distinction. **Identifiers—**\*Word Association

This paper gives the results of a controlled experiment on word association. The purpose was to establish norms of commonality of primary descriptive adjective responses to common nouns. The stimuli consisted of 203 common nouns selected from 10 everyday topics of conversation, approximately 20 from each topic. There were 350 subjects, 50% male, 50% female, selected from various regions in the United States and stratified into three age groups: 15-22, 51-65, and 66 and older. The norms of commonality were established by counting every identical repetition of noun-adjective pairs. Two tables give: (1) the index of common nouns used as stimuli in the experiment; and (2) the norms of descriptive adjective responses to common nouns, including the number of repetitions for each adjective. The identical response pairs with the largest numbers, such as 170 for winter-cold and 107 for circle-round, are considered of significant interest. (TL)

**Identifiers—**\*Neglected Languages Materials Conference 1974, Southeast Asian Languages

The material development needs for the Southeast Asian languages are analyzed as follows: (1) both student and reference grammars must be produced; (2) student and reference English-foreign language dictionaries are needed; (3) research is needed in sociolinguistics, semantic analyses, linguistic surveys; (4) elementary, intermediate and advanced teaching materials are lacking in primary and secondary languages; and (5) teaching facilities and centers for the study of these languages are lacking. A report from the conference held in 1959 at the American Council of Learned Societies is also furnished here, with its determination of needs and recommendations for research. Requirements included basic language courses, graded readers, reference grammars, orthographic systems, student dictionaries, instructional tapes, area handbooks and other resources. General recommendations for pro-

grams to develop neglected languages were outlined, and specific needs for Burmese languages, Thai, Lao, Cambodian, Vietnamese, Indonesian languages and Tagalog were detailed. (CHK)

Pub Date 74

Note—12p.; Paper presented at the Conference on Material Development Needs in the Uncommonly Taught Languages: Priorities for the 70's (Columbia, Maryland, Sept. 29-Oct. 2, 1974)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Chinese, Chinese Culture, College Language Programs, Dictionaries, Higher Education, Instructional Materials, \*Language Instruction, Language Programs, \*Material Development, Phonotape Recordings, \*Reading Materials, Textbook Content, Textbook Evaluation, Textbook Preparation, Textbooks, \*Uncommonly Taught Languages, Vocabulary Identifiers—\*Neglected Languages Materials Conference 1974

This article surveys the teaching materials available in the United States for teaching Chinese at the college level. Suggestions are made for the improvement of existing materials and for the development of new ones. The main problems associated with the production and usefulness of language materials are that: (1) languages change through time and therefore materials are quickly out of date; (2) teachers and students vary in goals, temperament, and techniques; and (3) language pedagogy theories are constantly evolving. In addition, intensive courses create a qualitative difference in the need for materials. Academic intensive courses, unlike those offered in the government, must be targeted equally toward speaking and reading. The majority of the students in academic courses are preparing for higher-level research, for which they require reading proficiency in the language. In view of this, although all currently available Chinese materials could stand improvement and updating, reworking priorities should be for materials in the reading phase: (1) introductory general readers, and (2) intermediate short-form character texts especially on culture in Mainland China and updated newspaper readers. The available dictionaries seem to be adequate, but a periodic newsletter would be useful for continually updating the rapidly fluctuating political vocabulary. Recommendations are also made concerning spoken Chinese texts and taped materials. (TL)

This publication is designed to help teachers introduce pupils to the role of music, dance, and poetry in the civilization and culture of the Ancient Greeks and Romans. It may be used as an interdisciplinary course for secondary school pupils or to expand curricular offerings in Latin and Greek. Focusing on the pervasive influence of music within these cultures, examples of ancient music, descriptions of dances performed and excerpts of classical literature are all included. Unit 1 gives background information to the teacher regarding the study of music as part of Greek and Roman education and the attitudes toward music in those cultures. Names for musical instruments and drawings of them, Latin songs, music and lyrics, the place of music in mythology, and the dance in the ancient world are all discussed in the remaining four Units. A bibliography for teachers, musical versions of Horace's "Odes," and a form for evaluating the guide are also included. (SCC)

The guide is designed to assist teachers at the secondary level in using "Lingua Latina Secundum Naturae Rationem Explicata," the Nature Method Institute's Latin series. Particular emphasis is placed on the early chapters of the course. Abundant materials in the form of pattern practices and mimicry drills are given as supplementary material for the book's first four chapters. There is also a unit on Latin songs and one on holiday materials (recipes and song translations). Each chapter also has cultural content. A form for evaluating the guide is included. It is suggested that the initial presentations be aural-oral with the students' books closed, followed by pattern practices, then an explanation of the grammar in Latin accompanied by simple Latin questions, written pattern practices, and finally one section assigned as homework or written classwork and another on English derivatives of Latin lexical items to be done orally and then in written form. It is suggested that a workbook be set up to keep a record of these derivatives. (SCC)

This guide is designed to assist teachers using the "Cambridge Latin Course," a multimedia instructional system developed in the United Kingdom which can be adapted to the needs of pupils of varying backgrounds, ages, and abilities. The Guide focuses on Unit I, the first level of the Cambridge materials. The materials are especially suited to beginning learners of Latin in grades 7 and 8, but they may also be used with beginners in grades 9-12. The general approach to each stage in Unit I is as follows: (1) aural-oral presentation, using model sentences with visual cues and tape recording; (2) reading and writing, which involve reading aloud and little use of translation; (3) presentation of English derivatives and cognates, involving word games; (4) additional reading and writing, again with the use of visual cues and audio tape; (5) presentation of material on culture with the use of a variety of audiovisual aids, quizzes and written games; and (6) evaluation of pupil progress at the end of each stage. The major portion of the guide consists of curriculum and teaching suggestions for each stage in Unit I, specifically Latin questions, activities, derivatives and cognates, and word games. Two appendices conclude the guide: a bibliography for teacher reference and a summary of recent research on the value of Latin in upgrading the basic skills of pupils. A form for evaluating the guide is also included. (SCC)

**Descriptors**—\*French, Instructional Materials, \*Interference (Language Learning), Language Instruction, Language Skills, Phonetics, \*Phonics, Pronunciation, \*Second Language Learning, Speech Skills, Teaching Methods, \*Textbooks

This is the first phonetics book to be developed for use in first-year French courses. The intent of the book is to help the student acquire confidence in his ability to look at 85 percent of the words in the French dictionary and be able to pronounce those words correctly, as a result of his sounding out the words. When an American student looks at a foreign word, he may associate it with letters or groups of letters in the American phonic system. After an individual has learned to read (i.e. to associate sounds with symbols), he has difficulty understanding that a letter has a different sound in another language. This becomes evident when a language teacher pronounces a foreign word, and the student displays lack of comprehension until the word is presented to him in visual form. A concentrated comparative study of the sound-symbol correlatives in both the mother tongue and the target language makes the student aware of the similarities and differences of the sound systems of the two languages. The approach described is a systematic effort to associate the distinctively French sound with the printed letters. (Author/CLK)

**Descriptors**—English (Second Language), \*English for Special Purposes, Instructional Materials, Language Instruction, Language Teachers, \*Material Development, \*Teacher Developed Materials, Textbook Content, Textbook Evaluation, \*Textbook Selection

This article points out the difficulties teachers have in selecting suitable materials for teaching English for special purposes. Universal textbooks, designed to suit all possible situations, are not specific enough. The article proposes ways in which a broader spectrum of materials might be obtained: (1) by producing textbooks with optional components, or (2) by producing a number

of specialized textbooks. In the meantime, however, universal textbooks prevail, especially in developing countries, and the teacher is therefore burdened with the extra task of adapting these textbooks to specific situations. Suggestions are made for an approach to adaptation, and an example of an adapted lesson is given. Spanish and English versions of the article are printed side by side. (TL)

Descriptors—Behavior Patterns, \*Classroom Observation Techniques, Computational Linguistics, Computer Programs, \*Interaction Process Analysis, \*Language Instruction, Research Methodology, \*Second Language Learning, Student Teacher Relationship, \*Verbal Communication

Identifiers—Matrix Analysis, \*Sequential Processing

This paper describes a method to extract, by computer, maximum amounts of sequential information on pattern frequencies underlying verbal interactions in the foreign language classroom. For this purpose, an observation instrument was developed which was expected to allow the study of the structure of the interaction process; it was hypothesized that such interaction would move with a certain cyclical regularity and that sequential patterns of verbal behavior would be obtained which, in descending order of occurrence, would characterize dominant interactions. A computer program was written which, following certain conditions, segments the total interaction process into strings, lifts out embedded patterns, and orders them into groups of recurrent patterns. Examples are presented to show that sequential processing provides much more meaningful information on a classroom interaction than could hitherto be obtained from matrix analysis. The implications of research in this area for foreign language teaching are briefly discussed. (Author)

This is a study of linguistic variability among social levels in West Germany and of the problems associated with doing such an analysis. The data, ordered according to sex and social levels, were collected from young children retelling narratives heard on tapes. The report represents a comprehensive study of the children's syntactic performance and language usage. The discussion is within the transformational-generative framework and the classification of the syntactic patterns is based essentially on Chomsky. There are five chapters: (1) introduction to the investigation; (2) discussion of the adequacy of generative grammar and the assumptions taken by such a model in describing and interpreting linguistic phenomena; (3) description of the methodology used for collecting the data and for its analysis; (4) presentation of the results of the study, which are subsequently tabulated in the appendix; and (5) discussion of language usage forms resulting from socially induced behavior

strategies specific to social levels—Bernstein's concept of verbal planning. (TL)

Identifiers—\*Wales

The Faculty of Education of the University College of Wales is responsible for the initiation and coordination of research on the bilingual situation of Wales. This pamphlet outlines a program of work for this research. It is intended to show the individual researcher the overall aims and problems of the program and to suggest specific research topics. The introduction is divided into the following sections: (1) reasons for the research program; (2) the scope of research work; (3) need for realistic, rather than academic, to be researched; (4) special educational problems in a "mixed language" area; (5) standardized tests of intelligence and attainment and quantitative measures of Welsh linguistic background; (6) order of priority; and (7) research by groups of teachers. The main areas of investigation for the program have been divided into three: (1) the development of tools, for a reliable investigation, e.g., standardized language and intelligence tests; (2) the undertaking of studies using the tools to assess relationships between Welsh linguistic background and educational attainment, assess efficiency of alternate methods of language teaching, and survey general attitudes toward the bilingual situation; and (3) the initiation of projects connected with material development, student placement, national education objectives, reading surveys, and school conditions. Identifiers—\*Wales, Welsh Linguistic Background Scale

This pamphlet outlines an attempt to provide an instrument by which the linguistic background of Welsh children can be measured. In a group of Welsh-speaking children there are different degrees of Welshness, and it is essential, for educational purposes, that the degrees of Welsh linguistic background be estimated. The two versions of the Welsh Linguistic Background Scale, one in English and one in Welsh, are included, and instructions for their administration are given both in English and Welsh. Instructions for scoring follow. The validity and reliability of the scale have been tested and confirmed. The results from such tests would aid in student placement, later in job placement, and in the standardization of intelligence and attainment tests. Apart from its use as a necessary tool for research, the scale is recommended as a practical guide for teachers and others who are concerned with school organization. (Author/TL)

Identifiers—\*Wales

The British Education Act of 1944 stipulated that instruction and training be offered according to the ages, abilities, and aptitudes of pupils. One specific problem concerned the entry to secondary schools of pupils from a variety of primary schools. The resulting problem of determining the different aptitudes and abilities has been partially solved by the use of standardized tests. This pamphlet is designed to provide a brief introduction to the methods of constructing and using standardized tests, and to discuss special difficulties encountered in the construction and use of standardized tests in Wales, a mixed language area. Specifically discussed are the various kinds of standardized tests, what is meant by standardization, what such tests determine, the choice of tests, comparison of the results of various tests, and the concepts of mental age, attainment ages and quotients. Identifiers—Daniels Figure Reasoning Test, NFER Test 2, Ravens Progressive Matrices, \*Wales, Welsh Linguistic Background Scale

This report discusses the relationship between bilingualism and mental development of bilingual children. After a review of the relevant literature, a specific study is described. The linguistic background of 648 children from 29 schools, age 10 through 12 inclusive, was measured with the Welsh Linguistic Background Scale. General intelligence was assessed with three nonverbal tests: Raven's Progressive Matrices, Daniel's Figure Reasoning Test and the Non-Verbal Test No. 2 of the National Foundation for Educational Research. Objectives were to: (1) determine which of the nonverbal tests was the most independent of linguistic background and hence most suitable for intelligence testing in mixed language areas, and (2) describe the relationship between linguistic background and test scores. Conclusions are that: (1) none of the tests used is completely suitable for evaluating Welsh-speaking children if the results are to be compared with those of English-speaking children; (2) Welsh-dominant bilingual children scored consistently lower than English-dominant children; (3) a correlation exists between test performance and degree of bilingualism; (4) the location of a community accentuates the influence of bilingualism; (5) occupational levels and socioeconomic status must be considered when interpreting test scores; and (6) Raven's Progressive Matrices is the most independent test. Descriptors—Bilingual Education, Bilingualism, \*Bilingual Students, Educational Policy, Language Skills, \*Language Tests, Reading Ability, Reading Skills, Standardized Tests, \*Test Construction, Testing, Test Reliability, \*Welsh, \*Word Recognition

Identifiers—\*Wales

This pamphlet discusses the need for reliable standardized tests for the selection and classification of Welsh-dominant students in Wales and for the evaluation of their language skills. Because of the correlation in performance, the standardized word-recognition test described here applies to predominantly Welsh-background individuals and not to populations with intermediate degrees of

bilingual background. Specifically discussed are: (1) the foundations of reading ability, (2) standardizing the test, (3) the population sample to be tested, (4) the uses of the test, (5) test reliability, (6) test administration procedures and (7) the calculation of reading age. A sample test and sample scoring sheet are provided. (CLK)

Descriptors—\*Annotated Bibliographies, Classroom Materials, Curriculum Guides, Dictionaries, Grammar, \*Instructional Materials, \*Language Instruction, Reading Materials, Reference Materials, Resource Materials, \*Second Language Learning, Teaching Guides, Teaching Methods, Textbooks, \*Welsh, Word Lists

Identifiers—\*Wales

This bibliography lists 136 items which may be useful to anyone teaching or taking Welsh as a second language. Each entry includes the usual bibliographic information, some include annotations, and some are accompanied by quotations from reviews. About half the titles are in English, and the other half in Welsh. The annotations and quotations are also partly in English and partly in Welsh. The items listed include: (1) instructional materials for all levels, including self-instructional material: teaching guides, curriculum guides, course outlines, workbooks, spelling books, translations, and some literature to be used in the classroom; (2) dictionaries, vocabulary lists, and grammars; and (3) works about the grammar of Welsh, the history of Welsh, second language teaching methodology, and the place of Welsh in the school system of Wales. Descriptors—Adult Learning, \*Adult Students, Bilingualism, \*Course Content, Language Instruction, Language Role, Language Usage, \*Learning Motivation, News Media, \*Second Language Learning, Social Factors, Student Motivation, Television Viewing, Verbal Communication, Vocabulary, \*Welsh

Identifiers—\*Wales

This pamphlet is a report of a study of motivation among adults learning Welsh in Wales. It is claimed that the situations in which a language is likely to be used and the linguistic aim of the learners should be taken into consideration when the nature of the vocabulary to be included in a second language course is determined. Recent research work in vocabulary selection for second-language learning in France, Canada, and Ireland is reviewed. The study aimed at discovering, by means of a questionnaire issued to 113 classes of adults learning Welsh, the purpose for which the language was being learned and the situations in which the newly acquired command of the language is most likely to be used. It was found that the most frequently mentioned reasons were concerned with a desire to be able to follow news and other programs on television in Welsh and to be able to participate in social intercourse through the medium of the language. It is recommended that the planners of courses in Welsh as a second language for adults pay special attention to the vocabulary needed for understanding television news bulletins and for understanding and participating in everyday conversations among Welsh-speaking friends. The Role of Question-Answer Interactions in Language Development.

Pub Date 75

Note—8p.; Paper presented at the Conference of the Midwest Modern Language Association (Chicago, Illinois, November 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Child Language, Cognitive Ability, Cognitive Development, Cognitive Processes, Cultural Context, \*Language Development, Language Learning Levels, Language Usage, Linguistic Competence, Linguistic Performance, Psycholinguistics, \*Question Answer Interviews, \*Social Environment, \*Syntax

Identifiers—\*Questions

Question-answer interactions were chosen as an effective means of investigating the effect of the linguistic environment on language development. Research was reviewed indicating that the improvement in question and answer performance of a maturing child is based on the advancement of both his linguistic and cognitive abilities and that the adult systematically accommodates his speech with a child to those abilities. A categorization scheme was devised for the ranking of question types according to their cognitive and syntactic complexity and for the rating of answers according to their appropriateness and syntactic level. It is proposed that detailed analyses of a variety of adult-child question-answer interactions should provide important information concerning the theoretical role of adult accommodation to the child's level as well as principles leading to new language training techniques. This is the first annual report of the National Advisory Council on Bilingual Education summarizing the condition of bilingual education in the U.S. and the administration and operation of Title VII. The Council recommends, in summary: (1) that communication among groups in bilingual-multicultural education be continuous; (2) that states be assisted in developing bilingual programs; (3) that testing for bilingual students be developed; (4) that cross-cultural orientation to a target group be recognised in bilingual programs; (5) that funding be increased; and (6) that bilingual-multicultural education be promoted as quality education for all students. The recommendations are amplified in the report with specifics of implementation and administration. A legislative statement of purpose and definition summarizes the passage of the Elementary and Secondary Education Act of 1965 and subsequent amendments. The history and development of the National Advisory Council from 1974 onward is detailed, followed by the 1974 recommendations of the Council. Extensive statistics on the number of non-English-speaking children and their educational failure support the need for bilingual-multicultural programs. Federal and state programs in bilingual education are detailed, and the activities and future plans of the National Advisory Council noted. (CHK)

Identifiers—Canada (Montreal), Immersion Programs, \*Saint Lambert Experiment

This article discusses the history of the St. Lambert bilingual education experiment in Montreal, Canada, and bilingual education in general. The experimental project was begun because parents did not feel that the traditional language classes were successful in teaching their children French. The belief that native language skills would suffer, and simple resistance to French, delayed the implementation of an immersion program at the kindergarten level. It had marked success: academic achievement, mother tongue competency, and other areas of intellectual development were not hampered. By grade 7, children who had begun in the program not only performed better than peers who had been through English-only programs in vocabulary tests, reading, spelling, and language skills, but also performed at or above the level of their French-Canadian peers in most tests of French language skills. Attitudes towards French-Canadians also improved, as well as general thinking skills, as a result of the bilingual program. Reasons for the program are outlined, including criteria for program-participant selection. The St. Lambert project is compared to other bilingual projects, and the present Canadian language situation is discussed. (CLK)

**Identifiers**—\*Australia

The conference was held to alert teachers and other interested persons to the complexities of linguistic diversity in Australia, with attention focused on the immigrant child. This report includes the individual conference papers, presented by Marta Rado, Bert Townsend, Michael Clyne, Alan Matheson, and Rede Lar, and the comments of symposium and forum participants. The implications of bilingualism and biculturalism are analyzed from the standpoint of language development, language contact, social integration, social mobility, and communication interference. Principals and teachers elaborate on the practical problems encountered in schools with a high degree of immigrant intake. The Multilingual Project, a form of bilingual education developed at La Trobe University, is discussed by school staff who had direct experience with the materials, and its theoretical foundations are described. English-speaking teachers can participate in this program with the help of bilingual pupils, parents, or other assistants. Materials are student-centered, with emphasis on conceptual development. Learners may study in the language of their preference. Project materials are produced in parallel forms of English and immigrant languages, and the units are suitable for independent or small group study. (Author/CLK)

**On the Psychological Reality of Underlying Phonological Representations.**

Pub Date 6 Nov 75

Note—15p.; Paper presented at the SAMLA Conference (Atlanta, Georgia, November 6, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Cognitive Processes, English, \*Generative Phonology, Language Research, \*Linguistic Competence, Linguistic Performance, Linguistic Theory, \*Native Speakers, Phonetics, Phonology, \*Pronunciation, \*Psycholinguistics, \*Stress (Phonology), Suprasegmentals, Syllables, Vowels

In "The Sound Pattern of English," Chomsky and Halle maintain that the phonetic representation of most words can be generated from underlying forms and a small set of rules. Since these underlying forms are frequently close to the traditional spelling, we may hypothesize that literate native speakers share comparable internalized rules which enable them to agree on the pronunciation of new words. Twenty subjects were asked to pronounce 30 little-known English words. Because Chomsky and Halle's rules are based in part on learned Latinate vocabulary, the words were evenly divided between those entering English from Latin Greek, and Germanic sources to test for differences in performance relative to word origin. While the subjects averaged 81 percent agreement on stress assignment, the number of segmentally distinct responses ranged from one to ten per test word with an overall average of five. On the other hand, a majority of the subjects agreed in their pronunciation of 21 of the 30 words. The subjects demonstrated even more agreement in their interpretation of vowel graphemes under the same conditions of stress and syllable type. Chomsky and Halle's system reflects a fair degree of psychological reality, but it exceeds our competence on many points. (Author/CLK)

**Sociolinguistic Aspects of Chinese Language-Teaching Materials.**

Pub Date 28 Nov 75

Note—16p.; Paper presented at the Chinese Language Teachers Association Meeting (Washington, D.C., November 28, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Chinese, Contrastive Linguistics, Cultural Awareness, Instructional Materials, \*Language Instruction, Language Patterns, Language Usage, \*Language Variation, \*Material Development, Political Influences, Second Language Learning, \*Sociolinguistics, Textbooks

**Identifiers**—\*China

Because of the language changes that have taken place in the People's Republic of China since 1949, Chinese can be seen as a language divided between the pre-1949 varieties and the post-1949 ones. What is taught in the United States does not reflect the current Chinese situation, partly because most of the native language teachers in the United States left China in 1949. The changes that have taken place in the language of the People's Republic, which include phonological, lexical, and syntactical elements, as well as situational ones, must be taken into account in language instruction. A student of Chinese should acquire linguistic and sociolinguistic competence and an awareness of both the pre-1949 and the post-1949 varieties of Chinese. Therefore, Chinese language teaching materials need to deal with the sociolinguistic variants. This can be done by providing existing texts with supplementary materials that make use of a contrastive approach to present the variant usages. (Author/CLK)

**Identifiers**—\*Finland

This paper reports how Finnish student teachers and pupils rate the importance of objectives in English language instruction, and compares them with ratings of inservice teachers from a previous study. Forty-two teachers from post-graduate teacher-training schools and 131 students, aged approximately 17, from two schools, were involved. Student teachers reported that the most important cognitive skills were the ability to distinguish and repeat sentences, word and sounds, comprehension of a text, and ability to converse in English. The least important were translation ability and factual knowledge of English literature and customs. In the affective domain, the important goals were positive attitudes toward studying and speaking English, while the least important were use of English in spare time and developing empathy and a sense of responsibility. Students' responses were generally in agreement, with listening and reading comprehension and speaking ability the most important. Factor Analysis compared these results with those of inservice teachers, who considered traditional objectives slightly less important than student teachers, and audiolingual skills more important. Questionnaires and rating scales are appended. (CHK)

**Descriptors**—\*College Language Programs, \*Community Colleges, Curriculum Development, Higher Education, \*Language Instruction, Modern Language Curriculum, \*Program Design, Second Language Learning, Second Languages, \*Spanish, Teaching Methods

The alternatives to the traditional intermediate or second-year courses in community colleges are three student-centered plans designed for colleges with low or high enrollment of second-year Spanish students. Plan A is a two-year program of Spanish instruction. It consists of Spanish 101 and 102 and eight four-week minicourses, including two different grammar minicourses during the first four weeks of instruction. Plan B is a two-, two-and-a-half-, or three-year program. It includes Spanish 101, Spanish 102, and also eight four-week minicourses. These courses may be taken during two, three, or four semesters. Students may choose from 12 different minicourses. Plan C is an accelerated one-, one-and-a-half-, or two-year program. It enables students to complete Spanish 103 and Spanish 104 in one or more semesters. They could take both courses simultaneously. Students receive credit on completion of eight four-week minicourses. Charts for each plan and a list of suggested minicourses are included. These alternatives may be offered in other languages. **On Processing Conditional Sentences.**

Pub Date 75

Note—19p.; Paper presented at the Conference on New Ways of Analyzing Variation in English (NWAVE), (4th, Washington, D.C., October 24-25, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Ambiguity, \*Cognitive Processes, Discourse Analysis, Expressive Language, Function Words, \*Generative Grammar, Intonation, Language Role, Language Styles, Language Usage, Linguistic Theory, Mass Media, Psycholinguistics, Publicize, Punctuation, \*Semantics, \*Sentence Structure, Syntax

**Identifiers**—Conditional Sentences, \*Language Processing

Thirty informants were presented with sets of clauses punctuated as in the pattern "S1. If S2. S3" and asked which clause, S1 or S3, the "if" clause modified. Independently, several linguists judged the sentences "S1, if S2" and "S2, if S3" acceptable. Missing intonational clues or improper punctuation, which frequently occurs in advertising, could force a processing grammar to disambiguate the qualification in the above. Semantic data alone prove insufficient for this disambiguation process; anaphoric and temporal relationships will serve to disambiguate in such cases, but are not always present. If Strawson's "Indirectness Condition" is elaborated by examining the types of non-truth-functional relationships leading from the antecedent to the consequent, a hierarchy which predicts the informants' selections is established. This pragmatic hierarchy, causal/pseudo-causal/inductive/inductive and deductive/inductive, would aid the processing of potentially ambiguous clauses. It is claimed that the same hierarchy could be applied to disambiguate sentences of the forms "S1. If S2. S3." Further, it is claimed that this hierarchy applies within a generative grammar to limit the acceptability of conjoining arbitrary sentences with "if." (Author/TL)

Rodman, Robert  
Right Dislocation.  
Pub Date 75

Note—6p.; Paper presented at the Southeastern Conference on Linguistics, (14th, Atlanta, Georgia, November 6-8, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Discourse Analysis, English, Language Patterns, Language Styles, \*Language Usage, Linguistic Performance, Nominals, \*Oral Communication, Oral Expression, \*Pronouns, \*Sentence Structure, \*Standard Spoken Usage, Syntax, Verbal Communication Identifiers—\*Dislocation (Grammar)

Right dislocations are expressions of the following forms: (1) "They told the Grand Jury a number of lies, the Nixon men." (2) "We find we have to limit our social schedule, my husband and I." (3) "Mary always wears a frown, the ugly witch." They are found also almost exclusively in the spoken language. This paper examines contextual situations in which the use of right dislocations is appropriate. Some of the basic functions of right dislocations are to: (1) make fully explicit a pronominal reference that the speaker thinks the audience may be unsure of; (2) remove a "heavy" noun phrase from a position in the sentence where it is felt to be awkward; (3) retain the prominence of postposed articles or direct objects in "complex" or phonologically "heavy" structures; and (4) add prominence or emphasis to a noun phrase. Identifiers—Classical Arabic, \*Intercommon Spoken Arabic, Syrian Arabic

The purpose of this paper is to present a general overview of the linguistic setting of Arabic. Three main areas are covered. The first of these, diglossia, is defined in general terms and then examined more closely in relation to its historical development in Arabic-speaking countries (i.e., as resulting from geographic, socioeconomic, and religious splittings in this area of the world). The second major portion of this paper is devoted to a synchronic comparison of the phonology, morphology, syntax, and lexicon of Classical Arabic and Syrian Arabic. The comparison shows that: (1) the phonology of the two varieties of Arabic is "moderately different;" (2) the vernacular has a simpler grammatical structure than the Classical, and is becoming increasingly synthetic; and (3) lexically, the vernacular borrows much from Classical Arabic. The final portion of the paper discusses the need for and development of a standardized language that would dissolve the diglossic split in Arabic. The most practical and likely choice for a unified language is here offered as that dialect known as the "language of the educated." This Intercommon Spoken Arabic, already evolving, perhaps will lead to sociolinguistic changes what will distribute literacy more widely in the Arab world. (Author/TL)

Hammond, Robert M.

Phonemic Restructuring of Voiced Obstruents in Miami-Cuban Spanish.

Pub Date [75]

Note—17p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Consonants, \*Cubans, Deep Structure, Distinctive Features, Generative Phonology, Language Research, Language Variation, \*Phonetics, \*Phonological Units, Phonology, \*Spanish, Spanish Americans, Surface Structure

Identifiers—\*Miami Cuban Spanish

Standard manuals of Spanish pronunciation recognize that both [+continuant] and [-con-

tinuant] surface variants occur for the voiced obstruents/bdʒ/. Within generative phonology, it has been assumed that the systematic phonemic representation for these voiced obstruents should be [-continuant] /bdʒ/, with a rule of spirantization converting these segments to [+continuant] surface forms in specified environments, rather than the converse, i.e., systematic [+continuant] and a phonological rule of despirantization. The [+continuant] versus [-continuant] status of the systematic phonemic representations of the voiced obstruents of Miami-Cuban Spanish (MCS) are discussed in terms of the following arguments: (1) symmetry of the systematic phonemic inventory of obstruents, (2) markedness as it relates to the feature [continuant] in obstruents, (3) language change-rule loss and rule spread, (4) directionality of phonological change involving voiced obstruents currently occurring in MCS, (5) frequency of occurrence of the [+or -continuant] surface variants of voiced obstruents, (6) rule economy and relative abstractness of underlying forms, and (7) naturalness of phonological rules of spirantization and despirantization. It is concluded that, although evidence may not presently be strong enough to conclusively motivate phonemic restructuring of voiced obstruents in MCS, if current phonological changes continue in this dialect in the direction of [+continuant] surface forms, such a restructuring of underlying forms will become obligatory. Descriptors—\*Adverbs, \*Descriptive Linguistics, English, Form Classes (Languages), Language Patterns, Language Research, Language Usage, Linguistic Theory, \*Semantics, \*Sentence Structure, Syntax, \*Verbs

Identifiers—\*Temporal Conjunctions

In a sentence containing a conjunction "when," "once," or "as soon as," the events in the main and the subordinate clauses are understood as occurring closely together in time. This paper endeavors to uncover the subtle differences which nevertheless exist among them. Clauses headed by "when" can refer to a span of time, whereas "once" and "as soon as"-clauses must refer to a point in time. There is a clear correlation between the distribution of "once" and "as soon as" with respect to the verb in their clause, and the classification of verbs proposed by Vendler (1967). Further, the presuppositional nature of "when" is different from that of "once" and "as soon as." In sentences containing a clause headed by the latter two conjunctions, the events in both the main and the subordinate clauses are presupposed as starting at the point designated by the subordinate clause. The difference between "once" and "as soon as" is evidenced by the impossibility for "once" to connect two events which are causally unrelated. Sentences illustrating this point seem to lead to the conclusion that a "once"-clause gives the last in a series of events causally leading up to the event in the main clause. (Author/CLK)

Incorporating Sociolinguistic Norms into an EFL Program.

Pub Date 75

Note—30p.; Paper presented at the MEXTESOL National Convention (2nd, Cocoyoc, Mexico, 1975)

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Bilingualism, Bilingual Students, \*English (Second Language), \*Language Instruction, Language Role, Language Usage, \*Language Variation, Native Speakers, Non English Speaking, Second Language Learning, \*Sociolinguistics, Spanish, \*Teaching Methods

It is not sufficient for students in foreign language classes to simply internalize the sound system and grammatical structure of the target language or to memorize the vocabulary. Speaking is not merely a linguistic event, but rather in-

volves an extensive system of norms for the social interaction. The relationship between speaking and social interaction has been extensively studied by sociolinguistics. It is the purpose of this paper to: (1) briefly describe and define some of the sociolinguistic norms that have been identified, (2) show how these norms correlate with behavioral patterns observed in speaking, and (3) illustrate how drills can be devised and used in foreign language teaching to teach the interactional norms involved in speaking. The basic sociolinguistic notions of role relationship, social situation, social interaction, language choice, and speaking are discussed. Items that lend themselves to the construction of foreign language drills are personal and transactional role relationships; congruent and incongruent social situations; metaphorical and situational switching; language choice, in terms of stable and unstable bilingualism; tones and manner of communication; channels and modes; interlocutors; and speech situations, speech events, and speech acts. Sample drills are provided. (CLK)

Signing Acts and Evolving Linguistics.

Pub Date 30 Aug 75

Note—13p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Animal Behavior, \*Communication (Thought Transfer), Evolution, \*Language, Language Patterns, \*Linguistics, Manual Communication, Nonverbal Communication, Primatology, \*Sign Language, Verbal Communication

Identifiers—\*Chimpanzees

Linguistics retains from its antecedents, philology and the study of sacred writings, some of their apologetic and theological bias. Thus it has not been able to face squarely the question how linguistic function may have evolved from animal communication. Chimpanzees' use of signs from American Sign Language forces re-examination of language origins and the evolution of progressively more highly encoded communicative systems. Linguistics has contributed to ignorance about sign languages when it has accepted an evolutionary view of human vocal and auditory organs but has called on a creation myth to account for speech and language. Not all linguists are so dualistic. Hewes, Kendon, Kavanagh, Liberman, Sarles, Wescott, and others have attempted to look at language as brain function with both limbic and vocal involvement, in recent meetings of the American Anthropological Association, the IXth International Congress of Anthropological and Ethnographical Sciences, conferences of the National Institute of Child Health and Human Development, and the New York Academy of Sciences. A promising lead which may be empirically testable is that the gestural signal and not the all-at-once vocal signal (as in bird song) used by bipedal primates first divided into partials with nominal and verbal referents. Testing Standard Spanish as a Second Dialect.

Pub Date 2 Jul 75

Note—17p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Language Instruction, \*Language Tests, Language Variation, Morphology (Languages), Native Speakers, \*Nonstandard Dialects, Reading Tests, Regional Dialects, \*Spanish, Spelling, \*Standard Spoken Usage, Suprasegmentals, Syntax, Teaching Methods, Test Construction, Vocabulary

Identifiers—\*Bidialectalism

This discussion begins with a brief description of three approaches to teaching standard Spanish as a second dialect (S.S.S.D.), called the "eradication" approach, the "second dialect" approach, and the "both dialects" approach, which is favored here. Because the teacher of standard Spanish as a second dialect is concerned with developing in the student the ability to switch from the local form to standard Spanish, and not from local to English, S.S.S.D. tests should be bidialectal in nature. Therefore, they will be substantially different from ordinary tests of Spanish as a foreign language. The paper offers examples of numerous discrete item formats for S.S.S.D. testing of various linguistic problems. Subsections are included for stress, vocabulary,

spelling, reading, dictation, morphology, and syntax. The rationale for each item is described, and some hints are given for the writing of nonoffensive directions. (Author/KM)

Descriptors—\*Computer Assisted Instruction, Educational Technology, Humanities, Language Aids, \*Language Instruction, Man Machine Systems, Programed Instruction, Scientists, \*Second Language Learning, Teacher Attitudes, \*Teaching Methods, \*Technological Advancement

Identifiers—\*Plato IV

This paper examines several theoretical and empirical issues, together with new directions in thinking, which have emerged as the result of significant research done on the PLATO IV computer and with the advancement of the language pedagogical theory. CAI previously encountered three basic problems: (1) the cost of hardware, (2) the lack of adequate software, and (3) the algorithmic ability of the machine. The first two difficulties have been overcome by PLATO IV. The attitude conveyed by the Goedel Theorem in the field of mathematics and the algorithmic ability of the machine are no longer the center of controversy in the humanities. The focus is on how to exploit the capabilities of the computer and how to establish a meaningful interaction between man and the machine. Thus, attitudes toward machines have changed significantly. Theoretical problems are investigated along two parameters: computer-based and non-computer-based pedagogy. The former incorporates such questions as the various roles of the computer and which roles a humanist should assign to it. The "concept of sequencing" is discussed. The discussion of empirical issues includes questions such as whether or not the machine dominates man. (Author/CLK)

Can't Language Testing Interface with Language Acquisition?

Pub Date Mar 75

Note—8p.; Paper presented at the Meeting of the Teachers of English to Speakers of Other Languages (Los Angeles, California, March 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Classroom Techniques, Interference (Language Learning), \*Language Instruction, Language Teachers, \*Language Tests, \*Learning Processes, Psycholinguistics, \*Second Language Learning, \*Teaching Methods, Testing Behaviorist/structuralist language teachers and theoreticians are beginning to pay attention to contributions from contemporary linguists, psychologists, and educators. This paper draws attention to an obvious, but not often considered, point of interest to all who are engaged in formal language instruction and in related fields. Classroom procedures which run counter to natural acquisition strategies compete for the attention and energies of the language acquirer and may indeed hamper language acquisition. The same holds for language testing procedures. (Author)

Descriptors—Content Analysis, \*Cultural Awareness, Cultural Context, Cultural Education, \*Cultural Images, Essays, Ethnic Stereotypes, Folk Culture, \*Foreign Culture, \*German, High School Students, \*Language Instruction, Teaching Methods

Identifiers—\*Germany

The new emphasis on combining language and culture teaching finds all teachers busy updating

and improving their materials. However, feedback on how successful they are in their attempts is limited. Revealing insights into the image of Germany held by high school students can be gained from the 1974 and 1975 essays, written by applicants for the travel-study trips, on the following Landeskunde topics: (1) You would like to spend two months somewhere in West Germany. Which place would you pick, for what reasons, and what would you like to do there? (2) Do you think that there are essential differences between German and American youth? What is your answer based on? While one-sided, uniform responses occurred to the first topic, indicating the existence of strong cultural-geographical cliches, the reactions to the second topic were more varied, indicating a realistic grasp of contemporary life. Reasons are presented for the popularity of the cliches and recommendations offered for dealing with them without abandoning altogether the "good old Germany" image of folklore and regional attractions. Transition from Italian.

Toronto Board of Education (Ontario). Research Dept.

Pub Date Oct 75

Note—105p.; For related document, see ED 098 796

**EDRS Price MF-\$0.83 HC-\$6.01 Plus Postage**

Descriptors—\*Bilingual Education, Bilingual Students, \*English (Second Language), \*Italian, \*Kindergarten, Language Instruction, Language Programs, Primary Education, \*Program Evaluation, Second Language Learning

This report provides a comprehensive view of the two-year kindergarten program for children from Toronto's Italian community which ran from September 1973 to June 1975. The transition program and its participants are described, and the program is examined in relation to the implicit goals with the aid of comparisons with students in regular kindergarten classes. The transition program children learned English at a rate equal to that of similar children in regular programs, despite being exposed to Italian for most of the first year, and they participated more in class discussions, a sign that their adjustment to school was made easier. Parents of the transition children attended more official school functions and talked regularly with the teacher on an informal basis. These results suggest that the program generally has been successful in meeting its goals in the short term and that the transition model is viable for children in kindergarten. Other benefits or drawbacks may not emerge until later in the children's school career. The context in which a program of this nature is implemented is extremely important. Various considerations and procedures that might be required in other contexts or with alternative program models are discussed in the summary of the report. (Author/CLK)

Bilingual Education and Early Childhood.

Pub Date 30 May 74

Note—28p.; Lecture delivered at Southern Illinois University (Carbondale, Illinois, May 30, 1974); Occasional light print

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Biculturalism, Bilingual Students, \*Child Development, Community Involvement, \*Early Childhood, Early Reading, Educational Objectives, Educational Policy, Language Development, Language Skills, \*Program Planning, Sociocultural Patterns

Educators are presently engaged in testing the hypothesis that under favorable conditions bilingual schooling will improve the education of both bilinguals and monolingual English-speaking children and at the same time contribute to a healthier society. These prerequisite favorable conditions are: a socio-economic-cultural survey of the community contemplating a bilingual program; participation by various sectors of the community in the planning and conduct of the program; clear-cut statements of philosophy, rationale, goals, and objectives; and adequate program design, including staff, curriculum, methods, materials, evaluation, provision for correction of program defects; provision for research; and description and publicizing of the program for the benefit of other interested communities. Each of

these elements is elaborated in Part I. In Part II some of the findings of specialists in early childhood are considered together with their implications for bilingual education. Of special relevance are the development of the child's intellect, senses, memory, and imagination. His early language development and potential for bilingualism or multilingualism and early reading and writing suggest the conclusion that bilingual education between ages two and five opens vistas for innovative developments. Descriptors—Language Instruction, Language Tests, Morphemes, \*Morphology (Languages), \*Recall (Psychological), Retention, \*Russian, Second Language Learning, Semantics, Structural Analysis, Suffixes, \*Vocabulary Development, \*Word Recognition

Identifiers—\*Root Theory

There have been several recent works dealing with the Russian "root system." Most of these works operate on the claim that vocabulary-building in advanced Russian classes may be accelerated by a mastery of the systems of derivational morphology. Townsend's "Russian Word Formation," Gribble's "Russian Root List," and Beard's "Dynamic Glossing" (SEEJ 19,49-57) are all predicated on the assumption that knowing the roots, affixes, and rules of combination of Russian derived words will facilitate vocabulary-building. This paper reports on two experiments designed to test the validity of "root theory." In the first test, experimental subjects were given a list of Russian words sectioned into individual morphemes, while the control subjects received a list of the same words unsectioned in lower case type. It was found that the experimental subjects remembered more words on the recall tests. In the second experiment, all subjects were given the same list of new, unfamiliar words but which comprised morphemes occurring in the previous recall experiment. It was found that although the difference was not of statistical significance, the experimental group outperformed the control group in identifying the correct meaning of the new words in a fashion paralleling its performance on the recall test. Aspects of Bordeaux French Phonology.

Pub Date [75]

Note—19p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Dialect Studies, \*French, Language Standardization, Language Variation, \*Non-standard Dialects, Phonetics, \*Phonology, \*Regional Dialects, Social Dialects, Sociolinguistics, Suprasegmentals, \*Vowels

Identifiers—\*Bordeaux French, Standard French

Among the characteristics which set Bordeaux French apart from Standard French are the rules governing the behavior of its mid-vowels. These rules are much simpler and more extensive (in that they also apply to unstressed vowels) than in Standard French. Their application is, however, systematically conditioned by the presence or absence of word boundaries, a fact not recognized for Standard French where it has been obscured by a number of conditioning factors not operating in Bordeaux French. Another conditioning factor is the presence in the syllable following that of any mid-vowel of "e caduc," whose effect is the same whether it is elided or not. For this feature, Bordeaux French and Standard French show remarkable unity in spite of marked superficial differences. A sociolinguistic investigation reveals that the mid-vowel adjustment rules of Bordeaux French constitute an area where "standardization" is least successful, except for a few members among the high social classes. This can probably be attributed to the degree of abstraction of the process involved (standardization is more successfully achieved when a straightforward, across-the-board phonetic replacement is involved) and to the complexity of the target system (Standard French). The meaning of a word often cannot be formulated by conscious rules, because it is unconscious. Evidence on the verb "break" demonstrates this. The consequence for teaching is that teachers cannot supply meanings in words, but should present a wide range of uses of a word, so that students can intuit the unconscious generalization. (Author)

Descriptors—Bibliographies, Cultural Education, Directories, \*Foreign Culture, Information Seeking, Information Sources, \*Language Instruction, Language Teachers, Library Materials, \*Library Research, \*Reference Materials, Research Skills, \*Research Tools, Resource Materials, Second Language Learning

This paper considers the "why" and "how" of library research as it relates to instruction in a foreign language class. The search for cultural information is viewed as a human and a technical problem. The paper includes steps for guiding student research, discussion of different inquiry contexts, and techniques for literature search. The most important section (VI) is an annotated list of general and cultural reference sources. In effect, this is an intensive examination of reference-room holdings from the point of view of a culturally oriented foreign language teacher or student. Bibliographies, indexes, encyclopedias, handbooks, yearbooks, and directories are studied for their cultural yield. Both historical and anthropological types of cultural information emerge. Most reference sources are accompanied by notes of particular interest to a foreign culture researcher. Key words and cross-reference headings are highlighted. Press and periodical directories, as well as the use of government documents, are vital topics. Appendix A reports an interview with a reference librarian; Appendix B offers pedagogical suggestions for exploiting travel books; Appendix C is a starter list of cultural sources by language area. Descriptors—\*Arabic, \*Contrastive Linguistics, Dialects, \*English (Second Language), Interference (Language Learning), \*Language Instruction, Language Variation, Official Languages, Paragraph Composition, Phonology, Pronunciation, Rhetoric, \*Second Language Learning, Syntax, Teaching Methods, Vocabulary, Writing Skills

Identifiers—Classical Arabic, Modern Standard Arabic

This paper first explains the diversity of the Arab World, the unifying force of Classical Arabic, and that Modern Standard Arabic, less com-

plicated in structure and less ornate in rhetoric, is sufficiently different from colloquial dialects to require considerable instruction in schools. For contrastive analysis to be useful as a basis for EFL methods and materials, one must therefore answer the question "What is the native language of the Arabic-speaking student?" Examples of Arabic interference (often differing from one dialect to another) are given in phonology, syntax, and rhetoric. Techniques for teaching segmental sounds are suggested, as well as drills to practice linking. For the teaching of vocabulary, it is argued that since students are accustomed to analytical procedures of learning language forms, they may enjoy and profit from exercises that manipulate base morphemes and some common derivational affixes. For the teaching of grammar, the redundant use of the object pronoun is presented (The food which we ate it was good) with sample, sequential exercises. For the teaching of rhetoric, reference is made to the influence of Arabic rhetoric and the unusual emphasis on coordination rather than on subordination. Sample exercises demonstrate guided practice of paragraph organization in English. (Author/TL)

Descriptors—\*Bilingualism, \*Child Language, Cognitive Processes, English, \*Language Development, Language Research, \*Phonology, Preschool Children, \*Psycholinguistics, Romanian, Speech, Verbal Development

Many researchers have assumed that adult bilinguals have separate systems for their two languages. Such an assumption raises interesting questions about how the two languages are acquired in the case of a child learning two languages simultaneously. This study attempts to determine whether the two languages are acquired separately right from the beginning or whether at first they form a single system and only become separated at a later point. A phonological analysis is presented of a Romanian-English bilingual child's spontaneous speech at age two, and the processes operating in the two languages are compared. Specifically, sound inventories, segmental substitution patterns, final consonant deletion, deletion of unstressed initial syllables, cluster reduction, glottal stop insertion and the insertion of weak vocalic segments were examined in both languages. Since the same phenomena were found to occur in both English and Romanian, it is concluded that there is only one system through which both languages are being processed at age two. (Author)

Identifiers—\*University of Minnesota

The student and faculty experiences in, and their attitudes toward, four-year programs in the General Colleges Extended Programs at the University of Minnesota were surveyed. Questionnaires distributed to the population, consisting of General College faculty members, four-year students in residence, and former students who had finished one or the other of the four-year degrees, polled the faculty and graduate attitudes about advising, internship, and evaluation. General findings indicate: (1) some units within the college work with more extended-program students than others; (2) respondents seemed to feel that internships are designed to develop a student's proficiency in his area of concentration; (3) most respondents would like more guidelines in working with students preparing for internships; (4) advisors were helpful during the internship; (5) the majority of graduates worked on jobs related to their areas of concentration as their internship experience; and (6) outstanding characteristics of the program noted were flexibility and the ability to develop individualized programs. Determinants of Faculty Publication Productivity at Four-Year Colleges.  
Pub Date [75]

Note—15p.; Table 1 may not reproduce clearly because of quality of original document; Paper prepared for the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—College Faculty, \*Faculty, \*Higher Education, Productivity, \*Publications, Research, \*Surveys

This study identified determinants of publication productivity of Ph.D. faculty in arts and science departments at undergraduate colleges. Separate analyses were also conducted of faculty publishing at public, nondenominational, Protestant, and Catholic institutions. The sample consisted of 1,216 faculty selected from the respondents in the American Council on Education-Carnegie Commission on Higher Education 1969 national survey. Contingency coefficients on 48 variables were reduced to the 10 strongest predictors for regression analysis. Habit of professional writing is the single best predictor of total productivity, even when years in higher education, rank, and other correlates are held constant. The study also interprets productivity correlates so as to assist undergraduate colleges in their concerns for faculty development. The data suggest that both dimensions of professional growth—teaching and research/publishing—be available and encouraged by four-year colleges. (Author)

Research, Personnel, \*Planning, \*Policy Formation

Identifiers—\*University of Wageningen

The University of Wageningen takes care of only one faculty with 80 departments and about 4000 students. The university has been growing rapidly in recent years with an increase of 25 percent in first year students each year. Because of this growth and because of various social developments, the University Board recognizes the need for a good data system to support and to take part in the process of management; this means the system has to correspond with the intrinsic characteristics of the management system. The article describes briefly the process of management. The various aspects of the process, e.g., teaching and research task, personnel, etc. are strongly related; a qualitative description of some of these relationships is provided. The data system is derived from the properties of the management process and is designed on behalf of operational management with some thought given to strategic management. (JMF)

 Identifiers—\*Washington

The Council on Higher Education is a permanent coordinating agency designed to engage in comprehensive planning for Washington postsecondary education. This report concerns the strategic phase of the council's planning effort, i.e., the identification of fundamental assumptions. Its focus is educational goals, institutional roles and missions, and general governing policies. The emphasis is on identification of basic premises, value judgments, philosophies, and purposes of the system. The draft report contains the council's goals for postsecondary education along with approximately 200 recommendations pertaining to such matters as high school college articulation, nontraditional studies, state higher educational admissions and transfer policies, general policies for finance, regional planning, manpower analysis, and a range of related matters. The report is directed to the six-year period between 1976 and 1982. (Author/JMF)

Descriptors—\*College Faculty, Communications, \*Higher Education, Information Sources, \*Information Systems, Information Theory, \*Land Grant Universities, Operations Research, \*Social Sciences

Identifiers—\*Taiwan, University of Missouri Columbia

The central issue in the analysis of the data in this study is the ability of the social science faculty to contribute to the operations of the university as an information system. This means a contribution at all levels from basic science research to working with the public. The study attempts to determine: (1) the extent to which the efforts of the social scientists in one United States and two Taiwan public universities operate at all activity levels from theory to practice; and (2) the perceptual and organizational constraints that hinder them from functioning effectively at each. The universities studied were the Columbia Campus of the University of Missouri, the National Taiwan University, and Chungshing University. Interviews were conducted with regularly appointed social science faculty members on all three campuses concerning their own university

status, the organizational constraints under which they work, and their own perception of how much they think a public university should be involved in a variety of teaching, research, and service activities. They were also asked questions designed to elicit information about communicative output—books, journal articles, research reports, and the chief audience to which each was primarily directed. Identifiers—\*National Student Association, NSA

Each year the officers of the United States National Student Association are required to report on their activities. The report is for the year 1974-75 and discusses activities in the administration of the national office including a brief overview of the finances and operation of the national office. On-going administrative programs including the Office of Educational Affairs, the NSA lobby, the Office of Political Affairs, and the internship program are highlighted. Information dissemination is through the Student Government Information Service, area conferences, the NSA Magazine, and other publications. Major sponsored programs reported on include the National Third World Student Coalition, the National Gay Student Center, National Student Committee for Farmworkers, National Women's Center, Food Action Center, and National Campus Alliance for Amnesty. The service division is involved in the Insurance Trust and the National Student Travel Bureau. The report concludes with a look to the future of the association with some specific recommendations for maintaining the organization's viability. (JMF)

Descriptors—\*College Students, Continuation Students, Dropout Attitudes, \*Dropout Characteristics, Dropout Prevention, \*Dropout Research, Dropouts, \*Higher Education, \*Student Attitudes, Student Behavior, Student Research

This study represents an attempt to identify variables which might differentiate continuing students from withdrawn students at New College of Hofstra University and, consequently, variables that might be worthwhile monitoring in the future. A total of 55 students who had withdrawn over a period of three semesters (September 1973 to January 1975) were studied. Where possible, a comparative analysis of similar data for comparable continuing students was performed. The data is presented in four parts: (1) an analysis of major area of study, semester hours of work attempted and completed, and SAT and High School decile data for withdrawn students; (2) a comparison of continuing and withdrawn students who entered New College in 1972 and 1973; (3) establishment of a multiple regression equation; and (4) an analysis of exit questionnaire data. The report recognizes the speculative nature of the conclusions because of the small size of the sample, but suggests a number of variables for continuing investigation. (JMF)

Student course evaluations are used at New College, Hofstra University as one of the tools to evaluate the effectiveness of New College courses and instructors. This report summarizes all aspects of the evaluations that were completed during 1974-75. The report: (1) summarizes the procedures used in administering the evaluations; (2) describes the evaluation instrument, including its reliability and validity; (3) indicates the results for each session of this year by major area and total college; (4) analyzes the results of the evaluations in terms of regular New College faculty versus adjunct or visiting faculty; and (5) indicates some conclusions to be drawn from this year's evaluations. Identifiers—\*Michigan

The current flux of conditions associated with the slow growth of enrollment admittedly makes projecting enrollment to the year 2000 highly speculative. The only way this process can be handled is by generating several conceptually meaningful series of enrollment projections. The three sets of enrollment projections in this report are based on assumptions about mortality, fertility, and migration. Although very different, each is conceptually useful. There is an attempt to analyze how enrollment rates have changed and to indicate the rationale for the projections. Demographic constraints to higher education are translated into economic constraints, and these are fitted into the projections. Finally, there are brief policy recommendations for types of support programs to aid the three out of four projected potential students who would normally and should be attending college over the next ten years, but will not without such programs. Descriptors—Admission Criteria, Attendance Patterns, College Environment, Costs, Curriculum, \*Economic Climate, Educational Benefits, \*Higher Education, \*Mathematical Models, \*Public Policy, \*Socioeconomic Influences, Tuition

This paper develops and estimates a model of college attendance that focuses on the influences of public policy and of economic environment. The Policy instruments examined are tuition, admissions requirements, college locations, breadth of curriculum, draft deferments, and class integration of neighborhoods. The aspects of the economic environment examined are the opportunity cost of the students' study time and the size of the anticipated earnings payoff to college graduates. The first five sections of the paper

develop a theory of college attendance and then apply it to the choice and definition of variables and the selection of functional form for the estimating equation. Section 1 examines the college entrance decision when unlimited borrowing is possible. Section 2 handles a more realistic situation. Section 3 applies this theory to the selection of the college. Section 4 examines how planning for college influences model specification and the selection of variables. Section 5 derives the functional form for estimation and describes how the estimated parameters will be used to test the hypotheses discussed in sections 1 and 2. Section 6 describes the data and section 7 presents the results. Section 8 analyzes the effectiveness of public subsidies of undergraduate education by calculating the subsidy cost of an extra student from each of the 20 ability-by-income strata and discusses the policy implication of the results. Note—23p.

Available from—National Association of College and University Business Officers, One Dupont Circle, Suite 510, Washington, D.C. 20036 (\$1.25)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Cost Effectiveness, \*Data Collection, Decision Making, \*Higher Education, \*Information Needs, Management Systems, \*Methods

Costing has been recognized by business, financial, and other administrators in higher education as a valuable management tool. A growing interest in the determination of costs and their use revealed a lack of uniformity in cost definitions and cost determination methods and approaches in a language that was readily applicable to higher education. There was also misunderstanding about cost analysis and costing standards for higher education. Discussed are fundamental considerations for determining cost information, an examination of different cost methods and the conditions under which each is appropriate, and a statement of costing standards applicable to higher education. Evaluation of the quality and efficiency of academic programs involves much more than the use of cost information. Definitions of the quality and efficiency of academic programs have not been developed and accepted on a national basis. Cost data should be related to the characteristics, the state mission, and the goals and objectives of an institution. Numerous judgments, in addition to objective, quantifiable data, are required in determining costs. (Author/KE)

Identifiers—\*Japan

We must learn to anticipate and to alter our futures, and higher education holds the key to that achievement. The role of universities is defined as twofold: (1) to bring about a well-balanced industrial society in which there is sufficient diversity of ideas; and (2) to redesign the industrial society to cope with problems brought about by changes at the national, international, and global levels. These roles are analyzed largely in the context of the Japanese experience, but have implications for the United States and other countries. Proposals for achieving these ends are: (1) that organized skepticism should be the first principle of all education; (2) that the education of tomorrow must be engaged in the exploration of the "inner frontier" of men; (3) that the content of education should be truly international; (4) that

liberal education must be reemphasized; (5) that diversity of education should be encouraged; and (6) that solutions to the general problems all people confront together must be considered more and more seriously. (Author/KE)

**An Analysis of the Aggregate Financial Needs of Kentucky's Post-Secondary Students. Research Report.**

College Entrance Examination Board, Atlanta, Ga. Southern Regional Office.; Kentucky Higher Education Assistance Authority, Frankfort.

Pub Date Nov 73

Note—55p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—\*Data Analysis, Data Bases, \*Educational Finance, Federal Aid, \*Financial Needs, \*Higher Education, Models, Post Secondary Education, Private Colleges, Proprietary Schools, Resource Allocations, State Aid, State Universities, \*Student Needs, Vocational Schools

Identifiers—\*Kentucky

The primary emphasis of this document is the accurate estimation of the financial need of undergraduates in Kentucky postsecondary institutions during the 1971-72 academic year. The need for an aggregate analysis of the type found in this document is twofold: (1) it presents an estimate of the total financial need that exists in an educational system; and (2) it allows the Commonwealth of Kentucky to determine areas of greatest need. To calculate the financial aid needs for a currently enrolled student in Kentucky, it is necessary to determine four factors: (1) expected student contribution or self-help, (2) expected parental contribution, (3) income distribution data for the families of the relevant group of students, and (4) expected out-of-pocket costs or total budgeted expenses for students at the institutions they plan to attend. Presented is an analysis of the financial need for undergraduates attending seven groups in Kentucky institutions—major public universities, regional public universities, four-year nonpublic colleges, two-year nonpublic colleges, community colleges, vocational-technical schools, and proprietary schools. Models are developed under three differing sets of conditions: (1) actual 1973-74 estimates; (2) 1973-74 estimations, including the potential effects of the Basic Educational Opportunity Grant Program; and (3) 1973-74 estimations based on the aspirations of educational attainment as expressed by Kentucky secondary school students. Descriptors—\*Academic Achievement, \*Academic Aptitude, \*Admission Criteria, \*Graduate Students, \*Higher Education, Success Factors, Tables (Data)

The process by which students are selected to perform successfully in graduate schools has generated a literature that is reviewed here to determine what predictors and what criteria are used for graduate student selection and to evaluate the relative success of the predictors used. The bulk of the research involves correlation analysis. The article is organized into the following five segments: (1) the criterion problem; (2) kinds of predictors; (3) aptitude variables as predictors; (4) environmental variables as predictors; and (5) personality variables as predictors. The results of many prediction studies are integrated using tabular presentations. Implications of the findings for making graduate student selection decisions are discussed. (Author/KE)

Identifiers—\*Endowment Funds

Much has been said and written about the need for measuring accurately and improving the investment performance of college and university endowment funds, but little has been written about how colleges and universities should report on the status and performance of the investments of endowment funds. When guidelines for reporting are adopted, a number of questions should be included. When should the reports be distributed? Should information be recorded on a book or market value basis? How should performance data be computed? With what indexes should the performance data be compared? In addition to annual financial statements, there are needs for special investment reports for public distribution as well as internal management reports. External

reports should be prepared annually, but internal reports should be prepared quarterly or more frequently. (Author/KE)

Out of the many external forces that influence college campuses, there are four that have had (or are likely to have) a major impact on the fortunes of higher education. The ways in which college and university officials and friends react to these forces can make an enormous difference to the future of higher education. The forces are: (1) Federal Government mandates to conform to new social norms, i.e., affirmative action, elimination of age discrimination, occupational safety and health, minimum wage and fair labor standards, unemployment insurance, social security, health maintenance organizations, Employment Retirement Income Security Act provisions, wage and salary controls, environmental protection, privacy laws, etc.; (2) accountability; (3) the political economy, that is, inflation, unemployment, energy costs, and erratic investment dividends, and (4) impact of public disenchantment with colleges and universities. Descriptors—Administrative Organization, \*Complexity Level, \*Educational Accountability, \*Higher Education, \*Personnel Management, \*Productivity

Many people tend to think of the economic problems of higher education as fiscal concern—as a business office problem in financial management. But the full scope of improvements needed in resources management to make higher education more cost-effective is much broader than mere financial control. A central part of resources management must deal with the human resources that organizations utilize. Although it is accepted as a truism that people are the most valuable resources in organizations—and particularly is this true of educational institutions—people are typically the most wasted resource. The people in our institutions are neglected and underutilized. Inadequate attention is paid to their motivation and development; more attention is focused on the physical plant and financial resources. Three concepts should be considered when studying the question of how well institutions of higher education organize and utilize their human resources to carry out their educational functions. These concepts, which are relevant to any deliberations on improving the management of higher education, are productivity, complexity, and accountability. (Author/KE)

The Federal Government and institutions of higher learning have become interdependent elements of the research structure. Colleges and universities cannot adequately support a high level of research activity with their own limited funds, and the government must rely on the obvious wealth of expertise on campus for the conduct of research required for national goals. Congress requires detailed accountability for Federal funds and, over time, a complex system has been developed by the government to provide it. This guide has been compiled to provide individuals dealing with funding agencies the background required to understand the nature of the relationship created and the consequences for the institutions. Sections cover: (1) characteristics and procedures of the research contracts with the Federal Government; (2) analysis of approximately 100 contract clauses developed for use in research contracts with the Federal Government; (3) background material on the development of the cost principles; (4) the policies and procedures of 43 private foundations and Volunteer Health Agencies; (5) three specimen agreements; (6) a large number of specimen contract clauses covering a broad range of topics; and (7) a glossary and alphabetical index. Newly graduating engineers and technicians of the class of 1974 enjoyed the best job prospects since 1970, according to data compiled by the Engineering Manpower Commission from a survey of the nation's engineering and technical schools. The pattern of persons seeking employment and those seeking further study seem to have been changing gradually in the last three or four years. At both the bachelor's and master's level in engineering, and the two-year associate level in technology, fewer graduates were continuing their education. As usual, the Ph.D. in engineering and the bachelor in technology degree represent terminal points for practically all graduates, with only a few percent pursuing further full-time study. Among master's and doctor's degree graduates the percentage with other plans remained at fairly high levels comparable to 1973. The strong demand was reflected in higher salaries offered to new graduates. Women graduates averaged slightly higher salary offers than men. No specialties appear to have had significant placement problems in 1974, although architectural engineering, computer science, and engineering sciences were somewhat weaker than other areas. More college and universities are being subject to audit by the Internal Revenue Service (IRS). When an institution is selected for audit, it will be notified, probably in writing, and contacted by a representative of the IRS, who will make arrangements for a preliminary visit to discuss the procedures to be followed. Prior to the first meeting with the examiner, counsel should be advised and the business office alerted. A single individual should be chosen to act as liaison officer with the IRS. There are three kinds of audits to which the institutions may be subjected: (1) a general audit, (2) payroll audit, or (3) a team audit. In anticipation of an audit, an institution should make a special examination in two areas: (1) unrelated trade or business, and (2) withholding. (Author/KE)

It may be a mistake to speak of the "higher education community" as a synonym for the Washington-based higher education organizations associated with advocating public policy for American higher education. These organizations represent different views and constituencies including students, states, and institutions such as liberal arts colleges, community colleges, state four-year colleges, and public and private universities. So different are the interests the associations attempt to represent that they are frequently unable to agree among themselves on any but the broadest propositions. On specific questions the associations will frequently part company. Hence, they are likely to differ on the question of whether or not students at state institutions should be expected to bear a greater share of the costs of their education, or the specific percentage of costs federal grants should be allowed to cover. This monograph looks into the origins of competency programs in higher education and explores various ideas about educational outcomes as a basis for defining what competency is and is not. These educational outcome ideas relate to behavioral objectives, mastery learning, and testing for specific competencies rather than for an intelligence test type of learning. Eight competency programs at institutions of higher education are surveyed with emphasis on how they began and the unique set of competencies they developed. Since these outcomes are not only informational in nature but often include value outcomes as well, the institutional goals must be clearly defined before competency outcomes for students can be specified. Lifelong learning in the United States and recurrent education in Europe are new models of education that permit those beyond post compulsory education to have access to higher education throughout their lifetimes. The rationale behind these models is based on the idea of a "learning society" that accommodates changing social and personal goals and promotes social equity. There appears to be a sharply increasing interest in further education on the part of adult Americans and a clear movement by American colleges and universities toward expanding the lifelong learning concept. Our decentralized educational structure is likely to temper some of the widespread changes advocated by proponents of lifelong and recurrent learning, but such programs will receive increased funding from federal and state sources. The problem of transferring university "technology" to industry must be addressed in highly specific terms if satisfactory and conclusive results are to be expected. It is the general purpose of this conference report to identify major obstacles and to explore successful means for reducing or eliminating them. The conference was planned with the following objectives in mind: (1) to promote an increased interest among university administrators in the technology potential of their respective institutions; (2) to develop a more acute awareness of the need for more effective management of university technology resources; (3) to assemble university representatives with considerable experiences and expertise in the management of faculty discoveries and inventions to encourage them to communicate with one another, and to a broad university audience details relating to their policies,

procedures, methodology, etc.; and (4) through an effective program format to maximize effective communication among all institutional representatives relating to pertinent problems now impeding the flow of "technology" into the market place. (Author/KE)

Identifiers—\*University of California

In March 1974, the Regents approved for planning purposes a new University Academic Plan for 1974-78. That plan contained significant changes from the prior University Academic Plan of 1969, primarily because of the substantial downward shifts in state and national population growth rates. Hundreds of individuals—faculty members, students, chancellors, deans, and other administrative staff—from the nine campuses of the University of California have contributed to the development of the Campus Academic Plans. At the university-wide level, many other staff members have helped to design guidelines, to provide information, and to review and analyze the plans. The results of their efforts covered in this document are: (1) planning objectives, campus plans, and benefits, the link between academic and budgetary planning, and periodic revision; (2) broad goals and directions, specific program proposals, board actions on charges; (3) planning steps, consultation during planning, staff reorganization, program reviews, and continuing activities; (4) some current academic policy issues and problem areas; and (5) summaries of campus academic plans. Part 2 of this document contains statements made by the chancellors of the various divisions of the University of California. (Author/KE)

The number of scientists and engineers employed at universities and colleges has shown an increase in each of six consecutive surveys conducted between 1965 and 1975. Since 1965 the number of those employed full-time has expanded from 142,700 to 239,000 or 68 percent, while the number of part-time scientists and engineers grew from 36,200 to 58,000, or 60 percent. The rate of growth, however, has slowed considerably in recent years. For example, the number of full-time scientists and engineers rose at an average annual rate of 7.7 percent during the 1965-71 period, fell to 1.5 percent between 1971 and 1974, and increased slightly, by 3 percent from 1974 to 1975. The only significant reduction in a major full-time employment category over the last 10 years occurred in engineering—down 3 percent from 1973 to 1974, and another 1 percent from 1974 to 1975. Changes were also noted in fields of employment, types of institutions, employment of Ph.D.'s, employment of women, and employment of graduate students. (Author)

The Educational Amendments Act of 1972 authorizes the Secretary of Health, Education, and Welfare to improve postsecondary educational opportunities by providing assistance to educational institutions and agencies for a broad range of reforms and innovations. To implement this authority, the Secretary has established the Fund for the Improvement of Postsecondary Education, a separate organizational unit with the Department of HEW, under the general supervision of the Assistant Secretary for Education. The fund is administered by a director and a small professional staff. The director is responsive to a 15-member, board appointed by the Secretary and authorized to recommend policy priorities for the fund and to review grants and contracts of a specific kind and amount. The fund is a governmental, grant-making organization with four distinguishing characteristics. It is comprehensive, responsive, action-oriented, and risk-taking. The fund administers a comprehensive program competition to which applicants are invited to submit proposals related to any or all of the purposes for which the fund can make awards. (Author/KE)

Identifiers—\*Maryland

This tenth annual report of the Maryland Council for Higher Education reports the progress and results of studies undertaken or completed in 1974. During 1974 the council undertook and completed a major study dealing with the financial needs of Maryland private institutions. Complete recommendations are given in chapter 1. The council has expanded its activities to coordinate the Academic Common Market for Maryland higher education institutions as part of the Southern Regional Education Board agreement to monitor and coordinate the Maryland Plan for Completing the Desegregation of its Public Postsecondary Education Institutions, and to assume the responsibilities of the State Postsecondary Education Commission established pursuant to the Education Amendments Act of 1972. The council completed an inventory and common classification of degree programs offered by all the higher education institutions in Maryland offering postsecondary programs. Council committees have been involved in a number of important activities such as allied health manpower planning, faculty workload, faculty collective bargaining, and implementation of higher education management systems. The council believes that the formulation of a Master Plan for the Community College segment is a significant step. A full report and recommendations related to the plan are given in chapter 3. Chapter 2 covers relevant statistics. (Author/KE)

Descriptors—Administrative Principles, \*Administrator Responsibility, \*Administrator Role, Board Administrator Relationship, \*Governing Boards, \*Higher Education

Certain basic principles must be accepted if colleges and universities are to function in an orderly, purposeful way and to lay down those conditions necessary to insure the presence of effective leadership on the campus. Some basic principles are: (1) a college or university exists to serve the general society that created it and that supports it; (2) its constituencies should be provided with an opportunity to be informed and heard; (3) in the eyes of the law a college or university is its governing board, commonly known as the board of trustees; and (4) the major functions of a public college or university are teaching/learning, scholarship/research, and appropriate public service, as determined ultimately by the board of trustees. The role of the president is: (1) to serve as chief executive officer; (2) to act with authority; (3) to recommend policies for consideration by the board and the implementation of these policies; and (4) to understand and work with the board. A Strategy for Obtaining a Performance-Oriented Training Program for Social Work Field Instructors.

Pub Date 11 Jun 75

Note—38p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Change Strategies, Educational Change, Field Experience Programs, \*Higher Education, Instructional Staff, Methods Courses, Models, \*Performance Based Education, Policy Formation, Questionnaires, \*Social Work, Surveys, \*Teacher Education

This document investigates the successful effort to develop and implement a strategy for obtaining a performance-oriented training program for Barry College School of Social Work Field instructors. The mission of the project was to create a system of influence to concert activity so that the educational policy of the school could be shaped to facilitate training of field instructors. A survey was constructed and sent to all active field instructors to determine whether they felt a performance-oriented training program would be helpful to them in teaching students. Results of the questionnaire showed that the large majority of clinical faculty strongly desired such a training program. The results of the survey were presented to the Association of Agency-Paid Field Instructors. That association passed a motion formally requesting the school to design and carry out performance-oriented training for clinical faculty. This request was then taken to the Field Instruction Committee who passed a similar motion. The proposal was then presented to the Dean of the School of Social Work who appropriated money for the program. (Author/KE)

The Impact of American Higher Education on Undergraduate Student Valuing.

Pub Date Aug 75

Note—38p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**  
**Descriptors—**Behavior Development, Concept Formation, \*Higher Education, Literature Reviews, Peer Relationship, Personal Values, \*Research Methodology, Student Attitudes, \*Student College Relationship, Student Teacher Relationship, \*Undergraduate Students, \*Values

American higher education is a socializing institution and therefore allegedly influences the values of its participants. Colleges and universities are complex organizations that claim to transfer knowledge and skills to students. In order to communicate knowledge and skills, colleges and universities have developed highly organized disciplines. In the process of categorization and transmitting knowledge and skills, implicit and explicit values are also communicated to students. Along with these formal influences on student values, there are a variety of informal influences on students. The informal influences include personal contact with faculty and student peers. Research into the impact of American higher education on undergraduate student valuing has proven to be as complex as the internal organization of colleges and universities, which provide a variety of potential influences on the formation of student values. Researchers have obtained data that are conflicting and often unreliable. Research methods have been questionable. (Author)

The Evergreen State College seems to be working well as a nontraditional college committed to educational change and innovation. It provides a model for interdisciplinary education, developing basic cognitive skills and drawing all disciplines in probing specific problems. The necessary ingredients for a stimulating learning environment based on this model seems to be feasibility, openness, and a genuine feeling of community among all learners. Evergreen begins with no grades, no ranks, no departments, nothing to create a division and competitive learning environment. Beyond this, the school works actively toward

building a sense of trust, community, and cooperative exploration. Small Coordination Studies Programs allow personal contact and a sense of group identity. Team building activities further develop this group commitment and even the facilities themselves are arranged to provide contact and interchange. (Author/KE)

The Unified Studies Program began at Boston State College in September of 1974. Its model is based on team-teaching, learning contracts, small interdisciplinary seminars, and other open-classroom and unified educational learning/teaching techniques. Boston State College had been compelled to shift its academic assumptions because of financial stringency followed by a rapid expansion during the 1960's. The planning and implementation of the first segment of the test year for the Unified Studies Programs was an example of real cooperation between the faculty and administration of Boston State College. The most significant result of the program appears to be the challenge that accompanies a new venture which requires faculty, students, and administrators to rethink their goals and priorities for general liberal arts education. The philosophy of Unified Education is holistic, undisciplinary, and generalistic. The problems raised by these attributes are the attendant difficulties in collection/analysis/projection on a time/content grid; the flux of methodological ground rules; and the tentativeness of generalists to project while they are in a stage of collection and analysis. The solutions to these problems are: a humanistic ethic, a metaphorical method, and a positivistic stance. (Author)

The Unified Studies Program (USP) is an innovative program of integrated studies in liberal arts. The program at Boston State College (BSC) is team taught by five faculty members. Because it was an experimental program, the first evaluation was designed to evaluate each component of the program. The questionnaire was divided into sections on background of students, team-teaching, contracts, case study, workshops, Unified Studies Seminars, Content Oriented Seminars, guest speakers, and media series. Based on responses of the students and the results of the first semester's evaluation, a number of changes were made in the spring semester. During the spring semester, the students in the USP were compared to those students in the regular school. An equal number of BSC students were chosen according to the following characteristics: sex, day/evening, number of credits, age, and residence. Results suggested that USP provided the type of instruction that facilitates reading, writing, and research skills and necessitates use of library resources. The students supported the staff and the instructions they received. All the goals set forth in the beginning of the year were attained. (Author/KE)

After a two-week introductory period, participants in the Unified Studies Program at Boston State College will engage in a study of eight important institutions chosen by students at a planning session in November. Each institution will be dealt with for one full week. After the spring vacation, small groups (4 or 5 people) will engage in independent projects for four weeks. The independent projects will permit students to make in-depth studies of one of the institutions examined during the eight weeks. The semester will end with participants sharing their findings in group presentations during the last week of classes. Course Equivalency Workshops for students who need to fulfill departmental requirements for particular courses as well as minicourses will be offered during the semester. The participants will begin the semester developing general scholarly skills, then learn modes of inquiry associated with particular academic disciplines during the study of the eight institutions, and finally will apply the skills and processes mastered in producing a significant project of their own. This is the rough draft of a learning contract between faculty and students in the spring 1975 Unified Studies Program at Boston State College. Examples are given of the staff contract with the students and of the student contract with the staff. Students contract to do diagnostic and evaluative work, attend workshops and Unified Studies seminars, and do either a group or an individual research project. (KE)

There are at least five models for the way that learning environments are structured: (1) autocratic, (2) traditional liberal, (3) open classroom, (4) unified education, and (5) free school. The Unified Studies Program tries to blend the models in the middle. At the same time, unified education has some unique qualities that the program also tries to use: (1) a holistic perspective, (2) a multidisciplinary methodology, and (3) a quest for rigorous generalizations. Instead of learning fragmented bits of information, they begin to put things together. The aim is to produce breadth without superficiality, and to integrate life experiences with academic problem solving. (Author/KE)

Teachers have used unified educational techniques for years. What is new is the attempt to articulate a system of such techniques that can be used at all levels of learning. Some suggested techniques are: (1) whole-learning charts, (2) linkage exercises, (3) whole-problem-solving exercise, (4) universals exercise, (5) archetype exercise, (6) model exercise, (7) analogy and metaphor exercise, (8) evolution exercise, (9) deviance exercise, (10) integration exercise. This is an attempt to rationalize a system for teaching certain ways of thinking, reasoning, problem solving, and decision making that are an important part of the "hidden" curriculum. (Author/KE)

To equip new faculty members with all the necessary tools to begin their careers as highly effective and productive college teachers, formal training in pedagogy was made available for all graduate teaching assistants at Texas A&M University. Twenty-five graduate level instructors in college and public school settings or who expressed interest in college teaching were enrolled in the program. The class met once a week for a semester. The students were divided into four subject-affinity groups. Up to 15 hours of skill training were devoted to Flanders Interaction Analysis, which examines teaching behavior. In addition, students were presented with a series of microlessons in videotape-equipped miniclass-

rooms. The training program was augmented by lectures that incorporated differing questioning strategies. Program results were encouraging. (Author/KE)

**Identifiers**—\*New York

There is much evidence that supports the assertion that the problems involved in school-college articulation are both significant and serious enough to warrant immediate attention and action. Data was collected from various sources by using a questionnaire designed: (1) to gather programs within the state; and (2) to serve the educative function of encouraging respondents to actively focus on the many varieties and types of school-college articulation and thus to stimulate developments on individual campuses. After an examination and survey of the typography, background, and literature of school-college articulation, specific conclusions are drawn. In general, both the schools and the colleges in the state appear to be open to greater articulation between the two sectors. Even though they do not regard articulation as a major educational concern at present, most respondents who were interviewed were much interested in learning more about innovative practices and programs at other schools. The idea of a task force or a series of regional or statewide conferences on articulation met with much favor. (Author/KE)

The vocational goals index in this document allows global qualifications to be determined for each award. The level of study supported by the fund and the sex qualifications can be determined. If the fund is limited to residents of specific states, to citizens of the United States, and/or if the recipient must study in a specific location, that too can be determined in one glance in the vocational goals index. If the applicant or his family must be a member of an ethnic group, of a labor union, etc., to be eligible for that particular financial aid, that is also noted in the vocational goals index. Examples of certain kinds of local student aid funds are given, but it is essential that the person needing student aid try to find similar agencies and donors in his own community. The section on student aid provides a road map for the latest information on Federal financial student aid. (Author/KE)

Descriptors—\*Collective Bargaining, \*Conflict Resolution, Contracts, \*Employer Employee Relationship, \*Grievance Procedures, \*Higher Education

This study compares the manner in which employment relations problems are resolved at institutions with collective bargaining contracts and those without such contracts. It also describes how collectively bargained agreements in general have resulted in the development of more formal conflict-resolution mechanisms in all sectors of higher education. An analysis and descriptive summary of grievance procedures at contract and noncontract institutions is provided. It is concluded that the reliance on formal authority is greater and grievance procedures more frequent in collective bargaining situations than in nonbargaining situations; however the trend is for the broader rules of public labor relations to move through all sectors of the higher education community. The need is underscored for continuing study of different approaches to managing employment relations conflicts. Both contracting and noncontracting institutions are urged to keep thorough records of all bargaining efforts so that longitudinal studies can be performed to provide a basis for a completely systematic analysis that is not possible at the present time. Descriptors—\*College Choice, Educational Opportunities, \*Equal Education, \*Financial Needs, \*Financial Support, \*Higher Education, \*Student Financial Aid

In the mid 1970's the goals of student financial aid revolve around the idea of removing financial barriers to access and reasonable choice. Students should be able to choose an institution based on rational decision making rather than monetary considerations. To this end the Federal Government, the states, and other sources of student financial aid have developed a whole array of programs designed to move us toward the goal of equal educational opportunity. Yet the formulas differ for distributing the funds under these programs, and all too often the funds appropriated fall far short of the program purposes. For a more equitable system to be developed: (1) a student and his family must be assured early in the student's formal education that financial aid

will be available: (2) announcement of the amount of aid should be made before the student to select an institution so that this decision is not dictated by purely financial considerations; (3) to achieve equal educational opportunity, the determination of student need must be based on one method of need analysis used by all who grant student aid; and (4) sufficient funds should be provided to meet the financial need thus determined. Descriptors—\*Consumer Economics, \*Consumer Protection, \*Federal Programs, \*Government Role, \*Higher Education, Post Secondary Education, Proprietary Schools, State Programs

Participation of postsecondary institutions in student consumerism occurs largely because of the broader problem of external pressures on all postsecondary institutions requiring institutional responses. A major source of pressure comes from government regulations for federal student-based aid programs, especially loan programs. These regulations not only determine how the loan programs are administered but also shape internal administrative procedures affecting student-institutional relationships. Pressure also comes from students who seek to influence campus politics and programs and from student-initiated law suits that charge institutions with failing to meet their educational commitments. New institutional and organizational initiatives that attempt to provide more complete information for students may heighten consumer awareness throughout postsecondary education, creating a more favorable climate in which students can make sound decisions about their education. This activity is implemented by federal efforts on behalf of consumers that result from the government's concern in the awarding of guaranteed loans and in fulfilling their legislative mandates. A broad, panoramic study was conducted on the activities and the extent of participation of Black people in various telecommunications fields in the United States. The ways in which media technology can be and has been used as a means for educating Black people were examined. Briefly, the ideological perspective of Black education was discussed and defined, but the major emphasis of the extensive survey was on mass media applications and Black people. Commercial television, films and filmmakers, commercial radio, public broadcasting, computer-assisted in-

struction, educational use of multi-media and communication satellites were dealt with in detail. Successes and failures in these areas were identified, a format for improvement and recommendations for establishment of innovative programs were developed. Bibliography and appendix are also provided. (HB)

Information is provided about instructional methods and materials utilized by 80 academic, 337 public, and 1333 school libraries in Wisconsin. For both academic and school libraries, a listing of libraries is followed by an index. The listing is arranged alphabetically by the name of the institution, and each institution is numbered for indexing purposes. Each entry contains the address of the institution, the person responsible for the instructional program, demographic information, and specific characteristics of the program. Indexing is done by grade levels, subjects covered, and instructional methods. A brief chapter on public libraries gives a summary of the state of library instruction in the Wisconsin public libraries. (NR)

A model classification for media paraprofessionals was constructed in order to establish salaries, personnel qualifications, useful training programs, administrative procedures, and standardized terminology. An analysis was made of such job elements as type of work, its difficulty and responsibility, supervisory responsibility, administrative responsibility, personal contacts, and working conditions. The classification plan was developed based on several levels of competence in each of four classes: media center clerical, film library clerical and technical, media preparation and reproduction, and media technical and maintenance. This resulted in 29 separate positions for which job descriptions were developed—including the title, basic job concept, duties and responsibilities, required knowledge or skills, experience, education, and desirable personal characteristics. Affirmative action, training programs, opportunities for promotion, and plans for developing media training curricula were considered, and brief recommendations for executing the plan were formulated. **Identifiers**—Library Services and Construction Act, LSCA, SOLINET, \*South Carolina, Southeastern Library Network

The annual program for administration of Library Services and Construction Act (LSCA) funds in South Carolina is presented in four parts: the annual program for 1976, a supplement to the 1975 program, a supplement to the 1976 program, and amendments to the basic state plan. Library service programs outlined for 1976 include general administration of LSCA funds, library public relations, operation of the state library, strengthening the state library agency, field services, service to the disadvantaged, periodical services, institutional libraries, service to the blind and physically handicapped, and service to persons of limited English-speaking ability. Career education workshops, public library development, book collection improvement, a film program, and improvement of metropolitan libraries as resource and reference centers appear in the 1975 program supplement. Descriptions of interlibrary cooperation projects cover a communications network for interlibrary loans, intercommunication among libraries, area reference resource centers, an interlibrary loan network, training for interlibrary cooperation, and participation in the Southeastern Library Network (SOLINET). Letters, documents, and lists of personnel and participating agencies are included. (LS)

**Document Not Available from EDRS**

**Descriptors**—History, Librarians, \*Libraries, Library Associations, Library Cooperation, \*National Libraries, \*Public Libraries, Regional Libraries, School Libraries

**Identifiers**—\*Canada, Letts (Alberta)

The history of books, reading, and public libraries in Canada can be traced from the first public reading in 1535. Although a university library organized by Jesuits in 1635 was followed by book collections in fur trading posts, government agencies, subscription libraries, and libraries for the professions, the first public libraries did not open until 1883. These were in Guelph and Toronto. Traveling libraries grew in Western Canada, and the provinces enacted library legislation. Early in this century new public libraries opened and began to flourish (some with the help of the Car-

negie Corporation), but the depression and World War II slowed development. Since cooperation and a national library were seen as necessary in the 1940's, the Canadian Library Council and the Canadian Library Association (CLA) were formed to promote them. The 1950's saw increased library cooperation, the rise of regional libraries, legislation for a national library, and the formation of libraries in previously unserved areas. In the 1960's and 1970's metropolitan libraries grew, the number of library schools increased, standards were written, and the new national library building opened. Future library development may include better funding and services, improved communications, increased use of nonprint media, resource sharing, workshops and other training programs, and better facilities. This volume of Proceedings of the American Society for Information Science is limited to the text of papers accepted and scheduled for presentation at the 1975 meeting. The papers reflect the need to address and define issues in national information policy, and they examine the current state of federal-level planning and funding of information systems. Contributed papers are categorized in the following manner: (1) information transfer mechanisms and phenomena; 2)

library networks; 3) communication and classification theory; 4) user psychology; 5) library management; 6) education and careers in information science; 7) retrieval vocabularies: indexing, switching mechanisms, and text manipulation; 8) planning national and international systems, extending the application of technology, and using micromedia; 9) the future of information services and systems; 10) clustering and discrimination techniques and secondary sources; 11) using on-line retrieval services; and 12) applications in biology and chemistry. In all, 80 papers are included. (CH)

**Identifiers—\*National Commission Libraries Information Science**

A study on information technology and public policy examined relationships among information providers and their clients in order to determine the economic, institutional, and technological factors that are key in deciding how people get the information they need. The research project was conducted to help the National Commission on Libraries and Information Science in three ways: to highlight costs and benefits of various allocations of information functions, to indicate the size and direction of forces, and to help libraries and information technicians evaluate their roles so that practical public policy alternatives and their consequences for the public can be better understood. Researchers found that the public reach of information services varies widely even within types of services. The scope of information resources is wide and well-supported by various governments. In the past 20 years, the size, activity, and cost of library and other information services have grown above the growth rates of basic indexes. Information services and libraries suffer from poor accounting practices, confused policies, rivalries, and limited scope of research and development. (CH)

**Aiming for Quality: The Five-Year Plan of the Chicago Library System. 1976-1980.**

Chicago Public Library, Ill.

Pub Date 75

Note—151p.

**EDRS Price MF-\$0.83 HC-\$8.69 Plus Postage**

**Descriptors—Community Characteristics, Information Needs, Library Networks, \*Library Planning, Library Programs, \*Library Services, Library Standards, Objectives, \*Public Libraries**

**Identifiers—\*Chicago Library System, Illinois (Chicago)**

The efforts of the Chicago Public Library during the years 1976-80 will focus on: (1) evaluating, improving, and adjusting existing programs and developing new programs; (2) cooperating with other agencies and organizations in the community; (3) improving the functioning of the library as a research and reference center for the state; and (4) improving the fiscal position of the library system. The objectives of the five-year plan include developing a program of library services aimed at meeting the needs of every Chicagoan; providing adequate library materials, both print and nonprint; developing an adequate staff; improving communications within the library system; providing functional, safe, and attractive facilities; increasing public awareness of

library services; modernizing the library's internal fiscal procedures; and increasing the library system's financial resources. A bibliography of over 100 items is included. (Author/PF)

**Descriptors—\*Cataloging, Computers, Demonstration Projects, Libraries, \*Library Automation, \*Library Cooperation, Library Expenditures, Library Networks, Library Planning, Library Research, Library Services, Library Technical Processes, On Line Systems, \*Union Catalogs, \*University Libraries**

**Identifiers—Ontario, TELECAT, UNICAT**

The Monograph Demonstration Project, an experiment in cooperative library development, was conducted by the Council of Ontario Universities from July, 1973 through April, 1975. Objectives of the project were to establish that an automated, on-line cataloging support system is practical within the Ontario University library community, to provide superior cataloging support services at reduced cost, to eliminate duplication of cataloging, and to create a union catalog providing increased capability for rationalization of collections and cooperative university program development. As a result of the project, an automated cataloging support system now serves 16 libraries. The demonstration period proved to be a developmental period rather than a time of uninterrupted services and, as yet, cost reductions are not proven. Some duplication of cataloging activity was eliminated, and the development of a union file began. The researchers conclude with recommendations for the future for Ontario Universities. The original proposal, considerations for terminal selection, and flowcharts of processing procedures using the union cataloging support system are appended. (CH)

**Descriptors—\*Cataloging, Catalogs, Data Bases, Libraries, Library Automation, Library Planning, \*Library Research, Library Technical Processes, \*Union Catalogs, \*University Libraries**

**Identifiers—Machine Readable Cataloging, University of California**

The Institute of Library Research converted to machine-readable form over one million catalog cards representing about 750,000 Roman-language titles catalogued by the University of California (UC) libraries from 1963 to 1967. From this data base they printed the UC Union Catalog Supplement (UCUCS-1). From 1968 to 1972, an additional set of card records was collected and preprocessed. This study determined the extent to which the new UCUCS-2 records are available in already existing University of California data bases and in a few "outside" data bases. A one-half percent stratified sample was drawn from each UC campus and findings revealed that 82% of the UCUCS-2 sample could be associated with some kind of unique identification number, but only 63% of the total actually had this number on the catalog record; the others had to be searched in other files. Identifiers—Order Librarians

Many factors need to be considered when a librarian decides on vendors for his orders. By using information from existing trade journals and from questionnaires completed by publishers, a handbook was developed to assist librarians; it discusses some 450 publishers in terms of their: (1) address, (2) promptness of delivery, (3) price discounts which a library can expect, (4) charges other than actual purchase price, (5) convenience of returning materials, (6) accurate and prompt reports of titles currently unavailable, and (7) availability of standing order or approval plans. Publishers, book wholesalers, and librarians were surveyed in early 1974 to provide background data for a program at the American Library Association Annual Conference 1975. Publishers were queried about their relations with libraries, promotional activities (including relations with review media, direct mailings, and advertising), and sales to libraries. Wholesalers were queried about their services to libraries, and the results were tabulated for small, medium, and large wholesalers. Libraries were queried about their budgets, selection practices, and ordering practices. Results were tabulated for Association of Research Libraries members, college and university libraries, community college libraries, public libraries, and special libraries. The questionnaires with tabulated results and the lists of recipients form the bulk of this document. (PF)

Identifiers—Higher Education Act Title II B, Media Specialist Education

A survey of 495 school media specialists in five Southeastern states attempted to discern which courses in their professional education best prepared them to manage school media programs. Results listed the most highly regarded

courses for both the elementary and the secondary specialists. In addition, the subjects rated the importance of various media specialist functions, and "selecting and evaluating resources" received the highest rating. The opinions of the specialists reflected a pragmatic orientation and were influenced by the credentialing criteria of their respective states. This document discusses the research methodology that was employed, outlines the results, and makes recommendations for future media specialist education. (EMH)

Identifiers—\*Council for Cultural Cooperation, Council of Europe

The Council for Cultural Cooperation is intended to promote interaction among European nations and to initiate cooperation in remodeling educational systems. At a 1974 Brussels conference, participants discussed the moral obligation of European governments to promote sociocultural community development directed toward a greater measure of compassion, equality of opportunity, and true democracy. Hoping to replace complacency and frustration with participation and self-realization, participants encouraged teachers and other social agents to inject their communities with a sense of animation and community consciousness. This policy requires radical reforms in education, political institutions, and cultural patterns, and these changes are unlikely to occur without the assistance and provocation of a group of agents trained in the art of social reform. This document is a collection of 10 essays which describe the need for change, cite examples of successful reforms, and make proposals for the future. (EMH)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Building Design, Building Plans, \*Developing Nations, Librarians, Library Equipment, \*Library Facilities, \*Library Planning, \*School Libraries

Identifiers—Asia, \*Regional Center for Book Development, UNESCO

An effective school library requires a good supply of books and periodicals, adequate furniture, sufficient space, and a trained person to manage the facility efficiently. In Asia, where educational facilities are often in short supply, UNESCO has established a Regional Center for Book Development and has made recommendations for future development in the use of libraries. Each village school should have some sort of minimal library facility to encourage students to do exploratory reading and to learn basic research skills. Simple designs can be used to modify existing school plants to provide shelving, a catalog, seating, and a work area for the librarian. Sample plans are provided. (EMH)

Descriptors—Community Problems, Extension Agents, Information Centers, \*Information Dissemination, \*Information Needs, Information Seeking, Information Sources, Information Utilization, Interagency Cooperation, Interdisciplinary Approach, Organization, Research Projects, Surveys, Technological Advancement, \*Water Pollution Control, \*Water Resources

Identifiers—Pennsylvania, Pennsylvania Cooperative Extension Service, \*Water Resources Scientific Information Center

In response to the need of many individuals and communities throughout Pennsylvania for an effective network to disseminate information about water resources, a study was conducted to explore possible relationships between the Water Resources Center and the Pennsylvania Cooperative Extension Service. The report focused on a case history review of the information transfer specialist who facilitated exchanges between the two agencies. To assist the specialist, a water resources needs survey was distributed to relevant community members to determine the seriousness of local water problems. He acquired additional information through the use of trade journals, newspaper clippings, and a computer-based water resources information center. The research project has served to reinforce the feeling that the joint Water Center-Extension programs have the potential to greatly enhance the successful transfer of water resources information. Identifiers—Kansas (Lawrence)

Some educators, especially those engaged in minority studies, are historically disenchanted with textbooks. They have sought alternative sources of information in multimedia. To test the effectiveness of a multimedia approach to change students' attitudes and increase factual knowledge, the Lawrence, Kansas, schools designed an experiment to compare learning in two sample groups, one using a textbook approach for a six-week unit on ethnic studies and the other using a multimedia approach. Pre- and posttest results showed no significant differences in cognitive and effective learning between the two samples. This monograph consists of four parts: (1) a history of minority dissatisfaction with textbooks and instructional media; (2) a description of the methodology used in the Lawrence experiment; (3) results of the experi-

ment; and (4) an appendix of the measurement tools used in the study. (EMH)

Identifiers—\*Satellite Technology Demonstration

The overall objective of the Satellite Technology Demonstration (STD) was to test the feasibility of delivering television programming via satellite to isolated, rural locations. Community members at various STD sites were surveyed to determine how they felt about a variety of topics which were planned for an adult evening series. Topics in education, consumer affairs, health, and environment proved to be of interest, and a series of 12 programs, 40 minutes each with a 19 minute local question-and-answer segment, was designed and broadcast to STD receivers located in local junior high schools. Audience reactions were positive, but it was concluded that more interest could be generated if programs were of more specific local interest. (EMH)

Identifiers—California (San Francisco), Lockheed DIALOG, Project DIALIB

Costs and cost-related factors connected with providing on-line search services through the public library are examined. The examination was based on preliminary results from an on-going evaluation of an experimental program (DIALIB). In the DIALIB experiment Lockheed's DIALOG search service was available to the public through four public libraries in the San Francisco Bay Area. Preliminary data were gathered on fixed costs connected with system operation, on individual search costs, and on costs associated with the additional time demands made on the library reference staff. In addition, several factors were identified which impinge on the provision of financial support for such on-line search services. (Author/JY)

Descriptors—Computers, \*Cost Effectiveness, Data Bases, Experimental Programs, Information Retrieval, \*Library Reference Services, \*On Line Systems, \*Public Libraries

Identifiers—Bibliographic Searching, California (San Francisco), Computerized Literature Retrieval, Lockheed DIALOG, \*Project DIALIB

A cost analysis was made of on-line bibliographic searching in four public libraries in the San Francisco Bay Area using the Lockheed DIALOG system. The study involved monitoring the time that 35 individuals in the libraries spent processing some 411 search requests. The study identified a set of seven tasks that are performed for each request and determined the average time and cost for each of the tasks. The average total search cost was \$28.41, exclusive of telephone line charges. This figure does include the data base connect charges of \$17.29. The average time required to process a request was 7.8 calendar days. A wide variation in the cost and time figures was found among the four libraries and among individual searchers. (Author/JY)

The Impact of On-Line Search Services on Library Operations and Users.

Applied Communication Research, Stanford, Calif.

Pub Date 4 Mar 75

Note—8p.; Paper presented at the Annual Meeting of the National Federation of Abstracting and Indexing Services (17th, Arlington, Virginia, March 4, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Experimental Programs, \*Information Retrieval, Library Administration, \*Library Reference Services, Library Role, \*On Line Systems, Public Libraries, Use Studies

Identifiers—California (San Francisco), Computer Search Services, Lockheed DIALOG, \*Project DIALIB

An experimental program placed computer terminals in four San Francisco Bay Area public

libraries to be used to provide on-line computer search services to library patrons. The first few months of operation of the experiment showed that there was a significant impact on the participating libraries, on the library patrons, and on the community and society at large. Among the observations made of the program were that: providing computer search services is going to cost the library more than just the cost of the computer time used, that librarians must learn new skills to be effective searchers, that search services require a high degree of interlibrary cooperation and communication, that many of the clients for these services will be people who would not ordinarily use public libraries, and the community will develop an increasing awareness of the power of information. A broad search of the scientifically relevant literature on television and human behavior began in the fall of 1973 and extended over a year; the search concentrated on the literature since 1960, although it attempted to include all significant earlier works. In addition, special emphasis was placed on obtaining very recent, hard to locate, and infrequently referenced items, including various Congressional hearings, the reports of various national commissions and special committees, and noteworthy journalism synthesizing or commenting on the scientific literature. The more than 2,000 items located are first presented in a "master bibliography," and each is described by key words in terms of topics and in the case of empirical work, methodology. The master bibliography is followed by 11 specialized bibliographies. The first 10 of these specialized bibliographies deal with substantive topics. The eleventh collates current items, defined as citations bearing 1974 or 1975 dates or labeled "in press." The 10 substantive specialized bibliographies represent the topics in terms of which the literature is analyzed for the larger evaluation, for which the bibliography was compiled. They are defined and discussed in the introduction, where other procedural details and various symbols and terms are also explained. (Author/HB)

Descriptors—\*Broadcast Industry, Curriculum Development, Educational Background, Higher Education, Job Skills, News Reporting, \*Professional Education, Radio, \*Technical Education, Telecommunication, Television

Identifiers—Broadcasters, NAEB 75

Education designed to prepare future broadcasters should begin to concentrate on liberal arts and professionalism and should de-emphasize skills and technical competencies. Two weaknesses of a technical-centered education are: (1) that technical competencies rapidly become obsolete, and (2) that the broadcaster trained as a technician usually lacks the background and sensitivity to turn the industry away from commercialism and towards meeting the needs of the society. Broadcasters should be educated to make intelligent decisions and to use the media to

promote a free and harmonious society. This goal is best achieved through a general, liberal arts education, and through exposure to senior broadcasters who have a broad and humane perspective on the world. (EMH)

Descriptors—Audiovisual Aids, \*Classification, \*Educational Technology, Guides, Instructional Media, Standards, \*Vocabulary

Developed to help people in gathering, compiling, and interpreting data relating to the application of technology to instruction, this handbook provides assistance in the form of standardized terms and definitions and a structure showing the interrelationships of those terms. The handbook is organized to lead logically from an overall definition of educational technology to a classification scheme of terms, then, to the definitions for these terms. The classification scheme is outlined with subdivisions indicated by indentation and a numerical code. In a separate section, the terms are listed again in the order of the classification with complete definitions. Selected units of measure for the classified terms are provided in another section. A glossary listing related terms and their definitions, a brief bibliography, and an alphabetical index to all terms defined in the handbook are included. (Author/PF)

Note—16p.; Paper presented at the International Symposium on Audio-Visual Materials (Strasbourg, France, January 9, 1976)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Audiovisual Aids, \*Definitions, Educational Technology, \*Glossaries, \*Instructional Media, International Programs, Speeches, Thesauri, \*Vocabulary

Identifiers—International Council of Educational Media

Because no published glossary of audiovisual terms has yet gained international currency, there is a need to: (1) explore international acceptance of a list of audiovisual terms and definitions; (2) review current efforts to do so; (3) propose criteria for acceptable terms and definitions; and (4) recommend procedures for acceptance of terminology. Consistency of definition is necessary to maintain meaningful discourse between producers, librarians, practitioners, and administrators.

The goal of providing accuracy and clarity is especially important in a field characterized by prolific growth and diversity of formats. For example, the videocassette is presently available in some 20 forms, and the use of the term no longer suggests specific information about size or system compatibility. Efforts to develop uniform taxonomies are under way in Canada, the Federal Republic of Germany, and the United States; and the International Council of Educational Media is also developing terminology; but work remains in the development of a list which is exhaustive, mutually exclusive, unambiguous, and amendable to translation. Descriptors—Diagnostic Teaching, Educational Objectives, \*Higher Education, \*Individualized Instruction, Instructional Design, Speeches, Systems Concepts, \*Teaching Methods

In recent years, higher education has been subject to the criticism that the pervasive lecture method is impersonal and ineffective. The individualization of instruction using instructional technology can help to answer that criticism by facilitating the optimal combination of professor-determined objectives and processes with student-determined needs and goals. New technologies and methodologies can be used to adapt the instructional process more precisely to the needs of students. Because there is a natural tension between student-determined objectives and those of the professor, it is important that any new system provide flexibility and choice so that institutional harmony can be preserved. Identifiers—BALLOTS, Bibliographic Automation Large Library Operations, Middle Atlantic Research Library Information, Minnesota Interlibrary Teletype Exchange, Ohio College Library Center, Total Interlibrary Exchange

Papers from an institute on the university's role in information networks are presented. Two introductory papers define networks in general and consider reasons for their existence in academic libraries. Five papers describe operational networks: Ohio College Library Center (OCLC), Stanford's BALLOTS system, the Minnesota Interlibrary Teletype Exchange (MINTEX), the Total Interlibrary Exchange (TIE) in Southern California, and the Middle Atlantic Research Library Information (MARLIN) system. Factors contributing to the success and failure of networks are considered, as are constraints in the areas of jurisdiction, organization, finances, procedures, and personnel. The final three papers cover the potential for state networks, prospects for nationwide networks, and possibilities and needs for future networks. (LS)

Pub Date Aug 75

Note—44p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Curriculum Research, \*Instructional Films, \*Military Training, Statistical Analysis, Systems Approach, Technical Education

Two films, "Oxygen Breathing Apparatus Type A-3" and "Damage Control Petty Officer," were developed using an educational systems approach and based on 15 behavioral objectives. The effectiveness of each film was tested using three samples: one which was pretested, viewed the film, and was posttested; another which was pretested and posttested but did not view the film; and another which was tested without viewing the film. Results showed that viewing the film significantly improved posttest scores, especially for viewers of high intelligence, but the films failed to achieve the 80 percent proficiency which had been desired. Though modifications will be necessary to make the films meet minimal achievement standards, both films showed themselves to be significant aids in the instructional process. The report discusses in detail the statistical significance of the test results. (EMH)

Identifiers—\*Library of Congress, Machine Readable Cataloging, MARC

In a program sponsored by the Association of Research Libraries (ARL), the Library of Congress (LC) Processing Department reports on progress in development of the National Bibliographic Service. The first paper deals with past, present, and future cooperation between LC and the ARL. The second paper provides an overview of the automation activities of LC's processing department and serves as an introduction to the three subsequent papers. In the first of these the LC core bibliographic system is described, with heavy emphasis on MARC systems operations. The next paper covers the national bibliographic system including: CONSER, a serials data base; and automated register of additional locations; international cooperation; and participation in the projects of various library organizations. Finally, various problems encountered in transition to an automated system are described. The informal discussion held at the end of the program is also transcribed. (LS)

Identifiers—Chocktaw Nation Multi County Library System, CNMCLS, KEDDO, Kiamichi Economic Development District of Oklahoma, Oklahoma (Pushmataha County)

A study was made of library services in the Kiamichi Economic Development District of Oklahoma (KEDDO). Since six of the seven counties in the district belonged to the Chocktaw Nation Multi-County Library System (CNMCLS), particular attention was given to the seventh county, Pushmataha. The population, socioeconomic factors, transportation system, and industrial development in KEDDO were con-

sidered. Analysis of both the CNMCLS and the Pushmataha County Antlers Library showed that while the libraries of CNMCLS did not entirely meet Oklahoma state standards, CNMCLS was providing better services than Pushmataha County. Two possibilities for reorganization were proposed: (1) a joint city and county library could be formed, or (2) Pushmataha County could join CNMCLS and enjoy the benefits of CNMCLS's mail-a-book services; bookmobiles; centralized bookkeeping, book processing, and ordering; specialized equipment; larger book discounts; broader tax base; reference center; personnel training programs; and special programs for patrons. A specific recommendation was made that the Antlers Public Library Board of Trustees review existing policies and procedures and develop a written library policy. Appendixes include state and national library standards, CNMCLS salary and personnel classification schedules, a CNMCLS activities report, and a sample survey form. (LS)

Established by Congressional Act in 1950, the National Science Foundation (NSF) is charged with a variety of responsibilities in the areas of education, research, applications of research, data gathering, and information dissemination. The foundation is governed by an appointed director and a national board and is primarily funded by the federal government. Spending approximately 10 percent of the nation's funds for research and development, the NSF sponsors research which promises substantial benefits for society in the future. Proposals are submitted to an open competition, and winners are selected by a panel of experts. Since computers permeate most fields of science, the NSF also provides computer technology and time-sharing for subsidized researchers. Also, it is presently sponsoring an overview study of the state of computer art in the United States. Other studies on computers and privacy and on the role of computers in educational innovation will be forthcoming. (EMH)

Descriptors—Biomedical Equipment, \*Computers, Facility Inventory, \*Health Facilities, Health Occupations Education, Medical Education, \*Programming Languages, Surveys  
Identifiers—AFIPS 75, FORTRAN

Computers are currently being used to perform medical tasks such as: (1) taking medical histories; (2) patient care and health-unit care management; (3) clinical and laboratory work; (4) physiological signal monitoring; and (5) multiphasic screening. In a survey of over 200 institutions, over 339 computer language applications were found, many of which were developed in-house. The survey showed that commonly used languages such as FORTRAN, COBOL, and PL/I are used more often than the special purpose languages such as MUMPS, FOPS, and PILOT. Findings indicated that FORTRAN is the most adaptable for a wide spectrum of computer memory sizes. The results also showed that almost half the computers used in medical work were of the large main memory type (64K to 3M), and that computer vending was dominated by International Business Machines and Digital Equipment Corporation. This information was intended to provide basic guidelines on the hardware and software likely to be available for developing medicine education curriculums. (EMH)

Image of Women in Advertisements: A Preliminary Study of Avenues for Change. Stanford Univ., Calif. Inst. for Communication Research.

Spons Agency—Ford Foundation, New York, N.Y. Pub Date Sep 75

Note—40p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Change Strategies, Commercial Television, Communications, Content Analysis, \*Females, Mass Media, \*Publicize, Sex Discrimination, Sex Role, \*Sex Stereotypes, Social Change, \*Television Commercials, Television Viewing, \*Womens Studies

The Center for Research on Women (CROW) at Stanford University along with the Communication Department, the Psychology Department, and the School of Education conducted a study on the image of women in advertising and suggested ways to improve women's image in the advertising media. With the objective of sponsoring some alternatives to expedite change, the project focused on how advertising agencies and advertisers interact and how they create images. The results of interviews and a literature search indicated that advertising agencies continued to respond to the profit motive rather than social needs. However, there seemed to be several ways of bringing about image change. These included: (1) having large organizations, such as National Organization of Women (NOW), approach major advertisers and advertising agencies with suggestions for change; (2) having stockholders demand a more accurate presentation of women; (3) having large organizations boycott products with particularly offensive advertisements; (4) encouraging acceptance of recommendations made by the National Advertising Relations Board (NARB); and (5) urging the Federal Trade Commission (FTC) to be sensitive to presentations of women in commercials. The study concluded that alternatives needed to be backed up by research data showing the image of women portrayed by the advertiser or agency. (HB)

Descriptors—\*Computer Assisted Instruction, Computer Programs, \*Individualized Programs, Instructional Technology, On Line Systems, Semantics, Tutoring

Identifiers—Natural Language Processing, \*NLS SCHOLAR

NLS-SCHOLAR is a prototype system that uses artificial intelligence techniques to teach computer-naïve people how to use a powerful and complex editor. This new kind of computer assisted instruction system integrates systematic teaching with actual practice, keeping the user under tutorial supervision while allowing him to try out what he learns on the editor. NLS-SCHOLAR can be used as an on-line help system, outside the tutorial environment, in the course of a user's actual work. Testing on this system revealed that the teaching component of NLS-SCHOLAR is very effective, but the system's performance as an on-line help facility needs improvement. Techniques used in NLS-SCHOLAR are general and can be applied to the teaching of a wide variety of computer related activities. (Author/CH)

In 1975, a national conference was held to discuss the current status of open learning and nontraditional studies, and to discuss plans for the future. This report contains some 75 essays classified into the following categories: (1) general issues, (2) management and financing patterns, (3) academic and curricular patterns, (4) communications technology and delivery patterns, and (5) research and evaluation patterns. A list of conference participants is also provided. (EMH)

Crandall, Nelson D.

CAI: Its Role in the Education of Ethnic Minorities.

Pub Date Jan 76

Note—7p.; Paper presented at the Association for the Development of Computer Based Instructional Systems Winter Conference (Santa Barbara, California, January 26-29, California, January

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—American Indians, \*Computer Assisted Instruction, Elementary Secondary Education, \*Ethnic Groups, Feedback, Locus of Control, Mexican Americans, Minority Groups, Negroes, \*Reinforcement, \*Self Concept, \*Socioeconomic Background, Teaching Techniques

According to the Coleman Report of 1966, the poor child considers his success a matter of fate or luck—something completely out of his control. If a child with this outlook is going to succeed, the child must receive immediate gratification for his educational achievements, and he must be shown that success is the result of a cause-and-effect mechanism which he can personally control. Computer assisted instruction is a nearly perfect instrument for this purpose because: (1) it gives the student total control; (2) it operates in a cause-and-effect mode; (3) it is direct; (4) it provides immediate feedback; and (5) it gives specific, explicit directions. Results of several experiments have shown that computer assisted instruction can dramatically improve results on standardized tests. (EMH)

Federico, Pat-Anthony

Computer Simulation: A Technique for Studying Psychosocial and Sociotechnical Systems.

Navy Personnel Research and Development Center, San Diego, Calif.

Report No.—NPRDC-TN-76-3

Pub Date Jan 76

Note—63p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—\*Behavioral Science Research, \*Computers, Literature Reviews, Management Games, Organizational Theories, Psychology, \*Simulation, Sociology, Sociometric Techniques

Identifiers—Organizational Research, \*Personnel Research, Psychosocial Systems, Sociotechnical Systems

Navy personnel research conducted a comprehensive review of the literature on computer simulation studies to determine whether simulation methodology could be used to improve scientific understanding of psychosocial and sociotechnical systems. The literature search indicated that computer simulation could provide tools for the study of organizational behavior, and it was concluded that the advantages resulting from using simulation techniques outweigh the difficulties encountered in their implementation. **APEX: A Computerized Simulation Game as the Basis for an Undergraduate Interdisciplinary Course.**

Pub Date 27 Jan 76

Note—9p.; Paper presented at the Association for the Development of Computer-Based Instructional Systems Winter Conference (Santa Barbara, California, January 27, 1976)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Computer Oriented Programs, Decision Making, Games, \*Health Occupations Education, Higher Education, Management Games, \*Role Playing, \*Simulation

**Identifiers**—APEX

APEX is a computerized gaming simulation; it is also the name of an interdisciplinary course in environmental problems in urban areas introduced at the School of Health Science, Hunter College of the City University of New York. In the course, students assume the roles of decision makers in both the private and public sectors. They receive data and make decisions necessary to "run" the community. Their decisions are used as input to a computerized simulation of the community. Results generated by the computer are used as the bases for subsequent problems and decisions. APEX stimulates student interaction and encompasses broad decision-making areas in an integrated manner. Student responses to the course has been positive, and there are plans to add more roles to the APEX simulation. (CH)

**Multi-Ethnic Media; Selected Bibliographies in Print.**

American Library Association, Chicago, Ill. Office for Library Service to the Disadvantaged.

Pub Date 75

Note—37p.

Available from—American Library Association, Publications Department, 50 East Huron Street, Chicago, Illinois 60611 (\$2.00)

**Document Not Available from EDRS**

**Descriptors**—Adolescent Literature, \*Annotated Bibliographies, Audiovisual Aids, Authors, Childrens Literature, Cultural Differences, \*Cultural Interrelationships, Cultural Pluralism, Disadvantaged Groups, Elementary Secondary Education, \*Ethnic Groups, History, Instructional Media, Library Materials, Library Services, \*Minority Group Children, Minority Groups, Minority Role, Racism, Resource Materials, Self Concept, Sex Stereotypes, Textbooks

A guide to multi-ethnic materials is presented in three parts. The first is an annotated bibliography of bibliographic essays which cover such subjects as minorities in children's books, racism, minority literature and cultures, minority self-concept, sexism, minority authors, library services, intercultural understanding, and textbooks. The second section is an annotated list of bibliographies. These cite books and articles on minority authors and literature, minority culture and history, teaching materials, and library materials. Information sources are listed and described in the third section which cites books, periodicals, organizations, information services, and indexes. Most of the items in all three sections are concerned with children's and young adult books and audiovisual materials, and are primarily aimed at the educator and librarian. American blacks, Spanish-speaking, Asians, Indians, and Jews are heavily emphasized with occasional mention of other minorities. (LS)

Note—29p.

Available from—American Library Association, Publications Department, 50 East Huron Street, Chicago, Illinois 60611 (\$2.00)

**Document Not Available from EDRS**

**Descriptors**—Library Planning, \*Library Programs, Library Services, Manuals, \*Outreach Programs, Program Evaluation, Program Planning, \*Public Libraries, \*Young Adults

Plans are provided for developing a young adult program both in the library and in the community. Community investigation methods are described—where to look for information, organizations to contact, places where youth congregate and may be reached, ways to cooperate with schools, and how to survey the target group. Suggestions are made for developing a program based on the needs of the young adult community. These include establishing a good basic in-library program, training of library staff, involving young adults in the planning and encouraging participation of outside organizations. Funding, public relations, followup, and techniques for continuous evaluation of the program are also covered. Forms used in developing, publicizing, evaluating, and reporting the programs are appended. (LS)

Revised guidelines are provided for audiovisual materials and services in public libraries serving a population of 150,000 or more. A glossary of terms is followed by definitions of responsibility at the federal, state, regional, and local levels. Allocation of 10 to 15 percent of the materials budget for audiovisual resources is recommended. Other recommendations cover circulation policies, public access, materials selection and handling, and copying. Minimum standards are stated for purchasing specific kinds of materials and staffing the collections. Personnel needs are outlined for state and regional audiovisual collections. Twelve recommendations are made concerning minimum space and equipment, with specific equipment itemized. Finally, standards for maintaining statistical data are given. A form for listing holdings data is appended. (LS)

**Identifiers**—Regional Medical Program

An institute was set up to train 20 current employees to provide information retrieval and document delivery in libraries of health facilities in the northeastern United States and to promote familiarity with existing networks and regional systems. Participants included secretaries, medical record managers, volunteers, and others, with education ranging from high school graduation to a master of library science degree. Over a period of two weeks participants were exposed to information about health care facilities and libraries, the National Library of Medicine, specialized reference materials, book and periodical selection, library technical processes, government publications, binding, reference services, interlibrary loans, information networks, copyright, the Medical Library Association, medical data bases, and funding and budgets. In addition, participants made two site visits to medical libraries and saw slide presentations from two others. Evaluations found the institute very successful, and provisions for follow-up were made. Appendixes include a pretest and a posttest. (LS)

As an introduction to "Cover to Cover," a 32-program educational television series designed to encourage fifth and sixth graders to read for pleasure, this text provides a variety of background materials for each book featured in the series. Each unit focuses on one book and includes a sampling of reviews and a synopsis of the plot, and additional information is provided which might enable the teacher to accurately match the book with the interest and abilities of students. Each selection is accompanied by a list of other books similar in interest and difficulty. The second part of the test is an annotated bibliography of all the featured and suggested books from the "Cover to Cover" series. (EMH)

**Identifiers**—\*Dual Audio Television, Philadelphia City Schools

The Philadelphia City Schools engaged in a four-year program to develop and test dual audio television, a way to help children learn more from the massive amount of time they spend watching commercial television. The format consisted of an instructional radio broadcast that accompanied popular television shows and attempted to clarify and amplify the vocabulary and word concepts that were introduced. The power of the dual audio was that it piggy-backed on an already existing delivery system, but difficulties derived from attempting to inject educational content into formats that were in many ways inimical to good teaching practice. Research revealed that certain methods of presentation were more effective than others, but the overall results were disappointing. (EMH)

**Descriptors**—\*College Students, \*Educational Environment, \*Educational Research, Educational Testing, Higher Education, Performance Factors, Research Projects, \*Testing Problems

**Identifiers**—AECT 76

To assess the effect of contextual stimuli on learning, a study was conducted to see if providing instruction to students in one setting and testing them in yet another setting had an effect on their recall. Twenty-eight college students were randomly divided into two groups, and both were exposed to a multimedia instructional presentation. Then, one group was tested in the laboratory where they were instructed, and the other group was transferred to another location and then tested. An analysis of the test results showed that the displaced group scored significantly lower. (EMH)

**Identifiers**—AECT 76

An individuals ability to read is heavily influenced by the style in which he perceives letters and words. A study investigated the effect of the following two elements of perception: (1) field independence—the degree to which the subject is able to distinguish symbols and characters despite the complexity of the background; and (2) reflexivity—the degree to which the subject considers alternative interpretations. Using the Hidden Figures Test and the Matching Familiar Figures test, researchers examined 40 subjects between the ages of 15 and 17 who had been identified as either average or remedial readers. Test results showed that the average readers scored significantly higher, indicating that they were more field independent and reflective than the remedial group. A detailed discussion of the research methodology and tabular results are included. (EMH)

Descriptors—Algorithms, \*Computer Programs, Computers, Computer Science, Data Processing, Information Science, \*Programming Languages

Identifiers—INGRES, Nonprocedural Rational Languages, \*Query Processing

Multivariable queries can be processed in the data base management system INGRES. The general procedure is to decompose the query into a sequence of one-variable queries using two processes. One process is reduction which requires breaking off components of the query which are joined to it by a single variable. The other process, tuple-substitution, involves substituting for one of the variables a tuple at a time. The query processing algorithm has been developed for QUEL, the data language for INGRES. Algorithms for reduction and for choosing the variable to be substituted are given. The decision about which variable to substitute depends on estimation of costs, and some procedures for making cost estimates are outlined. (Author/CH)

Identifiers—CLENE 76, Management Review and Analysis Program, MRAP, \*Organizational Self Study

The Management Review and Analysis Program (MRAP) provides resources and guidelines for a research library to use in conducting an internal assessment of management practices. The MRAP self-study project has two components: a procedural methodology for conducting the analysis, and a conceptual framework provided to assist in evaluation. The study normally occurs over one year and a second year is generally devoted to the implementation of study results. Participating libraries have access to the program manual, data collection instruments, group development exercises, and other resources including consultation and personal assistance. Experience applying MRAP to library problems provides information on organizational learning and information on common barriers which may limit growth and development of library staff. (CH)

Note—27p.; Investigation into Information Requirements of the Social Sciences

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Data Collection, \*Information Needs, Information Services, \*Methods Research, Models, Research, \*Research Methodology, \*Social Science Research, Social Sciences

Identifiers—Great Britain, INFROSS Survey

The objective of this investigation was to collect data on the needs of information users which could serve as a basis for the design of information systems in the social sciences. Research habits of social scientists were explored to identify research procedures and problems of research including circumstantial and environmental variables. A profile of how social scientists conduct their research concludes this report. (CH)

Design of Information Systems in the Social Sciences (DISISS) is a research project conducted to describe the main characteristics of the literature of the social sciences using bibliometric techniques. A comprehensive machine readable file of social science serials was developed which is called CLOSSS (Check List of Social Science Serials). Data collection, data format procedures, editing and coding serials data, file creation, and analysis of the data base are all necessary operations for construction of a machine-readable file of bibliographical data. Data collection sheets, classification and coding procedures and labels are appended along with a diagram of main components of a CLOSSS record. (CH)

The growth of libraries and of technical education in the middle of the 19th century led to the organization of Melvil Dewey's School of Library Economy in 1887. The School offered a technical course to replace the apprenticeships then in favor. Its curriculum persisted as the model for library education through 1920. A break with the early form of library training came with the "Car-

negie impulse," the stimulus that catalyzed a national movement within the library profession to fall within the general reconstruction of higher education which was in full swing by World War II, and with the reorganization led by the Board of Education for Librarianship which focused attention on problems of educational administration. The latest development involved a transition to the acceptance of library education as a university responsibility. (Author/PF)

**Using Satellite Technology to Increase Professional Communications Among Teachers: a Report of Experiments Conducted by the National Education Association.**

National Education Association, Washington, D.C. Div. of Instruction and Professional Development.

Pub Date Aug 75

Note—76p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors—\*Communication Satellites, Educational Innovation, \*Educational Television, Formative Evaluation, \*Inservice Teacher Education, Instructional Materials, Instructional Media, Outreach Programs, Programing (Broadcast), \*Rural Education, \*Teacher Associations

Identifiers—Alaska, Fiji, Hawaii, National Aeronautics and Space Administration, \*National Education Association, New Zealand, Pan Pacific Satellite Pilot Series, PEACESAT Network

The National Education Association (NEA) in conjunction with the National Aeronautics and Space Administration, the National Library of Medicine, The Alaska Broadcasting Commission, and the Pacific PEACESAT Network, conducted four satellite experiments designed to improve professional communication among teachers. These programs were the Satellite Seminar, the NEA-Alaska Hour, NEASAT, and the Pan-Pacific Satellite Pilot Series. The report concluded that: (1) teacher-to-teacher exchange is the program's most important aspect; (2) when the course is offered for credit there is less teacher participation; (3) sufficient time must be allowed to mail materials in advance of the programs; (4) a site coordinator is essential at every location, and (5)

prior local coordination should be established with all potential users of a satellite radio station to select an optimum site. The advantages of using satellites as delivery systems for NEA programs were summarized. The appendix contains sample press releases, evaluation forms, and discussion questions. (NR)

Descriptors—Communication Satellites, Curriculum Development, \*Educational Television, \*Elementary School Teachers, Formative Evaluation, Information Needs, Information Systems, \*Inservice Teacher Education, Instructional Media, Programing (Broadcast), Questionnaires, \*Reading Diagnosis, Reading Materials, \*Rural Education, Teacher Education Curriculum

Identifiers—Appalachia, \*Appalachian Educational Satellite Project

An inservice educational television course, which offered individualized experience in diagnosing specific reading problems and in locating remedial materials, was beamed by communication satellite to 286 elementary school teachers in the Appalachian region. Course evaluation concluded that: (1) participants demonstrated a significant gain in the cognitive area; (2) participants preferred programs which balanced theory and practice; (3) participants scored a nonsignificant change in attitude; (4) site coordinators needed more training as facilitators; (5) a more efficient system of question relay and question screening should be utilized; (6) teacher-to-teacher exchange and field work were highly rated; (7) information retrieval systems would be utilized more frequently if the site coordinator possessed more training, the video program was improved, and the recommended materials were more accessible; (8) equipment performance was excellent; (9) participants considered the course experience valuable. Appendixes contain 25 tables and 4 illustrations, questionnaires, and evaluation forms. This was one of four Appalachian Education Satellite Projects. (NR)

**Questions and Answers Regarding the Ad Hoc Committee's Position [on Copyright Law Revision].**

Pub Date Jul 73

Note—11p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Computers, \*Copyrights, Educational Technology, \*Laws, Legal Responsibility, \*Legislation, Libraries, \*Reprography, Teachers, Television

Identifiers—Ad Hoc Committee on Copyright Law Revision

The Ad Hoc Committee on Copyright Law Revision describes its position in a question and answer format. General questions about the committee and its objectives are followed by a description of the differing needs of copyright holders and educators. Since the committee's primary concern is that educators have adequate access to and use of copyrighted materials, the questions are centered around the fair use doctrine, a limited education exemption, copyright duration, waiver of statutory damages on innocent educational infringers, reproduction by libraries, use of broadcast materials, and use of educational technology, including computers. In each of these areas the existing and proposed laws are described and the committee's recommendations stated. The committee's position on a clearinghouse or statutory licensing system is given, and the requested limited educational exemption is described in detail. A proposed statute titled "Limitation on exclusive rights: Reproduction for teaching, scholarship, and research" is appended. (LS)

**Cable Television; What's in It for Teachers? A Handbook for State and Local Education Associations.**

National Education Association, Washington, D.C. Div. of Instruction and Professional Development.

Pub Date [75]

Note—17p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Cable Television, Community Antennas, \*Educational Television, \*Guidelines, Instructional Media, \*Teacher Role

Identifiers—Federal Communications Commission, \*National Education Association

This handbook lists the reasons why educators at the local level should become involved in the development of education television programs for cable television. Developed by the National Education Association (NEA), it encourages use of the cable channels set aside for education by the Federal Communications Commission (FCC) before the channels are re-allocated for other uses. A brief discussion of what cable television is and how it can benefit education is followed by reasons why schools should use it and how cable TV can serve teachers, students, parents, and the community. Suggestions for workshops for teachers, how to get started in television programming, and how to get programs on the cable are presented. Ideas for funding sources are also given. (HB)

**Alternative Futures and the Role of the Media.**

Workshop 2 (Toronto, Ontario, May 26-28, 1975).

Ontario Educational Communications Authority, Toronto.

Pub Date Jul 75

Note—44p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Conference Reports, \*Futures (of Society), \*Mass Media, \*Political Socialization, Social Change, \*Television, Trend Analysis, Workshops, World Affairs

Identifiers—Media Roles

Educators, educational planners, and social critics convened in Toronto (Ontario, Canada) May 26-28, 1975, to discuss the role of the media, especially television, in planning for the future. The emphasis of the workshop was on political and social futures, specifically materials and situations which would enable people to gain more control over their lives. The five major themes of the plenary sessions and discussions were: images of the future; social, environmental, and physical trends; counter-trends; the colonizers and the colonized of the future; and anticipatory democracy for informed decision making. The task of the futures project was thus defined as providing materials and information about the future, and helping establish political structures to deal with it. Study groups met and reported on three specific areas: (1) the project's purpose, (2) the means of achieving this purpose, and (3) the contents appropriate to the five major themes of the workshop. Lists of participants in the conference and in specific groups are included, as are some participants' comments on a draft of the report. (Author/LS)

**Television Program Complexity and Ratings.**

Pub Date May 75

Note—29p.; Paper presented at the American Association for Public Opinion Research Conference (Itasca, Illinois, May 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Age Differences, \*Audiences, Behavioral Science Research, \*Complexity Level, \*Programing (Broadcast), \*Rating Scales, Television, \*Television Research, Television Viewing

This paper applied findings from studies using the kind of viewing measures used by social scientists, to the relationship between programing and viewership when viewership is measured by means used by producers. Total aggregate viewership and the relationship of viewers' ages to viewership was concentrated on. Effects of competing programs on aggregate viewership (the issue of counter-programing) was not dealt with. The relationship of program form complexity to

viewership as measured by ratings was also examined. The expected preference for middle program complexity values in general on the part of viewers failed to appear. Age was found to be strongly related to the amount of viewing, and the degree of program complexity seemed to be moderately related to the age of viewers. Changes in program complexity appeared to cancel one another out. Programs high in complexity were attractive to young adults; however, these individuals did not watch much television. The net effect appeared to be a rather flat response of total audience size to changes in program complexity. Noncommercial programs appeared to be less complex in form than commercial programs and their ratings suffered as a result. Also, program complexity was likely to be related to production cost. (HB)

Descriptors—Communication Problems, Computers, Data Collection, Information Dissemination, \*Information Networks, Information Processing, Information Systems, International Programs, \*Standards

Identifiers—International Standards for Information Transfer

Many international standards have been developed to aid information transfer and feedback, but they must be updated and promoted. International Organization for Standards (ISO) technical committees dealing with terminology, documentation, and information processing have several programs designed to meet this need. Catalogs, indexes, and specialized centers provide some sources of information and guidance in the application of standards, and way are suggested for furthering the application of standards in systems interconnection. Identifiers—Alaska, Alaska Indian Health Service Project, Appalachia, Appalachian Educational Satellite Project, ATS 6, Federation of Rocky Mountain States, \*Health Education Telecommunications Demonstration, Veterans Administration Hospital Project

Six experiments in health and education were conducted in rural areas of the continental United States and Alaska during 1974-75, using the National Aeronautics and Space Administration's Applied Technology Satellite-Six. The experimental activities included courses designed for elementary, junior high, high school, and college; continuing professional education; medical consultations and health care support; administrative interaction; and adult enrichment. The study concluded that: (1) systems planning and program content should be based on user needs; (2) effective field personnel require staff support, proper training, and multisource feedback; (3) project objectives, personnel requirements, and interdisciplinary cooperation should be initial considerations; (4) supplementary activities and materials play a significant role; (5) educational effectiveness, target audience, and subject matter are primary program elements; (6) time and money may be larger considerations than anticipated; and (7) interaction between the studio and remote sites needs to be carefully structured and adopted to the specific situation. Identifiers—Editorial Processing, Publication Design, Scientific Information, Technical Information

The aim of this guide is to alert persons with an operational interest in scientific communication to new ideas, techniques, and equipment in the field of communication media and publications. The focus is on the dissemination of scientific information via the technical journal or its equivalent. Secondary dissemination of information such as bibliographies, data bases, and services are treated incidentally. The guide is organized into five sections: innovations in conventional journal and monography publishing, print-on-paper alternatives, non-print-on-paper and mixed media innovations, trends and prospects, and innovations needed. Each section is subdivided into individual entries describing particular processes or innovations. This guide has been designed as an "idea book" to help small scientific societies, journals, and publishers as well as to increase general awareness of innovations and stimulate development of new ideas. Tactile Media for the Visually Handicapped.

Pub Date 76

Note—18p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Blind, Instructional Aids, \*Sensory Aids, State of the Art Reviews, \*Tactile Adaptation, Technology, \*Visually Handicapped

New technological developments allow even the most severely visually handicapped person to read print, sense images, and operate calculators and meters. One of these new developments is the Optacon, which converts printed images to vibrations sensed by finger touch, and may be used to read print, handwriting, and calculator displays. Another device, the Visio-Substitution System, converts visual images to vibrations over a 10-inch area of the user's back, enabling him to sense a complete image. The Binary-coded Output Display is designed to allow reading of measuring units such as meters and counters. The technology of tactile illustration is improving, both with commercially available tactile maps and illustrations and with materials (such as aluminum foil, paper and screen, and cellophane) adaptable to individual needs. Other educational aids useful to the visually handicapped include the abacus, the geoboard (with fixed pegs over which rubber bands are stretched to teach number theory and geometry), origami, models, mockups, and realia. Teachers and librarians thus

have a variety of devices available to help improve their services to the visually handicapped. (LS)

**Document Not Available from EDRS**

**Descriptors**—Broadcast Industry, Communications, \*Employment Patterns, \*Females, Feminism, Programing (Broadcast), \*Public Television, \*Sex Discrimination, \*Television Research, Womens Studies

**Identifiers**—\*Corporation For Public Broadcasting, National Task Force On Women

The National Task Force on Women, established by the Corporation for Public Broadcasting (CPB), had three objectives: (1) to examine the extent to which women were employed at all levels in public broadcasting and were integrated into its policy-making and operations; (2) to examine the visibility and image of women in all programming and the coverage of issues pertinent to women; and (3) to make recommendations to the CPB Board of Directors. These objectives were carried out by public television program monitoring, collection of employment statistics, surveying public television stations, and interviewing on the attitudes concerning employment and on the air appearances of women. The findings from the studies indicated that women, though involved in public broadcasting, have failed to achieve the occupational success of men in the industry. Particularly accountable for the discrepancy between men and women seemed to be the pattern of job segregation. Women, regardless of education and length of service in the industry, were disproportionately employed in the low status secretarial and clerical positions and men in engineering, mid-level, and high-level managerial jobs. Also, men were seen and heard on the air with greater frequency than women. Recommendations for implementation of policy to bring women into the mainstream are included. (HB)

**The Effect of Delay in the Presentation of Visual Information on Pilot Performance. Final Report, April 1974-July 1975.**

Naval Training Equipment Center, Orlando, Fla.

Report No.—NAVTRAEQUIPCEN-IH-250

Pub Date 15 Dec 75

Note—79p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

**Descriptors**—Feedback, \*Flight Training, Inter-mode Differences, Research, Simulation, Visual Perception, \*Visual Stimuli

**Identifiers**—Delay Effects, Navy

Naval researchers studied the effects of delay in the presentation of visual information on pilot performance. Simulated carrier landing tasks were performed by subjects using a visual display generated by a computer. In one part of the experiment pilots were asked to "fly" carrier approaches with and without a 0.1 second delay in the visual scene presented to them. In the second part of the experiment, pilots were asked to "fly" carrier approaches several times during which six pilot control inputs were recorded. Statistical analysis of the data generated by the experiment indicated that the differences between mean performance with delay and with no delay were not significant. Variances of lateral control deflection and force were significantly different for the delayed presentation and the nondelayed presentation, but the analysis of the other four control inputs did not reveal statistically significant differences. **Descriptors**—Cognitive Processes, Educational Research, \*Haptic Perception, \*Individual Differences, \*Instructional Technology, \*Learning Characteristics, Learning Processes, Learning Theories, Media Research, Stimulus Behavior, \*Visual Perception, Visual Stimuli

**Identifiers**—AECT 76, Cognitive Style

In order to investigate learning theories, media researchers need to explore three variables: (1) the psychological requirements of a given learning task, (2) individual differences in cognitive style, and (3) specific media characteristics. It is necessary to identify the psychological processes which underlie any specific learning task in order to study it systematically. There are also differential psychological dimensions that represent consistencies in an individual's manner of acquiring and possessing information, for example Viktor Lowenfeld's haptic and visual types. Since specific attributes are possessed by a given form of media, this three dimensional approach gives strong clues to the reasons why certain instructional methods work well with some learners while having either little or no effect on other learners. Eighteen references are cited. (Author/DS)

Under a grant from the Illinois State Library, a manual was prepared in 1973 as a reference guide for 18 library systems to use in their five-year planning and evaluation programs. The manual explained the Context, Input, Process, Product (CIPP) model. The 18 libraries used this model in various ways and reached different stages in the implementation of a five-year plan. Several of the systems reported that their planning committees found the analysis of their system environment very revealing. A block diagram of the CIPP model is included. (Author/DS)

**Identifiers**—Media Hardware, Media Software

A study of the interrelationship between expenditures and service programs in 27 community college library learning resource centers in California, Florida, Illinois, New Jersey, Missouri, Ohio, Texas, Virginia, and Maryland was conducted. Three data gathering tables on staffing, media production, library instruction, and media advisement were sent to library directors; and key personnel were interviewed. The information gathered at these interviews covered: features of the learning resource program; budgets, purchasing and grants; student utilization of media hardware and software; and production of audiovisual materials. Statistical data from the interviews is reported in 22 tables. (DS)

**Chicano Studies and Self-Concept: Implications for the Community Colleges.**

Pub Date 75

Note—107p.; Ed.D. Dissertation, Nova University

**EDRS Price MF-\$0.83 HC-\$6.01 Plus Postage**

**Descriptors**—Bibliographies, Cultural Awareness, Cultural Enrichment, \*Ethnic Studies, \*Junior Colleges, Junior College Students, \*Mexican Americans, Minority Groups, \*Self Concept, Self Esteem

**Identifiers**—\*Chicano Studies, Tennessee Self Concept Scale

This study was designed to assess the effectiveness of community college Chicano Studies courses in raising the self-concept of Chicano students. It was conducted during an 18-week semester at an established community college in an urban area of California. Minority students constituted 45 percent of the college's total enrollment. The study sample consisted of 65 Chicano students (42 males and 23 females) who completed one of four Chicano Studies courses (Chicano Literature, the Chicano and Education, the Psychology of the Mexican-American, and the Mexican-American in the United States). The dependent variable of self-concept was measured by the administration of the Tennessee Self-Concept Scale on the first and last days of class. Results indicated that participation in a Chicano Studies course significantly increased the self-concepts of Chicano students. No significant differences were found on the relationships between income, grade point average, sex differences, and the self-concept measures. An extensive bibliography is appended. (DC)

*Paige, James F.***The Estimated Fiscal Impact of Extending Resident Tuition and Fee Status to All G. I. Bill veterans.**

Washington State Council for Postsecondary Education, Olympia.

Pub Date Jan 76

Note—26p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Educational Finance, Junior Colleges, \*Nonresident Students, \*Post Secondary Education, \*Residence Requirements, Resident Students, \*Student Costs, Tuition, \*Veterans, Veterans Education

Identifiers—G I Bill of Rights, \*Washington

In January 1975, the Washington State Senate entertained a bill which would extend the definition of "resident student" for tuition and fee purposes to all veterans receiving benefits under the GL I. Bill of Rights. This report reviews the G.I. Bill and the financial assistance it provides, and makes an extensive analysis of the fiscal impact of the passage of this new bill. It concludes that the bill should not be passed because the substantial fiscal impact involved cannot be justified; there is no overriding educational need for such an action, and residency status can now be achieved after a one-year period. Significant findings include the following: (1) of the 25,000 veterans enrolled in Washington colleges and universities in fall 1975, only 819 are non-residents; (2) in the U. S. as a whole, 3.3 million veterans will participate in some form of educational training program in fiscal year 1976--by 1980, this number will decline to slightly over two million; (3) the number of veterans eligible for G. I. Bill benefits is expected to decline from nine million in 1976 to four million in 1980; (4) the estimated five-year fiscal impact of extending residency status to all G. I. Bill veterans in Washington would be \$3,193,764; and (5) the extension of residency status to all G.I. Bill veterans would have little if any impact on student financial aid programs. (DC)

Descriptors—Academic Aspiration, College Bound Students, \*College Choice, \*Community Attitudes, \*High School Graduates, \*Junior Colleges, Socioeconomic Background, \*Student Attitudes, Student Characteristics

Identifiers—College of Eastern Utah

In August 1975, the College of Eastern Utah (CEU) sent a questionnaire to all 380 1975 graduates of the three local high schools. Of the 148 respondents, 55 percent planned to enter CEU, 10 percent planned to enter a four-year college, 8 percent planned to enter another two-year college, 17 percent planned to work full-time, and 10 percent had other plans. The most prominent factors motivating those who planned to enter CEU were that they could live at home and that they were offered financial aid; Other factors included the promptings of parents and relatives, the quality of the social activities, the availability of personal attention, the lower expense, and the quality of education at CEU. The most important reasons given for choosing other schools were special educational programs, the other schools' academic reputations, the recommendations of students at those schools, and the availability of financial aid. Students from both high-income and low-income families were generally unsure of the quality of education at CEU. A demographic profile of the sample is provided, as are detailed data on the respondents' opinions of CEU. (DC)

Note—233p.; Due to the oversize format of the original document, each page has been filmed as two pages

**EDRS Price MF-\$0.83 HC-\$12.71 Plus Postage**

Descriptors—\*College Majors, Enrollment Trends, Extension Education, Females, General Education, \*Junior Colleges, Males, \*Racial Composition, \*Student Enrollment, Technical Education, \*Technical Institutes, Transfer Students, Vocational Education

Identifiers—\*North Carolina

This report contains enrollment data for the 40 technical institutes and 17 community colleges in the North Carolina Community College System for the 1974-75 school year, with comparative data for the 1973-74 and 1972-73 school years. The data are presented in extensive tables and graphs which comprise the bulk of the document. Unduplicated headcount enrollment and average annual full-time equivalent enrollment, by institution, are broken down by program area: college transfer, general, technical, and vocational programs; academic, recreational, and occupational extension programs; learning laboratory, adult basic education, Manpower Development Training Act, and new and expanding industry programs. The data are further divided within institution by quarter. Aggregate annual unduplicated headcount enrollment data is presented by curriculum specialization within each major program area. Student enrollment by sex and race is presented by institution, and in aggregate percentages by type of program. Several tables detail the geographic origin of students by institution, and by home county and curriculum area, as compared to the 1974 county high school graduate population and general county population. A brief introduction provides definitions of terms. (BB)

Descriptors—Administrator Attitudes, Definitions, \*Followup Studies, \*Junior Colleges, \*Management Information Systems, \*Research Criteria, Research Design, State Surveys, Teacher Attitudes

Identifiers—\*Delphi Technique, Project FOLLOW-UP, Texas

Using the Delphi technique, the staff of Project FOLLOW-UP surveyed community college educators in Texas to determine desirable characteristics and uniformity of terminology and definitions for a proposed statewide student follow-up management information system for Texas community colleges. Of 234 individuals invited to become Delphi panel members, 193 (82 percent) accepted and participated 100 percent in the three survey rounds. The panelists represented 47 of the 48 public community colleges in Texas, various state agencies, the Project FOLLOW-UP Committee, and the Advisory Council for Technical-Vocational Education in Texas. The open-ended round I questionnaire produced 61 statements which were presented as round II on a Delphi format requiring the panelists to respond to each statement on a 1-7 (agree-disagree) rating scale. The third round (formatted in the same manner) consisted of 64 statements, and statistical data of round II responses. Panelists reconsidered their round II responses in the light of group opinion and gave narrative explanations for responses remaining outside the interquartile range. Data are organized according to 15 areas of professional employment identified among the panelists. Copies of the three survey instruments and tabulated responses are appended. (NHM)

*Powell, Robert***Grading Style and Student Evaluation of Faculty.**

William Rainey Harper Coll., Palatine, Ill.

Pub Date Apr 75

Note—57p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—Annotated Bibliographies, Correlation, Evaluation Criteria, \*Grades (Scholastic), Junior Colleges, \*Literature Reviews, \*Post Secondary Education, Student Attitudes, \*Student Teacher Relationship, \*Teacher Evaluation

Identifiers—William Rainey Harper College

This paper discusses the association between student grades and student ratings of faculty. The first section reviews a 1974 study of Harper College English teacher ratings, which showed a correlation of .73 between the grades the teachers gave students and the ratings students gave the teachers. The second section reports the findings of a 1975 replication study which showed grade-rater correlations of up to .79. The third section provides a review of the literature in the form of an annotated bibliography, indicating that the Harper findings are typical of the findings of prior research at other colleges. Twenty-eight studies involving more than 70,000 student ratings of faculty in more than 50 colleges and universities have been conducted and published since 1954. In every study, at least some association has been found between grades and ratings, and in a number of the studies, the association has been found to be quite powerful, with correlations ranging up to .90. The fourth section of this document discusses the implications of the findings, concluding that the widely-held belief that grades and ratings are unrelated is a myth, relying for its support on studies conducted more than 20 years ago--studies that are weak in design and execution, and sometimes less than candid in reporting the data. (Author/NHM)

Identifiers—\*Armed Services Vocational Aptitude Battery, ASVAB

This study assesses the utility of the Armed Services Vocational Aptitude Battery (A.S.V.A.B.) in predicting the academic success of students enrolled in the Automotive Service Specialist curriculum at the State University of New York Agricultural and Technical College (Alfred, New York). This document, part I of a two-part study, describes the relative performances of selected subgroups of the Automotive Service Specialist students on the A.S.V.A.B. A total of 211 of the 217 students in the program took part in this study. Of those participating, 116 were entering freshmen, 78 were continuing seniors, and the remainder were students enrolled in a novel time-shortened degree program involving the New York State Board of Cooperative Education Services (B.O.C.E.S.). Compared with both regional and national normative groups, the population being tested showed average scores which were: somewhat lower on the coding speed test; approximately equal on arithmetic reasoning; somewhat higher on word knowledge and space perception; and notably higher on tool knowledge, mechanical comprehension, shop information, automotive information, and electronics information. Substantial similarity in Test and Aptitude Area composite scores was found for the continuing seniors and B.O.C.E.S. gradu-

ates. Entering freshmen scored lower in both areas. Tables of data are appended. (Author/NHM)

Preus, Paul K. Williams, Douglas F.  
Statewide Community College Faculty Development: A Personalized Approach.

Pub Date Nov 75

Note—89p.

EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage

Descriptors—Budgets, College Faculty, Inservice Programs, \*Inservice Teacher Education, \*Junior Colleges, Program Evaluation, \*Statewide Planning, \*Teacher Improvement  
Identifiers—\*Alabama

The Program for Development of Community College Faculty was designed to provide statewide coordination and resources for individualized faculty development programs at 18 of Alabama's two-year colleges. It featured a year-long (1971-72) on-campus program of faculty development planned and implemented by certain faculty members from each community college who were designated as "catalytic agents" and who participated in an intensive training session during summer 1971. The program also included a time-sequenced series of evaluations which continued three years after other program activities had ended. This report describes the program in detail, outlines its budget, and presents summaries of the evaluation results. It was found that program participants became slightly more open-minded and formed more positive attitudes toward basic community college concepts during their year of inservice training, and that it was the "catalytic agents" who benefited most from the program. It is recommended that any replication of this project include: (1) more lead time in selecting "catalytic agents" and in staff planning, (2) either more funding or a more limited scope, (3) the recruitment of at least two "catalytic agents" for each participating college, and (4) the requirement that each "catalytic agent" form program strategies before leaving the summer session. Appended are a list of participating colleges and the evaluation instruments. (DC)

Planning Colleges for the Community.

Spons Agency—EXXON Education Foundation, New York, N.Y.

Pub Date 74

Note—103p.

Available from—Jossey-Bass Inc., Publishers, 615 Montgomery Street, San Francisco, California 94111 (\$8.95)

Document Not Available from EDRS

Descriptors—Budgeting, Campus Planning, \*College Planning, Delivery Systems, \*Educational Alternatives, Educational Needs, \*Educational Planning, Educational Strategies, Facility Planning, \*Junior Colleges, \*Master Plans, Models, Open Enrollment, Statewide Planning

This book should be of special interest to community college planners and administrators. It tells them what options are viable in the planning process, and what results to expect from their choices. It provides the philosophical framework for integrating academic, fiscal, and facility planning into campus master planning, and it examines the larger role that federal and state planners will play in coordinating these local plans into overall master plans. The authors argue for a change in emphasis from the community college campus to community college education, with increased access and true equality of opportunity. They urge that more attention be paid to the needs of older and disadvantaged students, to career education for diverse adult roles, and to special community characteristics and social needs. They provide promising developmental alternatives and evaluate innovative delivery systems, such as satellite centers, store front operations, mobile units, individual study packages, and multimedia instruction. Finally, they describe an actual planning model for developing information, proposing policy, and assessing programs. A bibliography is appended. (Author/DC)

Shaw, Frances Fergusson  
Analysis of California Community College District Policies of Faculty Teaching Load.

Pub Date Aug 75

Note—61p.; M.A. Thesis, California State University, Los Angeles

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—\*College Faculty, General Education, \*Junior Colleges, Literature Reviews, \*State Surveys, \*Teaching Load, Vocational Education Teachers, Working Hours  
Identifiers—California

California community colleges assign teaching loads according to district policy. In order to identify prevalent standards for assigning teaching loads, a survey by mail of 102 California community colleges was conducted. Responses were received from 73 institutions (72 percent). Although a survey of the literature reveals that a 15-clock hour load is considered optimal, and the California Community Colleges Chancellor's Office supports this standard, many deviations from this norm were found. In such disciplines as English, foreign language, and other academic areas, faculty had clearly defined patterns of assignment, from 15 to 20 hours. The most inconsistencies were found in occupational education instructors' assignments, with hours ranging from 14 to 35 per week. On the basis of the review of the literature and an analysis of the survey results, a number of conclusions are drawn, and two recommendations are made: (1) State agencies and academic departments should establish and maintain realistic proposals of expected teaching loads; (2) Continuous assessment should be done regarding correlation of faculty teaching loads in each discipline. Survey results are tabulated in the body of the paper, and the survey instrument and list of respondents are appended. (Author/NHM)

Follow-Up Study of New River Community College Transfers Who Graduated in the 1972-73 School Year [and] Follow-Up of 1974 Graduates in Occupational-Technical Programs.

New River Community Coll., Dublin, Va.

Pub Date 8 Apr 75

Note—31p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Followup Studies, Grade Point Average, \*Graduate Surveys, \*Junior Colleges, \*Participant Satisfaction, Student Attitudes, Transfer Students, Vocational Education, Vocational Followup

Identifiers—New River Community College

This document includes reports of two follow-up studies of New River Community College graduates. The 1973 graduates in transfer programs, associate of arts, and associate of science degree programs are examined in terms of: (1) types of degrees and curriculums they completed; (2) their transfer status; (3) their evaluation of the New River Community College transfer program. The 1974 graduates in occupational-technical programs are studied in terms of: (1) their success in finding employment or transferring to other institutions; (2) their opinion of the programs and training at New River. Of the 48 1973 graduates in transfer programs, over 85 percent actually transferred, a large majority of whom (90 percent) transferred to local senior colleges. Transfer grade point averages, as compared with community college averages, showed a drop similar to those found in national studies. In the 1974 graduating class, graduates in occupational-technical programs numbered 238. Ninety-five percent of the graduates were found to be either working or attending other colleges. Within the employ group, 87 percent were employed in a field related to their area of study. Results of questionnaires mailed to graduates showed favorable responses to both the transfer and vocational programs at New River. Data are tabulated, and the survey instruments are appended. The Canadian Department of Manpower and Immigration is presently involved in occupational forecasting, i.e., projecting the supply and demand of individuals in various occupational categories. This report is intended to provide data on the output of skilled manpower from the community colleges in Canada, to be used in occupational supply forecasting. It presents data on past and future first-year enrollments and program graduates by province and by program for the years 1972-73 through 1980-81. A list of 58 program groupings was developed for the study. Data was received from 143 public and private community colleges. In addition to presenting the data and describing the study in general, this report provides a detailed description of the procedures used in collecting the data and making the projections. (DC)

Identifiers—\*Universidad Boricua

In 1972, the Puerto Rican Research and Resources Center began to develop a college which would respond to the inadequacies of the present educational system in meeting the needs of Puerto Ricans. Although a community college was originally envisioned, the end result was a plan for a university (universidad Boricua) which will have learning centers in New York, Boston, Philadelphia, and Puerto Rico, and which will offer bachelor of arts, associate of arts, certificate, and high school equivalency degrees. Each learning center will be housed in a storefront-type facility in a Puerto Rican neighborhood. The proposed university will use existing resources by entering into cooperative agreements with other colleges and universities for the use of laboratories, libraries, and gymnasiums. It will also solicit the support of local businesses in developing and implementing work/study programs. Universidad Boricua will concentrate on five major fields of study: communications technology, teaching, medical/health technology, urban renewal, and law. This report describes the planning process and the resulting plan and outlines the implementation process. A profile of Universidad Boricua and an overview of the Puerto Rican migrant are appended. Descriptors—\*College Faculty, Educational Trends, Fringe Benefits, \*Instructional Staff, \*Junior Colleges, \*Part Time Teachers, Teacher Salaries, Working Hours  
Identifiers—California

In California community colleges there are 14,273 people who are employed full-time as instructors. Another 20,027 are employed as part-time faculty members. In the past three years there has been an estimated annual increase of 10 percent in the number of part-time faculty employed. Benefits of utilizing part-time instructors include: (1) The opportunity for students to study under outstanding instructors whose primary employment may be elsewhere. (2) The opportunity for instructors to use part-time employ-

ment as a means of beginning a career in post-secondary teaching. (3) The opportunity for colleges to respond quickly and efficiently to community needs within the boundaries of financial resources available to them. Problems associated with part-time employment generally fall into two areas: (1) Recent court decisions have resulted in enormous confusion regarding the law pertaining to part-time teachers. (2) What benefits should be received by part-time instructors as compared to benefits received by full-time instructors? This keynote address delineates the issue involved in the part-time faculty controversy, and discusses the implications of various proposed solutions to the problems. (Author/NHM)

 Descriptors—\*Affirmative Action, Comparative Analysis, \*Educational Assessment, Equal Opportunities (Jobs), Evaluation Methods, \*Federal Legislation, Junior Colleges, \*Program Evaluation

Identifiers—El Paso Community College  
 This practicum compares federal requirements for affirmative action plans (Executive Order 11246, and Revised Order Number 4) to the existing affirmative action plan of El Paso Community College (Texas). Since the federal guidelines mandata action as well as a written plan, the assessment of El Paso's program is in two phases: (1) the college's written plan is evaluated by comparing its contents with the stated requirements of the law; (2) the institution's activity is evaluated by interviewing members of the administration having direct responsibility for implementing and enforcing the law. The bulk of this report is made up of tables which indicate institutional compliance or non-compliance with specific federal requirements. The results of this practicum indicate that El Paso Community College needs to take many basic actions in order to reach full compliance with federal affirmative action guidelines. This document should be of assistance to other institutions undertaking evaluations of their affirmative action systems. Appended are: tab "A" and tab "C" of Executive Order 11246, the El Paso Community College Affirmative Action Plan, and a copy of the Equal Employment Opportunity Act of 1972. (NHM)

Identifiers—Need Analysis, York College  
 The assumptions underlying the student financial need analysis performed by York College of Pennsylvania, and by the majority of post-secondary institutions nationwide, are that parents have a moral obligation to assist their children in obtaining an education and that they should do so to the degree they are able. This study was designed to determine the extent to which students actually receive the financial assistance presupposed in establishing their financial needs. A survey instrument was sent to a 20 percent random sample of the full-time undergraduate students at York College of Pennsylvania, a private four-year institution. Responses from independent students were not considered. Responses from dependent students were dived according to parental income into "high-income" and "low-income" categories, which were matched by sex and residency. The amount of expected parental support was calculated according to normal procedures and was compared to the actual parental assistance reported. Of the 48 "high-income" (over \$14,999) students sampled, only 14 received at least 80 percent of the expected

parental contribution, whereas 42 of the 48 "low-income" students sampled recieved at least 80 percent of the expected parental assistance. A literature review is included. A bibliography and the survey instrument are appended. (DC)

**Year-Round Education at the University of Minnesota Technical College, Waseca.**  
 Minnesota Univ. Technical Coll., Waseca.  
 Pub Date May 75

Note—4p.; Paper presented at the National Seminar on Year-Round Education (7th, Denver, Colorado, May 11-14, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
 Descriptors—\*Agricultural Colleges, College Planning, Extended School Year, Junior Colleges, \*Quarter System, School Calendars, \*School Schedules, \*Year Round Schools

Identifiers—\*University of Minnesota Technical College Waseca  
 The University of Minnesota Technical College-Waseca prepares students for midmanagement, semiprofessional positions in the broad fields related to agriculture. The college operates on a year-round quarterly basis, with the summer quarter being no different from the fall, winter, and spring quarters. Students can start any quarter and graduate any quarter; they can attend school continuously or intermittently, full-time or part-time. Planning for the college tied the year-round concept into all phases of the operations before the doors actually opened. Programs were developed with a minimum of prerequisites, and most courses are self-contained units. Nine-month faculty are rotated throughout the year. Registration, financial aids, veterans assistance, and other procedures have been developed to fit a year-round program. Advantages of the year-round system include the opportunity for students to fulfill employment experience requirements during the time of year that is most advantageous from a learning point point of view, and better use of expensive facilities and equipment. Although problems such as faculty fatigue, lack of time for professional updating, difficulty in maintaining the physical plant, and misunderstanding resulting from the break with tradition have occurred, the program has been well accepted by the students and the agricultural industry. (Author/NHM)

Identifiers—Bristol Community College  
 The contract learning program at Bristol Community College (Fall River Mass.) was developed to offer students of diverse backgrounds an optional method of pursuing their educational goals. This document reviews the history of the program, and proposes an alternate administrative procedure appropriate to learning contracts. The document includes a review of various alternate administrative procedures as discussed in the literature, and recommends the following approval process: (1) a faculty sponsor is selected; (2) the contract proposal is developed, with the help of the faculty sponsor; (3) the contract proposal is submitted to the department most directly involved with the subject for approval; (4) the faculty chairman submits the contract proposal to the division chairman for approval; (5) the contract proposal is submitted to the Dean of Academic Affairs for approval. Academic credit is awarded only if the above procedure is followed before the student begins his work. (NHM)

**Hotel and Restaurant Management; A Bibliography of Books and Audio-Visual Materials.**  
 Luzerne County Community Coll., Nanticoke, Pa.  
 Pub Date 75

Note—138p.

**EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage**  
 Descriptors—Audiovisual Aids, \*Bibliographies, Books, \*Food Service Industry, Food Service Occupations, \*Hotels, Junior Colleges, Library Collections

This bibliography represents a collection of 1,300 book volumes and audiovisual materials collected by the Luzerne County Community College Library in support of the college's Hotel and Restaurant Management curriculum. It covers such diverse topics as advertising, business practices, decoration, nutrition, hotel law, insurance landscaping, health standards and air conditioning, as well as food service and related technologies. Although more than half of the references are available through regular trade publishers, many of the references come from a wide range of small, independent, and relatively obscure publishers. Materials are cross referenced by curriculum topic: fundamentals food, hotel and restaurant accounting, food sanitation, introduction to hospitality industry, nutrition and menu planning, food purchasing, quantity food preparation, hotel-motel operations, property management and housekeeping, layout of food service equipment, beverage operations, merchandizing for the hospitality industry, meat analysis, food vending, food and labor cost control, and related topics. Many of the references are included under several topic headings. The college's Hotel and Restaurant Management curriculum is briefly described. (NHM)

Identifiers—Loop College

Of the 10,402 students enrolled at Loop College (Chicago) in fall 1972, 4,529 did not return in spring 1973. In October 1973, a questionnaire was sent to all of the nonreturning students. Non-returning students were divided into two categories: (1) 274, or 3 percent of the total enrollment, did not return because they graduated; (2) 4,255, or 41 percent of the total enrollment, did not graduate and did not return. By July 1974, 139 (51 percent) of the graduates, and 942 (22 percent) of the nongraduate had responded, a 24 percent response rate overall. This study presents detailed analyses of student responses in 27 tables, 9 diagrams, 6 appendices, and 6 supplements. Some of the conclusions derived from the data include: (1) Almost two-thirds of the students thought they had achieved their stated purpose at Loop. (2) About two-thirds of those in attendance at other schools said that they were adequately prepared at Loop. (3) Approximately 24 percent of the employed students said they received preparation at Loop for their present jobs, and 26 percent of the unemployed were looking for a job for which they received preparation at Loop. (4) Nearly 76 percent were satisfied with the quality of education at Loop. (5) Most withdrawals were for stated reasons over which the College had little or no control. (Author/NHM)

Identifiers—ACT, American College Testing Program, \*Wilbur Wright College

This institutional self-study is based on data available for Wilbur Wright College from 1968 to 1974, and includes data pertaining to three areas: enrollment, the American College Testing (ACT) profile, and student characteristics. Enrollment data shows distributions under categories including: day and evening enrollments, withdrawal and retention, program area, class, adult education, grade distribution, age, and sex. Comparisons with enrollments of past years are provided, as well as with enrollments of other institutions. The ACT profile shows a declining academic standard of entering freshmen over the years, and a lower score for Wright as compared to the scores of all Illinois community colleges. However, the mean high school GPA of Wright students has increased over the years. Data are also provided on students' educational aspirations and proposed educational majors. Student characteristics selected for analysis from computer printouts of the student characteristics reports for Wright include: student load distributions, earned college credits, rank in high school graduating class, future plans, mobility patterns of transfers, programs of transfers, ethnic distribution, ages, student distribution within a 4-mile radius of the college. Data are organized into 36 tables and 29 figures. (NHM)

**Descriptors**—College Faculty, Counselors, \*Employment Patterns, \*Instructional Staff, \*Junior Colleges, Librarians, School Personnel, \*Teacher Employment

**Identifiers**—\*California

As a part of the annual Supply and Demand Survey conducted by the Research Committee of the California Educational Placement Association (C.E.P.A.), 104 public community colleges in California were asked to report on their hiring of full-time faculty and staff during the 1975-76 academic year. Survey responses came from 101 institutions. A total of 1,481 full-time faculty and staff were reported hired, of whom 188 (12.7 percent) were returning from leaves of absence or sabbatical, 289 (19.5 percent) were former substitutes, 954 (64.4 percent) were new to the district, and 50 (3.4 percent) were new positions gained through special funding. Data were collected as to specific field vacancies filled. A short narrative section compares the C.E.P.A. data with that of previous years of California Community and Junior College Association reports on staffing patterns. Trends noted include an upward trend in the expansion of student services, as reflected in an increase from 69 to 154 full-time counselors hired, and a heavy influx of new instructors in health services, vocational, and business subject fields. Within the academic subject fields, social science, and English showed the greatest increase over the previous year. The survey instrument is appended, and data are organized into two tables. **Identifiers**—Minnesota, North Hennepin Community College

This document includes two studies related to the law enforcement program at North Hennepin Community College (Minneapolis, Minnesota). The first study reports the results of a survey sent to all students who listed law enforcement as

their major field. Two hundred and four students (74 percent) completed the questionnaire which examined the students' characteristics and plans. The average age of the group was 24. Forty percent were employed in law enforcement or a closely related field, and the remainder expected to end up working for a public law enforcement agency. Overall, an interest in the occupational area outweighed all other factors for both men and women, inservice and preservice students, in motivating enrollment in the program. The second study reports the results of a survey sent to 147 police chiefs in Minnesota in order to determine the number of job openings in law enforcement in 1975, desired characteristics of new officers, and emerging occupations into which a person with law enforcement interests might be directed. Most of the characteristics looked for when hiring a new officer fell into one of seven descriptive categories: job interest and ability, morality, emotional stability, understanding of people, intelligence, and personal appearance. Data are organized into tables and appended to each report. (ENHM)

**Descriptors**—\*Academic Ability, \*Academic Achievement, \*Achievement Tests, Cloze Procedure, Educational Assessment, Junior Colleges, \*Junior College Students, Mathematics, Motivation, National Norms, Reading Ability, Standardized Tests, \*Transfer Students, Writing Skills

**Identifiers**—Seattle Central Community College

This student assessment project establishes an index of the level of educational preparation of on-campus day transfer students at Seattle Central Community College. Reading, writing, and arithmetic were chosen as indices of the level of academic preparation, and a self-report inventory was selected to measure academic motivation. Although participation in the study was voluntary, the 485 students tested in 30 different classes represented 56.9 percent of the enrolled students in those classes. By using cloze procedure, it was determined that 40 percent of the students were experiencing difficulty reading their required textbooks. Sixty-seven percent of their writing samples were judged to be unacceptable for college transfer, and competency in arithmetic as demonstrated by a subset of the Comparative Guidance Placement Program, placed these students no better than the 45th percentile on a national norm. On the other hand, these same students appeared to be as motivated (on the basis of an Academic Motivation Scale) as other average community college students across the nation. Subsequent reports will follow this sample of 485 students through the academic year in order to identify possible relationships between the variables and performance. (Author/NHM)

**Contact-Credit Hour Ratio: Can Narrowing the Gap Lead to Legitimate Cost-Savings?**

Macomb County Community Coll., Warren, Mich.

Pub Date 22 Jan 76

Note—5p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Comparative Analysis, \*Credits, Educational Finance, \*Finance Reform, \*Financial Support, \*Junior Colleges, Liberal Arts, State Aid, \*Teaching Load

**Identifiers**—Contact Credit Hour Ratio, Macomb County Community College, \*Student Contact Hours

All liberal arts courses at Macomb County Community College where teacher contact with students exceeded the hours for which students obtained academic credit were examined, and comparisons were made with five neighboring universities and eight neighboring community colleges. Macomb's practice of paying for additional teaching time out of general revenues was found to be the most usual practice among the schools in the sample. However, for every course at Macomb in which the contact-credit hour ratio exceeded 1:1, at least one post-secondary institution in the sample, usually a university, had a

contact-credit hour ratio considerably lower than Macomb's. If Macomb adopted a lower contact-credit hour ratio, considerable savings would result, because instructors would be generating more credit hours per full teaching load. Calculating according to the lowest ratios of the colleges in the sample, \$357,504 would have been the savings in liberal arts for 1974-75. (NHM)

**Descriptors**—\*Course Evaluation, Curriculum Problems, \*Educational Assessment, \*Educational Needs, Employer Attitudes, Evaluation Methods, Institutional Research, Junior Colleges, Manpower Needs, \*Program Evaluation, Research Methodology, Student Attitudes, \*Technical Institutes

**Identifiers**—Moraine Park Technical Institute, \*Nominal Group Process

In order to evaluate the content of the courses and programs of the Moraine Park Technical Institute (MPTI) and to identify weaknesses and strengths in meeting the needs of the employee and employer, an in-depth evaluation of the school's five departments (trade and industry, business education, health occupations, agriculture, and general education) was conducted in 1973-74. A total of 1,021 responses were retrieved from 43 MPTI instructors, 36 advisory committee members, 6 area employers, 117 MPTI students, 51 MPTI graduates, and 10 management staff members participating in a Nominal Group Problem Identification session. These responses were supplemented by the results of a questionnaire completed by 104 advisory committee members and 84 area employers. Major problem area discovered include: the need for revisions in course objectives and materials; suggested changes in district policies, rules, and regulations; a need for additional or updated facilities; a desire for additional courses and programs; suggested changes in the scheduling of classes and classrooms for students and instructors; a need for better instructional methods; and a need for better communications, better counseling and testing of students. Twenty-four recommendations are made, and data are organized into 38 tables. (NHM)

Pub Date Jun 74

Note—61p.; Project No. 19-029-151-224. Some pages may film poorly

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

**Descriptors**—\*Cost Effectiveness, \*Educational Benefits, Educational Economics, Graduate Surveys, Investment, \*Job Satisfaction, Junior Colleges, \*Salaries, Student Attitudes, Student Costs, \*Technical Education, Technical Institutes, Vocational Education

A cost-benefit study of vocational-technical education was conducted at Southwest Wisconsin Vocational-Technical Institute in 1974. Thirty surveys were mailed to students who had graduated in May 1973 from the account clerk program or the business administration-accounting program at Southwest Tech. Thirty-one surveys were mailed to those who had applied to attend Southwest Tech during the 1973-74 school year, but did not attend. Response rates were 63 percent for the graduate survey and 41.9 percent for the nonattendee survey. The private economic benefit variable studied was income after graduation. The private economic cost variables were books and supplies, room and board, fees, transportation, and foregone earnings. The private noneconomic cost and benefit variables were satisfaction with the community, convenience, and attitudes toward education, present job, and

making a decision as to a lifetime occupation. Costs are calculated and shown in tables; the average payback periods were found to be 6.97 years and 5.6 years. Since graduates have higher employment, higher earnings, and are more satisfied with their jobs and community, vocational-technical education would seem to be a worthwhile investment. The survey instruments are appended, and data are tabulated throughout the report. (Author/NHM)

Lucas, John A.

Follow-Up Study of 1975 Voc/Tech Alumni. Research Report Series, Vol. 7, No. 6.

William Rainey Harper Coll., Palatine, Ill.

Pub Date 1 Dec 75

Note—36p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Comparative Analysis, \*Followup Studies, \*Graduate Surveys, Job Skills, \*Junior Colleges, \*Student Attitudes, Technical Education, Unemployment, \*Vocational Education, Vocational Followup

Identifiers—William Rainey Harper College

A followup study was conducted of all 493 William Rainey Harper College students who achieved alumni status (48 hours or more or a degree) during the 1974-75 academic year in a career field. Between 279 returns to a mailed survey instrument, and 134 telephone interviews, a total of 413 responses were gathered, an 83.8 percent response rate. About 85 percent of the respondents had received degrees at Harper. There was a sharp decline in alumni transferring on to other colleges, a sharp increase in alumni remaining at Harper for a third year. Unemployment among the alumni rose from 1974, and the salaries of those leaving Harper was not higher than in 1974. The percentage of alumni remaining in the same field was in the 50 to 55 percent range. Compared to the last four alumni classes, the 1975 class worked fewer hours while at Harper and spent less time on extracurricular and informal campus activities. Although the general comments made about Harper's image, services, and policies were more favorable than in previous years, the alumni rated Harper's training as only half-way between helping considerably and helping somewhat in preparing them for employment. In the managerial skills area, Harper was rated as only helping somewhat. Data are arranged into tables, and the survey instrument is appended. (Author/NHM)

Evaluation of Weekend and Early Morning Classes. Research Report Series, Vol. 7, No. 7.

William Rainey Harper Coll., Palatine, Ill.

Pub Date 3 Dec 75

Note—21p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Courses, Grades (Scholastic), Junior Colleges, \*Scheduling, \*Student Attitudes, \*Weekend Programs, Withdrawal

Identifiers—\*Early Morning Classes, William Rainey Harper College

In order to measure the effect of early morning and weekend scheduling at William Rainey Harper College, six different survey forms were developed and sent to the following groups of students: students taking six selected courses at 7 a.m., students taking the courses during regular times of the week, and students taking the courses on the weekend. Students finishing the courses were sent different forms than students withdrawing. In all, 797 students were polled, and 626 responded, a 78.5 percent response rate. Weekend students tended to have higher withdrawal rates than weekday or night students. However, they rated the courses as more beneficial than the weekday or night students, and they earned higher grades. Many would have preferred taking the courses at other times, and most felt that additional campus services should be provided on the weekend. Students taking 7 a.m. classes were more apt to withdraw than students in any other group. However, they withdrew because of personal problems, not because of the inconvenience of the time. Early morning students rated their ability to concentrate, the quality of other students, and the level of instructional support lower than the students in other groups, and tended to earn lower grades. The detailed results are shown in tables, and the survey instruments are appended. (NHM)

Lucas, John A.

Evaluation of Faculty Orientation--1975. Research Report Series, Vol. 7, No. 4.

William Rainey Harper Coll., Palatine, Ill.

Pub Date 10 Nov 75

Note—13p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*College Faculty, Comparative Analysis, Instructional Staff, \*Junior Colleges, Program Evaluation, Teacher Attitudes, \*Teacher Orientation

Identifiers—William Rainey Harper College

In order to evaluate the four-day faculty orientation offered by William Rainey Harper College, a survey was sent to all 202 full-time faculty in the fall of 1975. Ninety-one completed evaluations were returned. About 50 percent of the faculty felt that the orientation was very beneficial and should be continued as is. In 1974, 71 percent felt this way. In both years about 19 percent felt it should be discontinued. The big difference between 1974 and 1975 was that more faculty in 1975 felt the orientation should be modified to shorten the formal orientation, allowing more time for individual preparation and committee work. About 42 percent of the faculty were prevented from attending all or part of the orientation because of other commitments. In 1974 about 20 percent had suggested meeting off campus. Although this suggestion was followed, only 34 percent of the respondents felt that it was worth the money. Thirty percent felt money would be better spent attracting top educational leaders as speakers. New faculty felt the mentors assigned to them and the new faculty meeting were very helpful. An outline of the orientation program is included, data are organized into tables, and the survey instrument is appended. (Author/NHM)

Descriptors—Community Involvement, \*Community Service Programs, \*Educational Needs, \*Junior Colleges, \*Older Adults, Program Descriptions, School Community Relationship, \*Senior Citizens

Identifiers—Lehigh County Community College

Lehigh County Community College has made inroads in providing education to meet the needs of the elderly in four areas: (1) development of campus policy regarding the elderly; (2) establishment of community-based courses and activities for the elderly; (3) establishment of training programs for personnel in agencies that work with the elderly, and for private business owners who employ the elderly; (4) identification of the campus as a center for advocacy for the elderly. Specific achievements in each of these four areas are delineated in this document. For example, Lehigh has established a no-tuition policy for senior citizens; has introduced a Social Gerontology course into the curriculum; has employed senior citizens on campus; has established a community-based film series, a "Nutrition Bingo Program," and courses in such subjects as decoupage, ceramics, and creative home decorations; has offered conferences entitled "Changing Perceptions of Mental Health and the Elderly," "Modified Therapeutic Communities Conference," "Lutheran Chaplaincy Training Conference," and "Preretirement Planning"; subscribes to and supports groups such as the Gray Panthers and the Pennsylvania Association for Older Persons; and has created a Speaker's Bureau for the Elderly. Community Relationship, Student Characteristics, Teacher Characteristics  
Identifiers—Arizona (Navajo County), \*Northland Pioneer College

This document presents an overview of the history and characteristics of Northland Pioneer College (NPC), established in 1974 to serve Navajo County, a rural, sparsely populated area in northeastern Arizona (70 percent Indian Reservation land). The information presented in this document is intended to be of assistance in future planning for NPC. The college is organized according to a "minicenter" concept with four centers, each of which has a population service area of 3,500 to 7,500. Much of the equipment and supplies of the college have been mobilized to provide for easy delivery from center to center, and faculty who are willing to travel among the centers have been hired. This document covers the history of the college from its conception, through the opening of its doors in 1974, to projections for the future. NPC's goals are discussed, and student, faculty, and administrator characteristics are described. A special area of concentration is the school's relationship to the community it serves. Facilities and financial resources are discussed, and a recommendation is made that a bond election be undertaken to provide the funds for some permanent facilities. Data related to Navajo County population, employment, business, and NPC enrollment, student and faculty characteristics, and finances are presented in tabular form. (NHM)

San Diego Mesa College Affirmative Action Policy.

San Diego Mesa Coll., Calif.

Pub Date 31 Mar 75

Note—30p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Affirmative Action, College Faculty, \*Junior Colleges, Personnel Policy, \*Racial Balance, School Personnel, \*Sex Discrimination

This document describes the steps that San Diego Mesa College plans to take in order to bring about a balance in the racial and sex distribution of its faculty and staff that approximates the racial and sex composition of the population of the City of San Diego. The philosophy and goals of the Mesa College Affirmative Action Policy are set forth, and the apparatus necessary to monitor and enforce its implementation is detailed. Expected activities of the Affirmative Action Committee and the Affirmative Action Coordinators are outlined, and policies in the areas of budget and appeals are delineated. The present faculty and staff racial and sex composition is described for each department in the college (administration, arts and sciences, counseling, occupational education, and classified staff), and goals are set for one- and five-year periods. Finally, a calculation is made of how close the college will be in five years to its ultimate goal of an entirely balanced staff is the current goals are reached. (NHM)

Identifiers—\*New Hampshire

A total of 712 students graduated from the seven institutions in the New Hampshire Post-Secondary Vocational-Technical Education System in 1975. In spite of the high unemployment rate in the State, 70 percent, or 495 of the eligible graduates were employed full-time by September 30, 1975; 3 percent were employed part-time, 12 percent were continuing their education full-time, and only 9 percent were still seeking employment. Of all graduates employed full-time, 91 percent have remained in New Hampshire, 88 percent commute to work from their home towns, and 92 percent are employed in their major or related field of study. Average entry job salaries by job categories remained sta-

ble, showing no significant change from 1974. This is consistent with the general economic outlook. It is estimated that all graduates employed full-time will have a total gross earning power in excess of \$3,750,000 during their first year of employment. Data are tabulated for each of the seven institutions, according to program of study, and a list of representative companies employing 1975 graduates is provided. (Author/NHM)

**Descriptors**—\*College Faculty, Faculty Evaluation, Fringe Benefits, Instructional Staff, \*Junior Colleges, Overtime, \*Part Time Teachers, Salary Differentials, \*State Surveys, Teacher Employment, \*Teacher Salaries, Teaching Load

**Identifiers**—\*California

In order to gain information on the employment of part-time faculty, a survey instrument was designed and mailed to all of the two-year colleges in California. A total of 86 percent of the questionnaires were returned, and results were extrapolated to provide a statewide picture. Part-time faculty were found to constitute a sizable and growing proportion of community college certificated staff. There are 14,273 individuals employed full-time in California community colleges, and 20,027 employed part-time. Of the part-time employees, 7,505 are drawn from the pool of full-time faculty. In terms of full-time equivalents, 62 percent of community college instruction in the state is handled by full-time faculty. The use of part-time faculty is distributed fairly uniformly throughout all instructional categories. Over 90 percent of part-time instructors work either full- or part-time in another capacity. The average hourly pay of part-time instructors statewide ranges from \$11.25 to \$14.56. The average load is estimated to be 30 percent or 4.5 hours. Also discussed are hiring procedures, additional duties, faculty development, fringe benefits, and faculty evaluation. The survey instrument is appended, along with actual, rather than extrapolated, survey results. (NHM)

**The Impact of the Junior College Environment on Student Values and Retention.**

Pub Date Mar 70

Note—29p.; Abstract of Ed.D. Dissertation, University of Chicago

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Academic Aptitude, \*College Environment, Dropouts, Intellectual Development, Junior Colleges, \*Junior College Students, Personality Assessment, \*Personal Values, Psychological Needs, \*School Holding Power, \*Student Characteristics, Transfer Students

In order to assess the effect of college experiences on student values and retention, a study was conducted of 848 beginning students at three private and four public two-year institutions in the Chicago area. At the beginning of the academic year, two tests were given: (1) the Activities Index to assess the personality characteristics of the students, and (2) the Allport-Vernon-Lindzey Value Inventory to determine the values of the students. At the end of the academic year, two tests again were administered: (1) the College Characteristics Index to assess the college environment as perceived by the students, and (2) the Allport-Vernon-Lindzey Value Inventory as a posttest to ascertain any change in values over the year. Rather than assuming that personality characteristics or college climate alone was the more important correlate of value change, it was postulated that the dynamic interaction of the two was the determining factor. In fact, however, no significant change in values was found to have occurred at any of the seven schools. On an aggregate basis, dropouts were found to be significantly lower on intellectual orientation than either stayers or transfers. Scholastic aptitude was found to have no significant effect on withdrawal at six of the seven schools. Data are presented according to institution, and are organized into tables. (NHM)

**Identifiers**—\*Hawaii

As a part of a longitudinal study of student progress through the Hawaii community colleges, four campuses—Hawaii, Honolulu, Maui, and Windward—participated in a study of fall 1975 entering students continuing in the same college in spring 1976. The fall 1975 entering group numbered 3,924. Of the 2,790 who returned in the spring, 2,104 (75.4 percent) returned a survey administered at registration. Most students at Hawaii, Maui, and Windward listed "close and convenient" as the chief reason for college selection, but availability of a desired program also attracted students to Honolulu Community College. About 90 percent of the students said that they planned to continue their educations in fall 1976—most of them by returning to their present campus. The students considered only eight of the 16 student goals listed on the survey form as being important to them, and rated these eight according to the degree to which their expectations had been fulfilled. Students evaluated their community college experience by reacting to 11 items; on all four campuses, instructors' backgrounds and helpfulness received the best average ratings. Observations are made on the characteristics of the various campuses with regard to both their programs and student populations. Data are tabulated throughout, and the survey instrument is appended. **Descriptors**—Budgets, Community Colleges, Costs, \*Educational Finance, Enrollment Projections, \*Enrollment Trends, Expenditure Per Student, Facility Planning, Financial Support, \*Junior Colleges, Resource Allocations, \*State Aid, \*Statewide Planning

**Identifiers**—\*New Jersey

This financial report of the New Jersey community colleges is organized around a series of five topics: (1) costs and enrollments; (2) allocation of resources; (3) sources of revenue; (4) enrollment profile and output measures; (5) facilities and capital data. Each of the five sections contains quantitative data from budget projections submitted by the colleges for fiscal year 1975-76 and prior years. State aid to the community colleges actually supports a full-time equivalent (FTE) student count 3 percent below the enrollment projections of the colleges. In 1974-75, in addition, there was a major discrepancy between the high actual enrollments at the colleges (60,257 FTE) and the original projections of the colleges (57,656). Latest estimates of enrollment for 1975-76 are for 66,400 FTE. However, because of state imposed FTE limitations, and elimination of the conventional state reimbursement mechanism for overenrollments, the colleges will only receive state funding for 53,129 FTE. There will be, however, a marked increase in other sources of funds, including federal, county, industry, and private. The increased enrollment appears to be part of a general pattern of overall growth in college attendance as an alternative to employment because of a scarcity of jobs. Detailed financial data are tabulated and appended. (Author/NHM)

**Identifiers**—\*Nevada

This document is a 1971 master plan for the development of Nevada community colleges. The mission of the community college is seen as five-fold: occupational, university parallel, developmental, community service, and counseling and guidance. Based on projected manpower needs, the establishment of two new community colleges in Clark County and Western Nevada is recommended. These two new colleges will join Elko Community College as the foundation of the Nevada community college system. Enrollment projections for each of these three institutions are made for the 10-year period ending in 1980. Projections are based on an assessment of high school graduate interest in specific programs, and the expected effects of Nevada's public school adult education programs, of existing post-secondary occupational programs at the state universities, and of population growth. In addition, policy recommendations are made concerning admission standards, college size, grading, articulation, budget, facility improvement, and expansion. Specific recommendations include: the establishment of an open door policy; a grading policy designed to pass students, rather than to fail them; a goal of 60 percent of total student enrollment in occupational programs; a maximum size of 5,000 full-time equated students for any community college in the state. **Identifiers**—Los Angeles City College

This study examines the responses of the 1,474 students who withdraw from Los Angeles City College during the spring semesters of 1973, 1974, and 1975, and who completed the exit questionnaire. In spring 1975, 65 percent of the withdrawees were of non-Caucasian background, and 46 percent were male. About 40 percent of the males, and 20 percent of the females were in their first semester; and about 15 percent of the males, and 25 percent of the females were in their fourth semester or later. About 48 percent of the withdrawees had not been employed during the spring 1975 semester. Only about 26 percent were employed full-time. About 40 percent of the spring 1975 withdrawees indicated that they planned to transfer to a four-year college; 25 percent said they did not intend to transfer; and 33 percent were not sure. These proportions have been about the same for the last four years. Corresponding figures for the entire student body were 69 percent, 11 percent, and 19 percent respectively. About 97 percent of the withdrawees felt that they were adequately served by the college, and about half expected to return. The most often stated reason for withdrawal was going to work full-time, followed by personal problems. Data are organized into tables, and the withdrawal questionnaire is appended. (Author/NHM)

**Follow-Up Study of 1970 and 1972 Alumni.**

Research Report Series, Vol. 7, No. 9.

William Rainey Harper Coll., Palatine, Ill.

Pub Date 20 Dec 75

Note—43p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Educational Assessment, Educational Benefits, \*Followup Studies, \*Graduate Surveys, \*Junior Colleges, Occupational Surveys, Program Effectiveness, Relevance (Education), \*Student Attitudes, Terminal Students, Transfer Students

Identifiers—William Rainey Harper College

In order to evaluate long-term benefits to students, William Rainey Harper College conducted five- and three-year followup studies of all 1970 and 1972 alumni. The population was defined as students who had accumulated 48 or more credit hours or had received a degree. In all, 385 1970 alumni, and 1,154 1972 alumni were surveyed by mail or telephone; 237 responses (61.6 percent) were received from 1970 alumni, and 815 (70.6 percent) from 1972 alumni. About 70 percent of this population had received a degree or certificate before leaving Harper. Career program alumni tended to remain in their fields, but transfer program alumni drifted away from the fields they had chosen at Harper. In general, the longer the alumni had been away from Harper, the more apt they were to be working at a higher skill and salary level, and to be working further away from Harper. Sixty-two percent of the 1970, and 37 percent of the 1972 transfer alumni had earned bachelor's degrees by 1975. Overall, about 80 percent of the transfer alumni had taken at least some other courses at another college since leaving Harper. In addition, Harper's programs, facilities, and faculty were rated as to their degree of relevance to the respondents' present lives and jobs, and compared to those at other schools. Responses are tabulated, and the survey instrument is appended. (Author/NHM)

**Commitment Five: A Long-Range Plan for Fraser Valley College.**

Fraser Valley Coll., Chilliwack (British Columbia).

Pub Date Mar 75

Note—71p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—Cluster Grouping, College Planning, Community Colleges, Educational Finance, Educational Needs, Educational Trends, \*Enrollment Projections, \*Facility Planning, Grouping (Instructional Purposes), \*Junior Colleges, \*Master Plans, \*Program Planning, School Community Relationship

Identifiers—British Columbia (Chilliwack), \*Fraser Valley College

In order to develop a long-range plan for Fraser Valley College, this report reviews the national, provincial, and local setting for community colleges; presents a projection of future enrollments and programs; reviews service facility requirements; and determines the future campus requirements and their costs. Projected enrollments for the total College District are: 4,965 in 1975; 14,873 in 1980; 20,016 in 1985; and 32,517 in 1995. However, there are many factors which may significantly revise these projections. Thus, enrollment figures must be constantly reevaluated and their effect on long-range planning taken into account. In order that the College may fully meet the educational needs of the community, a projected balance of transfer, career, and community educational programs should be presented. Career programs should be grouped in clusters to facilitate the use of common courses and to allow students to build one career on another. Campus core facility requirements are projected for 1978, 1982, 1986, and 1990. These are based on projected enrollment, and instructional program requirements, and include projections of square footage required and corresponding costs. Data are organized into tables throughout the document, and enrollment and population projections are presented in graphs. (Author/NHM)

Identifiers—Delphi Technique, \*Frederick Community College

In order to design a long-range plan for developing and evaluating career education programs and services at Frederick Community College (Maryland), the following steps were taken: (1) 210 representatives of education, business, industry, and community organizations were selected to participate in a Delphi survey to define the goals of career education. Although only 104 individuals responded to the three rounds of Delphi questioning, the survey resulted in the identification of 10 clear-cut goals which are presented in this report. (2) In order to evaluate the college's current career education programs, a follow-up survey of career graduates was conducted, along with an employer evaluation of the career graduates. In addition, an examination of career faculty qualifications was made. (3) A plan of action was designed which gives both intermediate (3 to 5 years) and long-term (10 years) objectives for accomplishing the stated goals of career education at the college. This plan of action is designed to provide the general framework which is necessary for systematic planning, organizing, and evaluating career education activities, and is not intended to provide final procedures for carrying out these activities. The various survey instruments utilized in this project are appended, as is a bibliography of selected references. (Author/NHM)

Descriptors—Administrative Policy, Administrative Problems, \*Administrator Responsibility, \*College Administration, Community Colleges, Educational Responsibility, Governance, \*Junior Colleges, \*State Boards of Education, State Legislation, State School District Relationship, \*Trustees

Identifiers—\*Washington

The governance and management of the community college system in the state of Washington is based upon a division of responsibilities between the 22 district boards of trustees and the State Board. In 1967, a formal division of responsibilities between the district boards and the State Board was enacted by the state legislature. Later reports of district and State Board activities divided these responsibilities into 10 problem areas: (1) operating budget actions; (2) capital budget and project actions; (3) personnel actions, including professional negotiations; (4) real property acquisitions; (5) program and curriculum-related actions; (6) planning; (7) fees and charges; (8) legislative program; (9) State agency status; (10) multi-district cooperation. This report reassesses district and State Board responsibilities in each of these 10 areas, and makes a number of recommendations. A matrix graph is appended which explains the statutory responsibilities of each of the boards, enumerates recommendations, explains the implications of the recommendations for board responsibilities, and delineates the steps necessary for implementation. **Consumerism Comes to the Community College.**  
 Topical Paper No. 55.

California Univ., Los Angeles. ERIC

Clearinghouse for Junior Coll. Information.

Report No—TP-55

Pub Date Mar 76

Note—38p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Community Colleges, Community Relations, Educational Trends, Information Needs, \*Junior Colleges, Legal Responsibility, Occupational Information, \*Publicize, \*Public Relations, \*Recruitment, School Community Relationship, \*School Publications

Identifiers—\*Consumerism

As interest on the part of federal and state agencies increases, and legislation is enacted to prevent consumer abuse in higher education, institutions must recognize that students, as well as taxpayers, are consumers of higher education, and that the educational marketplace must concern itself with fair practices, much as business and industry have done in the past several years. The first section of this paper is a philosophical overview of the effect of consumerism in the community college. Some reasons for the development of consumer problems in community colleges are outlined, and a rationale for committing institutional resources to deal with them is given. The second and third sections deal with constructive suggestions of student affairs specialists at two community colleges (one rural and one urban institution) for facing the problems that consumerism presents to post-secondary education. Focuses include: the need for quick action; the need to gather accurate, relevant, and useful data concerning job descriptions and future job opportunities; the need to present both positive and negative information about the college facilities and atmosphere; and the need to explore various means of dispersing such information to interested members of the community. (Author/NHM)

*Babski, Carl***Does Students' Expectation of Teachers Affect Students' Evaluation of Teachers?**

Note—40p.; Practicum for Ed.D., Nova University

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Bibliographies, \*Evaluation Criteria, Junior Colleges, Learning Experience, Literature Reviews, \*Student Attitudes, Student Characteristics, Student Evaluation, \*Student Teacher Relationship, \*Teacher Evaluation, \*Teacher Role, Teaching Methods

This report gives an extensive review of the literature dealing with student evaluation of faculty, and investigates the effect of a previously unexplored variable, students' expectations of the teaching-learning situation. Eight student perceptions of the teaching-learning situation were identified: dogmatic, erotic, moral, therapeutic, intellectual, existential, humanistic, and pragmatic. These descriptions of student perceptions were worded into statements for the students to rank on a five-point Likert scale, according to their perceptions of what teaching and learning roles mean. This survey instrument was administered to classes in all four divisions at Miami-Dade Community College, along with questions designed to evaluate the course instructors, and questions intended to elicit information about the students answering the survey. Findings showed that there was no significant difference in the evaluation results among students with different perceptions of teaching and learning roles. The survey instrument is appended, as is a bibliography of literature on the subject of student evaluation of faculty. (NHM)

**Student Rights and Responsibilities.**  
 Kentucky Univ., Lexington. Community Coll. System.

Pub Date Aug 75

Note—31p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Community Colleges, Discipline, \*Discipline Policy, Due Process, Freedom of Speech, \*Junior Colleges, School Law, School Policy, \*Student Behavior, Student Organizations, \*Student Rights, Student Role, \*Student School Relationship

Identifiers—\*Kentucky

This document summarizes the rights and responsibilities of students in the University of Kentucky community college system. Part I deals with rules and procedures governing non-academic relationships between students and the University. The discussion is organized into five articles which have been adopted by the University Board of Trustees and may be amended only by that body: (1) the community college judicial system; (2) the rights of students, including admission, financial aid, facility use, privacy, the keeping of records, free expression, and free press; (3) the community college's supervisory role over student organizations; (4) financial delinquency; (5) interference, coercion, and disruption. Part II deals with rules governing

academic relationship, as adopted by the Community College Senate. In this part, the academic rights of students, and possible academic offenses (plagiarism, cheating) are discussed, along with procedures to be followed in the case of an academic offense or a breach of academic rights. Finally, this document discusses honor codes, and the composition of the Community College Appeals Board. (NHM)

**The Concept of Structure in Cognitive-Developmental Theory.**  
 Pub Date Aug 74

Note—18p.; Paper presented at the Annual Meeting of the American Psychological Association (82nd, New Orleans, Louisiana, August 30-September 3, 1974)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
 Descriptors—\*Cognitive Development, Cognitive Processes, \*Developmental Psychology, \*Human Development, \*Logic, \*Models, Structural Analysis, Structural Grammar, Structural Linguistics

Identifiers—Piaget (Jean), \*Structure (Psychological)

This theoretical paper discusses (1) the meaning of the concept of structure, how the concept of structure is used by psychologists, and how the concept can be defined, and (2) the role of the concept "structure" in cognitive development with specific reference to Piaget's vision of intellectual development. The meanings of the term structure in structural psychology, in gestalt psychology and in the structuralist movement are described, and it is emphasized that the concept of structure is a purely logical notion. Adjectives (like grammatical) serve only to modify rather than define the generic concept. Treating structure in this way implies that structural isomorphism has useful implications for work in new areas. Such analytical uses of structure are contrasted with Piaget's conception of cognitive structure which, it is alleged, has been used as grounds for his stages. The possible fallacy of assuming a relation between cognitive structures and cognitive stages in Piagetian theory is explained. Predictions concerning timing and sequence of stages based on this assumption are contrasted with Piaget's findings. (GO)

**Infant Accommodation and Acuity Threshold as a Function of Viewing Distance.**  
 Minnesota Univ., Minneapolis. Inst. of Child Development.

Spans Agency—Minnesota Univ., Minneapolis. Graduate School Research Fund.; National Science Foundation, Washington, D.C.

Report No.—NSF-P2B1389

Pub Date Apr 75

Note—12p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
 Descriptors—\*Distance, \*Eye Fixations, \*Infancy, \*Physiology, \*Visual Acuity, Visual Stimuli  
 Identifiers—Accommodation (Visual)

This study investigated whether the acuity threshold for distant targets is elevated for infants ranging in age from 24 to 63 days. Using square wave gratings and a modified staircase procedure, acuity thresholds for each of 331 infants were determined for one or more of the distances 30 cm, 60 cm, 90 cm and 150 cm. Acuity threshold was defined as the finest grating toward which the infant directed a significant proportion of first fixations. Results indicate that these thresholds were centered around a modal grating-stripe width of 30 minutes of visual angle, regardless of the infant's age. The predominant threshold of 20 - 30 minutes of an arc was found for the 150 cm distance, and no general improvement in acuity threshold was found over the age range tested. These results are in agreement with other infant acuity studies, showing that 1- to 2-month-old infants are sensitive to gratings of 2 cycles per degree or coarser. This value was relatively constant across large distances, suggesting that the 1-

to 2-month-old infant's lens does not accommodate as a function of target distance. This finding is compatible with the evidence to date that the low visual acuity of the infant does not vary with the distance of the pattern being viewed. (It is suggested that the young infant is sensitive only to low spatial frequencies, so that there is not effective stimulus for accommodation.) (GO)

**An Information Processing Approach to Children's Causal Reasoning.**

Pub Date Apr 75

Note—13p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Abstract Reasoning, \*Childhood, \*Cognitive Development, Developmental Tasks, \*Information Processing, \*Logical Thinking, Task Analysis, \*Test Interpretation, Validity

Identifiers—\*Causal Reasoning

This paper questions evidence for the thesis that causal reasoning of older children is more logical than that of younger ones, and describes two experiments which attempted to determine (1) whether there are true developmental differences in causal reasoning, and (2) what explanations for developmental differences can be supported. In the first experiment a problem that was completely unfamiliar to the subjects was used, so that subjects could not base their responses on previous statements of parents or teachers. Results indicated a clear developmental difference. In order to generate plausible interpretations of this finding, an information processing model was constructed to describe the steps involved in performing the experimental task. Various developmental differences were tested using an interactional strategy. Siegler and Liebert's regularity-without-contiguity task was analyzed and different versions presented to children of different ages. Competing explanations of the developmental difference were tested. Findings indicated that the difference lay only in the subjects' ability to overcome the influence of the blinking lights of the computer used in the experiment. The use of such an interactional design is recommended as a procedure for directly comparing the strength of factors which are hypothesized as central by different theories. (GO)

**An Experimental Test of the Effects of Internal and External Disequilibrium on Spatial Reasoning Development.**

Spans Agency—Spencer Foundation, Chicago, Ill.

Pub Date Apr 75

Note—47p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Cognitive Development, \*Cognitive Measurement, Elementary School Students, \*Models, \*Predictive Validity, \*Task Performance, Transfer of Training

Identifiers—\*Equilibration, Piaget (Jean)

This study investigated several levels of internal and external disequilibrium and their interaction. Subjects were 63 fifth graders assigned to three groups according to their degree of internal disequilibrium. Internal disequilibrium was measured by the amount "level mixture" (a tendency to respond to various events at several different reasoning levels) demonstrated on a map drawing pretest. Within each internal disequilibrium group subjects were assigned to low, middle or high external disequilibrium conditions, in which they received training on maps drawn at their own modal level, and one level above, or at two levels above. Post testing was conducted using the map drawing task, two spatial reasoning tasks and a delayed posttest. Findings suggest that: (1) external disequilibrium determines primarily the direction of discrepancy between existing and presented cognitive modes and is therefore an important factor influencing the direction of change; (2) internal disequilibrium relates to instability and may therefore primarily affect the amount of change; and (3) under conditions conducive to progressive change, bias distinguishes between subjects likely to advance in modal level

and those likely to undergo further elaboration and consolidation of the current level. (Author/GO)

**Developmental Changes in Problem Solving as a Function of Level of Socialization.**  
 Pub Date Apr 75

Note—26p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Childhood, \*Problem Solving, Social Development, \*Socialization, Time Perspective, \*Young Adults

Identifiers—\*Information Processing (Psychological)

In this study, which examines the relationship between level of information processing and level of general socialization, a total of 90 children aged 11 and 14 years and a group of 17 adults were presented with an organizational problem: how to order simultaneously presented tasks. Subjects were individually shown a map with locations and distances marked on face-down content and time-distance cards and asked to organize the performance of several tasks which had specific time constraints. Problem solving behavior was recorded by monitoring selection of cards, chosen sequences of moves on the map, and verbal comments. Data was analyzed first by testing 3 hypotheses derived from Schroder's construct of conceptual complexity. Each hypothesis was supported showing that with increasing age there are increases in level of proving time components of the task, in branching procedures and in the number of correct solutions. Second, the social background of the task was taken into account and hypotheses derived from this theoretical position discussed in terms of the data which confirms theoretical assumptions about the influence of level of general socialization on actual problem solving behavior. The problem was then transformed into a domino-type game and presented individually to a total of 45 subjects in age groups 11 years, 14 years, and adult. Results showed that adults need more time for solving the domino-type task but that younger groups need less time and produce more correct solutions than on the organization problems. (GO)

**The Facilitation of Class-Inclusion by Use of Multiple Comparisons and Two-Class Perceptual Displays.**

Spans Agency—National Inst. of Mental Health (DHEW), Bethesda, Md.

Report No.—NIMH-MH-19223

Pub Date 12 Apr 75

Note—29p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 12, 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Classification, \*Cognitive Development, \*Cognitive Processes, \*Concept Formation, \*Elementary Education, Elementary School Students, Logical Thinking, Set Theory, Transfer of Training

Identifiers—\*Class Inclusion

This paper reports two experiments which examined processes involved in children's ability to solve class inclusion problems of the form, "Are there more A' (subclass) or more A (class)?" In the first experiment a total of 216 children in age groups 5, 7 and 9 years were placed in three conditions which were designed to distinguish performance on single and double class inclusion problems (involving implicit and explicit partitioning) and to examine subsequent transfer of experience with the double class display procedure when the child returned to the traditional one-class setting. Findings support the position that certain perceptual contexts are more likely to induce the child to perceive the class rather than merely the subclasses. Overall transfer results also showed improvement but gave no significant effects for explicit compared with implicit partitioning of the double class display. Experiment 2 placed into two conditions a total of 120 children in age groups 5, 7 and 9 years, each condition comprising three consecutive tests designed to test the effect of intervening double class problems on Test 2 performance and

on Test 3 transfer effects. Anticipated improvements were demonstrated. Comparison of data from each experiment suggests that class inclusion is not what is at issue in part-whole comparisons. A general process description of what occurs in class inclusion problems is offered. (GO)

**Early Cognitive Development of Pre-term and Full-term Infants: Component Structure of Sensorimotor and Developmental Examinations.** California Univ., Los Angeles. Dept. of Pediatrics.

Spons Agency—National Inst. of Child Health and Human Development (NIH), Bethesda, Md.

Report No.—PHS-NO1-HD-3-2776

Pub Date Apr 75

Note—22p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—\*Cognitive Development, \*Comparative Analysis, \*Infants, \*Motor Development, Perceptual Motor Learning, \*Test Interpretation

Identifiers—\*Sensorimotor Evaluations

This paper reports a study which examined the relationships of various facets of sensorimotor performance to abilities measured by a developmental examination of a sample of full-term and pre-term infants nine months after expected term date. This study addressed three questions: (1) Are there differences in the sensorimotor development of term and pre-term infants? (2) Can the internal structure of the sensorimotor scales be determined by a single factor or by multiple factors? (3) Do sensorimotor scales provide an added dimension to the measurement of infant cognition above that provided by developmental assessment? Data analysis showed no pre-term and full-term differences in sensorimotor performance and provide support for the view that sensorimotor measures can be used as a method to explore the organization of infant thought and can supply information above that given by developmental evaluations if more than one indicator is used. The question of the relationship between mental and motor abilities is discussed in terms of inconclusive data obtained on gross motor abilities. (GO)

Descriptors—Curriculum Development, Curriculum Guides, \*Day Care Programs, \*Early Childhood Education, Family School Relationship, \*Learning Activities, Mexican Americans, \*Migrant Child Care Centers, Spanish, Spanish Speaking, \*Staff Improvement

Identifiers—Montana Preschool Program for Migrant Children

This paper argues that home activities comprise a valuable unplanned curriculum and that many of these activities can be transferred to the day care center. It is suggested that these activities foster a closer relationship between child and caregiver and bridge the gap between familiar home environment and novel day care setting. Home activities and situations which could be used in the day care center are listed with the emphasis on a need for parent-like involvement from the caregiver. Spanish and English versions of a staff development and training program for using home activities are included. (GO)

Descriptors—\*Behavior Change, \*Infancy, \*Interaction Process Analysis, \*Nonverbal Communication, \*Verbal Communication

Identifiers—Frank Porter Graham Child Development Center

This document reports the case of 2-year-old girl who demonstrated verbal ability at home but who communicated through nonverbal means in the preschool classroom setting. Baseline data was collected by classroom observation for approximately 32 minutes per day during a 6-day period using an interaction process analysis format. Verbal and nonverbal categories were recorded at 10-second intervals and indicated the direction of communication between subject, peers, and teachers. Analysis of baseline data showed gestural communication to predominate over verbal communication in a ratio of 4 to 1. As a result, a 10-day period of teacher intervention was instigated to increase the child's verbalizations by an increase in teacher talk and by the utilization of wh-form questions (who, what, when, where, and why). Praise was used to provide positive reinforcement. The 10-day period yielded little improvement in verbal responses, but continuation of the treatment produced a steady increase in verbal behavior. It was noted that without teacher help the child could maintain verbal gains, and peer reinforcement is mentioned as a possible factor in the maintained improvement in the rate of verbalization. Identifiers—Denver Developmental Screening Test, Kansas (Fort Scott), \*Southeast Kansas Demonstration Child Devpmnt Cnt, Walker Readiness Test

The development of 10 preschool children who attended the Southeast Kansas Demonstration Child Development Center was compared with the development of 10 preschool children who did not attend a child care center to ascertain the value of the center's program. Both groups were tested with the Denver Developmental Screening Test at the beginning and end of a 10-month period and with the Walker Readiness Test, Forms A and B, at the end of the period. Subjects in the experimental group came from low-income and middle-income families, while subjects in the control group came from families in all income brackets. At the end of the study the average reading readiness score of children in the experimental group was not significantly higher than that of the control children. The experimental group showed an increase in overall growth and development during the 10 months, but it was not significantly greater than the increase among control children. (BRT)

Descriptors—Child Care Centers, Comparative Analysis, \*Cross Cultural Studies, Curriculum Design, \*Day Care Services, Developed Nations, \*Early Childhood Education, \*Educational History, Educational Research, Infants,

\*Objectives, Preschool Children, Teacher Characteristics, Teaching Methods

This paper summarizes findings of an international study which compares the early childhood education and day care systems in 10 industrialized nations: France, Great Britain, Hungary, Yugoslavia, Israel, Poland, Denmark, Sweden, USSR, and the United States. Provisions for children from infancy to school entrance are considered. Historical perspectives on early education and care are reviewed and examples are given of three markedly different systems which provide day care and education to young children today. The bulk of the report consists of comparisons among national systems along such dimensions as goals; composition of classes; training, selection, and supervision of staff; features of the physical plant; design of curriculum; and methods of teaching. The main contrasts observed between the United States and other countries studied include the absence of active research and program evaluation in most other countries and a lack of self-criticism on educational issues in countries other than the United States, Great Britain, and Sweden. Preschool personnel in other countries are said to have a sense of conviction and purposiveness that may influence feeling of security in children and effectiveness in teachers. The report calls into question the assumptions of United States educators that early education requires (1) low student-teacher ratios and (2) more stringent teacher education requirements than exist in other countries. It is noted that the early childhood goals of character development emphasized abroad appear to be lacking in United States systems. (GO)

**Integration of Auditory and Visual Spatial Information During Early Infancy.**

Pub Date 13 Apr 75

Note—15p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 13, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Auditory Perception, \*Behavior Patterns, Cognitive Development, \*Infant Behavior, Models, Perceptual Development, Research Methodology, \*Sensory Integration, Stimulus Behavior, \*Visual Perception

An experiment was performed to show that infants perceive auditory and visual stimuli within a common space and that they perceive the sound as an attribute of the visual object. Subjects were 22 infants aged 3 to 5 months. Each infant was presented with a toy that moved in a small arc from side to side of a small window at the rate of one arc per second. The back-and-forth movements occurred in synchrony with a chime. The sound was wired either to come from the front window where the toy was located or from 90 degrees to the side behind a cloth. Two dependent measures were recorded: (1) limb and body movement, and (2) visual orientation to the left or right. Infants showed increases in agitated limb and body movement when presented with the chime spatially dislocated from its temporally synchronous visual source (the toy). Agitation was not shown when the chime and the toy were presented together in space. Infants who demonstrated adequate processing of the auditory information through accurate orientation behavior were most likely to show increased agitation. (Author/BRT)

**A Developmental Investigation of Verbal and Non-verbal Methodologies in Incidental Learning.**

Pub Date Apr 75

Note—30p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Comparative Analysis, \*Elementary School Students, \*Incidental Learning, Intentional Learning, Memory, \*Paired Associate Learning, \*Research Methodology, Verbal Stimuli

This paper reports three experiments concerning methodological issues in studies on incidental learning performance which use verbal and non-verbal procedures and which appear to be ham-

pered by differences in stimulus materials, learning opportunities, and dependent measures. The first study, using 128 children from grades 3, 5, 7, and 9, attempted to determine if differences in developmental trends using paired associate and memory tasks can be attributed to methodological differences between the tasks. The second study, using 120 children from the same grades, attempted to see whether invariance in incidental performance across age with paired associate tasks is peculiar to a criterion level of intentional performance. The third study, using a sample of 80 children, examined whether observed developmental trends in incidental learning may be affected by the degree of difficulty of the task as defined by memory load. General findings are examined to determine if the decline in incidental performance around 11 or 12 years is related (1) to the nature of the intentional task, (2) to minimal learning conditions, (3) to relatively unrelated intentional and incidental independent measures, and (4) to a moderately difficult or demanding intentional task. It is suggested that the decline can be eliminated by criterion levels of learning and by use of a very easy intentional memory task. A viable theoretical explanation for the decline is that at this age children focus on intentional material at the expense of incidental information. (GO)

**What Optimizes Moral Development and Behavior? Where the Theories Converge.**

Pub Date Apr 75

Note—13p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Affective Behavior, \*Cognitive Development, \*Comparative Analysis, \*Elementary Secondary Education, Integrity, \*Moral Development, \*Personality Theories, Social Environment, Student Responsibility

This paper attempts to find some similarities among different theories of moral development, presenting a literature review of research and a comparative analysis of results on three questions. The questions considered are: (1) What is the role of cognitive competence in moral development and what optimizes the cognitive aspects of moral growth? (2) What is the role of affect in moral development, and what optimizes the affective aspects of moral growth? (3) What supports the development of consistency between mature moral reasoning and moral behavior? It is suggested that the development of mature moral reasoning is facilitated by the imposition of real responsibilities in real social contexts, and by an environment which provides strong situational supports. **Formal Operations Thinking: Now You See It, Now You Don't.**

Pub Date Apr 75

Note—15p.; Pages 14 and 15 have been filmed from best available copy; paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Adolescence, Age Differences, \*Cognitive Development, Cognitive Measurement, \*Elementary Secondary Education, Individual Differences, Intelligence Differences, Intermediate Grades, \*Learning Theories, \*Measurement Techniques, Models, Sex Differences, \*Task Performance

**Identifiers**—\*Formal Operations (Psychological)

This paper discusses research exploring the performance factors involved in studies which test for formal operations. It is suggested that several previous studies dealing with formal operations confound performance and competence in determining the extent of subjects' formal operations schemata. Factors which might account for performance differences are: (1) tasks chosen by the investigators to measure formal operations thought, (2) the degree to which the investigators use a direct method of task presentation and questioning, (3) the number of dimensions along which tasks vary, (4) the content area of the task, (5) sex differences, and (6) intelligence differences. Results of a series of ex-

periments with elementary, junior high, and high school students which tested the extent to which these factors affect formal operations performance are presented. (BRT)

**Identifiers**—\*New York City Infant Day Care Study

This report concerns the field procedures and data analysis being used in the New York City Infant Day Care Study, a large-scale longitudinal study examining publicly-funded, community-controlled group and family day care programs in New York and comparing the effects of these programs and of home rearing on children and their families. Children's development and the patterns of care provided to them in group and family day care, as well as at home, are being evaluated and compared in three major areas: (1) child's health, nutrition, and physical development; (2) child's cognitive, linguistic, social, emotion, and personality development; and (3) family development. Procedures for assessing program input and developmental outcomes in these areas are described and design of the data analysis is discussed. The appendices, comprising most of the report, include (1) identification of committee members, (2) forms and manuals for the field procedures (three fourths of the report), and (3) material relevant to the data analysis procedures and analytical framework. **Identifiers**—Arkansas (Little Rock), \*Project Kramer

This report describes the evolving activities of an educational intervention program which is composed of (1) a comprehensive early childhood program for children from infancy through age 6; (2) a subsequent elementary program offering continuity of developmental support; (3) day care services, including after-school activities for school-age children; (4) a broad research program in child development and education; (5) a comprehensive array of supportive family services; and (6) preservice and inservice staff and student training programs. New developments and areas identified as needing change are discussed in relation to each aspect of the program. Discussion of the project's research activities includes an overall view of the research program and more detailed reports on Project AWARE (a human relations program for the primary grades) and Project LEAP (an experimental language training curriculum for 2- and 3-year-old day care children). The preservice and inservice training programs for staff and students are described. In addition, a consideration of future

educational and research plans is included. Appendices, comprising two thirds of the report, include (1) essays describing the program and its underlying principles; (2) tables showing the program's testing schedule; (3) materials used for home intervention (approximately one-fourth of the study); and (4) papers concerning the powerful position of day care today, the effects of day care on children, and aspects of research programs involving the disadvantaged. **Descriptors**—\*Adoption, Child Welfare, Community Surveys, \*Family Attitudes, Family Characteristics, Grandparents, Interviews, Legal Responsibility, \*Low Income Groups, \*Negroes, Parents, \*Rural Family

**Identifiers**—Alabama, \*Informal Adoption

This research deals with the legal, social and cultural contexts in which informal adoption of black children by adults takes place in rural south Alabama. A total of 306 parent surrogates were identified, interviewed and compared on the basis of 10 socioeconomic characteristics. Information was also collected on the number of children informally adopted in each house, reasons for the adoption, available alternatives to adoption, length of adoption period designated and circumstances of the parent and the parent surrogate when the child was taken in, characteristics of the child, and the relationship of child and parent surrogates with the natural parents. Data were collected on the incidence of parental request for retrieval of the child, on parental assistance in the care of the child, on the adoption children's physical and psychological condition, and on the parent surrogates' knowledge of the level adoption system. Analysis of the data indicated that there was a high degree of satisfaction and acceptance of the informal adoption arrangement, that the children were accepted into the surrogate homes as natural children, and that legal adoption was rarely considered or sought by these rural people. It is noted that the stringent requirements for legal adoption would deny many of the parent surrogates in this study the opportunity to become adoptive parents. Improvements in income, educational and health services are suggested as solutions which would not impair the traditional social concern among such people that assures children parental love and care. **Identifiers**—\*Research Trends

This booklet is based on a series of 1971 conferences attended by 22 prominent individuals in the field of child development research. Conference participants met in three working panels (on infancy, the preschool child, and the school age child) to assess the current status of the child development research field and to project research needs for the coming decade. Representing the collective opinions of the panelists, the booklet describes trends in research, gaps in research activity, and barriers to research efforts. The priorities in child development research are discussed, and the consensus on research needs is

reported under the following headings: (1) the need for more and better communication in research and development, (2) the need for collaborative research, and (3) the need for certain types of manpower. In addition, the synthesis of research results within and across disciplines is highlighted as a prerequisite for understanding the development of the child. (GO)

**Identifiers**—\*Curriculum Research in Infant Education

This package contains five home-based intervention curricula for families with children between 12 and 30 months of age. Three independent curricula (each emphasizing children's language, play or social development) enlist the mother's aid as observer, teacher and researcher, and promote a three-way interaction among mother, child, and home-visitor. The Mother Only curriculum combines the three independent curricula into a single program in which the primary interaction is between the mother and home-visitor, to the exclusion of the child (who should benefit from the education the mother receives). Likewise, the Baby Only curriculum is in combination form, but with the mother excluded from the intervention program. Each curriculum contains materials for a program of 32 visits by a trained home visitor over an 18-month period. The goals, home-visitor role, patterns of visits, and problems encountered in testing the language, play, and social development curricula are briefly discussed. (ED)

**Modification of Impulsivity in Young Children.**

Pub Date Aug 75

Note—138p.; Ph.D. Dissertation, Texas Woman's University

**EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage**

**Descriptors**—Behavior Change, Cognitive Processes, \*Conceptual Tempo, Contingency Management, \*Preschool Education, \*Reaction Time, \*Reinforcement, Response Mode, \*Tutorial Programs

This study examined the relationship of tutorial enrichment of cognitive processes and reinforcement of lengthened response latency to measurements of impulsivity in 3- and 4-year-old children in a typical preschool setting. In a pretest-posttest control group design, 48 impulsive subjects (24 male and 24 female) were randomly assigned to tutorial and nontutorial groups, producing eight cells with six observations per cell. Subjects were administered the Kansas Reflection Impulsivity Scale for Preschoolers (KRISP), Form A, and the Slosson Intelligence Test. Tutorial subjects then received tutoring with standard curriculum materials in two sessions per week for a 6-week period. During tutorials, subjects were provided with at least two opportunities for reinforcement per minute for lengthened response latency and systematic search strategies. At the same time nontutorial subjects continued their usual preschool routine. After 6 weeks, all subjects were administered the KRISP, Form B. The findings indicated that impulsivity was modifiable through the tutorial process, although the process was more effective for the 3-year-olds than for the 4-year-olds. The belief in orthogonality of efficiency and impulsivity was corroborated, as were the stability and independence of the impulsivity trait. (JMB)

**Identifiers**—\*Curriculum Research in Infant Education

This report describes a comparative study of methods of home-based infant and parent education. The study involved 108 children, aged 1 to 2 1/2 years, in six groups of 18 each. In three groups a home visitor worked with the children and their mothers using a curriculum which focused on either play, language, or social development. In a fourth group, the home visitor used elements of all three curricula with the mother only. In the fifth group, similar curriculum elements were used by the home visitor with the baby only. A sixth group (control) consisted of babies who were tested but not visited. Children were tested at 12, 18, 24, and 30 months of age for curriculum effects in language development, mother-child interaction, and cognitive development as evidenced in play. An in-depth comparison of subject performance in the six groups is provided. Extensive appendices, comprising most of the report, include sample recruitment procedures, demographic characteristics, and correlational analyses of demographic variables. In addition, extensive descriptions of the curricula, laboratory procedures, measurement techniques, and coding manuals are included. (BRT)

California Child Day Care Licensing Task Force: Report and Recommendations.

California State Health and Welfare Agency, Sacramento. Office of Educational Liaison.

Pub Date 31 May 75

Note—132p.

EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage

Descriptors—Administration, Child Abuse, Consultants, \*Day Care Programs, \*Family Day Care, Government Role, Interagency Coordination, Personnel Management, \*Policy Formation, \*State Licensing Boards, \*State Standards, Teacher Certification, Zoning

Identifiers—California, \*Day Care Licensing

This report contains information relevant to policies for child day care regulation in California. An introductory section of the report briefly provides background information on the development and goals of the California Day Care Licensing Task Force, summarizes policy recommendations, and defines the terms used in the report. Separate committee policy reports are presented on the following topics: (1) philosophy underlying the licensing effort and feasibility of alternatives to licensing; (2) administrative organization and integration of regulatory programs; (3) standards; (4) supervision, consultation, and personnel administration; and (5) enforcement. A discussion of task force policy recommendations is offered. The appendices, comprising more than one-half of the report, include: (1) a short history of day care licensing in California; (2) the full text of several issue papers prepared by task force consultants which deal with day care and child development program licensing, standards, and administration; and (3) a selected bibliography of additional reference materials. Identifiers—\*New York (New York), Project Head Start

This study investigated the impact of differential programming on urban, low income black children's early school achievement. The 728 children in the study, all residents of the Bedford-Stuyvesant and Brownsville areas of Brooklyn, N. Y., were "graduates" of 17 preschool programs during 1967, 1968, and 1969. The programs included 6 licensed, developmental day care centers; 4 unlicensed, custodial day care programs; 4 Head Start Centers; and 3 Board of Education Early Childhood Centers and prekindergarten programs. Specific information about each of the programs was obtained from a retrospective interview schedule and included program objectives, facilities, staff, curriculum, parental involvement, and ancillary data. Data collected from elementary school records included demographic information (particularly birthplace and family characteristics), school attendance, personal/social behavior, physical/health status, and school achievement as measured by the Metropolitan Achievement Test and the Reading and Mathematics Test for New York State Elementary Schools. The results strongly suggest that children from licensed day care programs are performing better than their peers during the early school years. Specific results and data limitations are discussed in detail. (ED)

Descriptors—\*Adoption, Black Community, Community Agencies (Public), Financial Support, Interagency Cooperation, Interagency Coordination, Interviews, \*National Surveys, \*Negro Youth, Private Agencies, \*Program Descriptions, \*Program Development, Welfare Agencies

Identifiers—\*Adoption Programs, Biracial Children

This report is a collection of abstracts describing the salient features of 20 adoption programs for children and infants of black and biracial background and attempts to delineate those program features which appear to be associated with effectiveness. Information on each program was collected by means of an unstructured interview with individuals at various staff and administrative levels. An account of each program is given under the following headings: Duration; auspices; purpose; staff involved; methods; community involvement; publicity; intra-agency modifications or innovations; inter-agency efforts; problems and obstacles encountered; steps taken to solve problems, if any; factors reported as most helpful; and cost to adoptive parent. Certain themes were recurrent in the summaries: (1) the primary goal of all programs was to find adoptive homes for black and mixed background children, (2) the auspices of the programs varied considerably, (3) nearly all respondents gave top priority to involvement of the black community in the development of programs, policies and procedures, (4) state, county and municipal departments of Public Welfare play an important role in the workings of adoption agencies, (5) respondents stressed the importance of inter-agency cooperation and coordination for effectiveness, (6) limited funds and staff account for restricted efforts to increase the number of adoptive placements, and (7) most programs attempt to inform the public about the magnitude and urgency of the need usually through use of mass media. Descriptors—\*Early Childhood Education, \*Handicap Detection, \*Handicapped Children, Language Handicapped, Mentally Handicapped, Multiply Handicapped, Normalization (Handicapped), Parent Counseling, Physically Handicapped, Preschool Curriculum, \*Preschool Programs, Program Development, \*Regular Class Placement, Special Services, State Surveys

Identifiers—\*Project Head Start

This report documents the status of handicapped children in Head Start programs during Fiscal Year 1975, including the number of children served, their handicapping conditions, and the services provided. It is reported that children professionally diagnosed as handicapped accounted for at least 10.4 percent of children enrolled in full-year Head Start programs. Nearly 57 percent of these children required a "fair amount" or "practically constant" special assistance. One of the most important services Head Start programs have offered handicapped children is the chance to be in a developmental environment with non-handicapped children. Counseling for families of handicapped children, modifying physical facilities, and providing special equipment are among the services Head Start provides for its handicapped children. Diagnostic criteria for identifying handicapped children for inclusion in the Head Start program are provided. All Head Start programs enrolling handicapped children require staff members to have additional training. Fourteen experimental programs for

handicapped children are attempting to develop new methods of serving handicapped Head Start children. Results of a state-by-state survey of Head Start services provided to handicapped children are presented in tabular form. (BRT)

This study investigated the effects of short term supplemental parent and classroom programs on the self-concept, sociometric status, social involvement, and heterogeneity of friendship and associations of day care children 3.3 to 5 year of age. The treatment conditions compared: (1) a regular day care program (control); (2) a day care program with supplemental classroom activities designed to enhance specific social interaction skills; (3) a day care program with a supplemental parent program focusing on increasing positive parent-child and parent-teacher interaction; and (4) a day care program with both supplemental classroom and parent programs. Data were collected before and after the 12-week intervention period, from approximately 200 black and Anglo children in eight large day care centers, using the following instruments: Brown IDS Self-Concept Referents Test; Play Situation-Picture Board Sociometric; Classroom Socio-Observations; and the Observation and Socialization Behavior instrument (revised), a videotaped observational rating procedure. Significant differences across treatment conditions were evidenced on a number of variables. The appendices include supplemental information on the instruments used, sample lessons from classroom and parent programs, and descriptions of the centers involved. (ED)

**Identifiers**—\*District of Columbia

This report describes the history, program, sample population, assessment methods, participant reactions, and final evaluation of a 7-year study which investigated the long-term effects of a 2-year traditional nursery school intervention program. A total of 30 disadvantaged children with below-normal initial IQs began the full-day program at age 3 and continued the program for 2 years. The children then entered a special kindergarten class for one year, were kept together for 2 subsequent years in a special school situation, and entered regular third grade classes. Followup information was obtained during the third, fourth, and fifth grades. The assessment criteria used were restricted to objective measures of intelligence and school achievement, such as language use and understanding, perceptual discrimination, concept formation, sensorimotor

coordination, memory, and number skills. Final results indicate that the improvements evidenced by children in the treatment group after the preschool program gave them little or no advantage by the end of the fourth grade over their peers who did not receive treatment. Sex, initial IQ, and sociometric status showed systematic relations to patterns of later IQ scores and school achievement measures. Methods of assessment used and final results are discussed in detail. (ED)

**Identifiers**—\*Child Advocacy Research Project, Childrens Rights

An exploratory study of child advocacy cases as conducted and reported by social agency workers is presented in this report. Most of the data were collected with the use of a critical incident technique, by which case workers from eight agencies reported selected child advocacy cases in which they had participated over a 4-month period. Information obtained from 163 of the case worker reports was coded and analyzed in terms of the advocate, client, problem, target system, objective, available resources, receptivity of target system, intervention level and method used, and outcome involved in each case. The resources used by the case worker and the receptivity of the target system involved are suggested to be especially influential in case outcomes, as portrayed by the data. The implications of the data for case advocacy practice and theory are discussed. A review of advocacy and social intervention literature is included. (BRT)

**Identifiers**—\*Child Advocacy Research Project: Childrens Rights

This report describes a study of 23 community-based child advocacy projects, located in 14 states and 20 cities, and outlines a strategy for evaluating such projects. Data on each project's history, development, and current activities were obtained. Data were analyzed to (1) determine how such projects are started and become operational, (2) identify stages in project development, and (3) establish a strategy for evaluating each identified stage of development. From the analyses, an evaluation instrument for community-based child advocacy projects was developed and piloted on six of the 23 projects studied. Semi-structured interviews were conducted with staff at these six projects to determine the relative success of each child-advocacy project in

terms of its planning and implementation. Variables such as funding agency, leadership, program structure, and advocacy objectives, processes, and targets were found to be important in program effectiveness. A review of evaluation research is included. (BRT)

**Identifiers**—\*Project Head Start

This report evaluates a three-year-demonstration program in child advocacy, created as part of existing Head Start Parent-Child Centers to meet the needs of children under 5 and their families. Local services were integrated and new services created in a variety of areas (health, housing, education and welfare) using a primarily paraprofessional untrained staff. Evaluation data were collected from on-site interviews with Advocacy Component (AC) coordinators and staff members, community agency administrators, and randomly selected families served by the ACs as well as from monthly statistical reports on contacts, referrals, staff changes, etc. The report is divided into eight sections (1) the history and development of the AC program; (2) initial objectives and their changes; (3) activities on behalf of individual families and the relationships between ACs and the families served (including AC population characteristics); (4) family education efforts (e.g., workshops, meetings); (5) agency coordination efforts; (6) staffing patterns, staff functions, training and turnover; (7) the functional cost data analysis; and (8) conclusions. Generally, the ACs are thought to have accomplished considerable work in their communities and on behalf of individual families, but their achievements were found to fall short of the nine national goals originally set for the program. A Comparative Test of Locus on Control Measures and IQ as Predictors of Children's Task Performance.

Pub Date Apr 75

Note—32p.; Paper presented at the biennial meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Academic Achievement, \*Comparative Analysis, \*Elementary Education, Elementary School Students, \*Intelligence Quotient, \*Locus of Control, Multiple Regression Analysis, \*Predictive Ability (Testing), Sex Differences

Identifiers—Nonacademic Achievement

In this study, locus of control and IQ were compared to assess the power of each as a predictor of performance on academic and non-academic tasks. Four locus of control scales: the Intellectual Achievement Responsibility Scale, the Academic Achievement Accountability Questionnaire, the Rotter I-E scale, the Origin-Pawn mea-

sure and the Iowa Tests of Basic Skills were group administered to a sample of 74 fifth grade children over a 2-week period. Following this test procedure, the subjects were asked to perform a motor task (pasting stars in circles), a counting task (for which the subjects had an option of selecting the level of task difficulty), a block stacking task, and a practice test on math problems followed by a math problems task for which subjects could select difficulty level. The performance measures were administered over a period of 1 week. Multiple regression analyses showed that prediction of performance was contingent on sex of the child and task. The best predictor for academic related tasks was IQ; whole locus of control predicted performance on some, but not all non-academic tasks. The data were compared to previous research, and the utility of locus of control as a predictor of task performance was discussed. (Author/GO)

Available from—University of Minnesota Press, Minneapolis, Minnesota 55455 (\$12.50)

Document Not Available from EDRS

Descriptors—Behavior Patterns, \*Child Development, \*Developmental Psychology, \*Elementary Secondary Education, Infant Mortality, Knowledge Level, Language Development, \*Preschool Education, Problem Solving, Prosocial Behavior, Sentence Structure, Sleep, Social Development, \*Symposia, Television Viewing, Visual Perception

Identifiers—\*Minnesota Symposium on Child Psychology, Sudden Infant Death Syndrome

This book is a collection of six papers presented at a 1974 University of Minnesota symposium on child development. The six chapters deal with language acquisition, visual perception, effects of television viewing, the Sudden Infant Death Syndrome (SIDS), problem-solving strategies, and Piagetian concepts related to social development. The first chapter explores factors which pertain to the length of children's early sentences. In the second chapter, the development of visual form perception is described ontogenetically and phylogenetically. The third chapter examines the effect of viewing television programs with prosocial themes and content on nursery school children's behavior. A fourth chapter discusses a research program which combines basic study of the physiology of infants' sleep with clinical observations and treatment of infants thought to be susceptible to SIDS. An investigation of the developmental aspects of problem-solving and reasoning abilities is presented in the fifth chapter. The sixth chapter relates Piagetian concepts of knowledge to the development of social cognition. (BRT)

Descriptors—\*Asian Americans, Bilingualism, Consortia, Cultural Factors, Day Care Services, \*Early Childhood Education, \*Ethnic Studies, \*Performance Based Teacher Education, Racial Discrimination, Residential Patterns, Self Concept

Identifiers—\*Child Development Associates, Pacific Island People

This Child Development Associate (CDA) Consortium report describes the issues, recommendations, and papers discussed at the 1975 Asian American Colloquy. There were three major purposes for this colloquy: to provide selected Asian Americans with information on the philosophy and goals of CDA, to provide an opportunity for CDA and its constituents to learn about an ignored minority group, and to obtain reactions from Asian Americans to the CDA concept. It was stressed by the panel of seven partici-

pants that they were not representative of several major groups of Asian American and Pacific Island people and that their recommendations must be viewed as tentative for that reason. Topics of the seven papers submitted by the panelists are: (1) the effects of residential patterns of Asian Americans on the availability and utilization of child care centers; (2) problems of bilingual and monolinguality; (3) early childhood education in the Asian community; (4) Asian Americans and Pacific Island Peoples; (5) early history of Asian Americans, 1850 to 1965; (6) role models for Asian American children; and (7) the portrayal of Asian Americans in the mass media. Appendices include graphs showing trends in the educational and occupational status and changes in income of five nonwhite racial groups in the state of Washington. (GO)

Day Care and the CDA; 1974: A Position Paper. Child Development Associate Consortium, Inc., Washington, D.C.

Spons Agency—Office of Child Development (D-HEW), Washington, D.C.

Pub Date Jan 75

Note—13p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Consortia, \*Day Care Programs, \*Early Childhood Education, \*Performance Based Teacher Education, Performance Criteria, Teacher Certification, Teacher Evaluation, \*Teacher Qualifications, \*Training Identifiers—\*Child Development Associates

This position paper summarizes the views of the 12-member Day Care Task Force to the Child Development Associate (CDA) Consortium, following a series of colloquies held by the task force on topics related to staff training and assessment in the day care field. Topics covered are: (1) definition of day care for children, (2) specific competencies required of day care staff beyond the basic CDA certification, (3) assessment procedures, (4) credentialing procedures, (5) eligibility requirements, and (6) special problems. Day care is defined as a multidisciplinary, nonexclusive extension of the family, operating in an extended time frame at the request of families who use it. The CDA performance criteria are judged adequate to meet primary needs in day care but lacking in the areas of human relations, individual differences, principles of learning, self-knowledge, objective observation, listening skills, and feeling tone. The task force consensus on the CDA assessment procedures for day care workers is that the additional competencies should be recognized, that procedures should be flexible enough to take account of artificial differences between full and part day staff, and that observations should be extended from 3 hours to a full day session. It is urged that the credentialing system remain independent of existing licensing or credentialing processes and remain regionalized for flexibility. (GO)

This colloquium report contains papers submitted to the Child Development Associate (CDA) Consortium by a panel of 12 black educators who represented different disciplines and differing black perspectives. Panelists discussed the education of preschool teachers with specific reference to competency areas, training programs for preschool staff, assessment and credentialing procedures. The report gives a brief outline of proceedings of the black colloquy participant

reactions and recommendations, and then presents the following papers: (1) Developing Communicative Competencies; a Black Perspective, (2) Assessment: Pitfalls and Problems without a Black Perspective, (3) Social and Psychological Implications of the CDA on the Black Community, (4) Implications of CDA on Supplementary Training, (5) A Profile of the CDA Candidate in the Black Community, (6) Competency-Based Training and Teacher Education in the Black College, (7) Evaluative Criteria for Assessment in Early Childhood Education, (8) The Role of the Community Child Development Center and the CDA, (9) Translating Black Experience Theory into Practice as it Relates to Training, (10) Is Competency Synonymous with Proficiency? (11) Cooperation, Competition and the Education of Black Children, (12) Competencies, Credentialing and the CDA Program or Maids, Miss Ann and Authentic Mothers: "My Momma Done Told Me."

The Only Child.

Pub Date Apr 75

Note—51p.; Master's Thesis, Southern Illinois University. Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.** HC Not Available from EDRS.

**Descriptors**—Academic Achievement, \*Behavior Patterns, \*Child Development, Elementary Secondary Education, Emotional Development, \*Family Relationship, Literature Reviews, \*Parent Child Relationship, \*Siblings, Social Development

**Identifiers**—\*Only Child

This review of the literature on the "only child" indicates that the single child is likely to be oriented more toward adults than towards peers, to be subjected more to an adult culture, to be an achiever who strikes out on his own, and to have a heightened sense of responsibility compared with children who have siblings. Statistics show only children often grow up to be outstanding, but there is a long-standing prejudice against the only child; parents often feel that they have to have a second child to "save" their first. Advantages for parents who have one child are discussed in terms of (1) less financial strain, (2) more freedom, (3) ability to devote time and energy to the child, (4) contribution to zero population growth, (5) avoidance of sibling rivalry, and (6) ability of mothers to realize their own ambitions while enjoying the experience of motherhood. It is concluded that "Oneness" by itself is not a determining factor in how an only child behaves, affecting the child only in the sense that being the eldest, middle or youngest child would affect behavior. Tucker, Mary K. Zell, Laverne C.

Day Care Arrangements of Low Income Single Parents.

Cleveland State Univ., Ohio. Inst. of Urban Studies.

Pub Date 75

Note—26p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Child Care, \*Community Surveys, \*Day Care Services, \*Early Childhood Education, Interviews, \*Low Income Groups, \*One Parent Family, Parent Attitudes, Questionnaires, Welfare Recipients

This study was designed to indicate the level of expressed demand for day care among low income women heading one-parent families in Cleveland and to determine the extent to which this demand is being satisfactorily fulfilled. A total of 123 low income single mothers with children under 14 years of age were contacted by telephone and interviewed using a 12-item questionnaire. Analysis of data indicated that 85 percent of the sample used day care services and a majority of the remaining 15 percent said that they would find employment if day care was available at little or no cost. Of those using day care, only 18 percent made use of day care centers and more than 33 percent used relatives as sitters. Satisfaction with day care arrangements varied with type used: the use of day care centers generated the highest rate of satisfaction and the use of an unrelated sitter in the child's home was rated most frequently as unsatisfactory. Alleged dissatisfaction with day care centers was based on

absence of perceived benefits to the child, costs of care, day care setting and restrictions on eligibility. Satisfaction with day care centers appeared unrelated to income and day care costs. Four recommendations to meet current demand and interest in day care centers were made based on (1) the findings of the present study which indicated high need, satisfaction and preference for day care centers, and (2) a survey of the status of day care services in Cleveland. Young Children's Sex Role and Knowledge of Sex Stereotypes. IJR Research Working Papers, 1975 Series.

Institute for Juvenile Research, Chicago, Ill.

Pub Date Sep 75

Note—10p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 3, 1975); Occasional light print

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Comparative Analysis, Criterion Referenced Tests, \*Preschool Children, \*Preschool Education, \*Sex Differences, \*Sex Role, \*Sex Stereotypes, Student Behavior, Student Characteristics

This study examined the proposition that Caucasian children between 3 and 5 1/2 years who behave in most sex appropriate ways have a greater knowledge of sex stereotypes than children who do not exhibit such behavior. The children in the study were 35 Most Masculine boys, 31 Least Masculine boys, 38 Most Feminine girls and 39 Least Feminine girls. Forty preschool teachers selected the subjects from 22 classes in 8 private nursery schools in a large metropolitan area by the method of pair comparisons; subjects were then rank ordered. Knowledge of sex stereotypes was measured using (1) a set of 8 pictorial cards depicting stick figures differing on one stereotype feature, and (2) a set of 16 questions concerning sex stereotypes. Individual children were shown the pictorial cards in fixed order and asked to point to the girl or boy. They were then asked 16 questions. Results did not support the hypothesis that knowledge of sex stereotypes and cognitive maturity affect sex role behavior. Girls were found to have more knowledge of sex stereotypes in general as well as of their own sex stereotypes when compared to boys. It is proposed that more attention be paid to the establishment of criterion groups in studies attempting to explore the process of sex role development which is still little understood. (GO)

Test Stimuli: Representational Level with Middle Class and Head Start Children.

Pub Date Aug 75

Note—12p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30 - September 3, 1975); Occasional light print

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Abstraction Levels, Pictorial Stimuli, Preschool Children, \*Preschool Education, Screening Tests, \*Test Bias, \*Visual Measures

**Identifiers**—\*Peabody Picture Vocabulary Test, PPVT

This paper reports two studies which compared scores obtained on the Slosson Intelligence Test (SIT) and Peabody Picture Vocabulary Test (PPVT) and investigated the hypothesis that the representational level of the stimulus items in the PPVT is inappropriate for preschool children regardless of socioeconomic background. In the first study, the PPVT and SIT were administered individually to a total of 18 Head Start (HS) children of median age 5 years 2 months. In the second study 18 HS and 18 middle income (MI) 4- and 5-year-old children were asked to label stimuli shown in three representational forms: objects, colored pictures and black and white line drawings. Both MI and HS children labeled the objects more successfully than the pictures, but this discrepancy was greater for the HS children. It was confirmed that the HS children obtained lower scores on the PPVT than on the SIT, and it is suggested that this may be due to the highly representational stimuli of the PPVT. A training effect was found in both the HS and MI groups; performance was enhanced by the presentation of objects before pictures. The possibility of cultural

bias in preschool screening tests is discussed and it is suggested that such bias may be reduced by: (1) using concrete objects in preschool stimulus labeling tasks, (2) ordering stimulus presentation from concrete to highly representational forms, and (3) considering the appropriateness of the SIT compared with the PPVT. **Descriptors**—\*Child Development, Cognitive Development, Curriculum Planning, Educational Philosophy, \*Effective Teaching, \*Elementary Education, Social Class, \*Teacher Characteristics, \*Teacher Education, Teaching Methods, Teaching Styles

**Identifiers**—\*Texas Teacher Effectiveness Study

This paper presents some of the major findings of the Texas Teacher Effectiveness Study, an investigation of the teacher characteristics that correlate with ability to produce student learning gain. In addition to general information about the study and its findings, specific attention is drawn to contrasts between optimal behavior in low SES and high SES schools, and contrasts between findings expected on the basis of previous theory and research and findings which failed to confirm expectations or even contradicted them. Analysis of these two sets of contrasts suggests an interpretation based upon considerations drawn from developmental psychology (particularly the distinction between Piaget's preoperational stage versus his concrete operational stage) and from an analysis of differences between the teaching-learning situation in grades 1-3 versus the teaching-learning situation in later grades. The data and these interpretations suggest several implications for how the act of teaching should be conceptualized and how future teachers should be educated. Some of these implications conflict with popular theories and beliefs concerning the nature of effective teaching, the structure of teacher education programs, and the implications of research on cognitive development for curriculum and methods in the early elementary grades. **Descriptors**—Ability Identification, \*Bias, \*Elementary Education, \*Expectation, Grade 3, Situational Tests, \*Student Ability, \*Student Evaluation, Task Performance

**Identifiers**—\*Expectation States Theory

This study examined the effects of varying degrees of situational definition on expectation states of third graders. The experiment was conducted in the spring and replicated in the fall. A total of 389 children in 12 third grade classrooms participated. The experimental conditions reflected three degrees of situational definition. In the assignment condition, subjects were told that another child had high or low ability at a certain task and that this ability was relevant to the task at hand; then expectations for the task at hand were assigned to the other child. In the relevance condition, subjects were told that the other child had high or low ability at another task and that this ability was relevant to the task at hand, but no assignment of expectations to the other child was made. In the activation condition, subjects were told only the other's ability at another task. Each child was then asked to rate 10 sentences in which some words had been sup-

plied by the other (fictitious) student. The results indicated that in both experiments, subjects in the activation and assignment conditions reflected about equal expectation effects in their ratings, while those in the relevance condition showed a smaller expectation effect. It was provisionally concluded that the data support the equality assertion of the expectation states theory. (JMB)

Identifiers—Appalachia, \*Clinch Powell Educational Cooperative, Elementary Secondary Education Act Title III, ESEA Title III

This report presents program evaluation results for three years of operation of the Clinch-Powell Educational Cooperative Early Childhood Education Program, a home-based, parent oriented program which serves four rural Appalachian counties and includes the use of home visits, mobile classrooms, and a TV program accompanied by a Parent Guide. Descriptions of the program's objectives, components, staff training, target population and comparison group are given. Results of the annual evaluations of the project have indicated that the program has had a measurable effect on children's cognitive and social abilities. Children who participated in the program have scored significantly higher on the Metropolitan Readiness Test and the Peabody Picture Vocabulary Test than children who had not been in a preschool program. Children who had been in the program for two years scored significantly higher on both tests than children who had been in the program only one year. Parents, home visitors and teachers rated children's social behavior and, for nearly all items, posttest scores were significantly more positive than pretest scores. Parents' evaluations of the program for three years have been consistently very positive. (Author/ED)

Identifiers—\*Project Head Start

This introduction to the Early Childhood Education (ECE) profession briefly explains the term 'Early Childhood Education.' gives a short historical portrait of kindergartens, nursery schools and child care centers, and describes major issues in ECE under the following headings: Social Forces Shaping Early Childhood, The Status of Kindergartens, The Status of Nursery Schools, Problems at the Nursery School Level, The Status of Head Start, Head Start's Problems, The Sparks From a Program (Head Start), The Status of Child Care Centers, New Steps in Child Care, Summing Up, and The satisfactions (of the profession). The view is expressed that ECE is a booming field, that there is growing awareness of the importance of infancy and toddlerhood, a growing determination to link

programs for children under 6 and over 6, and increased efforts to end the separation between home and school. The main problems and recommendations stressed are (1) the lack of quality programs, (2) the large size of kindergarten classes, (3) the difficulty of handling two half-day kindergarten shifts each day, (4) the break between kindergarten and first grade, (5) the undesirable use of first grade methods in kindergarten and preschool programs, (6) the need for better parent and citizen understanding, (7) the need for more creative and efficient evaluation of ECE programs and services, (8) the need for more men teachers, (9) the poor quality of television programming, and (10) the problem of caring for children under 3 whose parents cannot provide full time care. Descriptors—\*Child Development, \*Child Rearing, Creative Activities, Cultural Opportunities, Divorce, Learning Activities, \*Mothers, \*Parent Education, \*Preschool Education, Recreational Activities, Safety, Sex Education, Social Development, Socialization

This book is a compilation of practical suggestions for mothers on caring for children from birth through age 6. Everyday problems are discussed in an easy-to-read anecdotal style. The first section of the book deals with family life, including discussions of birth, breast feeding, basic child care (e.g., how to diaper a squirming baby), babysitters, nutrition, child safety, games, discipline, manners, toilet-training, travel, the arrival of a second baby, divorce, optimum physical and cultural environments for children. Family outings, pets, assigned chores, books, theater, and music are all emphasized as important to an enriching environment. In the final section, arts and crafts activities are adapted for children. Science, cooking, gardening, drama, and woodworking experiments are among those presented in this section. An annotated bibliography covering subjects presented in the book is provided. (BRT)

Descriptors—\*Attitude Tests, \*Child Advocacy, Child Care, \*Child Welfare, Economic Opportunities, Educational Needs, \*Elementary Secondary Education, Health Needs, Item Analysis, Legal Problems, \*Preschool Education, Safety, Typology

Identifiers—\*Childrens Rights, Childrens Rights Attitude Scale

This paper discusses the issue of children's rights and describes a study in which a 300-item attitude scale was constructed and administered to several groups of adult subjects. Major content areas, dealing with the rights of children aged 10-14 included: health, safety/care, education and information, economics, and legal, judicial, and political issues. Items conceptualized children's rights as oriented towards nurturance (i.e., the provision, by society, of supposedly beneficial objects, environments, experiences, etc., for the child) or oriented towards self-determination (i.e., stress on allowing the child to exercise control over his or her environment.) Two types of analyses were performed on the responses of the 381 subjects: (1) analysis by item subjects' attitudes regarding nurturance, self-determination, and specific issues of children's rights are sometimes independent of each other. Appendices (approximately one-third of the document) present (1) several statements of children's rights as developed by advocacy groups and others, and (2) the complete 300-item version of the Children's Rights Attitude Scale. **Coaching Children in Social Skills for Friendship-making.**

Spons Agency—National Inst. of Child Health and Human Development (NIH), Bethesda, Md.

Report No—NICHD-HD-07303

Pub Date Apr 75

Note—26p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975); Occasional light print

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Childhood Friendship, \*Elementary Education, Group Status, \*Interpersonal Competence, Peer Acceptance, \*Peer Relationship, \*Play, Sociometric Techniques, Training Techniques

In this study, each of 33 middle class children from grades 3 and 4 was administered one of three experimental conditions designed to test in what ways coaching in social play skills improves the sociometric status of the children with their peers. The subjects were selected because of their low ratings on sociometric questionnaires. Condition 1 consisted of instruction, play with a highly rated same-sex peer and review of the play experience with the coach; Condition 2 consisted of similar peer pairing and play without coaching; and Condition 3 consisted of being paired with a highly rated peer but playing games separately to control for possible prestige effects. During play sessions observations were made of frequency of the positive social behaviors being coached, and following coaching the sociometric questionnaires were again administered as a post-test. Results indicate that children who were coached received higher play ratings than children in the other two conditions, but that coaching for play situations did not result in generalization to the work situation. Gain in peer acceptance for play was not accompanied by gain in number of friends. It is suggested that work ratings and friendships depend on social skills not included in the present coaching. The important aspects of coaching for gains on sociometric measures in the play situation are discussed. (GO)

**Mother - Infant Interaction Patterns as a Function of Rearing Conditions.**

Pub Date Apr 75

Note—21p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975); Four tables are marginally legible

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Attachment Behavior, Comparative Analysis, \*Day Care Programs, Disadvantaged Environment, Home Visits, Infant Behavior, \*Infants, Interaction Process Analysis, \*Mothers, \*Parent Child Relationship, Social Behavior

Identifiers—\*Mother Infant Dyad

This study examined the effect of a day care program on mother-child interaction patterns and attachment behaviors, and compared these patterns of behavior with those obtained from a matched sample of more advantaged home-reared infants. Subjects were 60 infants, ranging in age from 3 1/2 to 9 1/2 months, and their mothers. There were three groups of mother-infant dyads: (1) the high-risk experimental group (HRE), comprising 15 high-risk infants who had attended a day care facility for 8 hours per day since they were approximately 2 months of age, and their mothers; (2) the high-risk control group (HRC), comprising 15 high-risk infants and their mothers living together at home; and (3) 30 dyads selected at random from birth records for the local community. Data were collected by home observation and by interaction process analysis of 25-minute videotapes of mother-child interaction in a home-like laboratory setting. Results indicated that infants in the HRE group vocalized more and were generally more responsive than infants in the HRC group; these findings reflected basic differences in the infants rather than in the mothers, who differed only on measures of maternal concern for optimal child development. The HRE infants and their mothers were found to have a similar social relationship to that between infants and mothers in the general population group, suggesting that intervention has a positive

effect on mother-child interaction in disadvantaged families. (GO)

**The Red Hook Family Day Care Training Program.**

Pub Date 75

Note—19p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Day Care Services, \*Early Childhood Education, \*Educational Programs, \*Education Service Centers, \*Family Day Care, Home Visits, One Parent Family, \*Parent Education, Poverty Programs

**Identifiers**—ACD, \*Agency for Child Development

This paper describes the Family Day Care Program, a publicly funded service with 1,800 providers serving 8,000 children in the five boroughs of New York City. The children, ranging in age from 2 months to 12 years, are cared for from 8 a.m. to 6 p.m. In each of the private licensed homes are a maximum of 6 children including those of the provider. Approximately 70 percent of the children enrolled are from single parent homes and most come from poverty level homes. The major sections of the paper cover the training and support services offered by the Red Hook training center for day care providers and parents, with anecdotal reports on the success of each program. Each provider receives (1) a comprehensive 4-week training course given at the center, and (2) follow-up supportive counseling, information and educational materials from Red Hook educational aides on biweekly visits. Workshops are given at the center for mothers of children receiving care. A bilingual/bicultural program has been designed to cater to the predominantly Spanish-speaking population, and course credits towards the Bachelor of Professional Studies are available to highly motivated providers. A licensed early childhood education teacher is hired for every 40 to 50 family day care homes. (GO)

**Children's Responses to Color as a Determinant of Race Attitudes.**

Pub Date Aug 75

Note—15p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 3, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Dimensional Preference, \*Early Childhood Education, \*Early Experience, Negative Attitudes, Negro Stereotypes, \*Racial Discrimination, \*Stimulus Generalization, Theories

**Identifiers**—\*Social Learning

This theoretical paper is concerned with the evaluation and preference responses of preschool children to light- and dark-skinned human figures. The paper examines the hypothesis that in children the frequently observed bias favoring light-skinned persons over dark-skinned persons is not a racial bias but is related to early learning experiences such as the aversive experience of hours of darkness which becomes associated with negative affect. The major sections of the paper include: (1) a review of the well-known molar phenomena regarding racial attitudes and preferences and the customary explanations of these based on social learning experiences involving cultural norms, (2) a summary of some recent research findings which challenge the adequacy of an exclusive dependence upon social-cultural learning theories, (3) the proposal of a revised theoretical interpretation which takes into account the early learning experiences of the child and his subsequent contact with social norms, and (4) a brief consideration of some practical implications which stem from the revised theory (e.g., that pro-light/anti-dark bias in younger preschool children is not bona fide racial bias and is modifiable under appropriate learning conditions, and that generalization of bias to racial contexts could be prevented by abandoning the color coding practice of designating Afro Americans "black" and Euro Americans "white"). **The Representation of Social Dominance in Children's Drawings.**

Pub Date Sep 75

Note—21p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 3, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Art Expression, \*Elementary Education, \*Graphic Arts, Group Structure, Interpersonal Relationship, \*Peer Relationship, Reliability, \*Social Behavior, Social Status, Test Interpretation

**Identifiers**—Childrens Drawings, \*Social Dominance

This study investigated whether dominance relations observed during free-play are apparent in children's drawings of themselves with another classmate. A total of 16 hours of observational data were collected from 37 children, 9 to 11 years of age, during 40-minute free-play periods in their school setting. Dominance assessments were based upon repeated daily recordings of agonistic interactions. Following 5 weeks of observation, all of the children were asked to draw a picture of themselves and a friend. The drawings of 18 children (who each drew someone within their social group) were analyzed initially by two judges for detail of each figure. Each drawing was also scored for closest distance between figures, farthest distance between figures, figure orientation, relative height of figures, and relative percent of page occupied by each figure. Subsequently, eight different judges independently rated the set of 18 drawings on maturity of style, friendliness, amount of interaction, hostility, and social dominance. Results provide evidence that: (1) adult judges do perceive social dominance differences of children's drawings of themselves and a classmate; (2) inter-judge assessments are reliable; and (3) judgments are correct with respect to observed dominance differences. **Learning to Control Environmental Stimulation in Infancy.**

Pub Date Apr 75

Note—25p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—Attention, Attention Control, \*Contingency Management, \*Infant Behavior, \*Infants, \*Learning Processes, Operant Conditioning, \*Stimulus Behavior, Transfer of Training, Video Tape Recordings

This study investigated the effects of prior experience with contingent or noncontingent stimulation of infants' ability to learn different responses to control perceptual stimulation. In the pretest phase, baseline rates of level movement, panel press and vocal responding were determined for each of the twelve, 6-month-old infants in the study. During treatment sessions, subjects assigned to the contingent stimulation group controlled presentation of auditory-visual stimulation by manipulating a level. An equal number of subjects assigned to the noncontingent stimulation group received the same stimulation noncontingently. In the posttest phase, all subjects were observed in separate tests of (1) learning to panel press, and (2) learning to vocalize to control perceptual stimulus presentation. Results indicate that the long-term effect of prior contingent stimulation is to enhance responding to control environmental stimulation. In contrast, prior experience with noncontingent stimulation interferes with learning to control environmental stimulation. Analyses of attentional behaviors were used to suggest the processes by which previous experience with contingent and noncontingent stimulation influenced subsequent learning to control stimulation. **Changing the Others-Concept in Elementary School Children.**

Pub Date Aug 75

Note—9p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, Aug. 30-Sept. 3, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Elementary Education, \*Measurement Instruments, \*Program Evaluation, Race Relations, Racial Differences, Testing Problems, Test Results, \*Tests, \*Test Validity

**Identifiers**—\*Others Concept

This paper briefly describes three studies in which the Paired Hands Test was used to assess the other-concept as a means of evaluating project or program objectives. The first study involved the use of the Paired Hands Test to evaluate an Afro-American Curriculum Project in which teachers received training in the development of a curriculum intervention project in their classrooms. In the second study, the instrument was used in the evaluation of an Outdoor Education Project where biracial teams worked together to solve a variety of science and mathematical problems set in an outdoor environment. In the third study, descriptive data was collected which reflect the characteristics of distributions of scores obtained by pupils at the fifth and sixth grade levels in one school in which the pupils were predominantly white, and in another school in which the pupils were predominantly black. Implications from the results of these studies are briefly discussed. (JMB)

**Descriptors**—Aphasia, Cerebral Dominance, Cognitive Ability, \*Cognitive Processes, Haptic Perception, Lateral Dominance, \*Nature Nurture Controversy, \*Neurological Organization, \*Physiology, \*Theories

**Identifiers**—\*Cerebral Specialization

This paper presents background information and brief abstracts of research papers from a symposium on the functional specialization of cerebral hemispheres in infants and children. According to one view of the development of cerebral specialization, the two hemispheres are initially unspecialized, assuming their respective

functions only with time and experience. The opposing view is that hemispheric specialization is a product of genetic endowment present, in some form, from the beginning of life. The five research papers summarized included some concrete evidence related to these views: (1) a study of hemispheric specialization for both speech and nonspeech sounds in infants; (2) a study of the relationship between the size of cerebral injury and the pattern of cognitive skills in adult patients who sustained brain injury during infancy; (3) an examination of hemispheric specialization for language in preschool and primary-grade children; (4) a study of hand specialization for shape discrimination in 3- to 13-year olds using the dichotic listening procedure for the haptic system; and (5) a discussion of the interaction of experiential and genetic factors in the patterning of cognitive abilities in normal individuals. **Early Childhood Separation Anxiety and Patterns of Social Behavior.**

Pub Date Aug 75

Note—10p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 3, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Attachment Behavior, Developmental Psychology, \*Emotional Response, \*Interpersonal Relationship, Parent Child Relationship, \*Peer Relationship, \*Preschool Education, Psychologists, Social Psychology

**Identifiers**—\*Separation Anxiety

This study was designed to determine whether separation anxiety proneness in normal preschoolers is associated with distinctive ways of relating to other people. A total of 14 preschool children (6 girls and 8 boys) were rated for separation anxiety proneness by their parents prior to preschool entrance. The preschool teaching staff then rated them for entrance distress each day of the first two weeks of preschool attendance. A clinical psychologist made almost daily observations in the nursery school throughout the school year; in addition, periodic observations, parental interviews, and developmental assessments were made by a child study group composed of another clinical psychologist, a developmental psychologist, and several graduate students. At the end of the year, the clinical psychologist who served as regular observer prepared summaries on each child based on the group's consensus from individual findings. The material from these case summaries was analyzed using a clinical judgmental process. The findings indicated that children who are prone to high separation anxiety have more limited repertoires for peer interaction than other children do, and that their relationships with both peers and adults are dependent ones. It was concluded that

separation anxiety in early childhood has important implications for psychosocial development. (JMB)

**The Professional's Role and Perspectives on Child Abuse.**

Pub Date 75

Note—13p.; Filmed from best available copy; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, Aug. 30-Sept. 3, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Behavior Problems, \*Child Abuse, \*Child Advocacy, Court Role, Discipline Policy, \*Elementary Secondary Education, Foster Homes, Legislation, Parent Child Relationship, Parent Role, Regular Class Placement, \*Student Rights, Suspension, Teacher Role  
**Identifiers**—\*Childrens Rights

This paper explores some of the ways in which professionals inadvertently or deliberately abuse children and perpetuate child abuse: (1) harassment and rejection of children by school personnel, leading to truancy or dropping out; (2) treatment of psychological disturbances which do not warrant outside help; (3) the pressures from teachers, parents, or psychologists obsessed by marks or by IQ scores and achievement tests; (4) continued use of various forms of discipline; (5) the deleterious consequences of labelling children in special education; (6) the harmful consequences of extreme forms of children's rights legislation; and (7) court punishment of abused children by removing them from their homes without considering the child's feelings or the adequacy of the foster homes in which they are placed. It is argued that children have the moral and legal right to be considered persons. (ED)

This booklet reports on the 1975 National Conference on Parent/Early Childhood Education (P/ECE) which addressed the question of parents' influence on the cognitive and social-emotional development of their children during the preschool years, focusing particularly on ways that the importance of learning in the home can be stressed to parents and effectively translated into practice. The report is presented under three main headings: (1) The State Of The Art (What Is) which deals with organization of administrative agencies and features of existing programs in P/ECE; (2) Reassessing Our Educational Priorities (Need), which covers research findings on needs for P/ECE, organization and administration needed, and teaching/learning content and processes needed; and (3) Recommendations of the Commissioner (What Should Be), which specifies recommendations for action in five areas. Appendices include summaries of six addresses on the topic: Reassessing Our Educational Priorities, The State's Responsibility, Whose Ball Park?, The Politics of Children, The California Picture, and Charge for the Future. Other appendices are a list of conference officials, the workshop schedule and conference schedule (including program participants), and the Women's Caucus Report. (GO)

This report reviews the legislative progress through December 31, 1971 of the rural development bills introduced in the U.S. Senate and House during the first session of the 92d Congress. For purposes of organization, this report presents 15 major rural development categories and limits this review to those bills and bill categories directed at economic, social, and cultural rural development. Each bill presented is identified in terms of its number, its author, its major provisions, and one of the following categories: (1) Revenue Sharing Bills; (2) Reorganization Bills; (3) Development Bank Bills; (4) Bills to Amend the Consolidated Farmers Home Administration Act; (5) Rural Industrial Incentive Bills; (6) National Policy; (7) Housing Bills; (8) Water and Waste Disposal Systems; (9) Rural Development and Population Dispersion Act of 1971; (10) Small Community Development; (11) National Rural Development Center; (12) Rural Telephone Bank; (13) Medical Care Bills; (14) Fire Prevention Bills; (15) Appalachia. A complete list of the proposed rural development legislation introduced during the 92d Congress is presented in the appendices. (JC)

Identifiers—\*California

Covering January through December 1972, this report presents tabular data on the migrant families occupying California's 25 migrant family housing centers. Tabular data, given by center, pertain to: (1) migrant housing center occupancy; (2) family size by center and by annual income; (3) age of family members; (4) age of male and female family members; (5) annual income; (6) school years completed by persons 18 years and over; (7) ethnic background; (8) number of families by length of stay, total days, and average stay; and (9) family home base. Data indicate that (1) between January and December 1972, 2,873 families occupied the migrant housing centers; (2) the mean number of children per family was 2.3 while the mean number of adults per family was 2.9; (3) the modal family size was 4; (4) the majority of the family members were between 22 and 44 years of age; (5) the majority had completed between 1 and 7 years of school; (6) the majority were of Mexican background; and (7) the majority length of stay was between 121 and 180 days. **Migrant Family Housing Centers. Annual Operational Summary, January-December 1973.**

California State Dept. of Employment Development, Sacramento. Migrant Services Section.  
Pub Date Feb 74

Note—15p.  
**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Academic Achievement, Age, Ethnic Groups, \*Family (Sociological Unit), \*Family Characteristics, Females, Income, Males, \*Migrant Housing, \*Migrant Workers, \*Tables (Data)  
Identifiers—\*California

Covering January through December 1973, this report presents tabular data on the migrant families occupying California's 26 migrant family housing centers. Tabular data, given by center, pertain to: (1) migrant housing center occupancy; (2) family size by center and by annual income; (3) age of family members; (4) age of male and

female family members; (5) annual income; (6) years of school completed by persons 18 years and over; (7) ethnic background; (8) number of families by length of stay, total days, and average stay; and (9) family home base. Data indicate that (1) between January and December 1973, 2,874 families occupied the migrant housing centers; (2) the mean number of children per family was 2.4, while the mean number of adults per family was 2.8; (3) the modal family size was 4; (4) the majority of the family members were between 22 and 44 years of age; (5) the majority had completed between 1 and 7 years of school; (6) the majority were of Mexican background; and (7) the majority stayed between 121 and 180 days. Descriptors—Bilingual Education, \*Early Childhood Education, \*Educational Innovation, Group Instruction, Home Programs, Instructional Materials, Migrant Children, Parent Participation, Parent School Relationship, \*Preschool Education, Program Descriptions, \*Rural Areas, \*Teaching Methods, Toys  
Identifiers—Elementary Secondary Education Act Title I, Elementary Secondary Education Act Title III, ESEA Title I, ESEA Title III

Intended to suggest types of early childhood education programs which may be implemented in rural areas at reasonable cost and which capitalize upon the rural environment's unique characteristics, this booklet describes 12 programs (many of which use Elementary and Secondary Education Title I or III funds) currently operating in rural areas. The practices are divided into 3 general categories, according to primary emphasis: (1) parent involvement in home learning, (2) group teaching practices, and (3) special programs. Relying on active parent involvement in the home, the first category consists of such program areas as early identification of learning disabilities, teaching severely handicapped children, and preparing young children for the classroom setting. Designed to provide young children in rural or migrant areas with group social experiences outside the home, the group teaching practices involve such diverse elements as bilingual educational training, creative toys and games, and a learning center on wheels. The last category includes a program, not yet in operation, which has proved successful in testing stages, and one which lacks a distinctly rural emphasis. However, both offer potentially adaptable models. Each description includes: program title, location, needs, developmental history, implementation considerations, vital statistics, evaluation, and contacts for further information. (NQ)

Descriptors—\*Career Education, Career Exploration, Definitions, \*Educational Needs, Life Style, \*Migrant Children, Migrant Youth, \*Program Development, Vocational Counseling, Vocational Development, \*Work Experience Programs

Of the more than two million seasonal farmworkers in the United States, nearly half are between the ages of 14 and 20 years. Although much has been done recently to meet some of the special needs of these migrant youth, they are still confronted with inadequate educational and training opportunities and limited career aspirations. In the forefront of what has been done is career education, a widely discussed but little understood concept among educators and public alike. By adapting the concepts of career education to the special and unique circumstances of the migrant farmworker, career education can have a positive impact on the educational process of the migrant child. This paper focuses on the philosophical and process assumptions of career education and applies them to the special situation of migrant children. Career education is discussed as a: (1) means of strengthening the relationship between the school and work, (2) means of easing the transition between school and work when the time comes, and (3) vehicle which will give migrant youth the opportunity to choose among alternative social and occupational lifestyles. Identifiers—\*Chicanos

Intended to contribute to the furthering of the development of alternative schools, this book discusses various problems and issues which arise in setting up culture-based, bilingual programs. These include: (1) possible types of alternative efforts at schooling, (2) questions which need to be considered before setting up a curriculum, (3) curriculum development, (4) Chicano language/speech and language planning in the school, (5) school organization, (6) training in the school, (7) financial costs and fund raising, and (8) program evaluation and documentation. The sociopolitical context of Chicanos and schools in the United States is discussed. Also included are: (1) a listing of followup readings, given at the end of each chapter; (2) a 47-item annotated and selected bibliography of materials pertaining to bilingualism and bilingual education, Chicano speech, and Chicano education in general; and (3) a partial directory of Chicano alternative schools and of Chicano Studies Programs. Identifiers—\*Australia (Western Australia), Chidley Centre, Western Australia Correspondence School

Prepared to meet the need for published factual data, this report on correspondence schools in Western Australia is designed to aid the education department in the upgrading and planning of correspondence education for the rurally isolated. Following the pattern of a 1974 questionnaire which sought information from parents (67 percent response) of isolated correspondence stu-

dents, this report presents both tabular and narrative data relative to: (1) Isolated Children: Demography (population distribution, occupational distribution, school year, degree of isolation, residential stability, accommodation); (2) Financial Assistance to Isolated Families (direct financial assistance, indirect financial assistance, taxation and direct financial assistance, parents' view of financial assistance); (3) Learning in Isolation (subjects, learning methods and media, supervision in the home, camp schools); (4) The Western Australian Correspondence School (brief history, administration and staffing, accommodation, school library, course development); (5) Schools of the Air in Western Australia (background, administration and staffing, equipment, accommodation, mode of operation); (6) Projected Plans for the Education of Isolated Children (Chidley Centre—special education facility for isolated children, the Isolated Schools Matriculation Project); (7) Parental Views (responses to the 1974 questionnaire). Descriptors—American Indians, \*Bilingual Education, \*Content Analysis, \*Educational Legislation, Educationally Disadvantaged, Educational Policy, Elementary Secondary Education, Higher Education, \*Management, \*Program Coordination

Identifiers—Education Amendments 1974

Based on an analysis of the Education Amendments of 1974 (P.L. 93-380), this paper provides an overview of the more than 20 different types of bilingual educational activity found in the law and raises some of the issues of management, policy, and coordination. Issues tend to cluster around interface areas in which there is inherent institutional, programmatic, or organizational stress. An analysis of the problem of developing a nationally coordinated bilingual education program suggests 5 potential areas of major stress: (1) the "continuity" issue characterized by stress

between new and existing programs and products; (2) the "communication" issue resulting from expanded internal, as well as, external linkages; (3) the "cooperation" issue arising from new interface areas at the local, state, and national level; (4) the "coordination" issue involving interaction between Federal and non-Federal activity, among funded bilingual centers and clearinghouses, and with related state and local efforts; and (5) the "compliance" issue involving adherence to laws, rules, and regulations. Some unresolved questions regarding further implementation of the law are presented. The appendices include a listing of: (1) legislation amended by P.L. 93-380, (2) new acts or legislation embodied in P. L. 93-380, and (3) implications in bilingual education and for American Indian Education. (Author/NQ)

Descriptors—Attitudes, Caucasians, Comparative Analysis, Demography, \*Employment Opportunities, Employment Patterns, \*Followup Studies, Health, Job Satisfaction, \*Job Training, \*Low Income, Migration, Negroes, Perception, Racial Differences, \*Rural Population, Sex Differences, Transportation

Identifiers—\*Arkansas (East Central), Economic Opportunity Act Title III B

From 1967 to 1971, a total of 742 low income, rural people in east central Arkansas were trained with funds provided by the Economic Opportunity Act (Title III-B). A total of 133 of these people were interviewed and divided into the following subgroups for purposes of comparison: (1) 74 respondents (46 blacks and 28 whites) who had been and remained employed following the III-B training; (2) 29 respondents (20 blacks and 9 whites) employed following III-B training but unemployed at the time of the study; and (3) 30 respondents (28 blacks and 2 whites) who had never been employed following the III-B training. The interviews were designed to solicit information relative to: (1) demographic characteristics; (2) employment history; (3) job attitudes; (4) perceptions; (5) transportation; (6) support for employment; (7) internal-external control; (8) health factors; (9) migration; and (10) Herzberg's job satisfier and dissatisfier factors. Among the first two groups, the main roadblocks to jobs during 1971 were "could not find suitable work" and "laid off from work." Reasons cited for leaving their first job after III-B training also centered on being laid off (32 percent) but included transportation problems (15 percent). Among the third group (predominantly black, unmarried, separated, or divorced females with children) major reasons cited for unemployment were inability to find suitable work (70 percent) and ill health (13 percent). **A Needed Research Orientation for Rural Sociologists in the South.**

Pub Date Sep 75

Note—14p.; A report of the Southern Rural Sociology Research Committee, Subcommittee on Research Priorities presented at the Annual Meeting of the Rural Sociology Section, Southern Association of Agricultural Scientists (Mobile, Alabama, February 1-4, 1976)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Costs, Methods, \*Research Criteria, Research Tools, \*Rural Areas, \*Social Change, Social Organizations, \*Sociology, \*Southern States, Theories

Rural sociology research in the South needs to confront the question of research priorities in order to more effectively meet the needs of its various clients and publics. Review of current priorities in rural sociology reveals emphasis on research activities ordered as follows: (1) Rural Development; (2) Population Distribution; (3) Social Inequality and Disadvantaged Groups; (4)

Environment and Natural Resources; (5) Agricultural Industry; and (6) Nonmetropolitan Communities. Since rural sociology is an applied field, research originates in the social problems confronted by policy makers and practitioners. Therefore, establishing criteria and procedures for setting priorities is more important than listing specific priorities. An adequate basis for determining research priorities must be grounded in the practice of rural sociology to provide continuity and focus, but not to the exclusion of future-oriented theory and methodology. The theoretical orientation of social change as applied to social organization has been largely overlooked. In order to employ the organizational orientation there must be a change in methodological emphasis to include the use of a more diverse assortment of research tools. Since the cost for such an orientation would be high, a capacity for initiating and continuing communication with potential clients must be built into the research activities. (JC)

**Descriptors**—Advisory Committees, \*American Indians, \*Civil Rights, Economic Development, Education, Evaluation, Federal State Relationship, Foster Children, Health, Law Enforcement, \*Nonreservation American Indians, \*Social Services, \*State Federal Aid, Welfare  
**Identifiers**—Maine, \*Maine Advisory Committee Civil Rights Commission, Maliseets, Micmacs, Passamaquoddy, Penobscots

Pursuant to its responsibilities to advise the Commission on Civil Rights, the Maine Advisory Committee's hearings, investigations, and recommendations relative to Federal and State services for American Indians in Maine are detailed in this report. Dealing first with policy and law as manifest in: (1) Self-Determination; (2) Federal Indian Services; (3) State Policy and State Services; (4) Conflict in the State of Maine, This report also presents the committee's recommendations for the following: (1) Economic and Community Development; (2) Housing; (3) Health; (4) Education; (5) Welfare; (6) Foster Care; and (7) Law Enforcement and Public Safety. Major conclusions cited in this report are: (1) Maine Indians are being denied services provided other Native Americans by Federal agencies which is not only discriminatory but is also placing a disproportionate tax burden on Maine taxpayers. (2) Half the Indians in Maine are not receiving State Indian services because they live off-reservation. (3) The State should develop an integrated service program to serve all Maine Indians (Maliseets, Passamaquoddy, Penobscots, and Micmacs) regardless of their residency. (4) Current socioeconomic statistics reveal longstanding discriminatory practices (45 percent substandard housing, 65 percent unemployment, severe health problems, nonexistent bicultural education, and 4 out of 136 Indian foster children in Indian foster homes). **Identifiers**—\*United States (Southwest)

A 2-year study of minority group barriers to allied health careers in the Southwest was conducted to identify those barriers experienced by minority groups in entering and completing a postsecondary educational program in allied health. Data were obtained through: (1) 7 one-day conferences convening students, dropouts, nonstudents, staff, faculty, and administrators held in Arizona, California, Colorado, New Mexico, Oklahoma, and Texas; and (2) an examination of demographic and health manpower data. Conference participants ranked, by priority, the barriers according to their importance to each minority group (Spanish Americans, American Indians, and Black Americans). Findings were presented by categories of barriers and the stages in the process of acquiring professional status (application, matriculation, and completion). This final report presents: (1) an overview of the study, (2) brief descriptions of each phase of the study, (3) a summary of each conference, (4) a summary of the barriers and priority rankings for each geographic area, (5) a synopsis of the barriers and recommendations, (6) a statement of conclusions based on the study's findings as compared with the findings of other investigations regarding minority allied health professionals and students in the Southwest. (NQ)

**Identifiers**—Ohio, Wisconsin

Compiled for use by agencies working with migrant and seasonal farmworkers, this directory lists programs and services available to these farmworkers during their stay in Ohio and Wisconsin. Data were obtained from Federal, State, and local agencies in each State. Special emphasis was placed on information and data current as of summer 1973. Information given for each county in the State pertains to: (1) programs, (2) agencies which may assist migrants, (3) crops and work periods, (4) migrant population and wages, and (5) labor camps. Programs listed provide educational, health, legal, and job placement services to migrant workers. Some of the listings of organizations, programs, or agencies may contain some obsolete information due to their instability; being subject to change as new needs, priorities, and objectives appear, or as operating funds expire. A synopsis of Ohio and Federal laws relevant to migrant and seasonal farmworkers is included. An annotated bibliography of National Migrant Information Clearinghouse publications is appended. (NQ)

**Descriptors**—Administrator Attitudes, American Indians, Annotated Bibliographies, \*Career Education, \*Educational Assessment, Educational Problems, \*Health Occupations, Literature Reviews, \*Minority Groups, Negroes, \*Post Secondary Education, Spanish Americans, Student Attitudes  
**Identifiers**—\*United States (Northeast)

The study identified the barriers which prevent application, matriculation, and/or completion of allied health postsecondary education programs by blacks, Spanish-surnamed Americans, and Native Americans and recommended means of reducing or eliminating the barriers. Only those barriers which could be resolved or reduced through programs of public information, outreach, and training were identified. The study was limited to the Northeastern states of Maine, Rhode Island, Vermont, New Hampshire, Massachusetts, Connecticut, and New York. Focus group sessions were conducted with 6 groups of students presently enrolled in programs of allied health, 6 groups of faculty, staff, and administrators of postsecondary allied health programs, and 1 group of minority professionals working in allied health. The discussions were analyzed in 2 ways: (1) objective analysis of barriers as stated in discussion and (2) content analysis of underlying thoughts and feelings. Findings indicated that: (1) most minority students did not include the allied health fields in their career selection process because they had no knowledge or inadequate knowledge of the career opportunities available; and (2) those who did enter postsecondary programs found the academic work difficult, sensed a feeling of social isolation, and seemed unable to find or get the supportive services needed to successfully deal with their environment. **Descriptors**—Academic Achievement, American Indians, Asian Americans, Comparative Analysis, \*Employment Statistics, \*Equal Opportunities (Jobs), \*Ethnic Groups, \*Labor Market, Negroes, Occupational Mobility, Qualifications, Socioeconomic Status, \*Spanish Culture, Unemployment, Urban Areas, Wages

Inequalities among minorities in the labor market were examined. Minorities were classified according to persons of Spanish descent (Mexicans, Puerto Ricans, and Cubans), Blacks, American Indians, Japanese, Chinese, and Filipinos. All persons 20 to 64 years of age, not enrolled in school and not living in group quarters, who were residents in 1970 were included. Detailed information was provided via the tabulations for regions and metropolitan areas. Emphasis was placed on labor force participation, employment, occupational achievement, mobility, weeks worked, and earnings. Brief profiles of each minority summarized their achievements. Data were obtained from the United States census' Public Use Sample files for 1970. Comparisons indicated that: (1) levels of employment, occupational achievement, and earnings differed by location, but that the overall rankings of minorities were not modified within areas; (2) participation and achievement levels tended to be highest in areas where a minority was most numerous, except for Cubans in Miami; and (3) achievements of minorities in the labor market were more dependent on their minority characteristics and such determinants as their educational attainment than on their regional or metropolitan location. **Descriptors**—\*Agricultural Production, \*Change Agents, Comparative Analysis, Exports, \*Factors (of Society), Income, Landlords, \*Land

Use, Livestock, Natural Resources, \*Rural Areas, Rural Farm Residents, Surveys, Tables (Data), Water Resources  
 Identifiers—\*Monongahela River Basin, West Virginia (North Central)

In order to determine rural land use in the Monongahela River Basin, 11,528 landowners, controlling 40 percent of 10 contiguous counties in north-central West Virginia and constituting 19 percent of the rural population, were surveyed. Data derived from 892 questionnaire responses were analyzed in terms of past, present, and future land use; land valuation; market trends; tenure; and prospects for potential conflicts among competing rural land uses. Specifically, data encompassed: (1) population statistics, 1950, 1960, 1970; (2) export industries; (3) rural land use in 1972 (acreage distribution, land values, mineral resources, idle farmland, farm income, agricultural crops, crop acreages, livestock income); (4) changes in land use, 1962-72; (5) anticipated land use changes, 1982; (6) land use problems (farm operation, water sources, and disturbed lands). Results indicated rural landowners: (1) owned less than 100 acres; (2) large tracts were few, averaging 177.9 acres; (3) beef cattle sales comprised the major source of farm income, but most owners earned greater incomes off the farm; (4) large owners of timber and mineral rights were notably absent from the survey population; (5) 50 percent of those surveyed had coal reserves, 80 percent had coal rights, and 13 percent indicated willingness to sell; (6) farmland will decrease and farms will increase in size; (7) livestock production will be the major determinant of the surveyed land. Descriptors—Achievement Tests, \*Diagnostic Tests, Elementary School Mathematics, \*Elementary School Students, \*Grouping (Instructional Purposes), \*Language Fluency, Language Tests, Manuals, \*Migrant Child Education, Reading Diagnosis, Reading Level, Test Reliability, Test Validity  
 Identifiers—\*Zip Test

Purpose of the Zip Test is to locate the instructional level at which a child can effectively use a mathematics book and a reader and to indicate his ability to conceptualize verbally in English. Designed to determine quickly and with reasonable accuracy the grade placement of a migrant child in reading and math and to assess his English language facility, the test facilitates the migrant child's rapid placement into a productive learning situation upon his arrival at school and eliminates vital periods of "sterile exposure" to learning situations in which he cannot respond. The test is divided into 3 sections: Language Facility, Reading, and Math. This examiner's manual presents the directions for administering each section of the Zip Test. Most of the directions are in English and Spanish. Zip Tips are given to indicate timesaving shortcuts and helpful hints. The manual also includes directions for: (1) administering math worksheets, (2) scoring the test, and (3) transferring scores from a tab sheet to a locator form. The assessment of the reliability and validity of the Math and Reading sections is discussed. (NQ)

Balliet, Lee Spangler

**Anglo Poverty in the Rural South.**

Pub Date May 74

Note—360p.; Ph.D. Dissertation, University of Texas at Austin

Available from—Inter-Library Loan, West Virginia University, Morgantown, West Virginia 26506

Document Not Available from EDRS

Descriptors—Agriculture, \*Anglo Americans, Doctoral Theses, \*Economically Disadvantaged, Historical Reviews, Industrialization, Minority Groups, Political Socialization, Racial Differences, Religion, \*Rural Population, Slavery, Social Characteristics, \*Social Influences, Social Structure, \*Southern States  
 Identifiers—\*Social Institutions

Seeking to trace both the nature and the extent of ceremonial (regressive) resistance to the progressive forces of technology and industrialization, the origins and consequences of economic, political, and social institutions in the Southern United States were investigated. Data were derived from the following sources: (1) Southern regional studies from various academic disciplines; (2) U.S. census figures on the socioeconomic characteristics of the poor by race and residence for the U.S., South, and non-South; (3) over 100 interviews with a cross section of Southerners regarding the present status of the rural poor. The following predominantly Southern institutions were analyzed in terms of their effect on common Southerners of all racial backgrounds: (1) slavery and plantation agriculture; (2) one-party system, poll tax, and county seat government; and (3) racial superiority, womanhood, agrarian romanticism, fundamentalist religion, and individualism. Emphasizing the case of the Anglo, the current state of technological industrialization was examined in view of efforts to overcome traditional barriers to economic and human resource development. It was concluded that the prevaience of Southern rural poverty among both Anglos and minorities was causally related to institutional rigidity and conflict arising from the region's specialized agricultural and industrial development. **What Happened to the "Public" in Public Television? A Study of Public Television and Popular Participation in Cattaraugus County, New York.**

Pub Date Aug 74

Note—354p.; Ph.D. Dissertation, Cornell University

Available from—Inter-Library Loan, West Virginia University, Morgantown, West Virginia 26506

Document Not Available from EDRS

Descriptors—Citizen Participation, \*Community Involvement, Doctoral Theses, \*Educational Television, Financial Support, \*Low Income Groups, Organizations (Groups), \*Public Television, Rural Areas, \*Rural Population

Identifiers—\*New York (Cattaraugus County)

Focusing on introducing a participatory public television system which would actively serve the specific needs and interests of the community by directly involving the citizens in the station's decision-making process, the experiment examined the relationship of Cattaraugus County, a rural depressed county, to the new public television station introduced specifically to serve the area. Begun when the Board of Cooperative Educational Services (BOCES) and Cattaraugus Community Action (CCA) responded to a notice that funds were available through a national "Mobilization of Resources Program", the experiment sought to "eliminate the deficiency of knowledge among the low-income and the community-at-large by mobilizing the local resources to make use of a local Educational Television network". This paper outlines the development of the participatory television experiment in Cattaraugus County, examining in particular the efforts to generate local participation during the project's initial phase. The project's origins and assumptions, objectives, and strategies used to involve the communities are discussed. The efforts to generate local involvement are described, with in-depth analysis of the activities in the small towns of Cuba and Springville. An overview and analysis of the findings and their potential application to other such efforts at developing feedback mechanisms for public television are presented. (Author/NQ)

Identifiers—CJIE, Current Index Journals in Education, Research in Education, RIE

A supplement to 5 previous bibliographies, this bibliography provides access to some of the latest resource material, research findings, and/or developments in outdoor education. Part I contains 143 citations and abstracts which appeared in "Resources in Education" (RIE) from the January 1975 issue through the December 1975 issue. Part II includes 61 citations of journal articles which appeared in "Current Index to Journals in Education" (CJIE) from the January 1975 issue through the December 1975 issue. In addition to outdoor education, the citations cover such topics as conservation education, educational programs, emotionally disturbed, environmental education, natural resources, nature centers, learning activities, science education, and urban environment. Types of materials cited include curriculum guides, research reports, resource guides, instructional materials, program descriptions, and teaching guides. A combined RIE and CJIE subject index is provided to assist the user in locating citations pertaining to a given subject area within the realm of outdoor education. Ordering information is included. Descriptors—Art, \*Conservation Education, \*Curriculum Enrichment, \*Educational Philosophy, \*Learning Activities, Learning Laboratories, Natural Resources, Nature Centers, \*Outdoor Education, Periodicals, Resident Camp Programs, Social Studies, Teacher Education, Teaching Techniques, Trails

The New York State Outdoor Education Association is dedicated to: (1) the professional improvement of persons interested and involved in outdoor education, and (2) the development of attitudes, values, and behavior necessary for the wise use of natural resources. Its major goal is the enrichment of educational curriculums through the use of the outdoors as a living and learning laboratory. "The Communicator", the Association's official journal, consists of articles contributed by outstanding authorities in outdoor education. Due to numerous requests for back issues of "The Communicator", this booklet provides 30 articles which appeared in various issues between 1970 and 1975. Addressing the Association's goals, the articles deal with outdoor education philosophy and methodology, ecological classrooms, resident camping experiences, teaching tips, and classroom projects. Among the topics are: outdoor education in the educative process, basic considerations for outdoor education, environmental programs, nature trails, professional preparation in outdoor education, teaching social studies and art outdoors, orienteering, survival, the outdoors as a learning center, ecology, and the environmental crisis. Descriptors—Advisory Committees, Agency Role, Community Leaders, Feasibility Studies, Followup Studies, Information Sources, Measurement Instruments, \*Mental Health Programs, \*Needs Assessment, \*Program Guides, Public Opinion, Questionnaires, \*Rural Population, Social Attitudes, \*Surveys, Teacher Attitudes  
Identifiers—Health Opinion Survey, HOS, \*North Carolina, North Carolina (Franklin County), North Carolina (Vance County), Stars Case Abstract Vignettes

Based on a North Carolina feasibility study (1967-73 in Vance and Franklin Counties) which focused on development of a pattern for providing comprehensive mental health services to rural people, this booklet is the first in a series of nine and deals with methods of gathering preliminary information. Basically, this booklet presents information gathering techniques and applications; reports on findings of the After Survey (completed at project termination); and discusses the following sources of information for detecting community needs: (1) Citizen's Advisory Councils: County Level; (2) Neighborhood Citizens' Advisory Councils; (3) Administrative Contacts: County Level; (4) Administrative Contacts: Agencies; (5) Need Inputs from Special Interest Groups; (6) Visits to Local Decision Makers; and (7) Need Inputs from State and Regional Planning Groups. Specifically, this booklet discusses: (1) the Health Opinion Survey, HOS (a 20-item screening instrument used to assess the prevalence of psychiatric or emotional disorder); (2) HOS findings in a rural population (of significance when related to age, marital status, education, occupation, and income); (3) assessment of mental health attitudes among teachers, community leaders, and the general public (program services, mental illness etiology, hospitals, treatment, psychiatrists, etc.); (4) use of Virginia Star's Case Abstract Vignettes to measure attitudes. Available from—William G. Hollister, M.D., Division of Community Psychiatry of the Department of Psychiatry, University of North Carolina, Chapel Hill, North Carolina 27514 (\$1.50 each; \$9.00 for set of 9 booklets; additional booklets \$1.50)

Document Not Available from EDRS

Descriptors—Agency Role, \*Budgets, Citizen Participation, Community Consultants, Community Leaders, Community Role, Feasibility Studies, \*Low Income Counties, \*Mental Health Programs, Organization, Paraprofessional Personnel, \*Program Guides, Public Opinion, \*Rural Population

Identifiers—\*North Carolina, North Carolina (Franklin County), North Carolina (Vance County)

Based on a North Carolina feasibility study (1967-73) which focused on development of a pattern for providing comprehensive mental health services to rural people, this second program guide deals with organization of a low-income program budget. Presenting the basic assumptions utilized in the development of a low-budget program in Franklin and Vance counties, this booklet describes the use of: (1) Local Control; (2) Part-time Outside Specialists; (3) Local Financial Resources; (4) Indigenous Staff; (5) A Limited Clinical Program; (6) Existing Helping Resources; (7) Equal Clinical and Non-clinical Programs; (8) Citizen Participation to Help Adapt Programs. Supplemental program activities which are also discussed include: (1) developing personal acquaintanceship with key community officials; (2) contacting and staying in touch with the community informal network of influential citizens; (3) establishing agency relationships; (4) avoiding controversial alignments and acting upon reported program failures; (5) using stigma-breaking activities; (6) targeting in on high-risk/low-use groups. A thorough discussion of the use of non-professionals is presented in the final sections on the Lay Coordinator (central figure in the Family Counseling and Education Center) and the Service Guide (a paraprofessional designated to travel the county helping people to get help). Document Not Available from EDRS

Descriptors—Advisory Committees, \*Citizen Participation, Clubs, \*Communication (Thought Transfer), Community Agencies (Public), Community Leaders, County Officials, Feasibility Studies, \*Mental Health Programs, Organizations (Groups), \*Program Guides, \*Rural Population, State Agencies, Volunteers

Identifiers—\*North Carolina, North Carolina (Franklin County), North Carolina (Vance County)

Based on a feasibility study (1967-73) which focused on development of a pattern for providing comprehensive mental health services to rural people, this guide deals with promotion of citizen participation. Describing both program successes and failures, this booklet presents the major communication bridges employed by the mental health programs developed in Vance and Franklin counties. Major components in the citizen participation program are identified as utilization of: (1) neighborhood advisory councils to provide citizen participation in program planning (needs assessment, local solutions, etc.); (2) county-wide advisory councils to promote citizen program monitoring; (3) contacts with the County Commissioners to provide citizen control

of program via placing project monies and project employees under commissioner control; (4) formalized visits and informal contacts with allied human service agencies and professionals to promote key professional citizen involvement; (5) joint project participation with special interest groups to promote program development roles; (6) planned visits to the formal network of community decision makers to promote key citizen involvement; (7) responsive contacts to patients or to citizen groups to promote familiarity; (8) volunteers as participating citizens to serve a variety of functions relative to their interests. Document Not Available from EDRS

Descriptors—Community Coordination, Consultation Programs, Education, Feasibility Studies, Helping Relationship, \*Interagency Cooperation, \*Mental Health Programs, Methods, Paraprofessional Personnel, Physicians, \*Preventive Medicine, \*Program Guides, \*Rural Population, Skill Development, Social Services, Workshops

Identifiers—\*North Carolina, North Carolina (Franklin County), North Carolina (Vance County)

Based on a North Carolina feasibility study (1967-73) which focused on development of a pattern for providing comprehensive mental health services to total people, this guide deals with strengthening and coordinating the existing services. Divided into three sections, this booklet details the successes and failures of program efforts in Vance and Franklin counties. The three-phase effort is identified as follows: (1) Developing the Helping Relationship: Workshop Methods Used to Build Core Helping Skills in Allied Agency Staffs (problems, goals, priorities; forces influencing behavior; self-image; helper's intent; sending and receiving communication; role expectations; helper's counter feelings; verbal recognition; building skills via sociodrama; defining issues; formulating choices; linking choices to motivation; verbalizing problems; face saving; and facing self); (2) Consultation, education, and Prevention Programming: The Concept of Effective Parsimony (conserving time, energy, and personnel via use of time trials, crisis support and brief counseling, agency coordination, inexpensive contact personnel, and a Lay Coordinator); (3) Strengthening the Mental Health Roles of the Existing Groups (General Practitioners; Public Health; Social Services; Agricultural Extension; Local Hospital Nurses; Local Nursing Homes; and A Prison Unit Staff on Alcoholism Control). Descriptors—\*Agriculture, Agricultural Laborers, \*Economic Disadvantage, Farmers, \*Government Role, \*Migrant Workers, \*Rural Farm Residents, Seasonal Laborers, Socioeconomic Influences

On July 22, 1971, the subcommittee initiated the hearings, noting that "the problems of the most severely disadvantaged people in rural America—migrant and seasonal farmworkers—cannot be described, much less solved, unless examined in the light of the larger difficulty in agricultural America—rural poverty." Questions set forth at this hearing included: (1) To what extent did rural poverty exist—and why did it persist? (2) What had the mechanization of farming done to, or for, the social and economic fabric of rural America? (3) Had small farmers and farmworkers, in the wake of rapid changes in American agriculture, been effectively shut off from the benefits and safeguards which workers in other industries enjoyed? (4) Had the advent of "agribusiness" (the rise of corporations and conglomerates as agricultural powers) helped to alleviate or aggravate rural poverty? (5) Was "agrigovernment" (characterized by massive support programs for agribusiness) meeting its responsibility to all the people and institutions in rural America? and (6) What were the common interests of small farmers and farmworkers in the face of political and economic forces which con-

trolled their lives, sometimes making them victims of poverty, but which lay beyond their control? On September 21 and 22, the economic alternatives remaining in rural America were explored. (NQ)

On January 11, 1972, the subcommittee heard further testimony on land ownership, use, and distribution in rural America. Witnesses gave testimony on: (1) Land ownership in California and the Nation; (2) the difficulties encountered in finding out who owns the land; (3) the implications of the continuing trend toward ever-higher concentration of land and economic and political Power in agriculture; (4) current developments in California agriculture from an historical perspective and their impact on farmworkers, farmers, and others affected by it; (5) the extent to which government policies and programs were meeting and serving the needs of all people in rural America; (6) the ecological and environmental implications of present and projected land ownership and use patterns; (7) rural-

urban migration; and (8) the Federal tax laws pertaining to agriculture and migratory labor. Among the witnesses were attorneys, journalists, and representatives from the Agribusiness Accountability Project, the Bank of America in San Francisco, the Rand Corporation, and the California AFL-CIO. On June 19, 1972, the subcommittee heard testimony on land-grant colleges and their role in rural America. The hearing's purpose was to determine whether this system of education, research, and extension is working for or against the cause—livable communities in rural America. Among the candid questions asked about the land-grant college system were: (1) Who benefits from the land-grant college efforts? (2) Have the land-grant colleges conspired, wittingly or unwittingly in the displacement and impoverishment of farmworkers? (3) Have these colleges lived up to their historic mission in rural America—to serve all the people of the Nation? and (4) Since 1% of all land-grant college money goes to the 17 colleges which are predominately black, what steps must be taken to eliminate racial discrimination where it exists in the system? Witnesses gave testimony on: the land-grant college complex and what it has done for family farmers, farmworkers, cooperatives, and the majority of other rural Americans; agricultural research pertaining to rural development and the needs of rural people in Pennsylvania; the land-grant college and the consumer; the creation and difficulties of black land-grant colleges; the legal environment in which the allocations of funds have been made to black land-grant colleges; and the land-grant college and organic gardening and farming. Identifiers—Chicanos

Purpose of the conference was to develop a set of priorities for sociolinguistic research on the Chicano community over the next 3 to 5 years. The conference was designed to develop guidelines for such research. Workshops dealt with specific areas of sociolinguistic theory, applied sociolinguistics, and sociolinguistic research policy guidelines. Topics covered were: (1) language varieties and attitudes toward language, (2) sociolinguistics and bilingual education, (3) Spanish language instruction for Chicanos, (4) language creativity in the Chicano community, (5) language policies and the Chicano community, (6) publication and dissemination of Chicano language materials, and (7) guidelines for sociolinguistic research. After the workshops, a plenary session was held to present workshop summaries and resolutions to the group as a whole. Prepared from transcriptions of recorded sessions and from notes taken at the workshop sessions, this report includes a summary of the workshop discussion and recommendations, a brief analysis of the workshop proceedings, a presentation of the final plenary session, and a list of participants. The proceedings appear in both English and Spanish in order to reproduce the actual linguistic setting of the workshops. Where the workshop was conducted primarily in Spanish, a short summary in English is provided. (NQ)

Descriptors—Adults, \*Attitudes, Comparative Analysis, Demography, \*Educational Change, Futures (of Society), High School Students, Industrialization, Perception, \*Rural Population, \*Rural Urban Differences, \*Social Change, Social Values, Technological Advancement

Identifiers—\*California (North), Quality of Life

Perceptions of social change in American society and education were examined via an attitude survey (22 demographic questions and 73 opinion statements) administered to the entire population of 5 Northern California rural high schools (n=1,288); all English classes in 2 Sacramento schools (n=1,384); and rural adults (n=258). Structured interviews were given to a cross section of students and adults (categories defined by the interviewers and selection made by school administrators). Among the items examined were: (1) Impact of Change (pace, quality, and psychological impact; traditional values; science and technology; family life); (2) City/Country Contrasts (freedom from serious social problems; the cautious approach; youth opportunities); (3) Change in American Education (pace; leadership; controversial issues; facilities; curriculum; teaching methods; lifelong learning). Results indicated: (1) the pace of change is perceived as damaging to traditional American values, particularly among rural adults; (2) there is widespread fear that city migrants and recreational or corporate developments will destroy rural life; (3) there is uncertainty and disagreement about the proper role of the schools in the future; (4) pride, resentment, uncertainty, anger, fear, and hope all seem to characterize rural attitudes about a changing society. The Subcommittee met to examine the attitudes and the administration's response to the hunger and the malnutrition of farmworker children. Some questions asked were: (1) What programs had been developed to meet the food and nutritional needs of farmworker families? (2) Were they properly administered? If not, why not? (3) Were there sufficient funds available? and (4) Was the Nation's commitment to the food and nutritional needs of children being met and if not, why not? On May 1, 1972, the Subcommittee heard testimony from a former food program specialist with the Department of Agriculture, Child Nutrition Division on the operations of child nutrition programs intended to benefit migrant farmworker children. Supplemental information presented during the hearing consisted of internal memorandums, letters, requests from States and reports. Among the topics covered were: (1) programs authorized to provide food assistance for migrant children; (2) food stamp program regulations and supplemental material; (3) family assistance and the migrant—an analysis of the 1970 Family Assistance Act to determine its effectiveness in serving the migrant population and to recommend legislative changes and regulation language; and (4) migrants and their problems with the Federal Food Assistance programs. On August 1, 1972, the Subcommittee heard testimony on bill S. 3762 which would extend the program for health services for domestic agricultural migrant workers. The bill would extend the migrant health program for 5 years, with \$100 million authorized for fiscal year 1973 and a \$25 million increase for each of the following years. S. 3762 represented a first attempt to bring the funding level for migrant health care services into some appropriate relationship to the documented level of need. Among the witnesses were the Assistant Secretary for Health and Scientific Affairs and representatives from the Community Health Service, the Hidalgo-Starr Catholic Charities (San Juan, Texas), the Texas Rural Legal Aid, the Orange Cove (California) Clinica de Salubridad, the Clinica de Salubridad de Campecinos, the Yakima Valley Clinic (Grandview, Washington), and the Migrant Legal Action Program, Inc. (Washington, D.C.). Additional information included: (1) suggested amendments to the Medicare-Medicaid Programs to extend migrant workers coverage, (2) summary of nutritional problems in the Lower Rio Grande Valley, and (3) bilingual staff by project and region. Descriptors—\*American Indians, Demography, Economically Disadvantaged, \*Federal Aid, \*Federal Legislation, Legal Responsibility, \*Social Services, \*Status, Transportation, Tribes, Unemployment

Identifiers—HR 7421, \*Menominee Restoration Act, Menominees, Wisconsin

Presenting reports, statements, letters, and additional information, these hearings of the Menominee Restoration Act (HR 7421) deal with restoration of Federal services to the Menominee tribe via repeal of the 83d Congress' (1953) termination policy. Testimony includes statements from representatives of the: Federal Government, National Congress of American Indians; Menominee Tribe; Menominee County Highway Department, Drugs and Alcoholism Program, Housing Authority, and Council of Chiefs; Wisconsin Schools; and the like. Some of the additional information presented includes: (1) an employment analysis for December 1967-June 1973; (2) Lake Moshawquit Property Owners Association agreements; (3) Native American Rights Fund's Memorandum re Restoration Act; (4) Menominee County Community Action Program's Impact Study (table); (5) Menominee Enterprises' financial analysis-ratios for March 1973 and summary of forestry and mill operations for 1961-72; (6) profile chart for averages on the Iowa Tests for basic skills; (7) Report 272 of the 87th Congress on lessening the impact of Federal services termination; (8) Bureau of Indian Affairs' report on termination (1965); (9) tables on: population and economic characteristics of tribes; county population and Wisconsin per capita taxable income (1969); and travel distances from community to service center; (10) Wisconsin Assembly bills, amendments, and fiscal notes. Since 1970, the Servicio Nacional de Desarrollo de la Comunidad (SNDC) has been in existence as an autonomous decentralized government agency. Its main effort has been to integrate Bolivia's 3.4 million rural inhabitants, the "campesinos," into the mainstream of national socioeconomic programs through self-help development projects at the community level. Schools, clinics, roads, bridges, potable water systems, sheep dips, livestock shelters, silos, and irrigation projects have been the main areas of concern. Local level workers trained in home economics have helped form Mothers' Clubs, provided training in homemaking arts, artisan crafts, hygiene and sanitation, child care, and other activities. SNDC has provided veterinary and agricultural production promotion, and education services for small farmers. In 1975, an evaluation was conducted to help the SNDC build upon its considerable past success and expand its roles to meet new and changing demands for the development of rural campesino communities. This report presents: (1) a relatively objective description of conditions existing during May and June 1975 within the SNDC training component; (2) an assessment of what was observed in relation to SNDC's past efforts and future projected roles; and (3) recommendations for strengthening and changing the training component in light of the new roles, responsibilities, and demands. Identifiers—Elementary Secondary Education Act Title VII, ESEA Title VII, \*San Luis Valley Colorado Schools, Spanish Surnamed

Primary objectives of the program were: (1) to meet the educational needs of those children who experience learning difficulties because of the inability to understand or speak the language of instruction, and (2) to maintain a sense of pride in the student's language and culture. During 1974-75, the program's 4th year of operation, there were 1,483 students enrolled in grades K-3. Of these 64 percent were Spanish surnamed, 35.8 percent were Anglo surnamed, and 20 percent were Japanese Americans. Student needs were met through the use of more individualized instruction, and more precise evaluation procedures for assessing student progress. Factors which influenced and enhanced the student's learning styles were achieved through an extensive presentation of oral language development in both English and Spanish, music appreciation (both listening and oral exposition), ethnic dances, and art. The project staff consisted of a director, a materials specialist, 63 certified personnel, 49

paraprofessionals, 9 community representatives, a curriculum specialist, and an internal evaluator. Focusing mainly on the up-to-date process evaluation findings in each of the program's operational components, this report presents data obtained from in-service meetings, pupil progress reports, Test of Basic Experiences, workshop evaluation scale, supply inventory, material development and management. Findings indicated that most activities for the year were conducted effectively. (NQ)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, \*Project Discovery Through Outdoor Education

Funded through the 1965 Elementary and Secondary Education Act (ESEA) Title III, the Project began serving youngsters handicapped either physically, mentally, or emotionally, who qualified for special education services in the fall of 1971. Among its objectives were to: (1) improve these youngsters' achievement in regular school subjects, their self-concepts, interpersonal relationships, and leisure skill; (2) train special education teachers to use the outdoors to provide learning opportunities to these youngsters; and (3) test an outdoor education model for improving the learning and lives of these children. The manual and filmstrips were created to disseminate ideas which were collected and found successful during 3 years of operation. Divided into sections by tabs for easy reference, the manual suggests methods and procedures in the sequence necessary to set up and carry out an outdoor laboratory experience. Among the topics covered are: teacher in-service, preplanning, the outdoor laboratory site, schedules, insurance, transportation, first aid, camp rules, kitchen duties, equipment, math, science, social studies, language arts, music, physical education, arts and crafts, fire, hikes and scavenger hunts, rainy day activities, winter activities, evaluation, disability considerations, permission slips and health forms, counselors, and resource people. Descriptors—Agricultural Education, Costs, Delivery Systems, \*Developing Nations, \*Economic Development, Educational Technology, Extension Education, \*Nonformal Education, Off Farm Agricultural Occupations, Planning, Policy Formation, \*Program Evaluation, \*Rural Development, Tables (Data), Training

Designed to assist rural planners and policy makers of developing countries in the use of non-

formal education programs, this book analyzes the findings of a two-year international research study. Emphasizing a functional view of education and equating education with learning, the focus is on: (1) preplanning diagnosis, (2) educational delivery systems, (3) costs and required resources, (4) innovative solutions, and (5) evaluations of nonformal programs. Data are derived from: (1) extensive discussions with agency experts; (2) a wide assortment of documents; (3) analytical working papers; and (4) a diversified sample of 25 ongoing nonformal education projects in Africa, Asia and Latin America. Divided into three sections (evidence, analyses, and conclusions), this book includes the following chapters: (1) Background of the Study; (2) An Overview of Rural Education; (3) Extension Programs in Agriculture; (4) Training Programs in Agriculture; (5) Training for Nonfarm Occupations; (6) Self-Help Approach to Rural Development; (7) The Integrated Approach to Agricultural Development; (8) A Critique of Agricultural Education and Research Systems; (9) A Critique of Training Programs for Nonfarm Rural Skills; (10) Improving the Technologies of Nonformal Education; (11) The Economics of Nonformal Education; (12) Planning, Organization, Management, and Staffing; (13) A Final Recapitulation and Commentary. **Outdoor Education Guide-Handbook, Waukesha Public Schools.**

Waukesha Public Schools, Wis.

Pub Date Sep 75

Note--80p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors--\*Activities, Camping, Concept Formation, \*Curriculum Guides, \*Elementary Education, \*Field Trips, Language Arts, Lesson Plans, Mathematics, \*Outdoor Education, Physical Education, Science Activities, Sensory Training, Social Studies

Identifiers--\*Wisconsin (Camp Phantom Lake)

Designed by the Waukesha Public Schools (Wisconsin) specifically for an elementary level three-day camping trip at Camp Phantom Lake, this outdoor education guide presents some ac-

tivities which suggest adaptation. Activity directions, plans, worksheets, evaluation sheets, and illustrations are presented in sequential order for the following disciplines which, by design, frequently overlap: (1) Mathematics (activities involving measurement of height, distance, hills, triangles); (2) Social Studies (activities involving map and compass skills via use of a compass trail); (3) Science (scientific observation using a "micro trail" approach, observation tools, and sensory skills); (4) Language Arts (an activity Progressing from meditation to creative writing and including discussions, sketching, water color painting, pantomiming, and poetry); (5) Physical Education (frisbee toss, run and summersault relay, endurance race, football throw, leap frog, kickball, and tug of war). Indicative of the variety of activities presented are: (1) a candlelight ceremony designed to offer students opportunity to express a "gut" feeling to the group; (2) a section on water pollution testing (chemical analysis, filmstrip, and questions); (3) a guide to making a "friendship stick" (emphasis on symbolic significance). Also included are a 46-item awareness test and the necessary school forms for such an outing. (JC)

**A Brief History of Indian Legislative Representatives in the Maine Legislature.**

Pub Date 75

Note--3p.; 1975 revision of a 1967 publication: Not available in hard copy due to reproducibility of original document

**EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.**

Descriptors--\*American Indians, \*Historical Reviews, \*Legislators, \*State Government, \*State Legislation, Tribes

Identifiers--\*Maine, Passamaquoddy: Penobscots

Of all the states in the U.S., Maine is the only one that has American Indian tribal representation in its legislature. The earliest records of Maine Indian representation are 1823 (Penobscot) and 1842 (Passamaquoddy), but Massachusetts' records indicate that Indian representation had probably been going on since or before the Revolution. Due to intratribal confusion and party conflict, the Main Legislature began in 1866 to describe the procedure for electing the Penobscot legislative representative as well as the tribe's governor and lieutenant governor. In 1952, the two Passamaquoddy reservations set forth provisions for annual election of their tribal representative in the Treaty of Peace of 1852. At the time of its inception in 1907, the Legislative Record indicates that Indian representatives were both seated and afforded opportunity to speak. However, after a concerted effort in 1939 to upgrade the status of Indian representatives, there was reaction, and in 1941 Indian representatives were ousted entirely. Until 1975, Indian representatives were excluded from the floor of the House, their status being little better than that of State paid lobbyists, though in 1965 their salaries were raised and in 1967 an expense account was added. In 1975 the House restored seating and speaking privileges to Indian representatives after a 34-year lapse. (JC)

Identifiers--\*Spanish Surnamed

Compiled to increase communication and interaction among the Spanish surnamed people of the United States, this directory lists 1,887 officials who held a publicly elected position at the Federal, State, or local level during 1973. Names and addresses of officials are listed alphabetically

by State, county, and city. Political affiliation and year in which the official leaves office are given by each name. Spanish surname was used to include Chicanos, Mexican Americans, Puerto Ricans, Latin Americans, Spanish Americans, and Cuban Americans. Names were obtained through personal letters sent to persons identified as Spanish surname in the State, county, and elected officials roster from each state. A follow-up letter, questionnaire, and a preliminary draft of the roster were sent to each person identified. Letters were also sent to organizations and non-elected officials for cross-referencing and expansion of the list. (NQ)

Descriptors--\*American Indians, \*Bilingual Education, Educational Objectives, Educational Philosophy, \*Evaluation Methods, Manuals, Models, \*Program Descriptions, \*Research Design, Research Tools

Identifiers--\*Choctaw Bilingual Education Program, Choctaws, Mississippi

Emphasizing the role of evaluation in program development, this publication describes the Mississippi Choctaw Bilingual Education Program (BECOM), its philosophy, goals, objectives, and proposed evaluation plan. Major components of this K-3 program are identified as: (1) Instruction; (2) Curriculum and Materials Development; (3) Management; (4) Staff Development; and (5) Parent-Community Involvement. Areas of research and evaluation are identified as: (1) English as a Second Language; (2) Survey of Existing Educational Conditions; and (3) Overall Program Evaluation. Identifying self-concept, academic achievement, language dominance, and oral English proficiency as variables to be measured, the research/evaluation design is described as one that will: (1) determine the setting in which bilingual education occurs; (2) describe the program participants; (3) determine the progress of each program component; (4) determine the effectiveness of each component in causing bilingual education to occur; (5) determine the accomplishments of the participants and the entire program. Also presented is a timeline chart which describes: (1) the research question; (2) the data source or population; (3) instrument or method; (4) interval and number of measures; (5) time of measure; (6) person responsible; and (7) method of analysis. **The Occupational Attainment of Migrant and Nonmigrant Farm-Reared Youth: A Colombian Case.**

Pub Date 21 Aug 75

Note--33p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975); Not available in hard copy due to light print

**EDRS Price MF-\$0.83 Plus Postage. HC Not Available from EDRS.**

Descriptors--\*Academic Achievement, Adults, Agriculture, Developing Nations, Landlords, \*Migrants, \*Occupational Mobility, \*Rural Farm Residents, Rural Youth, Social Class, \*Socioeconomic Status

Identifiers--\*Colombia, Private Ownership

The educational and residential (migrant and nonmigrant) characteristics of two generations from a minifundia community in rural Colombia were examined to determine the relationship between occupational attainment level and parental social class (determined by land ownership). Occupation and residence histories were obtained from a 10% sample of rural households which produced data for 204 second generation household heads, their spouses, and their siblings 16 years and older (n=1,677) and their third generation children 12 years and older (N=593).

Additionally, agricultural and marketing data were analyzed. The guiding hypothesis maintained that the number of high educational and occupational levels of both generations would be meager and that representatives from the larger landowning families would attain the higher levels. Results indicated: (1) the rural-born were likely to remain concentrated in traditional positions in the agricultural or service sectors where much underemployment prevails; (2) the few rural people from higher social class positions would maintain that position from one generation to another via transfer of land or migration to urban places and entry into technical or professional positions; (3) despite industrialization, the pyramidal social hierarchy, characteristic of preindustrial society, would continue. (JC)

Descriptors—Conservation Education, \*Earth Science, \*Ecology, \*Elementary Grades, \*Environmental Education, Field Trips, Instructional Materials, \*Learning Activities, Natural Resources, Outdoor Education, School Community Programs

Included in this document are a selection of articles reprinted from SCIENCE AND CHILDREN. They focus on environmental education in the elementary school, and present a number of environmental perspectives. Those concerning general or background information are: an examination of environmental education: children's attitudes about the environment; teaching resources in the national parks; and a school/community effort to preserve an urban environmental study area. Ecology is treated through investigations at the individual level, populations of one species, communities, and ecosystems. Adapting traditional activities to an ecological approach, emphasizing concepts of interaction and change, is suggested. Earth science experiences to increase awareness of the child's own and natural environment center on site experiences. They focus on analyzing small parts of a larger environment—investigating change, age, movement, erosion, deposition, etc. The field trip is presented utilizing a conceptual approach to develop environmental relationships. Suggested activities for children for observing their town as a man-dominated biotic community are examining construction, tree identification, soil samples, zoo trips, food chains, and succession. A calendar for teaching conservation activities is constructed. One article is devoted to the associations between nature and creativity. References are included following some articles. (BP)

**The Relative Importance of Selected Factors on the Decision of High School Students to Enroll or Not Enroll in Chemistry and Physics.**

Pub Date 73

Note—312p.; Ph.D. Dissertation, The University of Michigan

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-3729, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Chemistry, Doctoral Theses, Educational Research, \*Enrollment Influences, \*Physics, \*Predictor Variables, Science Education, Secondary Education, \*Secondary School Science, Student Characteristics

Identifiers—Research Reports

Predictor variables were sought relating to the decision of secondary school students to enroll or not enroll in chemistry and physics courses. Questionnaires were developed and administered to 404 students enrolled in chemistry and 358 not enrolled, and to 472 students enrolled in physics and 475 not taking physics. Rural, suburban and urban schools participated. The factors having the greatest influence on the decision to take chemistry were importance of chemistry to college plans (62 percent), importance to career goals (52 percent), planned college science or science-related major (47 percent), and college requirement needs (42 percent). Factors influencing students not to enroll were greater interest in other subjects (54 percent), fear of failure (36 percent), and belief in non importance of chemistry to career goals (34 percent). College plans, college science or science-related majors, enjoyment of science courses, and importance of physics to career goals were the factors related to taking physics in high school. Lack of interest, fear related to difficulty of physics and fear of failure were cited as reasons for not taking physics. The importance of factors considered was not significantly influenced by the sex of the student, the type of community, or the chemistry or physics curriculum. (Author/EB)

**Development and Field Testing of a Model to Simulate a Demonstration of Le Chatelier's Principle Using the Wheatstone Bridge Circuit.**

Pub Date 73

Note—147p.; Ed.D. Dissertation, Temple University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-1833, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Chemistry, Demonstrations (Educational), Doctoral Theses, Educational Research, \*Instructional Aids, Instructional Materials, Junior Colleges, \*Models, Physics, Science Education, \*Science Materials, \*Secondary Education

Identifiers—\*Le Chateliers Principle, Research Reports

An electronic simulation model was designed, constructed, and then field tested to determine student opinion of its effectiveness as an instructional aid. The model was designated as the Equilibrium System Simulator (ESS). The model was built on the principle of electrical symmetry applied to the Wheatstone bridge and was constructed from readily available components at a total cost of approximately \$95. The ESS and associated educational materials were evaluated by means of field testing in three high schools and junior college chemistry classes. Evaluation was accomplished by utilizing questionnaires to obtain students' opinions as to the effectiveness of the ESS as an instructional aid. Feedback was used to revise the instrument and the classroom presentations of the topic. The ESS, a teacher's manual, a lecture demonstration manual, and a previously prepared programmed unit were used during each of three presentations. It was concluded that the device could serve satisfactorily as an instructional model for teaching Le Chatelier's Principle. It was also reported that it was possible to construct an inexpensive and compact model which simulates the effects of externally imposed stresses on chemical systems at equilibrium. (Author/EB)

**An Educational and Professional Profile of Black American Doctorates in the Natural Sciences.**

Pub Date 73

Note—130p.; Ed.D. Dissertation, Indiana University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-2613, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Black Community, Doctoral Theses, Educational Counseling, Educational Research, Higher Education, \*Minority Groups, Motivation, \*Negroes, \*Science Careers, Science Education, \*Scientists

Identifiers—Research Reports

The problem of this study was to describe, according to selected variables, certain personal, educational, and professional characteristics of Black scientists who have earned the doctoral degree in the natural sciences with intent to encourage more Blacks to enter the fields of science. A self-reporting questionnaire was mailed to 500 Black scientists throughout the United States, who, for the most part, were employed in institutions of higher education. Data were collected relating to current employment, demography, personal background, perceived factors of influence toward science, sources of financial support for doctoral studies, post-doctoral work opportunities, and the Black scientists in relation to the Black community. Data results were expressed in frequency tabulations and percentages. The typical Black scientist was found to be a male 49 years of age, born and raised in the South, and working at a predominantly Black college or university. He came from a family of low socio-economic status and showed high achievement in science and mathematics. He strongly preferred teaching and research in a university and most often returned to work in the area of his birth. Poor schooling in science and lack of knowledge about science careers were greatest deterrents to other Blacks to pursue science careers. (Author/EB)

**Assessing Science Education at the Eighth Grade Level in Selected Public Secondary Schools in North Mississippi.**

Pub Date 73

Note—154p.; Ed.D. Dissertation, The University of Mississippi

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-1328, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Achievement, \*Curriculum Evaluation, Doctoral Theses, Educational Research, Grade 8, Junior High Schools, \*Program Evaluation, Science Education, Secondary Education, \*Secondary School Science

Identifiers—Mississippi, Research Reports

This study was directed at developing a model for assessing eighth grade science education in selected schools and using the model to identify procedures that might be used to maximize science achievement of the students. Thirty-four public secondary schools participated in the study. Data were obtained from annual publications, computer printouts, teacher questionnaires, and student response sheets. Two stepwise multiple regression programs were used in processing the data. Variables that were significant at the 0.10 level using the computer t-statistic were selected for the first restricted model, and those at the 0.2 level were selected for the second restricted model. The dependent variable used was the mean score on a science achievement test taken from the National Assessment of Educational Progress in Science, age 13. The independent variables were 10 science classroom variables, 12 teacher variables, and 6 school variables. The results of the study indicated that school officials should hire teachers with advanced degrees, increase the number of science periods taught as part of the total teaching assignment, and reduce the total annual per pupil expenditure. Using the second model, it was suggested that school officials increase the number of textbooks used, use textbooks with earlier copyright dates, and increase the library expenditures per pupil. **Identifiers—Research Reports**

The purpose of this study was to determine if eighth-grade students in junior high and middle school science classes could order selected science categories on the basis of the attribute interest into rank orders which were consistent and reliable. A sample of eighth-grade science classes from Wisconsin was selected. A set of investigator-developed instruments consisting of four inventories (two paired comparisons inventories and two triad comparisons) was administered to each class. The responses of each class to the set of inventories were analyzed to determine: (1) class averages of a consistency measure within paired comparisons inventories response sets, (2) class averages of a concordance measure across rankings from the paired and triad comparisons inventory formats, and (3) class averages of a concordance measure across rankings from two different triad comparisons inventories. The two concordance measures were considered measures of reliability. Significance levels of these average measures were computed. From the investigation, the author concluded that qualified support should be given to the utilization of the attribute interest in establishing consistent rankings of certain science categories. **Descriptors—**\*Academic Achievement, Behavior Patterns, \*Biology, Doctoral Theses, Educational Research, \*Instruction, Science Education, Secondary Education, \*Secondary School Science, \*Verbal Communication

**Identifiers—Research Reports**

The purpose of this investigation was to determine the effects of planned classroom teacher verbal behavior and resulting classroom pupil verbal behavior on the achievement of classroom pupils in 40 selected biology classes. The verbal behavior of 20 teachers and 867 pupils was observed by the use of audio tapes and categorized with the Verbal Reaction Behavior Log (VRBL). Ten teachers and 449 pupils comprised the experimental group. The experimental teachers received instruction from the investigator in the use of the VRBL, and the experimental group was taught specific subject matter with this approach. The control group was taught the same subject matter without utilization of the VRBL approach. Both groups were administered the same final examination. The results of utilizing a t-test to determine significant differences in final examination scores revealed a significant difference in favor of the experimental group. (Author/CP)

**A Study of National Trends in Earth Science Education and the Status of Earth Science Education in Virginia.**

Pub Date 73

Note—192p.; Ed.D. Dissertation, University of Maryland

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-9790, MF \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors—**Certification, Doctoral Theses, \*Earth Science, Educational Research, Science Education, Secondary Education, \*Secondary School Science, \*Surveys, \*Teacher Education, \*Trend Analysis

**Identifiers—Research Reports, \*Virginia**

This study investigated two broad questions: (1) What are the trends evident in status studies of earth science education across the nation and in Virginia between 1964 and 1972 and how do the trends in the nation and in Virginia compare; and (2) With recommendations for pre-service education, in-service education, and certification requirements for earth science teachers in mind, what is the status of earth science education in Virginia during the 1972-73 school year? The investigation of trends in earth science education involved all the secondary students and teachers of earth science in the nation for the period 1964-72, as determined by literature reviews and from the files of national and state agencies. The status study of Virginia earth science teachers involved all those who spend 50 percent or more time teaching earth science. Among findings were: (1) there was an approximately three-fold increase in the number of states requiring certification specifically for earth science between 1964 and 1972, (2) earth science is mainly a ninth-average level course in Virginia, and (3) about 43 percent of the Virginia earth science teachers indicated they planned to leave teaching in the next 5 years. **A Descriptive Analysis of the Chemical Bond Approach, the Chemical Education Material Study, and a Representative Traditional Chemistry Course.**

Pub Date 74

Note—583p.; Ed.D. Dissertation, University of California, Los Angeles

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 74-12,459, MF \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors—**Behavioral Objectives, \*Chemistry, \*Curriculum, Curriculum Development, Doctoral Theses, Educational Research, \*Instruction, \*Science Course Improvement Project, Science Education, Secondary Education, \*Secondary School Science

**Identifiers—Research Reports**

This study compared three one-year courses in high school chemistry. One of these, entitled Modern Chemistry, represents the "traditional" precollegiate chemistry course. The others are the Chemical Bond Approach (CBA) and the Chemical Education Material Study (CHEM Study). These are the two major revisions in high school chemistry which emerged from the curriculum reform movement of the 1950's. The investigator analyzed how these three courses attempt to educate students in the chemical discipline. Within the context of the Tyler rationale were examined: (1) course objectives, (2) learning opportunities, (3) course organization, and (4) course evaluation. The course objectives are classified within the framework of Bloom's taxonomy. Among the findings are answers to the following questions: How did the curriculum project-courses originate? Is there a difference in the kind of knowledge acquired, depending upon which course is studied? (Author/LS)

**Identifiers—**\*Nebraska Physical Science Project, Research Reports

The purpose of this study was to compare the effects of various teaching practices and classroom organizational patterns upon achievement and understanding of science of students studying materials of the Nebraska Physical Science Project (NPSP), an integrated chemistry-physics course, and to investigate these practices and patterns and the role perceptions of their teachers. The study sample consisted of 198 students and their 12 teachers. Students were given a battery of tests to ascertain aptitudes, teacher directiveness, and classroom organizational characteristics. The results of these tests and questionnaires were compiled and analyzed using the t-test and analysis of variance. Classes were grouped into lecture-demonstration or performance-sequenced categories for the purpose of comparing student achievement. Classes were regrouped into directive or non-directive categories to make comparisons of student achievement and to gain understanding of teacher role perception. Statistical analyses indicated no significant difference in achievement between groups. Recommendations based on this study included encouragement for NPSP teachers to feel free to use a variety of teaching styles and classroom strategies. (Author/CP)

**Descriptors—**\*Achievement, \*Attitudes, Educational Research, Elementary Education, \*Elementary School Science, \*Inservice Teacher Education, Process Education, Science Education, \*Teacher Education

**Identifiers—**\*Elementary Science Study, ESS, Research Reports

The purpose of this study was to determine the effects of a teacher in-service education Program of workshops in Elementary Science Study (ESS) and Process Science on (1) the fifth- and sixth-grade teachers who participated in the workshops, and (2) students of teachers who participated in these workshops. A Posttest-Only Control group design was used to test six research hypotheses. Randomization was used to insure the lack of initial bias between experimental and control groups for both teachers and students. In experimental and control groups (each comprised of twenty-five teachers), comparisons were made on knowledge of scientific processes, knowledge of scientific content, and attitude toward science and scientists using three instruments. A total of 150 students in the control group and 150 students in the experimental group were tested on the same three criteria, also by using three instruments. The analysis of the teacher data revealed no significant difference between the experimental and control groups on any of the instruments. Analysis of the student data revealed that the experimental group scored significantly higher (at the .05 level) than did the control group on all three instruments. (Author/CP)

*Hadar, Nitsa Boneh***Children's Conditional Reasoning: An Investigation of Fifth Graders' Ability to Learn to Distinguish Between Valid and Fallacious Inferences.**

Pub Date 75

Note—420p.; Ph.D. Dissertation, University of California, Berkeley

EDRS Price MF-\$0.83 HC-\$22.09 Plus Postage

Descriptors—Curriculum, Doctoral Theses, \*Educational Research, \*Elementary Education, \*Elementary School Science, \*Learning Processes, Logic, \*Logical Thinking, Science Education, Thought Processes

Identifiers—\*Conditional Reasoning, Research Reports

This study was conducted to determine if fifth-grade students can significantly improve their use of logical analysis through a suitable instructional unit taught under ordinary classroom conditions. Concrete teaching materials were developed to familiarize students with the distinction between the valid inference patterns—Modus Ponendo Ponens and Modus Tollendo Tollens (MP, MT), and the fallacious ones—Affirming the Consequent and Denying the Antecedent (AC, DA). No formal rules were taught. The experimental unit was implemented 4 to 5 times a week for 23-25 sessions, by 4 fifth-grade teachers in their ordinary classes. The teachers participated in a 12-hour pretraining workshop. A pretest/posttest, treatment/no treatment design was applied to assess resulting improvement in students' conditional reasoning ability. The sample consisted of 210 fifth-grade students in a suburban area, 104 in 4 experimental classes and 106 in 4 control classes. Experimental and control group pretest performance levels did not differ, but there was a significant difference in the posttest means. There was no significant change in the control group's pretest and posttest performance levels on any logical form, or for the experimental group's on MP and MT. However, on AC and DA the two groups' gain scores were significantly different. (MLH)

Descriptors—\*Directories, Educational Programs, \*Elementary Schools, \*Environmental Education, Field Experience Programs, \*Outdoor Education, Projects, \*Secondary Schools

A survey of public elementary and secondary school environmental programs and project curricula was conducted by the University of Tennessee at Knoxville. From the information received, this directory was compiled, the purpose being to facilitate the establishment of a national communication and information delivery system among operational programs and projects. The sources are presented in two sections. One contains those programs and projects responding to the survey instrument in the research study. The second section treats programs and projects which did not respond to the survey. Arranged alphabetically by state, each entry provides the director/co-director, program or project, and the address. Appended materials are also presented in two sections. The first contains an alphabetical listing of state education agency coordinators for environmental education, who identified their public school programs and projects applicable to the study population. Only one state agency representative did not respond to the survey. The second appendix is a listing of organizations, agencies, and persons known to be working in the field of environmental education, from which applicable study programs/projects were requested. More than two thirds of those contacted provided responses. (BP)

**Understanding the National Energy Dilemma.**

Georgetown Univ., Washington, D.C. Center for Strategic and International Studies.

Pub Date 73

Note—56p.; Contains 16 color-coded fold-outs Available from—ERIC/SMEAC, The Ohio State University, 1200 Chambers Road, 3rd Floor, Columbus, Ohio 43212 (on loan)

Document Not Available from EDRS

Descriptors—\*Conservation (Environment), \*Depleted Resources, Energy, \*Energy Conservation, Environmental Education, \*Natural Resources, \*Policy Formation, World Problems

This graphic representation of our energy dilemma provides government officials, industry, and general public with an understanding of the broad problems and complexity of our energy crisis. An energy display system projects effects of energy policies on our domestic energy situation. This display contains sheets indicating total energy flow patterns. Cross plots provide specific information on each item. Data are based on 1950, 1960, and 1970 figures with projections for 1980 and 1990. To understand the energy display system, accompanying fold-outs with specific text descriptions are provided. Percentages of residual and commercial, industrial, non-energy, transportation, electrical energy generation, coal/gas, oil/gas, and coal/oil uses are presented. Hydroelectric, geothermal, nuclear, gas (imports), gas (domestic), coal, oil (imports), shale, and oil (domestic) energy sources are displayed in percentages in flow patterns. Energy units are one million barrels per day of oil equivalent. Fold-outs consist of total energy flow patterns (1950, 1960, 1970, 1980, 1990); cross plots of "efficiency," "end uses," "form of use," "supply/demand charts"—1960-1985, 1990-2050;

charts of "guidance" required and demand projections. Appended material contains energy references and conversion tables. (BP)

This report deals with research presently being done dealing with the acquisition of musical skills. In an attempt to create a self-paced, independent music study approach, investigators have formulated two main hypotheses: (1) that perception and cognition are inextricably intertwined—not discrete quantities; and (2) that learning behavior in music generally follows similar developmental patterns as in other learning. Instruction is performed through computerized musical sounds by which the student may select a range of up to five octaves and play four parts simultaneously. The analysis and operation of this computerized instructional system is further explained. (Author/CP)

TORTIS (Toddler's Own Recursive Turtle Interpreter System) is a device which can be used to study or nurture the cognitive development of preschool children. The device consists of a "turtle" which the child can control by use of buttons on a control panel. The "turtle" can be made to move in prescribed directions, to take a given number of paces, to draw, to toot, to turn its light on and off, and to remember or forget. In this paper, protocols for several children who interacted with the turtle are informally summarized and discussed. (SD)

LISP LOGO is a computer language invented for the beginning student of man-machine interaction. The language has the advantages of simplicity and naturalness as well as that of emphasizing the difference between programs and data. The language is based on the LOGO language and uses mnemonic syllables as commands. It can be used in conjunction with character-oriented display terminals, graphic display systems, and music generation. This document provides a discussion of the merits of LISP LOGO, as well as a user's manual for the language. (SD)

The work described in this paper dealt with two tasks: (1) to determine an individual's particular representation of a melody—how he represents it to himself, what relations he finds, and (2) to observe how an individual's representation of a melody might change in the course of working with given melodic materials in an experimental situation. Students were provided a musical gadgetry in which a typewriter was coupled with a computer and a "music box." The box could produce a five octave range of pitches and could play up to four parts simultaneously. Subjects were to build a tune which made sense to them. From this, strategies which they invoked and decisions they made were studied. Narrative accounts of two students' efforts appear in the report. (Author/CP)

Several areas that are lacking in undergraduate nuclear engineering programs are discussed. Although most programs provide adequate theoretical knowledge in nuclear science, the nuclear engineer must have a working knowledge with the complete nuclear power plant, and be acquainted with the functions and responsibilities of the various segments of the nuclear industry and of the federal and state agencies under whose regulation the entire industry must operate. Suggestions are given for means of incorporating these practical aspects into nuclear engineering programs. (MLH)

This booklet on small game and waterfowl is  
 part of a series developed to encourage youth to  
 pursue environmental projects. The manual is  
 comprised of two units. The first unit discusses  
 small game management and laws and regulations  
 protecting them. Descriptions are given of  
 behaviors and habitats of small game and small  
 non-game animals of Colorado. The second unit  
 presents waterfowl management and details  
 behaviors and habitats of many Colorado water-  
 fowl species. Included in both units are suggested  
 activities for investigating wildlife. (MR)

 Conservation Education, Ecology, \*Elementary  
 Education, \*Environmental Education, Or-  
 ganizations (Groups), Post Secondary Educa-  
 tion, Publications, Resource Materials, \*Sec-  
 ondary Education

This is an environmental education bibliog-  
 raphy for elementary, secondary, and post-sec-  
 ondary schools. Eighteen environmental categories  
 are included. They consist of attitudes, bibliog-  
 raphies, careers, conservation, ecology, energy, en-  
 vironmental education, law and citizen action, or-  
 ganic farming, other resources, periodicals, pesti-  
 cides, pollution, population, series, solid waste,  
 technology, and wildlife. Each category is ar-  
 ranged in broad grade level designations (K-6, 7-  
 9, and 10-14). Grade level designations are

denoted by different colors, remaining constant  
 throughout the environmental categories. Entries,  
 arranged alphabetically, contain the author's  
 name, title, publisher, and the place, date, and  
 cost of publication. Some bibliographic citations  
 are followed by an annotation of the item con-  
 tent, a description of its possible uses, and per-  
 tinent comments. One of the final sections is an  
 alphabetized and annotated listing of citizen  
 groups, government agencies, professional and  
 other organizations providing information or  
 other services to individuals or groups. The last  
 section contains those publishing concerns cited  
 in the text. Compiled alphabetically, each entry  
 provides the address of the organization, agency,  
 and publisher. Individual listings are found under  
 the author's first and last names. (BP)

**What the Construction Industry Can Contribute**  
**to Engineering Education.**

Pub Date Jun 75

Note—17p.; Paper presented at the Annual Meet-  
 ing of the American Society for Engineering  
 Education (Colorado State University, Ft. Col-  
 lins, Colorado, June 16-19, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage  
 Descriptors—\*Construction (Process), \*Con-  
 struction Industry, Curriculum, Educational  
 Programs, Engineering, \*Engineering Educa-  
 tion, \*Higher Education, \*School Industry  
 Relationship

It is proposed that the construction industry  
 collaborate with educational practitioners and ad-  
 ministrators to establish the objectives of con-  
 struction engineering programs. Other recommen-  
 dations are that the construction industry assume  
 direct teaching responsibility for designated areas  
 of instruction; provide program support, such as  
 work opportunities and internships; and periodi-  
 cally review the operation of construction en-  
 gineering programs, providing evaluations and  
 suggestions to the program administrators where  
 appropriate. (MLH)

 Descriptors—Computers, \*Computer Science,  
 \*Course Descriptions, Curriculum, Engineer-  
 ing, \*Engineering Education, \*Higher Educa-  
 tion, Surveys

Identifiers—\*Microprocessors

Drawn from a survey of engineering depart-  
 ments known to be teaching microprocessor  
 courses, this paper shows that the adoption of  
 microprocessors by Electrical Engineering De-  
 partments has been rapid compared with their  
 adoption of minicomputers. The types of courses  
 that are being taught can be categorized as: sur-  
 veys of microprocessors, intensive study of one  
 microcomputer, inclusion of microprocessors in a  
 general course, project courses, and specific ap-  
 plications courses. (MLH)

 Education, \*Professional Continuing Education  
 Identifiers—\*Corrosion, General Motors Institute

A description is provided for a Corrosion and  
 Corrosion Control course offered in the Continu-  
 ing Engineering Education Program at the  
 General Motors Institute (GMI). GMI is a small  
 cooperative engineering school of approximately  
 2,000 students who alternate between six-week  
 periods of academic study and six weeks of re-  
 lated work experience in their sponsoring plant.  
 The corrosion course provides the students with  
 an intermixing of chemistry, metallurgy, and  
 polymer science as it applies to degradation of  
 materials. The format of the course and sample  
 topics are described. (MLH)

Note—21p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Colorado State University, Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Attitudes, \*Educational Research, \*Engineering, Engineering Education, \*Females, Instruction, Secondary Education, \*Secondary School Students, Student Interests

Identifiers—Research Reports

This study involved approximately 1,000 girls and 300 boys from the seventh, eighth, and ninth grades of five Michigan junior high schools. The girls were randomly divided into five groups. Group A received live presentations by women engineers; Group B participated in four engineering projects; Group C received only printed materials; Group D received no special instruction, but their parents received printed materials, as did the parents of students in Groups A, B, and C; and Group E was the control group. A test instrument designed to measure awareness and attitudes toward engineering was administered before and after the study to all girl participants, controls, parents and faculty. The analysis portion of the study had not been completed at the time of this report. (MLH)

Pub Date Jun 75

Note—21p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Colorado State University, Ft. Collins, Colorado, June 16-19, 1975); figure 2 (Typical EKG) in the original document is copyrighted and not available; Photographic materials may reproduce marginally

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Cardiovascular System, Computer Programs, \*Computers, Electrical Stimuli, \*Heart Rate, Human Body, \*Medical Treatment, \*Medicine

The utilization of computers in the interpretation of electrocardiograms (EKG's) and vectorcardiograms is the subject of this report. A basic introduction into the operations of the electrocardiograms and vectorcardiograms is provided via an illustrated text. A historical development of the EKG starts with the 1950's with the first at-

tempts to use computers in their interpretation. Programs intended for this purpose are described, with attributes and weaknesses of each mentioned. The current status of computer interpretation is evaluated as being generally more reliable than human interpretive methods. Another important use of the computer in patient monitoring is also described. Again, in the area of electrocardiography, the computer can detect ventricular fibrillation, an interruption of the heart's electrical stability. The computer has proven to be very effective in the detection of preliminary symptoms of ventricular fibrillation, thus lessening the demand on medical personnel to constantly monitor patients. (CP)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Administration, \*Educational Research, Higher Education, \*Interdisciplinary Approach, \*Literature Reviews, \*Management, Personnel, Research Coordinating Units, Research Projects, \*Universities

In this paper certain problems and issues which can be identified from the existing literature concerning the management of interdisciplinary research in the university environment are discussed. In a review of literature concerning multidisciplinary research, recurrent problems and issues were grouped into the following categories: (1) environmental issues, (2) managerial issues, (3) behavioral issues, and (4) other miscellaneous issues. Specially, environmental topics relate to the university as the environment of research, including its administration and organizational structure. Managerial issues deal with those aspects of management which involve selection of personnel, supervision and control, and project evaluation. Behavioral considerations include problems concerning individuality, education, and status, and the miscellaneous category is devoted to issues dealing with the research process itself. A cross-reference with these issues and 25 studies concerning research management is provided. (Author/CP)

Descriptors—\*Achievement, \*Educational Research, Educational Television, \*Engineering Education, Evaluation, \*Graphic Arts, Higher Education, Individualized Instruction, Instruction, Lecture, \*Teaching Methods

Identifiers—Research Reports

This paper describes the results of a three-way evaluation of traditional, televised, and individually-paced instruction in beginning graphics courses. The purpose of the study was to determine mean gain scores for students in each of the three groups. In order to disguise the experiment, no attempt was made to randomly assign subjects to groups, nor were subjects told they were participating in an experiment. Two forms of a standardized test were used in a pretest-posttest format. The mean, standard deviation, scatter diagram, and regression line were calculated for each instructional group and appear in attached appendices. Histograms are used to show pretest and posttest scores for subjects in each of the groups and scatter diagrams are constructed in which lines of regression are drawn. With the use of the standard errors of measurement for each of the instructional groups, it was found that significant achievement resulted for 73 percent of the traditional group, 78 percent of the televised group, and 59 percent of those subjected to individual instruction. Some possible explanations for these phenomena are provided. (Author/CP)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*College Science, Curriculum Development, Engineering Education, \*Engineering Technology, Higher Education, Instruction, \*Metals, Natural Resources, \*Program Descriptions, \*Recycling

This paper describes the content of a seminar-type engineering course dealing with materials reutilization (recycling). The course, consisting of lecture and discussion by various faculty and outside experts as well as student presentations of research papers on recycling topics, is intended

to investigate current areas in which recycling of materials appears feasible. Subjects chosen to be investigated are examined as to the chemistry and physics involved in the recycling process, through a materials science and process engineering viewpoint, and concerning the economics of the situation. It is indicated that this slight modification of the curriculum in metallurgy to recognize future concerns in the area of materials reutilization will allay the need for entirely new programs to deal with the problem. Identifiers—India, Singapore

Engineering education in the countries of India and Singapore is described. The post-secondary engineering program in India is offered at 132 institutions. Admission procedures are explained, as is the curriculum for students interested in production engineering. Descriptions and photographs of some final year projects are provided. In addition, an explanation of graduate engineering programs and the author's observations concerning student behavior are included. The explanation of engineering education in Singapore begins from a historical sketch of the development of the nation from 1961. During the period of 1962 to 1971, industrial employment has increased from 10,500 to 155,000 persons. Post-secondary education and vocational education are described, as well as the university system. At the university level, the manufacturing engineering curriculum is detailed. Also, as for India, the graduate engineering programs and observations of student behavior are provided. (CP)

Paz, Mario

**Mathematical Formalities and Engineering Studies.**

Pub Date Jun 75

Note—14p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Colorado State University, Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Case Studies, College Science, \*Course Content, Curriculum, \*Engineering Education, Higher Education, \*Instruction, Instructional Materials, \*Mathematics, Teaching Methods

The practice of utilizing mathematics instruction, in which only practical engineering applications and not the pure mathematical proofs are stressed, is questioned. Three cases are presented in which students made erroneous conclusions concerning an engineering topic. In each situation, the student violated a mathematical principle which was not evident to him because his instruction had dwelled only on the practical applications of the formulae. (CP)

Descriptors—Bilingual Education, Bilingual Schools, Doctoral Theses, \*Educational Research, Elementary Education, \*Elementary School Science, Instruction, Languages, \*Science Education, \*Transfer of Training

Identifiers—Research Reports

The purposes of this study were to determine if single language instruction was more efficacious than bilingual instruction in a science context and to investigate the transfer of learning science content and process skills from one language to another. Fifth-grade children from four schools in New Mexico who had had bilingual education for at least four years were randomly assigned to one of four treatment groups, and were instructed in subordinate and superordinate units of science. Three dependent measures were administered. Two measures sampled student performance in science activities; one was administered after initial science instruction, the other at the completion of the study. Measures were also administered for student language preference and attitude toward science instruction. The major finding of the study was that there were no significant differences between treatment groups receiving instruction bilingually and those having single language instruction. The students receiving total instruction in English did no better on the dependent measures than those students receiving total instruction in Spanish, and students receiving instruction in both Spanish and English performed just as well as those instructed in a single language. The students showed a statistical preference for a bilingual environment as opposed to a monolingual environment. (Author/MLH)

Identifiers—\*Piaget (Jean), Research Reports

A two-phase study was designed to investigate the relationship between cognitive skills hypothesized (by Piaget) to underlie number competence, and performance on tasks requiring logical reasoning with number-related concepts. During the first phase, a battery of tasks was administered to 60 kindergarten and 60 third-grade students. These tasks were designed to assess acquisition of concepts identified as formally related to various aspects of number concepts. Tasks within a concept area were weighted ac-

cording to their relative importance and degree of difficulty. Data were analyzed using contingency tables. In the second phase of the study, data were reanalyzed using a set of behavioral indices developed by Brainerd in earlier work. The results of the study support Piagetian theories of cognitive development. (SD)

This publication provides guidelines for the operation of an elementary school (K-6) science program curriculum. The report describes the science program which was developed and is in operation in the Montgomery County Public School District (Rockville, Maryland). An emphasis of the program is to maintain continuity between all levels of the school science curriculum. To provide this, an overview of the entire science program is presented, along with sections listing instructional activities, science materials, textbooks, and equipment for each of the three two-year "frameworks" which make up the total program. Appendices list annotated library titles under appropriate content areas as well as library resource books, textbooks, pamphlets, and teacher's guides which are most helpful to instructors in the program. Descriptors—Archives, \*Bibliographies, \*Developing Nations, Information Sources, \*Library Collections, Literature Reviews, Reference Materials, Science Education, \*Sciences, \*Technology

This report updates a previous publication with the same title, issued in March 1972. The purpose of these reports has been to identify and document the services of information sources in the United States which might be of use to those working on policies for science and technology in developing nations. Many of the sources noted in the original edition have been updated and, in addition, several new sources of collections and services have been added. Of the two major sections of this work, the first identifies a number of U.S.-based libraries and organizations with major holdings in fields related to science and technology in developing nations along with a record of some of the smaller, more specialized collections of interest. The second section of this report is comprised of a bibliography of selected references related to the use of science and technology for development. Three main topics: (1) the transfer of technology, (2) industrialization, and (3) small-scale industries are emphasized, these being different from those addressed in the first edition. (Author/CP)

Document Not Available from EDRS

Descriptors—Biological Sciences, College Science, \*Engineering, \*Enrollment Trends, \*Graduate Study, Higher Education, Psychology, \*Sciences

Identifiers—\*National Science Foundation, NSF

This report is based upon the National Science Foundation (NSF) 1975 Quick Response Survey which consisted of a stratified random sample of 1,297 departments in 294 institutions (including 67 medical schools) granting a Ph.D. in science or engineering. Variables investigated were: (1) area of science, (2) full-time enrollment number, (3) part-time enrollment number, (4) type of control (public or private), and (5) level of study (first-year and beyond). Among findings of the survey were: (1) combined full-time enrollment increased four percent between fall 1974 and fall 1975, after increasing nearly five percent the year before, (2) the life sciences showed another growth in enrollment, a phenomenon which has occurred since 1971, and (3) no increase or decrease was observed for enrollment in the physical and mathematical sciences, and psychology enrollment dropped - the only science to do so. Part-time enrollment increased only slightly over the level of 1974. Two-year colleges under both private and public control substantially increased enrollment. (Author/CP)

Descriptors—\*Chemistry, College Science, Evaluation, Higher Education, \*Instruction, Program Descriptions, \*Resource Materials, \*Science Education, Secondary Education, Secondary School Science, \*Teacher Education

Differing somewhat in format from the previous three volumes of this series, this work contains analyses of trends and problems in various aspects of chemistry instruction as presented by authors from around the world, but is printed entirely in English. Materials for this publication resulted from a UNESCO organized International Congress on the Improvement of Chemical Education held in Wroclaw, Poland, September 17-22, 1973. The works of 13 authors appear in this publication; eight papers under the heading of "Factors affecting the design of chemistry courses and programmes," and the remainder being classified as "Trends in other aspects of chemical education." In its entirety, this work is intended (1) to identify and analyze present problems and recent trends in chemical education at all levels, within and outside the formal educational system, and (2) to outline a proposed four-year cooperative plan of action among educational organizations for the further improvement of chemical education. Metrics for Mechanics and Other Practical People.  
Pub Date 75

Note—172p.

Available from—Dos Reals Publishing, 2490 Channing Way, Berkeley, California 94704 (\$4.00, paperback)

Document Not Available from EDRS

Descriptors—Auto Mechanics (Occupation), Craftsmen, Guides, Industrial Arts, Industrial Education, \*Manuals, Measurement, \*Metric System, \*Post Secondary Education, \*Practical Mathematics, \*Vocational Education

This handbook on the metric system is printed in a large type for ease of reading. It includes several tables of often-used facts. A brief background of the metric system is presented, followed by chapters on metric uses with electricity, length, pressure, temperature, threaded fastenings, tools, torque, volume, and weight. Each chapter provides a brief background of the metric concept followed by straightforward explanations of how to convert between metric and U.S. measures (using multiplication only). The handbook is directed toward mechanics and other craftsmen who seek a quick solution without any mathematical explanation. (JBW)

Maney, Catherine M.  
An Effort to Produce a Recommended List of Elementary Metric Materials.

Pub Date 1 Sep 75

Note—131p.; Maxi II Practicum Report submitted in partial fulfillment of the requirement for the degree of Doctor of Education, Nova University; Occasional marginal legibility

EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage

Descriptors—Audiovisual Aids, Cost Effectiveness, Elementary Education, \*Elementary School Mathematics, Evaluation, \*Instructional Materials, Mathematics Education, Mathematics Materials, Measurement, \*Metric System, Program Descriptions, Research, \*Resource Materials, \*Textbook Evaluation

The purpose of this study was to produce a list of materials for metric instruction in the elementary school. The Charles H. Taylor School in Boston was used as a laboratory for the collection, study, and evaluation of published metric materials. Problems inherent in the introduction of the metric system in four dissimilar elementary schools were studied. The main concerns focused on staff training and conversions, pupil incentives, and community/parental support and involvement. A primary administrative concern is that of finding money to purchase texts and materials for metrication. This paper describes the preliminary steps involving suppliers, staff, community, and school personnel, as well as procedures involving faculty and students for

evaluating materials and programs. The paper includes a recommended list of the metric materials and aids judged to be most worthwhile for use in the elementary school. It was also recommended that a faculty review and use the materials before ordering them; that materials be learner-tested; that resource rooms to established and materials be shared to reduce costs; and that descriptive cost-analysis lists be distributed to assist in the purchase of cost-effective metric materials. (JBW)

 Descriptors—\*Consumer Economics, \*Consumer Education, Curriculum Development, Instruction, \*Instructional Materials, Program Development, Secondary Education, \*Teaching Guides, \*Trade and Industrial Education

This supplemental guide was developed for the purpose of assisting secondary school teachers in the teaching of trade and industrial resource-related consumer education topics. Six main units of instruction are presented: (1) the economic system; (2) income procurement; (3) consumer behavior determinants; (4) consumer alternatives; (5) roles, rights, and responsibilities; and (6) community resources. For each unit, specific teaching topics, along with objectives, student activities, and suggested resources, are provided. Selected bibliographies of books, pamphlets, periodicals, and audiovisual materials are also presented. (CP)

Descriptors—\*Consumer Education, Course Descriptions, \*Curriculum Development, Instructional Materials, \*Laboratory Experiments, \*Science Activities, Science Education, Secondary Education, Secondary School Science, \*Teaching Guides

In this monograph, the implementation of consumer education topics into the science curriculum of secondary schools is advocated. Not only is the need for such activities explained, but several suggested instructional topics are provided. One area of recommended study is that of product comparison. A model outline of operation is provided, along with an example involving comparisons of shampoos. (CP)

Descriptors—Curriculum, Elementary School Mathematics, \*Elementary Secondary Education, Guidelines, \*Mathematics Education, Measurement, \*Metric System, \*Planning, Post Secondary Education, \*Research Reviews (Publications), Secondary School Mathematics  
 Identifiers—AIR, American Institutes for Research, \*National Institute of Education, NIE

This report reviews the findings of two projects funded by the National Institute of Education (NIE) and conducted by the American Institutes for Research (AIR). The project reports, "Going Metric" and "Metric Inservice Teacher Training," document the impact of metric conversion on the educational systems of Great Britain, New Zealand, Australia, South Africa, and Canada in order to provide educators and other planners with guides for preparing a national conversion program. Three vital needs were identified for a successful conversion policy in the U.S.: (1) a broad-scale involvement of all major elements in early planning, (2) a committed government policy and firm schedules, and (3) continued communication and coordination as conversion progresses. Recommendations include: (1) the creation of a national evaluative body that would establish clear uniform standards for metric educational materials; and (2) a coordinated teacher

training strategy, with direct communication links with teachers and provisions for feedback on metric curriculum materials. (JW)

 Descriptors—\*College Science, Course Content, \*Course Descriptions, Curriculum, Demonstrations (Educational), \*Engineering Education, Higher Education, \*Instruction, \*Physical Sciences, Science Education, Social Problems

Described is a course designed for engineering science and natural science freshmen and open to upperclass nonscience majors entitled "Science of Modern Materials" and which has been successfully presented for several years. This paper presents the philosophy behind the course, the teaching methods employed, and the content of the course. The course has a large scope, starting with water and the decomposition of igneous earths, including wood and wood products, cements, stones, vitrified products, metals and alloys glasses, plastics, semiconductors, and ending with ecological problems originated by materials generated pollution. The relation of structure and property is the theme followed through all but the ecology part of the course. This course attempts to intrigue the nonscience major by showing him how he lives with and depends on materials and how he or his representative will be responsible for laws regulating these materials in the future. In the final exam, the student must decide between several materials from which to erect a pole on his property on the basis of the ecological damage of maintaining the pole. The syllabus of the course indicates the demonstrations and teaching aids that were used. (LS)

Identifiers—Old Dominion University  
 This paper describes a program at Old Dominion University (ODU) which engages qualified graduate students in a professional research/design experience while simultaneously providing the academic environment for full-time study. During the two years, students are provided a stipend and tuition expenses under a study grant from the National Aeronautics and Space Administration Langley Research Center (NASA/LRC), Hampton, Virginia. Masters students and a few Ph.D. students are selected for the program. During the second year, students engage in actual engineering research and design at NASA/LRC. Sections of the paper describe (1) the ODU interdisciplinary approach to graduate aeronautics education, combining strengths from major engineering disciplines; (2) methods of student selection, study program planning, placement in NASA/LRC branches, student advisement, and research supervision; (3) degree production and current status of program; and (4) reception of the program by NASA management and engineers, the engineering faculty, and the students in the program. Evidence presented indicates that mutual benefits from the program accrue for the students, the engineering school, and the cooperating agency. (LS)

**Engineering Education Projects for Improving Agriculture in Developing Countries.**

Pub Date Jun 75  
 Note—17p.; Paper presented at the Annual Meeting of the American Society for Engineering

Education (Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
**Descriptors**—Agricultural Colleges, \*Agricultural Engineering, \*Agricultural Research Projects, \*College Science, Curriculum Development, \*Developing Nations, \*Engineering Education, Food, Higher Education, Science Education

Agricultural engineers have been working for a number of years with colleges and universities in many developing countries to improve their agriculture. Much of the activity in university development assistance has been taken over the last 20 years. The greatest portion of the support has come from USAID. Among the common problems facing the programs were: (1) the method of financing on a year-to-year basis; and (2) teaching, research, and extension were rarely under one administrative unit. The first official agreement covering a United States sponsored university contract was signed in 1952. During the next 20 years, six American universities became involved. By 1972, India had established nine new agricultural universities patterned after our land-grant institutions. The program was phased out during 1972 and 1973 at the request of the Indian government. The overall objective of the United States university contract program was to help India develop state agricultural universities with colleges of agriculture, veterinary medicine, agricultural engineering, home science, and basic sciences and humanities. Insight is given as to how a College of Agricultural Engineering was established. (LS)

**The Development of a Continuing Education Program for Mid-Career Professionals.**

Pub Date Jun 75

Note—30p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**  
**Descriptors**—Computers, \*Cybernetics, \*Educational Television, \*Engineering Education, \*Graduate Study, Higher Education, \*Interdisciplinary Approach, Problem Solving, Science Education

**Identifiers**—San Jose State University

The Master's Degree Program in Cybernetic Systems was proposed a decade ago as an interdisciplinary problem-solving oriented educational effort. Implemented seven years ago, it has developed into a successful continuing education vehicle for mid-career professionals. Those proposing the program recognized that without guidelines to follow, it must be developed using feedback gained from students, faculty, and professionals. As presently offered, the program is flexible and open-ended in terms of electives and theses topics. Graduates have developed emphases in a wide range of subject matter and have applied their newly learned tools to improve their current situations or to redirect their careers. Out of the 100 graduates, about 30 have engineering backgrounds. Some of the coursework is delivered over instructional television (ITV) via the Association for Continuing Education (ACE) and the Stanford ITV Network. It is anticipated that ACE will assume a regional leadership role in the certification and recertification of professionals. It is believed that the concepts of the cybernetic systems program will be extended to levels of education both below and above that of the current master's level. (LS)

**The Development of a Computerized Model for Teaching Engineering Statistics.**

Pub Date Jun 75

Note—18p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
**Descriptors**—Autoinstructional Aids, \*Computer Assisted Instruction, \*Engineering Education, \*Higher Education, Instruction, \*Mechanics (Physics), \*Problem Solving, Science Education

Engineering mechanics is recognized as one of the core subject matter areas of most engineering and technology educational programs. The study of mechanics and particularly the applications of

problem solving to rigid bodies at rest (statics) has proven to be troublesome to students. Systematic problem solving includes analysis, synthesis, and calculations. There is evidence to indicate that students gain broader insights into analysis and synthesis when freed from detailed computational method. The computerized model relieves the students of the mechanics of calculation and checks the students' analysis and synthesis of a broad range of statics problems on an individualized basis. The function and structure of the model is discussed. Two populations of students were used in testing the model. One group consisted of eight sophomore engineering students, who had completed a computer programming course. The second group consisted of 27 freshman technology students who had not completed a computer programming course. The overall attitudes of both groups were positive toward the model on the pretest. Engineering students became more positive on the posttest. Technology students became significantly negative on the posttest. It was suggested that technology students probably would have gained more from the model if they also had had to turn in problems. (LS)

**Teaching Fluid Mechanics to the Beginning Graduate Student—An Objective-Oriented Approach.**

Pub Date Jun 75

Note—21p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
**Descriptors**—\*Behavioral Objectives, College Science, Curriculum Development, \*Engineering Education, \*Graduate Study, Higher Education, \*Instruction, \*Mechanics (Physics), Program Descriptions, Science Education

**Identifiers**—University of Missouri-Columbia  
 A premature embarkment in specialized areas of fluid mechanics by the beginning graduate student, without having first thoroughly learned the basics, leads to learning difficulties and destroys zeal for learning. To avoid these problems, many schools in the U.S. offer beginning graduate courses in fluid mechanics (BGC FM). Because the success or failure of BGC FM has a profound effect on the students' subsequent learning, these courses must be planned according to specified objectives. The following include the goals of BGC FM: (1) review basic concepts; (2) introduce new concepts; (3) survey entire field; (4) learn state-of-the-art; and (5) study necessary math. At the University of Missouri-Columbia, these goals are accomplished in a series of two courses: Fundamentals of Fluid Mechanics (I) and Hydrodynamics (II). Course I is devoted to the first two goals and Course II to the last three. The specific objectives of Course I and Course II are given. The objective-oriented instruction described involves (1) the writing of a list of goals and objectives of the course, (2) distribution of the list to students, (3) conventional teaching, and (4) reevaluation of the list at least once a year. **Student Prepared Case Studies—The Missing Leg.**

Pub Date Jun 75

Note—33p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**  
**Descriptors**—\*Case Studies, Curriculum Development, \*Engineering, \*Engineering Education, \*Graduate Study, Higher Education, \*Instruction, Science Education

In the Engineering Case Program conducted by the Projects Board of the American Society of Engineering Education (ASEE), the ideal educational program is supported by: (1) content, science, and lore; lectures and programs; (2) observations of practice; case histories, plant tours; and (3) doing jobs; projects. This tripod model of engineering education requires that all three legs be present for the educational system to stand. This paper presents one way that the observation leg, the weakest element in most engineering education programs, can be strengthened. The use of engineering case studies, particularly at the graduate level, has been described as an

academic/professional link which is an alternate way of defining the observation leg of the tripod. Case studies offer a way for students to learn about and empathize with the real world. At both the Berkeley and Davis Campuses of the University of California, students can choose to write a case study as a portion of their Master of Engineering program. After meeting several times with their faculty advisor and the project engineer, they write the case study. An appendix includes portions of two student prepared case studies and a list of student-written cases. (LS)

This report examines a project design for land degradation problems in the northern and upper regions of Ghana. The project was jointly sponsored by the Ghana Council for Scientific and Industrial Research and the Agency for International Development. The council is responsible for coordinating the activities of 10 independent research institutes. Furthermore, the council advises the government on the use and conservation of Ghana's natural resources and how to employ scientific research in these matters. Using a multidisciplinary, multi-institutional design, the council brought the scientific community together to study poor land use practices in the savannah regions. The Ghana project design combined or organized problem-solving methodology and a multidisciplinary team approach to produce a unique resource research program. (MR)

**Document Not Available from EDRS**

**Descriptors—**College Science, \*Curriculum Development, Energy, \*Engineering Education, Higher Education, Instruction, \*Manpower Needs, Nuclear Physics, Radiation, Safety, Science Education

**Identifiers—**\*Nuclear Energy

Nuclear safeguard systems, their operation and implications for future manpower needs, and the need for these topics to be integrated into the engineering education curriculum, are focused on in this paper. The elements of a safeguard system and factors influencing the selection of a particular system are presented. Projections concerning the use of nuclear Power in the 1980's are cited as evidence of the need for engineering courses specializing in this area. The author states that while all engineering students should receive a "general orientation" to the topic, the low number of engineers electing nuclear materials safeguards as a profession will limit the feasibility of semester courses in materials and safeguards to a few institutions which are strong in the teaching of the nuclear fuel cycle and fuel management. **Identifiers—**\*Western Australian Institute of Technology

A review of the grading practices of various departments in the Western Australian Institute of Technology is the topic of this paper. The study was initiated in 1969, when an examination of scores given by various departments revealed a large year-to-year fluctuation. It was noted that some departments consistently graded higher than others. A historical account of the study, with graphs showing the grading inequities, is provided. The inception of a "standard grading distribution" and problems which resulted from its implementation are also described. Due to the number of arbitration situations in which students questioned their grades, a computer program was

developed which made examination and student academic information available to arbitrators. The author states that his addition of an easily accessible information network has greatly increased the efficiency of the grading system. (CP)

A program designed to increase student interest and provide motivation in a third-year systems and measurements laboratory in mechanical engineering is provided. The philosophy of the course, instructional techniques, equipment design (including schematics and photographs), suggested activities, and student reactions to the course are presented. An elimination of much "black box" electronic equipment in favor of transparent, simple, yet functional, laboratory equipment is advocated. (CP)

A Resident Engineer.

Pub Date Jun 75

Note—30p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Colorado State University, Ft. Collins, Colorado, June 16-19, 1975); Occasional light print

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**  
Descriptors—Aerospace Education, \*College Science, Curriculum Development, \*Engineering Education, Higher Education, \*Industrial Personnel, Industrial Relations, \*Industrial Training, Instruction

This paper examines the work of resident engineers in a university setting. The need for engineers with industrial experience is established, and the benefits of using resident engineers in training programs are cited. Attributes and problems associated with the practice are studied from the viewpoints of industry, government, universities, and the engineer himself. (CP)

Program Fighter - An Evaluation.

Pub Date 75

Note—17p.; Paper presented at the Annual Meeting of the American Society for Engineering Education (Colorado State University, Ft. Collins, Colorado, June 16-19, 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—\*Aerospace Education, College Science, \*Computer Assisted Instruction, \*Computer Programs, Course Descriptions, \*Engineering Education, Higher Education, Instruction, \*Instructional Materials, Teaching Methods

Described is a computer program for the sizing of subsonic and supersonic fighters which has been adapted for use in an aerospace engineering design course. Following a description of the program, an evaluation of its use in the university is presented. It is concluded that computer programs for the conceptual design of aerospace vehicles can play a very important part in design education. First, they give the students an overview of the conceptual design process, and second, they illustrate the capabilities of computers in design. The latter is becoming more important as time goes on because industry is moving in this direction. (Author/CP)

Basic Research in One Phase of Competency Development in the Preservice Training of Elementary Science Teachers.

Pub Date [75]

Note—22p.; Occasional light print

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—\*Educational Research, Elementary School Science, \*Elementary School Teachers, Higher Education, Instruction, \*Performance Based Teacher Education, \*Preservice Education, Science Education, \*Science Teachers  
Identifiers—Research Reports

Presented is a description of a research project related to the use of two modes of instruction, the abstract mode and the applied mode, and gains made from them. A secondary purpose of the investigation was to compare student gains according to area of interest. The writer selected one of the processes of science, the process of measuring, which she considered basic to the new approach in the teaching of elementary science. Preservice elementary school science teachers participated in the study. Data were secured from four elementary science education methods classes. The curriculum, Science - A Process Approach, was used for the instructional materials in the study. The testing portion of the study

represents all of the competencies included in the Process of Measuring of the entire program. Tests were constructed and administered. Difference scores were obtained between pretest and posttest administration. It was determined that students enrolled in the methods classes gained more competence from an applied mode of instruction than from an abstract mode. The classification level of students caused no significant difference in learning outcomes as related to the process of measuring. Science oriented students make more significant competency gains by both methods than language art or social studies students. (EB)

**Descriptors**—\*Annotated Bibliographies, Bibliographies, Classification, Curriculum Development, \*Curriculum Evaluation, Elementary Secondary Education, Instructional Materials, Learning Activities, \*Moral Development, Resource Guides, Social Sciences, \*Social Studies, Teacher Education, Teaching Techniques, Typology, \*Values

This is a resource guide for teachers, curriculum coordinators, curriculum developers, teacher trainers, and other educators interested in values education. The volume is the revised and expanded edition of ED 103 284. An introduction outlines and explains the guidelines used to formulate and organize the analyses of values educational materials. Chapter one presents an overview of the typology of values education approaches developed in the earlier publication and three procedures designed to help users apply the analytical system. Chapters two through six contain the analyses of curriculum resources. Each chapter focuses on one of the five values education approaches: inculcation, moral development, analysis, clarification, and action learning. Each is divided into three sections: a detailed explanation of the approach, analyses of student materials reflecting the approach, and analyses of teacher materials reflecting the approach. Chapter seven describes and explains two other approaches to values education—evocation and union—for which there are few curriculum materials presently available. These two approaches are explained in terms of their rationale, purpose, and methods. In addition, sample learning activities and educational programs related to these two approaches are discussed. An annotated bibliography of over 400 materials and resources concludes the document. (Author/JR)

**Political Orientations: Comparing Japanese in Portland and Japan.**

Pub Date 75

Note—12p.; Paper presented at the Conference of the Asian Studies on the Pacific Coast East-West Center (Honolulu, Hawaii, 1975)

Available from—Ralph Bunch, Political Science Department, Portland State University, Portland, Oregon 97207 (\$1.00)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Asian Americans, Comparative Analysis, Democratic Values, Environmental Influences, Family Influence, Generation Gap, \*Japanese Americans, \*Political Attitudes, \*Political Influences, Political Science, \*Political Socialization, Social Science Research  
**Identifiers**—\*Japan, Oregon (Portland)

The purpose of this study is to compare data on sample groups of Japanese, Japanese Americans, and Americans from three separate sources to determine political orientations and the socialization influencing the Japanese Americans' attitudes. The study ascertains whether the social-geographical environment or the family and other primary groups influence the orientations of Japanese Americans. Inquiry was limited to attitudes about majority rule and minority rights. Questions asked were: (1) what are the relative proportions of support for democratic precepts among Japanese, Japanese Americans, and other Americans; and (2) are the age/generation differences within these three groups similar in direction and extent. Although there are strong similarities in orientations, it was found that elder Japanese Americans are more like their cohorts in Japan than like Americans, but that younger Japanese Americans are more "American" than a cross section of non-Japanese Americans. Thus, it seems that cultural predispositions to political behavior are transferred through the family and other primary groups or socialization agents. Also, orientation discrepancies are due probably to generational differences rather than environment. (Author/ND)

Intended for students at the intermediate and junior high grades, this interdisciplinary unit contains seven lessons on the history of the government of Indians. Each lesson includes its objectives, activities, and evaluation. The activities consist of values clarification exercises, role playing, and creative writing. It is necessary that the lessons be taught in order so that students can understand the time line of the past, transition period, and present. Topics covered in the unit are The Great Confederacies, Treaty Period 1789-1871, Reservation Period 1871-1887, Allot-

ment Period 1887-1934, Reorganization Period 1934-1953, Termination Period 1953-1970, and Self-Determination Period 1970-present. Materials for some of the activities are reproducible as student handouts. An accompanying cassette tape is available from Audiovisual Center, Black Hills State College, Spearfish, South Dakota 57783 (\$1.50). (ND)

**Identifying and Controlling the Effects of Biases in Criminal Trials by Jury.**

Pub Date Dec 75

Note—12p.; Paper prepared for annual meeting of Speech Communication Association (Houston, Texas, December 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Bias, \*Court Litigation, Court Role, Courts, \*Criminal Law, \*Discriminatory Attitudes (Social), Due Process, \*Equal Protection, Justice, Laws, Lawyers, Legal Problems, Speeches

Three changes in trial procedure are proposed to minimize the effects of individual juror bias and those biases that are artificially induced by lawyers. Since certain personality types are likely to maintain whatever prejudices they bring to court, no one should be exempted from jury duty unless he is mentally retarded or physically incapacitated in a way that makes jury service impossible. This would not eliminate juror bias but would broaden the venire in order to more accurately reflect the biases of the total community. Second, since most jurors have a verdict in mind before they leave the jury box, unanimous verdicts should be eliminated. This would decrease the effect of individual biases of either the majority or minority in jury deliberations. Third, lawyer-derived biases may be eliminated by doing away with both cause and peremptory challenges. Too often lawyers use jury selection as means to seat jurors who have biases favorable to their side of the case. Also, in many cases, prospective jurors learn to give the "right" answer, glossing over their actual feelings. (Author/DE)

**The Use of Social Studies Concepts in Curriculum Development. Revised.**

Pennsylvania State Dept. of Education, Harrisburg. Bureau of Curriculum Services.

Pub Date 75

Note—30p.; For original version of this document, see ED 081 706

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—Affective Objectives, Anthropology, Cognitive Objectives, \*Concept Formation, \*Curriculum Development, Economics, Elementary Secondary Education, Generalization, Geography, History, \*Intellectual Disciplines, Interdisciplinary Approach, Models, Political Science, Psychology, \*Social Sciences, \*Social Studies, Sociology

This publication, a revised edition of ED 081 706, contains a conceptual framework for social studies curriculum development. The social science disciplines—anthropology, economics, geography, history, political science, psychology, and sociology—are considered resources for providing the key concepts, insights, and methods of inquiry enabling students to gain a better understanding of present and past societies and cultures. The framework, which comprises the major portion of the document, provides the following information on each discipline: (1) the major cognitive concepts, (2) a list of generalizations or ideas around which the concepts can be organized, and (3) an example to illustrate the development of a single concept into performance objectives and suggested teaching strategies. A model, showing how to develop an interdisciplinary unit on Poverty in America, cites concepts, skills, performance objectives, and suggested teaching strategies for accomplishing the objectives. The document also contains a brief list of affective concepts and a list of social studies processes. Although much of the material in this document duplicates that of ED 081 706, a few new concepts for most disciplines have been added. The section on psychology has been completely rewritten, and the section on the development of an interdisciplinary unit has been heavily revised. (RM)

**On the Study of Nationalistic Education.**

Pub Date 75

Note—18p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Citizenship, \*Democratic Values, Educational Research, Elementary Secondary Education, \*Nationalism, Political Attitudes, Political Issues, \*Political Socialization, \*Research Needs, \*Social Studies, Speeches, Values

This paper proposes that research and scholarship regarding nationalistic education be encouraged in order to increase our understanding of this form of values education. Nationalistic education, defined as those educational activities designed to develop a belief in national values, usually incorporates three dimensions: (1) development of positive feelings toward those rituals, ceremonies, symbols, and persons which express or incorporate national values; (2) development of competency in operating as a national citizen; and (3) development of negative feelings toward countries, ideologies, symbols, and persons which are considered contranational. Since all three aspects are value laden, their uncritical indoctrination for national ideals must not be left unexamined. Some of the studies conducted in this field and suggestions of several kinds of research that can contribute to this study are described. These include historical research, current documents study, text and materials analysis, censorship investigation, sociopsychological instrument development and use, interviews, and longitudinal attitude studies. **"Regional Crisis": A Simplified Teaching Simulation.**

Pub Date Nov 74

Note—21p.; Paper presented at the annual meeting of the Southern Political Science Association (New Orleans, Louisiana, November 9-11, 1974)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—Conflict Resolution, Decision Making, \*Foreign Policy, Foreign Relations, Higher Education, \*Middle Eastern Studies, \*Political Science, Secondary Education, \*Simulation, Teaching Techniques, \*World Problems

A simulation designed for an introductory college-level international politics and comparative foreign policy course is described. Regional Crisis requires student decision-maker diplomats, grouped in teams, to respond to a Middle Eastern crisis that has substantial potential for escalation. In response to an initial crisis scenario, student teams representing various Middle Eastern countries suggest policy decisions based on the expected costs, risks, and gains that may be expected from the implementation of such policies. Students representing members of the United Nations and an international newspaper encourage the student diplomats to publicly defend their country's policies with moral and legal statements and reasoning. All policy decisions take the form of treaties with other nations. A team is considered successful or effective by the degree that it achieves all or most of its goals. The game teaches the utility of the cost-risk analysis model for both the planning and evaluation of policy decisions. Teacher guidelines, student guidelines, and sample student materials are also included. (Author/DE)

**Differences in Social Distance Attitudes between Groups of Middle and Lower Social Class Preservice Teachers toward Minority and National Groups.**

Pub Date [75]

Note—12p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Discriminatory Attitudes (Social), Educational Research, \*Educational Sociology, Minority Groups, \*Social Class, Social Differences, Social Discrimination, \*Social Influences, Social Relations, Student Attitudes, \*Teacher Attitudes, Teacher Education

Social-distance attitudes of preservice teachers from middle and lower social classes toward minority and national groups are examined. Social distance, the aloofness and unapproachability of persons of different social strata, is both a symbol of class standing and a means of maintaining the existing distinctions in rank. The Bogardus Social Distance Scale was administered to 251 Mankato State preservice teachers who responded to the degree of intimacy they would allow to members of outgroups. Social-distance attitudes of preservice teachers from upper-middle and lower-middle, upper-middle and lower, and lower-middle and lower social classes were measured. The effect of educational home background (high-school diploma or partial college) on the difference in social distance attitudes was also considered. The results indicate that teachers from the upper-middle social class tend to have a significantly greater social distance attitude toward minority and national groups than teachers from either lower-middle or lower social classes. The social-distance attitudes of the preservice teachers toward minority groups appear to be related functionally to the social status positions of the teachers' families as defined by educational attainment. (Author/DE)

**Macro and Micro Implementation.**

Report No—P-5431

Pub Date May 75

Note—17p.

Available from—The Rand Corporation, Santa Monica, California 90406 (\$1.50)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Change Agents, \*Change Strategies, \*Educational Change, Educational Development, \*Educational Innovation, Educational Needs, \*Educational Planning, Educational Sociology, Educational Strategies, Elementary Secondary Education, Local Issues

Drawing from an analysis of educational innovation attempted in 200 school districts throughout the United States, this essay describes critical aspects of the implementation process. Four micro-level premises are critical to larger macro-level change policies. First, external inputs into the implementation process must be congruent with local needs, capacities, and preferences. Second, effective implementation of significant change is characterized by the process of mutual adaptation. This may include the modification of goals, technologies, behavioral change in students and teachers, and evaluation plans. Third, effective implementation depends

on the receptivity of the institutional setting to change. Indifferent and unreceptive environments are most frequent and fail to provide necessary support for change. Fourth, local school systems vary not only in their receptivity to change but also in their capacity to innovate; therefore, they can be expected to experience different implementation problems for the same class of innovations. Suggested implications for macro-level planning and implementation are briefly described. (Author/DE)

**University Students Experiences and Perceptions of High School Sociology.**

Pub Date 28 Aug 75

Note—15p.; Paper presented at the Annual Meeting of the American Sociological Association (San Francisco, California, August 1975)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Curriculum Development, Educational Improvement, Educational Problems, Educational Research, \*High School Curriculum, Secondary Education, \*Social Studies, \*Sociology, Speeches

The status of sociology at the secondary level is reviewed in this paper. Currently, instruction in the social sciences plays a minor role, as most social studies programs consist more of history than any other discipline. To determine the nature of their high school training in sociology and to determine whether their current university course was a duplication of what was received in high school, introductory sociology students from three Michigan universities responded to a questionnaire. The results indicate that two-thirds of the students had no sociology or related course in high school. For those few students who had a sociology course, it was usually a one-semester elective in which the content differed greatly from their introductory college sociology course. Sociological Resources for the Social Studies, a major secondary-level sociology curriculum project sponsored by the American Sociological Association, was identified by less than one percent of the respondents. University instruction in teaching sociology at the high-school level is recommended to help solve this problem. (Author/DE)

Descriptors—\*African Culture, \*African History, \*Area Studies, Art, Bibliographies, Craftsmen, Elementary Secondary Education, Ethnic Grouping, Glossaries, Interdisciplinary Approach, Natural Resources, Philosophy, Recreation, Religion, Resource Materials, \*Social Studies, Teaching Guides, Transportation Identifiers—Elisofon (Eliot), \*Ethnic Heritage Studies Program

This guide for secondary teachers focuses on sub-Saharan (Black) African history and culture. Although the guide is intended to be used in conjunction with the audiovisual materials on African heritage produced by the Museum of African Art, it can also be used as a source of background reading for teachers and as a guide to additional teacher/student resources. The audiovisual component of the program, drawn from the Museum's Elisofon Photo Archives on Africa, is intended to serve as a supplement to existing curricula on Africa and as a basis and motivation for related activities and projects for individual student research. This Teacher's Manual provides short background readings on the 15 major subject areas treated in the materials: physical environment, natural resources, history, government, ethnic diversity, religion and philosophy, the arts, architecture, dress, education, work, economics and trade, communication, transportation, and recreation. Also included in the manual are descriptions of and scripts from the audiovisual program component, objectives and suggested classroom activities to help teachers develop units of study around the audiovisu-als, and bibliographies of books and journal articles. Although intended to be used in junior and senior

high schools, these materials can be adapted to other education levels. (RM)

Descriptors—\*Change Agents, Change Strategies, Community Change, Community Development, \*Community Influence, \*Community Involvement, \*Community Leaders, Decision Making, Organizations (Groups), Participation, \*Power Structure, Social Change, Social Characteristics, Social Status, Sociology

This paper focuses on defining and comparing four approaches for identifying the community's power actors. It outlines how professional change agents might use each of the four approaches to identify community power actors who are relevant for community development. The four approaches include the positional, the reputational, the decision-making, and the social participation. The positional approach assumes that the power to affect community decisions rests in the important positions of formal organizations in the community. The reputational approach identifies power actors behind-the-scenes who have a reputation for influencing decision making. The decision-making approach emphasizes the actual participation in decisions as the criterion for identifying community power actors. The social participation theory holds that power to affect community decisions is acquired through participation and office holding in the community's voluntary associations. Since each of the approaches contains limitations and tends to identify a different type of power actor, a combination of the four approaches is recommended for professional change agents. Specific techniques for applying each of the approaches are described. (Author/DE)

Identifiers—\*National Assessment of Educational Progress

This volume contains social studies assessment data and exercises from the National Assessment of Educational Progress (NAEP). NAEP is an information-gathering project that surveys the educational attainments of 9-year-olds, 13-year-olds, 17-year-olds, and adults (ages 26-35) in 10 learning areas, one of which is social studies. Different learning areas are assessed every year, and all areas are periodically reassessed in order to measure educational change. This volume contains all the social studies assessment data which have been collected, scored, and analyzed to date and copies of approximately one-half of the social studies exercises that have been used in past assessments. Not included in this document are those social studies exercise tests which the National Assessment will administer again in the future to determine whether the performance level of Americans has improved or declined. However, the objectives that were measured by these unreleased exercises and their percentage results are presented. For exercises that have been released, this volume provides an exact copy of the exer-

cise, complete documentation about administration and scoring procedures, and the percentage results for the national sample and each of the subpopulation reporting groups. Researchers who need detailed information about the exercises and state and local educators who want to use NAEP exercises in their own assessment program will find this documentation useful. Descriptors—\*Child Development, Elementary Secondary Education, \*Family Characteristics, Family Environment, Interaction Process Analysis, Measurement Instruments, Parent Child Relationship, \*Public Housing, \*Research Design, Research Tools, Social Environment, Social Science Research, \*Statistical Analysis, Statistical Studies

The first part of a three-volume study, this report presents and justifies a research design for investigation of the relationship between the housing environment and the range of child development and family measures. The recommended design is nonexperimental in nature and focuses on comparisons of residents in selected housing programs (publicly supported residential housing complexes). In chapter 1 the results of a computer simulation of the entire investigation are used to calculate optimal decision rules for the conduct of the study. Basic problems of inference that are associated with investigation of the interaction of human subjects with their environment are reviewed in the context of independent variables in chapter 2. Chapters 3 and 4 deal with nonexperimental and experimental approaches respectively, with major emphasis given to the description and documentation of the recommended nonexperimental approach. The final chapter presents recommended instruments for the measurement of the cognitive, socioemotional, and physical development in subject children, plus supplementary measures of family well-being. Three appendices provide descriptions of the instruments and documentation of the simulation study. (Author/ND)

Descriptors—Facilities, \*Federal Programs, Goal Orientation, Low Rent Housing, \*Public Housing, Public Housing Residents, Research Design, \*Research Methodology, Social Science Research, Socioeconomic Background, \*Statistical Surveys, Tables (Data)

The second report of a three-part study, this volume presents the results of an extensive survey of certain federally subsidized housing programs. The survey was designed to identify individual housing projects that meet the requirements of the design described in volume 1 (SO 008 879). The requirements relate to the socioeconomic characteristics of residents of both the project and its neighborhood, the number of potential subjects satisfying the socioeconomic requirements, and regional, educational, and physical variables. The major portion of the document presents data in summary form and in the form of individual project descriptions. Procedures and methods used to select the programs and to survey the described projects are provided. In the appendices, principal findings of the survey are given as they relate to feasibility of the research design and to contribution of the Rent Supplement program to the realization of goals.  Descriptors—Anthropology, Disadvantaged En-  
 vironment, \*Environmental Influences, \*Litera-  
 ture Reviews, \*Low Rent Housing, Public  
 Housing, Research Reviews (Publications),  
 Slum Environment, Social Environment, Social  
 Science Research, \*Socioeconomic Influences,  
 Sociology, Urban Renewal

As the final part of a three-volume study, this review focuses on housing as an instrument of environmental change with particular emphasis on socioeconomic rather than physical dimensions. Three literature orientations relating to the effectiveness of intervention in the lives of the poor are used for review. They are (1) literature that is planning-oriented and concerned with the impact of urban renewal and redevelopment on central city communities, (2) literature that analyzes the low-income public housing programs in the United States by concentrating on the social goals, and (3) sociological and anthropological research literature concerning Oscar Lewis' "culture of poverty" concept. The impact of the housing environment is analyzed along several dimensions: child and family health, intellectual and achievement state in both child and parent, family interaction patterns, neighborhood and organizational participation, and juvenile delinquency. Each dimension is treated in a separate chapter. In addition, chapter 1 places specific aspects of environmental change in a broader cultural context of poverty, and the conclusion summarizes the findings of the chapters both individually and together. Descriptors—\*Curriculum Development, Decision Making, Economics, \*Educational Alternatives, Elementary Secondary Education, \*Futures (of Society), Planning, Politics, \*Problem Solving, \*Relevance (Education), Social Studies, Technological Advancement, World Affairs

In this report from the National Education Association's "Developments in Classroom Instruction" series, the need to mandate immediate training of our young people in alternative problem solving for the future is examined. The emergence of multiple threats to human survival, rapid rate of social change, and complexity that has overtaken our society on a global scale are causing this need. It is emphasized that traditional educational practice tends to be concerned with the problems and conditions of the past, rather than with the decisions of tomorrow. Thus, in order for positive decisions to be made, the traditional pattern of education must expand in the direction of a reformed cognitive curriculum. The reformed curriculum should include the examination of key issues such as global problems, economy, politics and government, and science and technology. This future-studies movement involves a broad spectrum of teachers from all grade levels and subject areas, and it incorporates a wide range of new curriculum materials and ideas. This means that teachers can design their own curriculum units to suit their concerns and the interests and experience of their students. (Author/ND)

**Suggested Materials and Themes for a Study of Population in Secondary Social Studies.**  
 Pub Date Aug 73

Note—194p.; Master's Thesis, The University of Texas at Austin

**EDRS Price MF-\$0.83 HC-\$10.03 Plus Postage**  
 Descriptors—Annotated Bibliographies, Demography, Educational Resources, Environmental Education, Instructional Materials, Learning Activities, \*Masters Theses, \*Population Education, \*Population Trends, Secondary Education, \*Social Studies, Teaching Techniques, \*World Geography

The main objective of this thesis is to suggest materials for use in secondary social studies classrooms for improvement of instruction on population and world geography. The thesis provides background information on population, a listing of sources where additional information can be found, and major generalizations, discussion questions, and related activities which can be used in the classroom. Annotated bibliographies of available materials are organized within broad subject categories, including basic teacher references, organizational sources of additional population information, suggested themes for a study of population, and solutions to the population problem. Each category begins with an author commentary and follows with the bibliographic information. Entries are alphabetized by author and include title, publisher, and date. Extensive annotations are presented, giving the reader an idea of the breadth and scope of the individual materials. (Author/JR)

Descriptors—Books, \*Community Change, Community Development, Community Planning, Community Programs, Guidelines, Higher Education, \*Human Services, \*Innovation, \*Organizational Change, Psychology, \*Social Action, Social Change, Social Sciences, Social Services, Social Work, Sociology

To effectively promote change in organizations and communities, specific strategies or action guidelines and some tactical steps for effectively carrying out these strategies are offered for people who work in human service agencies. The book is useful to both practitioners in the field and upper-division graduate students. The action guidelines, derived from basic social science research findings, are general principles that may be used by a variety of people concerned with organizational and community change. Four principles of intervention, or action guidelines, are considered: promoting an innovative service or program, changing the goals of an organization, increasing participation in organizations and groups, and increasing effectiveness in role performance. Each chapter presents and analyzes one of the four action guidelines. The general format of the four guideline chapters is similar, containing an introduction to the practice problem, action principles derived from research on the problem, illustrations of implementation, quantitative findings from practitioner logs, practitioners' views of problems and prospects, and getting started—thoughts for initiating action and a log for listing first steps. A final chapter draws conclusions and suggests further steps. (Author/JR)

These classroom materials are part of the Project Benchmark series designed to teach secondary students about our legal concepts and systems. This unit focuses on the California juvenile justice system. The materials describe the historical and legal development of the system, juvenile court procedures, correction facilities, and various creative alternatives to the corrections system. The second section defines such legal concepts as due process, jurisdiction, hearsay evidence, beyond a reasonable doubt, preponderance of evidence, and moral turpitude. Suggestions for two sample lessons using the materials are included. The first lesson focuses on the alternative ways to improve the juvenile justice system. The second lesson provides directions, sample materials, and simulation role description for a mock juvenile hearing. (DE)

Designed originally for use in junior-high-school classes, this bulletin provides an extensive file of 420 multiple-choice test questions in American history. The test items are intended to measure substantive understandings as well as such abilities as interpretation, analysis, synthesis, evaluation, and application. The initial questions were solicited from approximately 60 classroom teachers and are divided into four levels of difficulty. Arranged chronologically, the questions cover the following subject areas: European background and exploration; colonization and colonial life; the French and Indian War and the American Revolution; the Articles of Confederation and the Constitution; Federalist and Republican administrations to 1812, the Monroe Doctrine, and the Jackson Era; westward movement and sectionalism; the Civil War and Reconstruction; foreign affairs since 1865; and domestic affairs since 1865. This teaching guide on population education is designed to accompany a television series by the same title. The series of twelve 15-minute color programs provides the basis for a high school course in population education. Produced under a foundation grant, the series is available from National Instructional Television, a division of the Agency for Instructional Television. The series considers a wide range of population-related issues in the United States, helping students to understand how their actions have an impact on population and how population has an impact on them as individuals. Students develop effective criteria for decision making, examine their own values about population matters, and become aware of the consequences of their actions on themselves, their family, their society, and the world. Each unit in the instructor's guide corresponds to a specific program and includes the purpose, program content, suggested activities, teacher facts and figures, and student materials to be duplicated. Charts, graphs, and a bibliography conclude the document. (Author/JR)

Descriptors—Academic Aptitude, Aptitude Tests, \*Critical Thinking, \*Deductive Methods, Doctoral Theses, Educational Research, Elementary Education, \*Individual Differences, \*Inductive Methods, Learning Processes, Social Studies, Student Ability, Student Attitudes, \*Teaching Methods

This doctoral thesis examines whether inductive and deductive teaching methods are appropriate for different learners. Statistical interactions between the two instructional methods and various aptitude variables were examined among 275 sixth-grade pupils. Subjects were randomly assigned to rule-example (deductive) treatments or example-rule (inductive) treatments, which consisted of eight 40-minute periods of programmed instruction in selected skills and concepts of critical thinking. Student aptitudes were tested with five aptitude tests including Raven's Progressive Matrices test. The results indicate that the deductive and inductive teaching methods were appropriate for different learners, and that Progressive Matrices scores indicate which students should receive each kind of instruction. While both teaching strategies produced similar achievement scores, the deductive method produced better student attitudes. In this manner, the study provides empirical grounds for teaching different learners differently in order to maximize their attitudes and attainment and to personalize and humanize their instruction. The thesis presents the social and historical background of aptitude-treatment interaction research; explains the rationale, experimental design; and statistical analysis of the study reports and interprets the empirical results; and recommends several approaches to subsequent research. Identifiers—\*Pattern of Healthful Living Project

This curriculum guide for kindergarten teachers contains values-based classroom lessons which are intended to assist students in the development of a positive self-concept, rational thinking processes, and a personal and societal value system. Teaching techniques include role playing, story telling, classroom discussion, puppet shows, skits, and use of audiovisuals. Lessons are provided on two major topics: Self-Awareness of the Physical Body and Self-Awareness of Feelings. Lesson outlines contain purpose, concepts, affective objectives, class activities, specific teaching procedures, guiding questions, evaluation techniques, and lists of materials needed. For many lessons classroom stories are included. Bibliographies of additional teacher resource materials and values-related children's books are provided. Appendices include procedures for group discussion and role playing, patterns for puppets, and a curriculum-materials resource list. The curriculum developers recommend that teachers receive training in affective teaching skills and attitudes before using the guide and that the materials not be used daily, but rather spaced to cover a semester at a time. **Identifiers**—\*Religion in Elementary Social Studies Project, RESS

These third-grade materials, from the Religion in Elementary Social Studies (RESS) project, explore the relationship of religion to ethnic traditions in our multiethnic and multireligious society. Included here are the teacher's guide, the printed student materials, and an evaluation report from RESS level 3. The materials stress active learning. Interest centers are used to introduce seven modules on ethnicity. Students are involved in a discovery approach to learning through the use of printed, visual, and auditory materials. The modules on ethnicity presented in the teacher's guide include the following: (1) A Metropolitan Area: The San Francisco-Oakland Bay Area; (2) Ethnicity in a Metropolitan Area; (3) A Spanish-Speaking American Tradition in an Inner-City Neighborhood; (4) A Chinese-American Tradition in an Inner-City Ethnic Neighborhood; (5) A Black-American Tradition in an Inner-City Ethnic Neighborhood; (6) A White, Protestant-American Tradition in a Suburban Neighborhood; and (7) A Jewish-American Tradition in a Suburban Neighborhood. For each module the guide provides the major concepts and organizing ideas, skills and behavioral objectives, lists of the classroom and student materials needed, specific teaching methods, evaluation techniques, and lists of additional print and non-print resources. **Descriptors**—Educational Research, Political Science, \*Political Socialization, Politics, \*Power Structure, School Environment, \*School Organization, Socialization, Social Structure, \*Student Attitudes, Student Role, \*Student School Relationship, Systems Concepts

The relationship between student attitudes and the school as a political system is analyzed in this research report. Four types of school systems are hypothesized: elite, bureaucratic, coalitional, and participant. After testing this conceptualization, student attitudes of trust, integration, confidence, and interest toward both school and society are explored. Questionnaire results from 2,546 students in 13 Midwest secondary schools provide the research data. The results indicate that most schools tended to be bureaucratic, although there was variation within this pattern. The student attitudes formed a consistent and predictable structure with general societal attitudes closely related to attitudes toward school. Depending on the particular systemic characteristic, coalitional and participant school systems were most closely related to positive student attitudes, while elite school system patterns were most closely related to negative student attitudes. Student attitudes toward the bureaucratic school pattern fell between these two positions. Student government groups were seen by students as more important in the school decision-making process than originally hypothesized. (Author/DE)

**Descriptors**—Consumer Economics, \*Consumer Education, Consumer Protection, \*Curriculum Development, \*Economic Education, Educational Objectives, Elementary Secondary Education, Interdisciplinary Approach, \*Relevance (Education), Social Sciences, Student Responsibility, Teacher Education

In this monograph, Ralph Nader briefly explores the importance of including consumer education in the general curriculum, discusses problems for incorporating consumer education into the curriculum, and outlines educational objectives for a consumer education course. Although most schools have treated consumer education as a frill rather than as a true academic discipline, it is very relevant to students' lives. Consumer education embodies a large variety of distinctly different skills and critical thinking that are essential to effective functioning in our society. However, a variety of problems exist for incorporating consumer education into the curricula. Teachers lack good motivational materials and a sufficient background in consumer education. In preparing a course dealing with consumerism, a variety of educational objectives should be considered. For example, students need to distinguish between needs and wants, learn how to manage their own finances, become aware of alternatives, and know how to get information before they purchase goods and services. In addition, consumer education should afford students opportunities to encounter the consumer situations of their daily lives in an innovative way. (Author/JR)

**Descriptors**—\*Curriculum Development, Educational Needs, Educational Philosophy, Elementary Secondary Education, Foundations of Education, Higher Education, Humanistic Education, \*Moral Development, Moral Values, Problem Solving, \*Social Sciences, \*Values, Yearbooks

This yearbook records some basic ideas on values education which the author previously presented to lay and professional audiences. The first part of the document focuses on the formulation of problems and principles. A principle is defined as a solution to a problem. Seventy principles are identified and listed. For example, one principle is an attitude—if conflict among forms of behavior rages within the individual, then attitudes emerge. The second part examines values and the nature of human values, and lists 797 values in school and society. The last part of the document places the 70 principles and 797 values into the contexts of materials on the formation of problems and solutions, the identifying and learning of human values, learning, objectives, creativity, criteria for the evaluation of schools, criteria of philosophy and objectives of schools and the school and community for use in the accreditation of schools, outcomes of training as contrasted with teaching, and processes of humanization/dehumanization in the schools. The focus of this newsletter is on the findings of a two-year nationwide study of adolescent girls. The study undertook to identify the wide variety of needs, aspirations, and concerns of

young women 12- to 18-years old. Nine hundred and twenty women were interviewed in both rural and urban settings, representing a wide range of racial, religious, and ethnic group and socioeconomic backgrounds. One-third of the women were adjudicated delinquent, one-third were active in youth organizations, and one-third fell into neither category. The study analyzed the girls' beliefs and feelings on life goals, marriage, children, sex, careers, relationship to adults, permissiveness, peers, drugs and alcohol, youth organizations, school, and social and political involvements. In addition, Dr. Gisela Konopka, the author of this study, is interviewed. She outlines ways of meeting needs of young girls; for example, one way to meet their needs is to enhance their self-esteem through participation in decision making. Selected poetry and quotations from the interviewed girls are interspersed throughout the newsletter. (Author/JR)

**Descriptors**—American Indian Culture, \*American Indians, Culturally Disadvantaged, Cultural Pluralism, Culture, Educational Equality, \*Educational Needs, \*Educational Problems, Elementary Secondary Education, Higher Education, \*Mexican Americans, Minority Groups, Negro Culture, \*Negroes, School Role, Teacher Education, Teaching Techniques

This publication contains three essays dealing with the educational problems and needs of Mexican Americans, black Americans, and American Indians. In his essay on Mexican Americans, Alfredo Castaneda discusses the undemocratic character of American public education, and stresses the need for democratic cultural pluralism. He devotes his essay largely to the immediate needs of his group, discussing the values orientation of Chicanos and the educational implications. In the second essay, Richard L. James explores the nature, meaning, and injustices of the period of bondage through which blacks passed in their fight for freedom, and he examines their struggle for equality. He points out that the diversity of blacks in their values, aspirations, and approach to life and their "blackness" make the solution to black educational problems very complex ones. In his essay on American Indians, Webster Robbins indicts the Euro-American system, saying that it destroyed the once proud and beautiful American-Indian culture in its attempt to "Christianize," to "civilize," and later to "democratize" the aboriginal tribes. He suggests that every attempt be made to recapture the major elements of the original aboriginal cultures. A summary to the essays concludes that multicultural educational programs must be developed and teachers must be trained to deal with the exigencies of a multicultural situation in schools. Summaries of 62 educational research projects, completed or in progress in Turkey during 1973-74, are contained in this survey. Information is outlined in 12 major categories. Included in the categories are title, organization, researcher(s), progress status, bibliographic references, background and aims, size and composition of sample, methods, main findings, number of workers, time schedule, and source of finance. The research focuses on various topics such as administration, curriculum, educational practice, higher education, elementary and secondary education, students, and teacher education. The document concludes with a list of researchers and an alphabetical list of descriptors. (JR)

Descriptors—\*Achievement, Educational Research, \*Failure Factors, Individual Differences, Low Achievement Factors, \*Performance Factors, Psychological Studies, Psychology, \*Sex Differences, \*Success Factors  
Research designed to analyze the effect of achievement motivation and gender as determinants of attributions for success and failure is described. One-hundred and twenty male and female subjects, divided according to levels of achievement motivation, were asked to do an anagram task at which they were made to succeed or fail. Ratings of ability, effort, task difficulty, and luck, as possible causes for success or failure, indicated that those with high achievement motivation of both sexes made relatively higher ratings for ability and lower ratings for task difficulty. Females tended to employ higher ratings for luck, and females with high achievement motivation made more use of effort as a causal factor than men. High achievement motivation males had a very high estimate of their own abilities. The male and female low achievement-motivated groups tended to be similar, although the women tended to make more use of task difficulty in explaining failure and had somewhat higher rating of their abilities. The low achievement-motivated males saw ability as the primary determinant of outcome. (Author/DE)

national Programs, \*Statistical Data, Student Exchange Programs, \*Study Abroad, Tables (Data), Teacher Exchange Programs, Tourism, Travel

This publication discusses and provides statistics on United States travel abroad and foreign travel to the United States. Contents include a discussion of the following: (1) trends in travel and exchange programs; (2) scope and relevance of U.S. exchanges; (3) cultural exchanges, programs, and travel between the West and Russia, Poland, Hungary, Romania, Czechoslovakia, Bulgaria, the People's Republic of China, and the Middle East; (4) programs involving foreign visitors who came to the United States to study the democratic process; (5) exchange programs aimed at fighting drug abuse; (6) environmental and urban projects; and (7) other nations' support for exchanges. Names, addresses, and descriptions of groups that provide exchange opportunities are provided. The tables in the appendices, which comprise half of the publication, contain statistics on exchange programs from 1949 to 1972. Included are numbers of both U.S. and foreign persons exchanged, origin or destination by area, kinds of exchange grants, and what the travelers taught or studied. (Author/RM)

This teacher's guide for consumer education, one in a series of consumer resources, provides learning activities for secondary students and 4-H Club members. The document emphasizes the importance of teenagers as consumers. Based on this philosophy, the materials are developed to give teens the training and guidance to develop the skills needed to become competent consumers. The document is divided into two sections. The first section, the teacher's guide, includes a statement of purpose, objectives, ideas, suggested resources, and a suggested discussion outline for individual learning activities. The student materials in the second section provide background information and specific learning activities which revolve around topics such as advertising, shopping, credit, consumer responsibility, and the metric system. Descriptors—\*Banking, Business Education, \*Consumer Education, \*Economic Education, Financial Services, \*Home Economics, Learning Activities, Money Management, Secondary Education, Teaching Guides, Teaching Techniques, \*Teenagers, Youth Clubs

One in a series of consumer education materials for teenagers, this document focuses on banking and banking services. The series is based on the philosophy that teens need the training and guidance to develop the skills needed to become competent consumers. Developed for 4-H Club members, the material is designed to acquaint students with the functions of a bank, and to teach them how to use a checking account and how to write checks. Two sections comprise the guide: the teacher's guide, which contains statement of purpose of individual activities, objectives, ideas, suggested resources, activities for learning experiences, and evaluation; and the student section, which offers background information and specific learning activities. (Author/JR)

The focus of this document, one in a series of consumer education materials for 4-H Club members and secondary students, is supermarkets, food, and purchasing. The materials in the series are based on the philosophy that teenagers need the training and guidance to develop the skills needed to become competent consumers. The supermarket project focuses upon four major objectives: help students gain an understanding of ways to save money on the food bill; enable students to learn how to use the facts on labels to help them buy the best product; acquaint students with some of the new supermarket tools—unit pricing, open dating, and nutritional labeling; and acquaint students with how the tools can best help the food shopper. The document is divided into two sections. The first section is the teacher's guide which contains a statement of purpose, objectives, ideas, suggested resources, learning activities, and evaluation. The second section is the student material which contains background reading and learning activities. (Author/JR)

Descriptors—\*Budgeting, \*Consumer Education, \*Economic Education, Income, Learning Activities, \*Money Management, Relevance (Education), Secondary Education, Teaching Guides, Teaching Techniques, \*Teenagers, Youth Clubs

This document, one in a series of consumer education materials for 4-H Club members and secondary students, focuses on money management. The materials are based on the premise that an understanding of the management of money is vital if one is to be prepared to meet the challenges of the economically oriented society. Specific objectives are for students to gain an understanding of the principles of the management of money; see the influence of individual values, goals, and resources on money management; realize the value of education in terms of expected lifetime income; and understand why saving is an important part of money management. The materials are divided into two sections. The first part is the teacher's guide which contains statement of purpose, objectives, ideas, suggested resources, learning activities, and evaluation. The student materials

comprise the second part which contains background reading and specific learning activities. (Author/JR)

**Unit on Political Decision Making and Action Strategy over a Local Environmental Problem.**  
 Spons Agency—Florida State Dept. of Education, Tallahassee. Office of Environment Education.  
 Pub Date 75  
 Note—47p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**  
 Descriptors—Class Activities, Conflict Resolution, \*Decision Making, \*Environmental Education, Instructional Materials, Political Influences, \*Political Issues, Political Power, \*Political Science, Public Policy, Resource Materials, Secondary Education, Social Studies, \*Social Studies Units, Teaching Techniques, Values

This unit provides six lessons in which students develop a strategy for political action on a local environmental issue. The unit emphasizes the process of solving political problems within the political system and may be adapted to any geographical or social problem. The first lesson introduces a general environmental issue and requires students to make a value decision between the rights of people and nature. In lesson two, the students examine a local environmental problem in political terms through a simulation and a field trip. Lesson three is a simulation which introduces students to the concepts of conflict, conflict solution, and decision making. Lesson four is a slide discussion of the various kinds of political power. Lesson five provides readings and questions for a discussion on how organized, political-pressure groups work. Lesson six requires the students to formulate their own political strategy for a solution to the environmental issue. Except for audiovisual materials, this unit contains all the necessary student readings, teaching instructions, discussion questions, and evaluation questions for the unit. (DE)

 Descriptors—Bibliographies, \*Children, \*Curriculum, \*Curriculum Guides, Educational Objectives, \*Humanistic Education, \*Psychological Needs, Self Concept, Self Esteem, Teaching Methods

Identifiers—\*Self Knowledge  
 The document discusses the significance of psychological curricula, presents outlines of several specific curricula which can be purchased, and raises and answers questions about why it is important for children to participate in classes in which they can examine their feelings and their images of themselves and others. It is stated that the modern trends is away from an education which only provides cognitive knowledge and toward education which develops the child's self-knowledge and capacity to think creatively and analytically and encourages the child to feel self-esteem. A bibliography provides information on where to write for specific curriculum packages, what materials are included, what specific kinds of activities are used, and advantages and disadvantages of different, widely-used programs. The document's title, "Feeling Around in the Dark," is meant to imply that the affective areas of education are still only vaguely understood, but that it is important to make an effort at finding out how a humanistic education can best relate to the psychological needs of learners.  Descriptors—Abstracts, Accountability, \*Catalogs, Certification, Educational Programs, Governance, Individualized Instruction, \*Literature Reviews, \*Performance Based Teacher Education, Program Evaluation, Staff Improvement, State Departments of Education

This document is a compilation of articles, extracts of books or articles, and abstracts of material on performance based teacher education (PBTE). It is divided into four sections. The first section contains background material and provides definitions, rationales, and historical contexts for PBTE. The second section has material on program design, evaluation and assessment, personalization and individualization, and field-based support systems for PBTE. The third section is divided into the following headings: general implications, staff development, governance, accountability, state agencies, and accreditation issues in PBTE. The fourth section presents a critique of PBTE from the standpoint of the American Federation of Teachers and another from a general standpoint. The document also includes names of the jury members who

chose the documents for inclusion in the source book, the list of the original documents from which these were selected, and information about AACTE and ERIC. (CD)

 Descriptors—Discipline, Educational Innovation, \*Foreign Countries, Inservice Teacher Education, \*Interviews, Open Education, \*Open Plan Schools, Physical Environment, School Design, Student Teacher Relationship, Teaching Methods, \*Teaching Styles, \*Team Teaching Identifiers—\*Australia

Interviews were conducted with 27 teachers working in open space schools in Australia. The selection of interviewees was arranged to find those with both critical feelings of the deprivation of their traditional roles and the independence of the self-contained classroom and with enthusiasm for what others view as a major component of educational progress. Those who felt uncomfortable with the new schools (some to the point of requesting transfer to traditional schools) cited among their problems a lack of discipline, an "anything goes" attitude by the children, excessive noise, the difficulty of enforcing their own standards when not supported by other teachers, and dislike of practical aspects of the physical environment. Those who liked the schools cited (1) the opportunity to cooperate as a staff, (2) the enhancement of possibilities of learning successful teaching strategies from other teachers, (3) a feeling of increased independence and freedom to experiment, and (4) the validity of having teachers focus on their special abilities rather than try to cover all things for all children. It was inferred on the basis of this interview that the open space school is not necessarily geared to every teacher's personality and abilities, but that it is a positive innovation for many. (CD)

 Descriptors—\*Cultural Differences, Ethnic Groups, \*Field Experience Programs, Observation, \*Preservice Education, Rural Urban Differences, Sociocultural Patterns, Student Teachers, \*Student Teaching, \*Suburban Schools, Suburban Youth

The Suburban Teacher Education Program (STEP), was a full-semester alternative student teaching experience at Texas Southern University, the purpose of which was for students to gain additional understanding and insight in bridging the sociocultural gap that exists between life in suburbia and the central city. This goal was achieved by providing a selected number of black student teachers the opportunity to become involved in this special alternative student teaching activity. The several interdisciplinary seminars which comprised the first phase of the program were intended to provide students with a repertoire of technical, personal, and coping skills for successfully addressing teaching problems in predominantly white communities. The second phase of the program consisted of full-time teaching in the same classrooms in which observations took place during the first phase. STEP program activities were based on thoroughly tested procedures drawn from the nationally recognized Cooperative Urban Teacher Education program, which prepares teachers for inner city schools. (The report contains a bibliography and an appendix showing the score and sequence calendar for the program.) (BD)

Descriptors—\*Clinical Professors, \*College School Cooperation, \*College Supervisors, \*Cooperating Teachers, \*Preservice Education, School Involvement, Student Teachers

This paper describes the use of clinical professors at Kent State University and 19 affiliated teacher education centers who oversee student teachers' involvement in participating schools. The professors have the following nine major responsibilities: (1) preparing the students before arrival in the schools, (2) orienting the students to the schools and communities in which they will serve, (3) planning varied field experiences, (4) assessing student progress, (5) serving on a teacher education center steering committee, (6) conducting inservice activities with teachers in the schools, (7) conducting a seminar in the teacher education center, (8) conducting research, and (9) solving problems. People at Kent State feel that this kind of program has meant more work for the clinical professor and has demanded certain adjustments from the schools, but they are pleased with the results. (CD)

Descriptors—Budgets, Collective Bargaining, \*Educational Finance, \*Educational Planning, Enrollment Rate, \*Enrollment Trends, \*Higher Education, Political Attitudes, \*Teacher Education, University Administration

Higher education now faces problems which inhibit it from planning major new programs for the future. The two most serious problems are crises in funding aggravated by dwindling enrollments and lack of continuity in leadership. Teacher education programs are often spared from being cut—some have been expanded—because they are cheap to run, but interests of budget and cost efficiency preclude innovations. In terms of leadership, individual private interest, exemplified by faculty collective bargaining, often ignores larger issues. College administrator turnover is rapid, partly because the jobs are so demanding and frustrating. This too diminishes long-term cooperative planning. A swing to conservatism in American politics has influenced education. People seem ready for a return to the 3 Rs; other aspects of traditional universities will survive as well, while the rest will rely mostly on field experiences and emphasize real skills as opposed to titles and credentials. Those seriously interested in progressive education should work together to prevent a chaotic, unplanned, and undesirable educational future. (CD)

**What Does Teacher Certification Stand For?**

Pub Date 29 Jan 76

Note—9p.; Paper presented before the National Association of State Directors of Teacher Education and Certification (St. Louis, Missouri, February 3, 1976)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Accreditation (Institutions), College Faculty, Grading, Higher Education, Professional Personnel, Role Conflict, Standards, \*State Standards, Student Teachers, \*Teacher Certification, Teacher Education, \*Teacher Employment, Teacher Evaluation, \*Teacher Supply and Demand

The main argument is that standards for certifying teachers are too lax. It is argued that this might have been acceptable when there was a shortage of teachers, but, now that there is an oversupply of teachers, it is time to certify only the best qualified. The author criticizes certification practices which ignore theoretical standards and instead accredit almost any teacher education program. The role of school of education faculty is described as having an inherent con-

flict, in that faculty wish to help their students and are unwilling to grade them realistically and possibly limit their opportunities to get jobs. It is suggested that teaching cannot be a full status profession as long as a teaching certificate does not guarantee a high level of professional performance. (CD)

Descriptors—\*Course Evaluation, \*Curriculum Evaluation, Higher Education, Professors, Students, \*Teacher Education

Identifiers—\*Professional Studies

This is the report of a study that examined the impact of the institutional structure on the development of the professional studies course at one college, the influence it had on the staff and student commitment and perception of relevance, and the way the structure affected the nature of the program at work. The research data for the study was collected through interviews, questionnaires, participant observation, and college documents. Chapter 1 concerns the formal organization and curriculum of professional studies. It discusses two phases, 1965-72 and 1972-75, in the development of the course. In chapter 2, the focus is on the perception of status and value of professional studies. It contains staff comments on the influence of the structural and organizational features of the college course pattern, and student comments on the competence and commitment of the staff. Chapter 3 contains staff and student comments on the conflicts and anxieties associated with teaching and learning in the professional studies area. (Appended are 14 items including research methods, questionnaires, course patterns, academic structure at the college, unit structure of courses, academic staff structure, staff teaching experience, matriculation patterns, lines of communication, and membership of the Academic Board.) Identifiers—ANISA Model

This volume of readings is a basic survey of issues and perspectives concerning the nature of teaching. Part one is composed of four articles containing perspectives on the need for educational theory. Two of the authors contend that educational theories emerge from education, while the other two authors are more positive in their conception of the nature and function of theory in educational practice. Part two contains nine articles on Perspectives on teaching, learning, and instruction. Some of the topics discussed are psychological conceptions of teaching, defining good teaching, the use of concepts in teaching and learning, the role of content in learning, theories of instruction, and a conceptual model of instruction. The final article presents the American National Institutes for Social Advancement (ANISA) perspectives on the nature of teaching. A list of references is included in this book. Appended is a summary statement on the ANISA model. (RC)

Identifiers—\*American Association Colleges Teacher Education

This speech, by a member of the American Association of Colleges for Teacher Education's Commission on Education for the Profession of Teaching (CEPT) and one of the authors of the CEPT report, is a discussion of CEPT. He begins by discussing whether or not the teaching profession and teacher education are "real" professions. He takes the view that they are not and that the task ahead for teacher educators is to know what constitutes a "real" profession and to pursue it with wisdom and vigor. Next, he talks about problems in schools, and states that no effort to improve schools in America is likely to succeed until progress is made in improving the professional education of teachers. He urges that the governance of the teaching profession must be given to teacher educators and not to the states. He believes that one way to achieve a professional status in teacher education is to increase the teacher education curriculum to include a fifth year internship. He highlights portions of the CEPT report and states that the commission is neither uncritical of nor does it defend universities and their performance in teacher education. He concludes that the teaching profession will be a "real" profession when society recognizes teachers as highly competent professionals, when the universities and colleges accord them status, when the profession supports and cherishes them, and when their own self-respect and self-esteem tells them that they are real at last. Descriptors—\*Book Reviews, Developing Nations, \*Educational Programs, Family Planning, Females, Feminism, Folk Culture, \*Foreign Culture, Illiteracy, \*International Organizations, \*International Programs, Latin American Culture

Identifiers—United Nations

The document is comprised of short articles on a variety of topics chosen for their relevance to educators in internationally-oriented schools. Some of the subjects covered are international women's year, population assistance to developing countries, Iranian Folktales, illiteracy in Latin America, and Ford Foundation involvement in Turkey. There are also book reviews, news briefs on educational projects in different countries, and reports on United Nations educational work. Some of the articles are in both French and English, some just in French. (CD)

**ISA Bulletin Special Workshop Report Edition No. 76. "Will Your Teaching Survive the Seventies?"**

International Schools Association, Geneva (Switzerland).

Pub Date Feb 75

Note—86p.; A report on the International Schools Association Teachers In-Service Training Workshop (1st, International School of Geneva, Switzerland, July 8-19, 1974)

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

Descriptors—\*Comparative Education, Educational Needs, Humanistic Education, \*Inservice Teacher Education, \*Interdisciplinary Approach, \*Teacher Workshops

This is a report of the first teachers' inservice training workshop sponsored by the International Schools Association. It begins with some introductory statements concerning the workshop and its theme—"Will your teaching survive the seventies?" It also indicated in these introductory remarks that the workshop was intended as a conference concerned with new educational thinking in Britain and the United States, and also as an interdisciplinary experience for the participants. The next part of the report presents summaries of the talks by the principal speakers. The summaries have been subjectively reported by the compiler and are not pure transcriptions. The speakers' topics included (1) the need for humanness in all educational development; (2) community living; (3) the need for a greater "exactness" in approaches to learning; (4) the philosophical nature of the educational process; (5) the importance of a properly organized school situation; (6) the organization planning, self-questioning, and honesty required in teaching mathematics; (7) and "survival techniques" for teaching in the seventies. The summaries of these talks are followed by a brief summary of other talks and discussion groups. Annexes to the report comprise the next part, and include bibliographies, additional reports, and other sources of information. (RC)

Descriptors—Adult Education, Certification, Consumer Economics, \*Educational Development, Educational Quality, Educational Research, Federal Legislation, \*Federal Programs, \*Inservice Education, \*School Personnel, Teacher Recruitment, \*Teacher Supply and Demand, Teaching Quality

Identifiers—Education Professions Development Act

The National Advisory Council on Education Professions Development was established by law to review federal programs for the training and development of education personnel and report its findings and recommendations to the President and to Congress. In 1975, the council held four meetings. The first resulted in 15 recommendations concerning inservice teacher education, adult education, research, and other issues. Also, a draft report, "Gatekeepers in Education: A Report on Institutional Licensing," was discussed and adopted for publication at this meeting. The report was written to combat consumer abuse and improve standards for institutional licensing. The second meeting adopted a report on directions for the Teacher Corps. The third meeting discussed the council's testimony before the Senate Subcommittee on Education and the Congress' reluctance to continue the Education Professions Development Act in a time of teacher

surplus. The council's position was that, while recruitment of new teachers is no longer a problem, the priority has become quality of teachers and improvement of inservice education. The last meeting of 1975 left it unclear whether the council would be continued, but the staff was to develop an issues paper presenting the council's view of the federal role in education professions development. (The text of the law establishing the council and its responsibilities is included in this report, as are numerous details on selection of officers, reports approved, educational institutions visited, and other business). **Education in the 70's and Beyond.**

Pittsburgh Univ., Pa. School of Education.

Pub Date 11 Apr 75

Note—196p.; Papers presented at the Annual Colloquium of the Council of Graduate Students in Education (1st, University of Pittsburgh, April 11, 1975)

**EDRS Price MF-\$0.83 HC-\$10.03 Plus Postage**

Descriptors—\*Basic Skills, \*Educational Alternatives, Educational Change, \*Educational Philosophy, Educational Research, \*Educational Trends, \*Humanistic Education, Literacy, Reading Instruction

Identifiers—Multicultural Education

These papers focus on (1) alternatives to and within education, (2) critical issues for the 70's and beyond, and (3) affective/humanistic education. While some papers are on very specific subjects (i.e., teaching emotionally disturbed deaf children, reading readiness tests, peer influence on students, alcohol education, visual learning in literacy, and other subjects), some major themes overlap in several papers. Foremost is a concern that education not lose the momentum of some of the reforms made in the 1960's through an overemphasis on basic skills to the exclusion of concern with the affective and humanistic side of education. Another important theme is the crucial need for educational alternatives, including nonformal education in developing countries and better educational programs for the training of minority inner-city personnel. Several papers concern the problems of teaching reading and the fact that literacy is still not universal although it is fundamental to any other kind of learning. One paper criticizes the granting of academic credit in college for basic literacy courses. Various questions in educational research are also examined, including the problems of relating the understanding and knowledge of the researcher and the practitioner. (CD)

**Peer and Cross-Age Tutoring in the Schools: An Individualized Supplement to Group Instruction.**

National Inst. of Education (DHEW), Washington, D.C.

Pub Date 75

Note—66p.

**EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage**

Descriptors—Academic Achievement, Annotated Bibliographies, \*Cross Age Teaching, Group Instruction, \*Individual Instruction, Instructional Materials, \*Peer Relationship, \*Peer Teaching, Student Teacher Relationship, \*Tutorial Programs, \*Tutoring, Tutors

Group classes with 30-40 children per teacher favor the children who catch on fast. These children participate more in class and give more feedback to the teacher, so the teacher gears instruction to them and goes too fast for students who are having difficulty. Peer and cross-age tutoring, can supplement class learning and help the below-average student catch up. Tutors provide tutees with a greater chance for personal participation in instruction and offer reinforcement of correct responses. The tutors are likely to improve their own knowledge of the subject and their attitude toward school as well. Individualized instruction kits and materials are now available on the market and are useful for tutoring programs. Support of teachers for the tutoring program is crucial, as some teachers feel threatened by any program which removes partial responsibility for teaching from them and unconsciously subvert tutoring program. Peer tutoring has an advantage over cross-age or adult tutoring in that it does not require interclassroom cooperation. (A discussion of how to decide if tutoring is warranted in a classroom and how to or-

ganize and supervise a tutoring program is included in this book. An annotated bibliography provides reports of effects of tutoring on tutor and tutee.) (CD)

Descriptors—\*Curriculum Guides, Educational Resources, \*Feminism, Instructional Innovation, Political Socialization, School Role, \*Sex Discrimination, Sex Role, Sex Stereotypes, \*Teacher Education, \*Womens Studies

This document presents a rationale for the use of women's studies courses in teacher education programs and offers suggestions concerning possible topics to cover, books to read, and projects to do. It stresses that women's courses are ideally team taught and nonhierarchical, placing a strong emphasis on student involvement in the direction of the course. Units are suggested for a model course, "Sex Role and Education." Suggested topics include hiring and other employment practices, children's books, the socialization process, and changing discriminatory attitudes. Specific objectives are outlined in terms of what any college course should provide and what a women's course in particular should offer. Among the suggested learning projects are journals, individual experiments, and case studies of particular women. A number of ideas for research topics are suggested, along with possible ways of researching the topics. Suggested books are grouped under headings such as the History of the American Woman, Woman's Place, Women as a Minority Group, Sex Roles, and Counseling. A list of organizations dealing with women's rights issues is also included. (CD)

Identifiers—\*Career Opportunities Program, COP

It was recognized during the early 1970's that colleges had a responsibility to the communities in which they existed and that more and more people who were not white, middle class, or 18 were demanding a college education. The career Opportunities Program (COP) was involved in getting colleges and universities to make several kinds of changes in their teacher education programs. One of the changes many institutions made was to establish open admissions or an admission policy in which students lacking normal prerequisites could be accepted on a probationary basis. On-site instruction was another innovation, with professors teaching courses in community schools. Many minority students and older students received bachelors degrees. Most COP students did unexpectedly well both academically and as teachers. Through this program, some teacher aides received degrees, while others received paraprofessional degrees and a concomitant rise in status. Conservative institutions, through association with COP, tended to become a little more progressive, while institutions which were already experimenting with socially relevant programs did so even more. (Descriptions are provided in this bulletin of changes at several of the institutions which were involved with COP.) (CD)

**A National Evaluation of the I/D/E/A Change Program for IGE.**

Charles F. Kettering Foundation, Dayton, Ohio.

Pub Date Sep 75

Note—42p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Administrator Attitudes, \*Educational Programs, \*Individualized Curriculum, \*Individualized Programs, Inservice Teacher Education, \*National Surveys, Parent Attitudes, \*Program Evaluation, Questionnaires, School Surveys, Student Attitudes, Teacher Attitudes

Identifiers—\*Individually Guided Education

A survey was conducted to determine attitudes of administrators, teachers, students, and parents of students in schools using the Institute for Development of Educational Activities, Inc. (I/D/E/A) Change Program for Individually Guided Education (IGE). The study took over two years, and reached a sample of the 1,200 schools in 36 states. Generally, the attitudes of all groups were positive toward IGE. Results also indicated that school staffs which had used IGE for over three years liked it better than staffs using it for shorter periods of time. Also, the more IGE outcomes were implemented in a school, the more the staff was favorable. Attitudes of administrators, teachers, parents, and students in urban and non-urban schools were equally positive, as were attitudes from schools with both predominantly white and non-white populations. Parents tended to feel that their children had progressed more in school using IGE. Teachers felt the program was equally useful for slow and fast learners as well as for culturally advantaged and disadvantaged students. A few administrators and teachers complained that the program carried with it the necessity to increase work loads too drastically. (Tables and sample questionnaires are included.) (CD)

Identifiers—California (Oakland), Elementary Secondary Education Act Title III, ESEA Title III

The Santa Fe Precision Teaching for Effective Learning, (PTEL) an ESEA Title III program, was selected as a remedial instructional approach to the performance and motivational problems of Santa Fe students. It proposed the following six major program objectives: (1) planning and implementation of start-up activities; (2) staff training in the charting of student correct and error frequencies in reading and math; (3) staff training in setting individual behavioral objectives and mastery criteria for students, and in concepts of the individualized management system; (4) training in reinforcement principles; (5) sequential ordering of behavioral objectives in the math and reading curricula; and (6) the attainment of Oakland Unified School District achievement score norms in math and reading by 60, 80, and 100 percent of PTEL students in program years one, two, and three, respectively. The evaluation demonstrated that five out of six objectives were accomplished by the program. Curriculum planning and development of materials were initiated by the staff at the beginning of the program and continued throughout the year. The staff generally felt that the inservice training provided was effective and adequately prepared them to implement PTEL methods in the classroom. Santa Fe PTEL failed to meet the predicted objective of 60 percent of its students achieving OUSD reading averages by approximately 10 percent and math averages by approximately 14 percent. The staff's reaction to the program's operation, administration, and organization was generally positive. (Author/BD)

Identifiers—\*Athletic Trainers

This book provides an authoritative reference on the fundamentals of athletic training for people with varied backgrounds but a common interest in the health and education of the high school athlete. The book is designed especially for the novice athletic trainer. Section 1 of the book concerns the organization and administration of athletic programs. Included in this section are discussions of athletic trainer relationships, planning for health supervision, and facilities. Section 2, focuses on the principles of athletic fitness. It contains information on physical fitness, nutrition, personal health safeguards, mental readiness for competition, and adaptation to environment. The third section provides suggested procedures and practices. The topics presented are physical therapy; protective athletic equipment; protective taping; physical conditioning; first aid, including recognition, care, and referral; and evaluation and records. The final section of this book pertains to athletic training as a career, and consists of information on upgrading standards, professional preparation, and two appendixes containing National Training Association program requirements and procedures for certification. **An Urban Multi-Linguistic Competency Based Preservice Field Based Teacher Preparation Program.**

Boston Univ., Mass. School of Education.

Pub Date 15 Dec 75

Note—9p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Cultural Differences, Cultural Pluralism, \*Field Experience Programs, Internship Programs, \*Multilingualism, \*Preservice Education

With the conceptual model designed around the urban public and private school setting and its specific teaching strategies, this field-based

teacher preparation program covers appropriate methodology in reading/language arts, social studies, and science. Students are afforded the opportunity of integrating content, theory, and practice into a totally field-based multilingualistic culturally diverse teaching/learning setting. Each semester program, comprised of approximately 40 junior interns, 30 cooperating teachers, 700 elementary pupils, and 4 university staff, is totally field-based in five urban schools. Content methods and instruction take place in one of the public school classrooms for a portion of each day; for the remainder of the day the interns work in their assigned classrooms. Program competencies are designed to emphasize the specification, learning, and demonstration of those behaviors which are essential to effective teaching. Program research emphasizing the effects of the training site on selected teacher training variables has been consistently evaluated within a multi-dimensional scheme. The research results have provided evidence in support of the field-based teacher preparation program, evidencing that field-based preservice teachers have more positive feelings toward their teaching experience than university-based preservice teachers. In the cognitive domain, as evidenced by pupil growth, field-based interns have demonstrated an ability to positively affect pupil learning. (Author)

Descriptors—\*Field Experience Programs, Higher Education, Negro Teachers, \*Preservice Education, \*Student Teaching, Suburban Environment, \*Suburban Schools, \*Teacher Education

Identifiers—\*Distinguished Achievement Awards Entry

The Suburban Teacher Education Program (STEP) was established at Texas Southern University in spring 1975. STEP is a 16 week experience which seeks to effectively prepare black preservice teachers for suburban "cross-over" schools. It consists of two eight week segments, the first of which is devoted to the involvement of participants in interdisciplinary seminars in mental health, sociology of suburbia, and education, and employs inquiry teaching techniques and methods. The remaining eight weeks consists of actual in-class student teaching where the theories studies, field trips made, and the newer insights and understanding gained from the reality-oriented and field-based activity of the first eight weeks are implemented. Students may receive a maximum of 12 semester hours credit for these experiences. Results of the first year's activity indicate that the program has made a significant impact on the student teachers, on the university, and the school community in which it is located. The program brings together a diverse supportive population and assists those students who seek to teach in suburbia in bridging the gulf that exists between the two cultures involved. (Author/CD)

Descriptors—\*Affective Objectives, \*Educational Philosophy, Educational Quality, Elementary Education, Emotional Development, \*Humanistic Education, Learning Theories, \*Moral Development, \*Open Education, Performance Based Education, Self Concept, Student Role, Teacher Role

The document is a collection of articles, all of which concern educational reform in general and humanistic/affective education in particular. The first article establishes a theme for the book in warning that undue stress on competencies and

skills may mean losing sight of equally valid and important humanistic aims of education. A common concern of many of the articles is developing positive self-concept in children; encouraging moral development; helping the child to understand and express humor, aggression, anger, and other personal feelings; and devising curricula that can spark a child's imagination. Two articles focus on the habit of teachers to shy away from teaching science, both out of unfamiliarity with the subject and a lack of ingenuity in thinking of ways to make it accessible to young children. Experiments and projects are suggested which are both lively and educational. Another article examines children's difficulty with math and tries to focus on what kinds of operational thinking, as identified by Piaget, are required to master different mathematical problems. An article by Albert Shanker argues for strengthening the role of teacher associations in issues of educational policy. Other articles concern the role of the teacher in the open classroom, student role in a person-centered program, and competency based teacher education. (CD)

The Division of Teacher Education and Psychology at Southwestern Oklahoma State University has developed a unique approach to the task of improving teacher education. The uniqueness of the approach lies in (1) the attempt to revise an on-going program without additional funding, personnel, and released time; (2) the use of the basic tenets of competency or performance based teacher education (C/PBTE) as guidelines while retaining those more traditional practices which are considered successful instead of replacing the existing program; (3) the development of a set of competencies out of existing practice and revising these to conform to a desired teacher model rather than beginning with a particular teacher model; (4) the establishment of a system of assessment and evaluation based on an explicit set of competencies encompassing all of the student's learning experiences; and (5) the use of the expertise of local personnel to perform consultative services. (A table comparing traditional education to competency based education and an outline of the program are included) (Author/CD)

Identifiers—SODIA

The document describes Utah State University's program in elementary education, called SODIA, an acronym for self, others, discipline, implementation, and associate. The first part of the document identifies specific competencies student teachers need in developing their own self-awareness, in learning communication skills, and in teaching the specific subjects of language arts, reading, math, science, and social studies. It suggests specific instructional activities the student is expected to perform in the classroom as a student teacher. The second part of the document is a handbook of student teaching, defining

the role of both student teacher and his/her supervisors. The student is expected to fill out forms which are included as a record of his/her development in different competencies. The third part of the document contains letters from school systems supporting the SODIA program. The last part of the document is a student program planning guidebook meant for use by education majors at Utah State. (CD)

This paper is designed to be used as a practical resource manual for the development of proposals for negotiations on inservice teacher education. It is divided into two sections. The first section focuses on the analytical techniques which should be used by an association in formulating the content and design of its inservice education proposal. It addresses the following three major considerations: (1) the relationship which should be developed between the negotiated inservice program and other negotiations priorities, (2) the negotiating unit, and (3) the legitimate organizational objectives of the association. The second section examines three general options which an association can adopt in negotiating its inservice program. Each option is accompanied by illustrative contract language. (Author/PB)

**Cardiac Arrest During Medically-Supervised Exercise Training: A Report of Fifteen Successful Defibrillations.**

Pub Date May 75

Note—3p.; Paper presented at the American College of Sports Medicine Meeting (New Orleans, Louisiana, May 1975)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Cardiovascular System, \*Exercise (Physiology), Heart Rate, Intervention, \*Males, Medical Assistants, Medical Treatment, \*Older Adults, Physical Fitness, \*Risk

The Cardio-Pulmonary Research Institute conducted an exercise program for men with a history of coronary heart disease. Over 7 years, there were 15 cases of cardiac arrest during exercise (one for every 6,000 man-hours of exercise). Trained medical personnel were present in all cases, and all were resuscitated by electrical defibrillation with no permanent damage. Coronary heart disease patients are at risk of cardiac arrest during exercise, and there seems to be no way of predicting by age, type of exercise, or seeming tolerance to exercise whether or not cardiac arrest will occur. Nor are months of regular exercise a safeguard against an attack. However, exercise, even vigorous exercise, is safe if there are medical personnel present, and the physiological and psychological benefits of exercise in the rehabilitation process for coronary heart disease patients are important. Descriptors—Academic Achievement, Assignments, Cheating, \*Creative Thinking, Elementary Secondary Education, Guidance, \*Home Study, \*Home Work, \*Independent Study, \*Learning Theories, Student Motivation, Study Skills

This booklet is an evaluation of the use of homework as it contributes to learning. The main contention of the booklet is that as often as possible homework should be in the form of independent study projects and should be interesting and enjoyable rather than boring or overly difficult. It is suggested that homework assignments which are too long or too disagreeable create a great deal of anxiety in students, particularly those most anxious to succeed. The document refers to experiments in which homework loads were reduced in school systems with no noticeable decline in accomplishment, while children and their families both seemed pleased with the change. Unpleasant homework assignments are also criticized as leading to cheating, since many students do not see the need for doing the work themselves. It is stated that it is not in fact known whether or not homework detracts from the student's interest or vitality in the classroom. Creative assignments which genuinely challenge students and are geared to their ability levels are seen as useful when assigned in moderation. A bibliography by the ERIC Clearinghouse on Teacher Education of other literature on the subject of homework is included. (CD)

Descriptors—\*Performance Based Teacher Education, Teacher Behavior, \*Teacher Certificates, \*Teacher Certification, Teacher Education, \*Teacher Qualifications, \*Teachers

For a competency-based system of teacher certification to be feasible and fair, a valid and reliable set of measurement procedures must exist. There are four questions which must be answered

before competency-based teacher certification can be validly implemented. The first question is, Should teacher or pupil behavior be used as evidence of teacher competence? Teacher behavior rather than pupil behavior is a more appropriate basis on which to judge teacher competence. The second question is, On what basis should specific behavioral indicators of competence be selected for observation? It is intellectually unjustifiable at this time to establish a particular set of behavior indicators of teacher competence as certification criteria. Question 3 is, Under what conditions should teacher behavior be observed in order to assess competence? Teacher behavior must be assessed in several contexts and over time if the assessments are to be generalizable. The final question asks, what kinds of measures of teacher behavior should be used to assess competence? Observation systems need to be identified and developed which are characterized by strong reliability and validity and by enough scope to reflect the range and complexity of teacher-student interaction. The movement in the direction of competency-based teacher certification should proceed only to the extent that our knowledge and technology will adequately support it. (RC)

Descriptors—Class Activities, Community Characteristics, Community Study, Cultural Background, Culture, \*History Instruction, Instructional Innovation, \*Interviews, \*Local History, \*Older Adults, Oral Communication, \*Oral History, Secondary Education, Social History, Social Studies, \*Tape Recordings

The book presents information on the use of oral history as a classroom device. The first chapter discusses the evolution of oral history from a practice intended to preserve information on noted Americans to a way of preserving recollections of older Americans about the past. The second chapter explains why interviewing members of their own communities can make children more interested in the subjects they study. The "Foxfire Book," a popular anthology on Appalachia, originating from a social studies class, is used as an example of stimulating, innovative project. The third chapter offers suggestions on preparing the student as an interviewer, such as how to be a good listener, ask good questions, and put the interviewee at ease. Methods of using tapes are compared in chapter 4. It is recommended that segments of the tape be indexed rather than transcribing all the tapes, which is time-consuming and costly. Chapter 5 discusses the development of an oral history project and provides examples, including a sample release form, which gives a project the subject's permission to use the interview, and a sample interview. The author states that the establishment of an oral history association, the increasing use of oral history in schools and colleges, and the enthusiasm usually associated with its use indicate that oral history is likely to be a major adjunct to classroom instruction in the 1970's. Descriptors—\*Financial Support, Program Budgeting, Program Costs, Program Descriptions, Program Design, \*Program Development, \*Program Planning, \*Program Proposals, Research Projects, \*Research Proposals

This booklet is intended to be a package that individual teachers and local associations can use in writing successful proposals. It begins with 10 steps that can serve as a guide for formulating a proposal. These steps can be used as agenda topics for working through the proposal process. The next section of this booklet details how to write the proposal. It contains the various parts of the proposal listed in outline with explanations and examples. The third section presents criteria for rating the proposal. The fourth section, concerning evaluation and reporting states that evaluation and reporting of a proposal that is already being implemented is essential when looking for future funding. A chart showing the major activities that comprise the funding cycle makes up the fifth section. The final section of this booklet contains various sources of financial support for funding proposals. Descriptors—\*Behavior Change, Behavior Patterns, \*Change Strategies, \*Changing Attitudes, Elementary Secondary Education, Punishment, \*Reinforcement, Reinforcers, Social Reinforcement, Student Behavior

This report reviews some of the most relevant findings from the extensive research which has been done on behavior modification. It summarizes the more important, practical, concrete, and classroom-tested procedures which research shows to be effective in improving students' academic and social behaviors. The first section of the report begins by stating that a more descriptive name for the behavioral approach is behavior improvement. Next is an explanation of how consequences may be used to improve classroom behaviors. Reinforcement and punishment are discussed, as are ways to change and improve academic and social behaviors. The next section talks about the methodology of using behavior modification procedures. It contains information on pinpointing behaviors and counting and charting behaviors. Behavior modification change procedures are the topic of the third section. Discussed in this section are change procedures, modeling as a change procedure, social reinforcement procedures, activity reinforcement procedures, token reinforcement procedures, and punishment procedures. The final section suggests ways in which the reader might learn more about behavior modification. The report also contains a list of 100 selected references. (RC)

Descriptors—Behavioral Objectives, Evaluation, Independent Study, \*Inservice Teacher Education, Large Group Instruction, Small Group Instruction, \*Teacher Education, Video Tape Recordings

The first section of this final report is an introduction that is on video tape and available only through the author. The second section, which is written, concerns large group instruction. It contains information on the lecture and on an instructional management strategy for individualized learning. Small group instruction is explored in section three. Some of the topics

discussed are what is small group discussion and why it is desirable, how small groups should be organized, and how small discussion groups can function more effectively. Section four pertains to independent study. The topics discussed in this section include what independent study is all about, teacher planning for independent study, and materials for independent study. The focus in section five is on the development and writing of instructional objectives. Section six deals with the utilization of teaching strategies. Included in this section is information on the UNIPAC format, how children learn to think, key concepts of individualization, machine scheduling, and determining individual needs. Section seven discusses the development of learning packages and includes sample formats. Section eight concerns creativity related to thinking skills. Finally, section nine deals with evaluation instruments. Included in this section is information on diagnosing and assessing the teaching act and performance assessment rating. (RC)

**Teacher Perceptions of the Acceptability of Teacher Training Products. Research and Development Memorandum No. 141.**

Stanford Univ., Calif. Stanford Center for Research and Development in Teaching.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date Dec 75

Contract—NE-C-00-3-0061

Note—33p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Complexity Level, \*Evaluation, Inservice Teacher Education, \*Instructional Materials, Microteaching, Skill Development, \*Teacher Attitudes, Training Objectives

The study was designed to find out what kinds of teacher training products were considered most useful by teachers. Twenty-one teachers were asked to evaluate 125 teacher training products divided into various sets by objectives and complexity of training mode and skills required. There was fairly strong agreement on what products were good, with preference going to those that involved microteaching or other clinical practice, varied activities, and complex skills and training. These products tended to be more expensive and to have produced at research and development centers. The methodology used to determine teacher attitudes toward teacher training products is considered an acceptable model for future research, and the authors hope research will be done to determine acceptability of the products after use by teachers. (Statistical tables are included, as are sample questionnaires answered by teachers.) (CD)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Athletics, Communication (Thought Transfer), \*Humanism, Interpersonal Relationship, \*Philosophy

Forces that would wrest personal autonomy from us are presently at work, both directly and indirectly, in the sports profession and in society at large. We are typically confused on the subject of man's nature; we have arbitrarily and unwisely relegated it to the interdisciplinary area of metaphysics where the topic rests in some disarray because of the plethora of theories that currently prevails. These confusing and overlapping concepts of man's nature confound many of our presentations and discussions. We have a definite responsibility to our students to help them form their own, highly personal positions as to man's basic nature. The need for more effective communication within the area of sport and physical activity philosophy is self-evident. Because of the varied methodological approaches we employ, we are seemingly not communicating too well with each other, and our voices are not having a significant influence on those involved with sport in the culture. Members of the Philosophic Society for the Study of Sport have a contribution of vital importance to make in regard to sport's cultural role. (Author/CD)

Most students majoring in elementary education at Illinois State University are enrolled in the CORE Program. These prospective teachers are required to complete three on-campus unified "cores" or semesters of work which focus upon the arts, communication skills, and natural and social sciences. The fourth core or semester is devoted to clinical teaching experiences and selected course work at one of four teacher education centers operated by the Department of Curriculum and Instruction in cooperation with public school districts. The centers provide a program of extensive clinical experiences for about 400 teacher candidates yearly. Each center is staffed by an in-resident director and two clinical consultants who are employed by the university to service approximately 50 students per semester. In some centers, consultant staff members are district personnel assigned to this position. Through partnership agreements, cooperating districts provide office space, classroom facilities, and school personnel. The paramount goal of the fourth core component is the provision of a multitude of opportunities for the teacher candidate to work toward the attainment of teaching skill competency and to search for their own unique teaching style through direct involvement in a realistic teaching-learning situation. (The programs at each of the four teacher education centers are described in this report.) (Author/CD)

**Teacher Verbal Behavior and Its Relationship to Growth in Child Language.**

Pub Date 5 Feb 76

Note—12p.; Paper presented at the Association of Teacher Educators National Conference (St. Louis, Missouri, February 5, 1976); Occasional light print

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**  
Descriptors—\*Language Development, \*Language Usage, Preschool Children, \*Preschool Education, Preschool Teachers, Teacher Behavior, \*Verbal Communication

This study investigated the relationships between teacher facilitative or directive verbal behavior in nursery school classrooms and seven aspects of child language change. Twenty-eight nursery teachers and 95 children from these classrooms were selected for this study. The teacher verbal behavior was measured by the Withall Social Climate Index, which produces a facilitative score and a directive score for each teacher. Child language change was determined by a pretesting and posttesting with the Peabody Picture Vocabulary Test and with an analysis of 50 consecutive statements. Within the limitations of this study and from the findings, it can be concluded that teachers consistently used a pattern of facilitative or directive verbal behavior in their classrooms. It can also be concluded that language for the four-year old children in this study, as measured by the instruments used, continued to change in the six month period. Finally, it can be concluded that, for children in this sample, change in use of complexity sentences was greater in those classrooms where teachers used more directive verbal behavior. In the other aspects of language change studied, the verbal behavior as measured by the Climate Index. (Author/RC)

Adaptive Testing as a Significant Process in AIM. Memphis State Univ., Tenn. Bureau of Educational Research and Services.

Pub Date 1 May 75

Note—29p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Computer Oriented Programs, \*Individualized Programs, Instructional Systems,

\*Measurement Techniques, Models, Response Style (Tests), Scoring, \*Student Ability, \*Student Testing, Test Construction, Test Interpretation, Test Reliability, Test Selection, Test Validity

Identifiers—\*Adaptive Testing, Computer Assisted Testing, Flexilevel Tests, Tailored Testing

To what degree testing can become adaptive is considered in three ways: from a formal methodological perspective; from a human process, stability, perspective; and from a subsystem or component view within an adaptive instructional system (AIS). With the advent of large computer-based training systems, the opportunity to broadly implement adaptive testing models and contrast them in terms of their adaptive nature has come to its moment of truth. It, therefore, seems appropriate to describe various computer paradigms which are representative of one or more models. This completes the first third of this paper. Testing has long been considered adaptive if the situation is made easier or more relaxing for the student. As this paper illuminates, it is perhaps more important to increase the challenging aspects of the test adaptation, even to stressing characteristics in order to improve both reliability and validity. Adaptive testing can be considered within the context of a total AIS framework. To what degree does it provide for time savings and for enhanced systems improvement? It is in this last area that so little experience and data are available. What little data and conjecture that can be accumulated at this time is presented to complete the overview of adaptive testing. (Author/RC)

Thomas, Patricia J.

Racial Difference in the Prediction of Class "A" School Grades. Final Report.

Navy Personnel Research and Development Center, San Diego, Calif.

Report No—NPRDC-TR-75-39

Pub Date Jun 75

Note—55p.

Available from—National Technical Information Service, Springfield, Virginia 22161 (AD-A012 319, MF \$2.25, HC \$4.25)

Document Not Available from EDRS

Descriptors—Academic Ability, \*Aptitude Tests, Caucasians, Cutting Scores, Grade Point Average, \*Military Personnel, Negroes, \*Personnel Selection, Post Secondary Education, Predictive Validity, \*Racial Differences, Test Results, \*Test Validity

Identifiers—Basic Test Battery, \*Navy

The Navy's selection tests are not as valid for minority personnel as they are for the majority group, the utility of alternative test composites was investigated. The samples were drawn from all students attending a Class "A" school, the first school a recruit goes to in order to learn a technical skill, during 1971-1972. Comparisons were made between mean selection test groups. Regression lines were plotted for white and black students to investigate the usefulness of lower cutting scores for minorities. Predictive validities of the current selection composites and all other combinations of Basic Test Battery (BTB) tests were determined. Differential validity of the operational BTB selectors was reaffirmed and alternative selectors were identified. The mean test scores of blacks were significantly lower than those of whites but their final school grades were not significantly lower. Analysis of the regression lines demonstrated that lower aptitude blacks generally would earn higher grades than lower aptitude whites. It was concluded that an improvement in minority assignment to technical training can be accomplished by implementing new selection composites, valid for both whites and blacks. Lowering the cutting score for blacks on the current combinations of BTB tests was counterindicated due to the chance-level validities of the operational composites in these courses. (NTIS/BJG)

This Manual has been designed to provide step-by-step guidelines for conducting an evaluation of a structured training sequence. The assessment design to be presented involves essentially: the testing of a group of trainees before and after a sequence of instruction by administration of the same set of objective-form items under structured testing conditions; and the application of a series of statistical procedures to the resultant scores and individual item responses to determine the magnitude, direction and level of Test to Retest changes in cognitive (subject matter) competence. As will be stressed repeatedly throughout the Manual, the quantitative analysis of the testing data can provide both a measure of trainee achievement and an assessment of training effectiveness, by estimating how much of the increase in levels of subject competence displayed by the trainees at the end of the course can be attributed to the training experience. Descriptors—\*College Students, \*Course Evaluation, Data Analysis, \*Data Collection, Evaluation Methods, Higher Education, Participant Satisfaction, Rating Scales, \*Statistical Analysis, \*Student Attitudes, Student Evaluation of Teacher Performance

Identifiers—Instructional Assessment System, \*University of Washington

This report presents statistical analyses of data derived from the first year's use of the Instructional Assessment System. Included are: means, standard deviations, and several reliability estimates for each item within each form; inter-item correlations; and correlations of items with non-evaluative variables. Among the major results discussed are the high item reliabilities for all but small classes, the high inter-item correlations and their implications for use of ratings results for diagnosis of instructional problems, and the causal implications of item correlations with non-evaluative variables, e.g., whether students wanted to take the course and grade expected. This Technical Research Report is primarily designed for reference by educational testing and measurement specialists as a supplemental guide to interpretation of Armed Services Vocational Aptitude Battery (ASVAB) results in local and state career guidance and counseling programs. This study examined the validity of specific ASVAB composites from a sample of 6,130 students in 25 high schools offering vocational-technical curricula. School samples were obtained through voluntary participation. A general conclusion indicates that, for the most part, form 2 of the ASVAB does do well in predicting success in a number of vocational-technical categories. For those categories where form 2 of the ASVAB does not appear to predict well, further exploration is needed to delineate the ability factors necessary for academic success in those categories. This Procedure Manual provides detailed instructions to school personnel on how to construct and administer a successful feedback questionnaire, and how to use the resultant data to identify and correct training problems. Specific information is provided about the number of questionnaires to mail, the particular persons to receive them, the time following graduation for mailing, and ways to obtain a satisfactory rate of return. In addition, specific rating scale forms, instructions, and other questionnaire pages are provided which will facilitate the development of a feedback questionnaire for a particular school. (Author)

Descriptors—\*Cooperative Education, Data Analysis, \*Instructor Coordinators, \*Needs Assessment, Questionnaires, \*Teaching Skills Identifiers—Florida

The purpose of this study was to analyze Work Experience and Diversified Cooperative Training in-service teacher-coordinator perceptions to determine: (1) acceptance/rejection of 13 postulates, (2) acceptance/rejection of concepts/elements complementing the postulates, (3) the rank ordering of accepted concepts/elements, (4) acceptance/rejection of 32 knowledge competencies, (5) acceptance/rejection of 32 practitioner competencies, and (6) distribution of responsibilities. Two questionnaires were developed and administered to 440 randomly selected in-service Work Experience and Diversified Cooperative Training teacher-coordinators. The first questionnaire attended to the first three purposes listed above, yielding data needed for a theoretically

based coordinator definition. The second questionnaire attended to purposes four through six, thus providing a needs assessment. The most important finding of this study is the extent of agreement found between Work Experience and Diversified Cooperative Training teacher-coordinators as to the principles undergirding their job performance and the teaching competencies necessary to conduct both programs. The chief differences in the perceptions of the group is in the degree of acceptance of concepts/elements and responsibilities. Specific findings, implications, and recommendations are discussed. Identifiers—University of Washington

Discriminant function analyses utilizing Washington Pre-College (WPC) aptitude/achievement variables and Vocational Interest Inventory scores were performed to predict graduating major for June 1975 University of Washington graduates in 11 majors. Using both types of pre-college measures classified more graduates correctly than utilizing the cognitive or interest measures alone. Suggestions for improved feedback in the WPC program were made so as to provide future high school juniors with (1) three profile scores (based on the first three discriminant functions), (2) a graphic presentation called Plot of Aptitude and Interest Profiles for Typical College Graduates, and (3) a rank ordering of 11 college majors in terms of their closeness to the student's three profile scores. Identifiers—Elementary Secondary Education Act Title VII, ESEA Title VII, \*Milwaukee Bilingual Education Program, Wisconsin (Milwaukee)

This report covers the 1974-1975 extension of the Elementary and Secondary Education Act (ESEA) Title VII Milwaukee Bilingual Education Program which began as a five-year project in September 1969. The program was initiated to develop a bilingual curriculum for schools with Spanish-American populations. Federal legislation, which supports the Milwaukee program, was designed to meet the special needs of children who have limited English proficiency and who come from environments where the dominant language is other than English. In order for Spanish-background children to become more broadly-educated adults, they must be afforded educational opportunities at least equal to those available to other children. Bilingual education was and is considered to be a basic and essential framework to provide these opportunities. The

total bilingual program had three main components. They were an elementary program, a secondary school program, and inservice training for staff. This report describes each of these programs along with the specific objectives and the findings on which the evaluation was based. (Author/DEP)

The Committee on Federal Agency Evaluation Research believes that evaluation of government programs is very much in the public interest and should not endanger the privacy of individuals who give information about themselves. It will not be easy to work out procedures and legal arrangements that balance the conflicting objectives of fostering accountability in government and protecting individual privacy. Special efforts must be made in two areas: (1) protecting evaluation research data from accidental release or malicious misuse by unauthorized persons; (2) protecting people who give information about themselves in the course of evaluation research or social experimentation from having that information used in a court or legislative inquiry. The Committee believes that these efforts should receive high-priority attention in federal agencies, the Congress, and the research community. It is the Committee's hope that this Report and its appendices will contribute to informed debate on these issues. The appendices contain two papers: "Confidentiality-Preserving Modes of Access to Files and to Interfile Exchange for Useful Statistical Analysis" and "A Researcher's Shield Statute: Guarding Against the Compulsory Disclosure of Research Act." Many home economics teachers have experienced difficulty in developing good classroom tests and have expressed a need for help. This publication was prepared to provide guidance in the construction and use of a variety of measurement devices. Section 1 discusses the role of measurement in the instructional process including why measure, what to measure, and how to measure. Section 2 deals with preparing instruments used to assign grades. Advice is given on preparing a test blueprint, choosing an item type (essay, completion, true-false, multiple-choice, and matching), and measuring cognitive and psychomotor learning outcomes. Section 3 discusses preparing instruments used to evaluate and plan instruction related to cognitive, psychomotor, and affective learning outcomes. (RC)

**Establishing Appropriate Time Limits for Tests.**

Pub Date [Nov 73]

Note—22p.; Paper presented at the Annual Meeting of the Northeast Educational Research Association (Ellenville, New York, November 1973)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

**Descriptors**—\*Statistical Analysis, \*Test Construction, \*Timed Tests

The implications of various time limits for tests of a fixed length or number of items seem obvious. If the time permitted is much too short, scores may bunch up at the low end of the potential score range, with a loss of potential variance and a general diminishing of the utility of the variance which is observed. If the time permitted is an intermediate value, the scores tend to become some mixture of power and speed. This paper proposes a simple technique for estimating the mean and standard deviation of the distribution of finishing times for a population of test takers. Given such values, a number of decisions concerning test specifications can be made. (Author/DEP)

**Intelligence and Personality Revisited: An Experimental Approach.**

Pub Date [Sep 74]

Note—38p.; Paper presented at the Annual Meeting of the American Psychological Association (New Orleans, La., August 30-September 3, 1974)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

**Descriptors**—Cognitive Processes, College Students, Environmental Influences, Higher Education, \*Individual Differences, \*Intelligence, Literature Reviews, \*Models, Neurosis, Persistence, Personality Theories, \*Problem Solving, \*Stress Variables

**Identifiers**—Extraversion, Introversion

The history of attempts by psychologists to determine the contribution of personality to intel-

ligence has not been one of unqualified success. Part of the problem may be in the balance of granularity of analyses on the intelligence side and the personality side. A comprehensive analysis of the contributions of extraversion and neuroticism to problem solving latency, accuracy, and persistence in stressed and unstressed conditions was undertaken. Two directional predictions were made based on previous research: (1) Solution-time will be shorter in extraverts than ambiverts or introverts, and shorter in ambiverts than introverts, in both stressed and unstressed conditions. (2) Neuroticism will be related to solution-time such that in the stressed condition, mid-neuroticism subjects will be faster than either high- or low-neuroticism subjects who will not be different from each other, and in the unstressed condition high-neuroticism subjects will be faster than mid-neuroticism and low-neuroticism subjects, and mid-neuroticism subjects will be faster than low-neuroticism subjects. Subjects were university students in undergraduate and graduate educational psychology classes. The personality dimensions of extraversion-introversion and neuroticism were measured by Form A of the Eysenck Personality Inventory (EPI). The dependent variables of problem-solving latency, accuracy, and persistence were measured by the Nuffer-no Tests. Results are discussed in relationship to previous studies. (Author/BJG)

**Identifiers**—\*AAMD Becker Reading Free Vocational Interest Inventory

The AAMD-Becker Reading-Free Vocational Interest Inventory is a non-reading vocational

preference test for use with mentally retarded persons, particularly the educable mentally retarded at the high school level. Illustrations having occupational significance are presented in forced-choice format for selections. The instrument helps to identify areas in which individuals have vocational interests, thus aiding counselors in the vocational planning, training, or job placement of individuals. Scores are provided in eleven male and eight female interest areas. Male interest areas are automotive, building trades, clerical, animal care, food service, and patient care. Female interest areas are laundry service, light industrial, clerical, personal service, food service, and Patient care. Scores in each male and female interest area are derived from pictorial items presented in 55 male triads and 40 female triads in separate inventory booklets. The inventory is available as a consumable booklet for hand scoring and includes an Individual Profile Sheet to interpret results. It can be administered within a 45-minute class period. The manual provides information on administering, scoring and interpreting the test, as well as the development of norms, intercorrelations of the scales, reliability, and validity. (RC)

**Candidate T-37 Pilot Performance Measures for Five Contact Maneuvers. Final Report.**

Quest Research Corp., McLean, Va.

Spons Agency—Air Force Human Resources Lab., Wright-Patterson AFB, Ohio. Advanced Systems Div.

Report No—AFHRL-TR-88

Pub Date Dec 74

Note—88p.

**EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage**

**Descriptors**—Aircraft Pilots, Computer Programs, \*Flight Training, \*Performance Tests, Statistical Analysis, \*Task Analysis, \*Test Construction, Test Validity

**Identifiers**—Air Force

The objective of this program was to develop candidate pilot performance measures for five undergraduate pilot training (UPT) contact training maneuvers flown in the T-37B aircraft. The work included development and application of a method of analyzing operator performance tasks for purposes of identifying candidate measures. This resulted in sectoring of each T-37B maneuver into functional segments, wherein the dominant measurement variables are consistent, and task segments, wherein the relationships among the dominant measurement variables are consistent. Several types of measures were then defined which, collectively, satisfy measurement needs over all task segments. Specific candidate measurement formulae were developed for each segment in accordance with the analysis results. Computer programs (FORTRAN IV) were developed and implemented to: (1) smooth, printout, and plot data recorded on-board a T-37B aircraft; (2) automatically detect task segment boundaries; (3) compute criterion functions from skilled performer's data; (4) compute measures specified at run-time by the user; and (5) perform and print results of several empirical validation tests of the candidate measures for subsequent researcher analysis. **Identifiers**—Project Head Start, \*Project Health Start

The purpose of this paper is to specify the design for evaluating the second year Health Start Program. This design is used as the basis for the determination of the data to be collected and the comparisons that will be made using these data to

provide information to answer the policy questions asked by the Office of Child Development (OCD). For OCD, the basic purpose of the evaluation is to identify successful procedures, strategies, and methods of operation that could be transferred and applied to Head Start or other types of local health service delivery programs. In addition, rapid feedback was to be provided about: (a) whether local projects are complying with program guidelines and grant conditions; (b) the managerial efficiency of projects; and (c) the need for technical assistance either in management or substantive areas. This form of feedback is called project management in this paper, distinguishing it from the evaluation of the program which is the main purpose of this effort. For this analysis, two kinds of comparisons are made: (1) comparisons between particular procedures and strategies within the Health Start program; and (2) comparisons between Health Start and the health component of a sample of Head Start programs. Appendices contain the data collection instruments. (RC)

 About 960,000 U.S. civilian employees have received about 45 million hours of training, costing the Federal Government about \$216 million. To find out how the Civil Service Commission and the Federal Executive department measured the effectiveness of this training, fulfilled the evaluation requirements of the Government Employees Training Act of 1958, and progressed in implementing the recommendations of a 1967 congressional subcommittee report which concluded that Federal training was not evaluated as required, the Government Accounting Office sent questionnaires to about 900 Federal Executive department training and employee development officers and consulted with Commission officials and training evaluation authorities. The questionnaire results showed that the evaluation requirements of the Government Employees Training Act, the Executive order supplementing the law, and the subcommittee recommendations are not being met adequately. Specific findings and recommendations are given. The survey instruments are also included. (RC)

 Identifiers—\*Air Force

To realize its full research potential, a need exists for the development of an automated objective pilot performance evaluation system for use in the Advanced Simulation in Undergraduate Pilot Training (ASUPT) facility. The present report documents the approach taken for the development of performance measures and also presents data collected from two preliminary evaluation studies. The results indicated that the objectively derived measures: (1) correlate highly with instructor ratings, and (2) discriminate between pilots of different experience levels. These findings are encouraging and demonstrate the potential of the present approach for generating the needed automated objective pilot performance measurement system. (Author)

**Definition of the Situation and Observer Bias.**  
 Pub Date [Apr 75]  
 Note—40p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**  
 Descriptors—\*Aggression, \*Bias, Expectation, \*Observation, Play, Preschool Children, \*Social Class, Undergraduate Students

An experiment is reported in which an attempt was made to bias college students' observations of a videotape of children at play. The study is framed in terms of W.I. Thomas' ideas concerning the definition of the situation. Observer bias is an instance when a definition of a situation is based primarily on subjective situational factors. Reliance on subjective situational factors is dependent on the degree of ambiguity of the situation's objective factors. Students were given false information concerning the Socioeconomic Status (SES) of the children in the videotape (manipulation of subjective situational factors). Also, the degree of ambiguity of the videotape (manipulation of ambiguity of objective situational factors) was varied. The students were asked to record all aggressive behavior exhibited by the children. The information about the children's SES did affect the students' observations. The degree of ambiguity of the videotape failed to produce the hypothesized effects. (Author/BJG)

 Descriptors—Evaluation Needs, Higher Education, \*Rating Scales, \*Student Evaluation of Teacher Performance, \*Student Opinion, \*Teacher Evaluation, \*Test Validity

The validity of a rating instrument depends not only upon the content of the instrument and the purposes the instrument is to serve, but also upon its relationships to criteria external to the instrument. Formative and summative evaluation require two distinct types of instruments which yield different types of information. The problem that remains in the development of formative rating devices is a definition and enumeration of the domain of teaching behaviors. A solution to this problem possibly would be different for various subject areas and teaching styles. Careful sampling of this domain may require a set of rating devices which are hierarchically arranged. Current rating instruments represent a step toward the development of broad-band devices, which could be used at the highest level of the hierarchy to identify problem areas, and may also be useful for summative evaluation purposes. Evaluation instruments yield information that is reliable and logically expected to be related to quality of teaching performance. What is lacking is evidence relating ratings to important educational outcomes. (Author/RC)

 Descriptors—\*Ability, Ability Grouping, Branching, College Students, Comparative Analysis, \*Computer Oriented Programs, Group Tests, Individual Differences, Item Analysis, Psychometrics, Response Style (Tests), Scoring Formulas, \*Testing, Vocabulary  
 Identifiers—\*Stradapive Testing

A conventional vocabulary test and two forms of a stradapive vocabulary test were administered by a time-shared computer system to undergraduate college students. The two stradapive tests differed in that one counted question mark responses (i.e., omitted items) as incorrect and the other ignored items responded to with question marks. Stradapive test scores were more consistent with the hypothesized nature of the population distribution of verbal ability. When corrected for differing levels of item discrimination and memory effects, the test-retest stabilities of the two testing strategies were about equal. Scores on one form of the stradapive test were found to be very stable for testees who had highly consistent response records on initial testing. Stability of "subject characteristic curve" data was high, suggesting the usefulness of these data for describing test-tee interactions. Of the 10 stradapive ability scores studied, which grouped into four clusters, average difficulty scores had the highest stabilities. Analysis of difficulties of items associated with correct, incorrect, and question mark responses suggested that items with question mark responses should not be ignored, but should be treated as incorrect responses in branching decisions. Suggestions for future research on the stradapive testing mode are made. (Author)

Descriptors—\*Evaluation Methods, \*Models, Preschool Programs, \*Program Evaluation, Research Methodology  
 Identifiers—\*Causal Modeling

Educational and social programs often develop from a weak or imprecise conceptualization relating the program's system of input variables to its claimed outcomes. Evaluation personnel can contribute both to the final development of a program and to the fair evaluation of such programs by learning to formally characterize programs and to construct causal models of them. The evaluation effort represents an attempt to determine the correctness of the program's existing conceptualization, and if properly carried out, permits the developer/sponsor to strengthen, add, or delete components which are found to be non-functional. In this paper, the authors discuss the concept of causal model building and illustrate their ideas with an example of how causal model construction procedures were used to assist in the evaluation of a complex early childhood program. Descriptors—\*Ability, Branching, Comparative Analysis, \*Computer Oriented Programs, Group Tests, Individual Differences, Item Analysis, Models, Response Style (Tests), Scoring, \*Testing, Test Reliability, \*Test Validity, Verbal Ability

Identifiers—\*Stradapive Testing

This study empirically investigated the validity and utility of the stratified adaptive computerized testing model (stradapive) developed by Weiss (1973). The model presents a tailored testing strategy based on Binet IQ measurement theory and Lord's (1972) modern test theory. Nationally normed School and College Ability Test Verbal analogy items (SCAT-V) were used to construct an item pool. Item difficulty and discrimination indices were rescaled to normal ogive parameters on 249 items. Freshmen volunteers at Florida State University were randomly assigned to stradapive or conventional test groups. Both groups were tested via cathode-ray-tube (CRT) terminals coupled to a Control Data Corporation 6500 computer. The conventional subjects took a SCAT-V test, while the stradapive group took individually tailored tests drawn from the same item pool. Results showed significantly higher reliability for the stradapive group, and equivalent validity indices between stradapive and conventional groups. Three stradapive testing strategies averaged 19.2, 26.5, and 31.5 items per subject as compared with 48.4 items per conventional subject. A 50% reduction from conventional test length produced an equal precision of measurement for stradapive subjects. Item latency comparisons showed the stradapive group required significantly longer per item than conventional group members. It is recommended that time rather than number of items be used in future adaptive research as a dependent variable. (Author/DEP)

Descriptors—Academic Achievement, Age Differences, \*Comparative Analysis, Courses, Ethnic Groups, Grade Point Average, \*Graduate Surveys, \*High School Graduates, Intelligence Quotient, Mathematics, Post Secondary Education, Racial Differences, Reading, Sex Differences, \*Student Records, Test Results  
 Identifiers—California (Los Angeles), \*Los Angeles Unified School District

The third and final phase of the examination of the 1973 graduates of the Los Angeles Unified

School District are presented. Secondary school records were examined in relationship to the graduates' sex, the socioeconomic background of the school of graduation, and the post-high school experience of the graduates. Nearly all the data in this study were derived from the secondary school cumulative records of the graduates. The study was limited to graduates who responded to a followup questionnaire sent to them in May 1974. Findings indicated that the typical graduate of Los Angeles senior high schools: (1) was 17 years and 11 months of age; (2) had senior high school grade-point average of 2.71 (B-); (3) had an intelligence quotient of 98.1; (4) had a reading score on a standardized test that placed the graduate at the 45th percentile on national norms; (5) had a mathematics score on a standardized test that placed the graduate at the 44th percentile on national norms; (6) had a 47% chance of completing an academic course of study; (7) had a 78% chance of entering the Los Angeles Unified School District during his elementary school years (grades 1-6); (8) had an 89% chance of spending his entire senior high school career in one school; and (9) had a 63% chance of being enrolled in a four-year or a community college one year after graduation. Tables provide comparative data. (BJG)

Descriptors—\*Ability, Comparative Analysis, \*Incentive Systems, \*Measurement, \*Military Training, \*Motivation, Objective Tests, Performance Tests, Predictive Ability (Testing), Technical Education, Test Validity

Identifiers—Air Force, \*Effort Measurement

This research explored the validation of a quantifiable, objective, and reliable method of measuring the amount of effort to be directly rewarded in incentive systems. A battery of relevant ability tests was given to a sample of Air Force trainees and to civilian subjects using a simulation of the course taught the Air Force trainees. Results showed that the simulation subjects were comparable to the Air Force subjects and that the ability test battery predicted performance equally well for both samples. The hard criterion of effort displayed wide variability, excellent reliability, and good construct validity. (Author)

Descriptors—\*Cutting Scores, \*Decision Making, Mathematical Models, Measurement Techniques, Statistical Analysis, \*Testing, Test Validity

Identifiers—Pass Fail Testing, Utility Ratio

A measure of the usefulness of a pass/fail testing decision procedure is the ratio of the utility of the given procedure to the utility of a procedure based on knowledge of scores on a criterion measure. It is computed from scores for a representative sample of persons tested. Utility functions may be specified by the test user or set by convention to be linear with unit slope. The utility ratio can be used for comparing tests or for selecting test items. (Author)

**Multiple Serial List Learning with Two Mnemonic Techniques.**

Pub Date [74]

Note—22p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Associative Learning, Codification, \*Comparative Analysis, Cues, Imagery, \*Learning Theories, \*Mnemonics, Recall (Psychological)

The classic mnemonic for learning serial lists, the method of loci, and its modern counterpart, the peg system, were compared by having subjects learn three 20-item serial lists. In addition to the type of mnemonic training, list imagery was either high (rated 6-7) or medium (rated 4-5), and instructions were either progressive elaboration (e.g., make a single image for each list position across the three lists), imagery, or verbal mediation. The verbal mediation instructions resulted in equal performance on both high and medium lists. The two imagery instructions resulted in higher recall than the verbal on high imagery lists and lower recall than the verbal on medium imagery lists. An absence of serial position effect was found for the two imagery instructed groups receiving high imagery lists. All other conditions showed a strong serial position effect. The comparison of the two mnemonic systems showed the peg method gave slightly higher recall on the high imagery lists, and the loci method gave slightly higher recall on medium lists. The results were discussed in terms of the subject's attempt to create an image for the medium imagery items interfering with finding an effective mediator. (Author)

Descriptors—Association (Psychological), Aural Stimuli, \*Classification, \*Conceptual Schemes, Cues, Graduate Students, Higher Education, \*Learning Modalities, \*Visual Perception

Identifiers—\*Visual Information Storage

In a poststimulus cueing task subjects reported either the identity of items or their category membership. Results indicated that readout from Visual Information Storage (VIS) is not selective for conceptual categories. Rapid conceptual categorization of the type found in visual search experiments probably occurs at a processing stage subsequent to VIS readout. Another experiment demonstrated that subjects report category more accurately than identity when stimulus duration is 2 seconds, although there is no difference at .2 seconds. At the longer duration, superiority of category reports was correlated with subjective reports of processing strategy, suggesting that rapid categorization occurs when subjects encode and store information by category immediately after VIS readout. Identifiers—\*Navy

The purpose of this research is to develop content analytic techniques capable of extracting the differentiating information in narrative performance evaluations for enlisted personnel in order to aid in the process of selecting personnel for advancement, duty assignment, training, or quality retention. Four tasks were performed. The first task was to cross-validate a short-cut indexing technique—the rational condensation method—on other occupational specialties and on other pay grades than those that had been studied earlier. In the second task, a reliability study was conducted in order to be certain that consistency among several indexers can be taught and achieved in their interpretation and application of the rational condensation short-cut method. A third task was undertaken in order to shed some light on whether it is reasonable to assume that although there may be slight differences between two indexers in how they apply a particular indexing procedure, a more important consideration is that they consistently use their own individualized interpretation of the indexing rules and conventions. In the fourth task, a careful comparison of the indexing, coding, keypunching, and subsequent computer processing time required to apply the rational condensation short-cut indexing procedure and the original lengthy indexing procedure to a small subsample of a data base was made. tional Norms, \*School Districts, Standardized Tests, \*State Programs, \*Testing Programs, Test Results

Identifiers—\*Dade County Public Schools, Florida (Dade County), Florida Statewide Assessment Program, Stanford Achievement Test

This report encompasses the results of two 1974-75 testing programs: (1) the Florida Statewide Assessment Program of communication skills and mathematics, administered to pupils in grades 3, 6, and 9, and (2) the countywide testing program involving the Stanford Achievement Test, a national standardized test administered to pupils in grades 1-12. These programs differ with respect to the types of instruments utilized, the use of their results, and their geographic scope. The body of the report is divided into several sections. In the first section, a summary and interpretation of the district wide results is presented in a question and answer format. Attempts have also been made to anticipate the major questions the typical reader might ask and to provide answers in as simple a form as possible. Following this section are the major sections on the district results for the State Assessment and Stanford, or district-wide, program. Tables denoting the by-grade and by-subject area results are presented here. (Author/DEP)

Winick, Albert B.

A Format in Assessing the Mentally Retarded for Vocational Activation Utilizing the Clinician's Insights.

Pub Date Jul 74

Note—254p.; Ph.D. Dissertation, Walden University

**EDRS Price MF-\$0.83 HC-\$14.05 Plus Postage**

Descriptors—Achievement Tests, Adults, Clinical Diagnosis, Cognitive Tests, Guidelines, Intelligence Tests, Interest Tests, Literature Reviews, \*Mentally Handicapped, Motor Development, Personality Tests, \*Predictive Ability (Testing), \*Psychological Tests, \*Vocational Adjustment, \*Vocational Rehabilitation  
Identifiers—Bender Visual Motor Gestalt Test, Draw A Person Test, Purdue Pegboard Test, Sentence Completion Test, Wechsler Adult Intelligence Scale, Wide Range Achievement Test, Work Interest Check List

Tests of intelligence and structured measures of emotional status, aptitudes, and achievement alone do not suffice in predicting the vocational adjustment of the mentally retarded. Since the main concern is the evaluation of the many aspects of behavior which make the individual a unique and changing person, a format was developed which included a particular battery of psychological tests which assessed intellectual capacity and functioning, personality characteristics, academic achievement, aptitudes, and preferences. Tests were selected for their usability and appropriateness with the mentally retarded. The importance of the format is that it included the author's interpretations and insights based on the examinee's responses and reactions to the testing program. The test findings were critiqued, and the clinical interpretations were presented. Some conclusions and recommendations were: the focus of the assessment should be on the identification of areas of strength rather than on weakness; social competence is one of the most important determinants for vocational functioning; it is more appropriate to make an assumption of positive adaptation on a meaningful criteria of employability and social integration until negative evidence appears, rather than to assume a poor prognosis until positive evidence appears; and finally that predictive measures should be more as estimates of preparation for the next step in training or placement than as determiners of the future. Prediction During Learning of Later Retrievability.

Pub Date [Nov 74]

Note—6p.; Paper presented at the Annual Meeting of the Psychonomic Society (Boston, Massachusetts, November 1974)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Memory, Paired Associate Learning, \*Probability, \*Recall (Psychological), Retention, Undergraduate Students, \*Verbal Learning

Evidence was found for an ability to monitor during learning the degree of retrievability of the to-be-learned material from memory at time of a subsequent test. Students were given three successive study trials to learn either a list of 60 paired associates or a free-recall list of 60 "unrelated" words. During a fourth study trial, they rated on a 7-point scale how confident they were that they would recall the item on a later test trial. Performance on the subsequent test was a monotonic increasing function of rating for both tasks the slope being greater for paired associates. (Author)

Longitudinal Data Analysis with Pictures, Regression and Principal Components.

Pub Date [75]

Note—19p.

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—\*Data Analysis, Graphs, \*Longitudinal Studies, Multiple Regression Analysis, \*Statistical Analysis

Identifiers—Change Point Analysis, Principal Components Analysis

Several statistical techniques that can be used to ameliorate the difficulties inherent in the data analysis of longitudinal studies are presented. The first step in longitudinal data analysis is graphing. This permits visual inspection of the data, and with educated viewing can yield insights into the nature of the underlying mechanisms. The next level of sophistication is to apply regression analysis and change point analysis to the curves obtained from the graphical analysis. It is usually the case in longitudinal studies that the exact form of the curve is not known prior to the experimentation. The graphing of the data is useful in suggesting different mathematical models to apply to the curves. The results of the regression analysis will help determine the uniformity of the process across subjects. The next step is to use the form of the fitted equation to determine significant points on the curve. The shape of the curve will suggest change points in the subjects' behavior with respect to the dependent variable. In certain cases where problems arise, the use of principal components is called for. Practical advantages are that they explain the original curve best and will likely point to any existing major differences, and they occur mathematically and do not depend on the experimenter's ability to form a regression curve or pick important change points. When used in conjunction with each other, these techniques form a powerful package for analyzing longitudinal data. (RC)

Identifiers—\*PLATO, University of Illinois

The University of Illinois' PLATO Elementary Program, which was observed and evaluated for two years, was the focus of Part 1. The major PLATO features were described and the PLATO elementary reading and mathematics demonstrations, representing attempts at sequential and concurrent hardware, software, curriculum, and implementation development of tutorial computer assisted instruction, emphasized. The PLATO staff was composed of volunteers because of the perceived importance of teacher commitment to the program. This method of selection caused several problems. The orientation of PLATO staff varied with implementer's views of proper teacher contribution to the program. Judgments on the effectiveness of teacher orientation and the relationship between that process and the eventual development of the innovation were inconclusive. In Part 2, the theoretical components of the degree of PLATO implementation and classroom observation were discussed. An effort was made to sketch the evolution of one of the observation instruments being employed to observe the effects of PLATO on the life of elementary classrooms, the conditions and hypotheses under which it has been developed and used, and one illustrative result concerning implementation. EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

**Descriptors—\*Multiple Choice Tests, \*Test Construction, Testing Problems**

Identifiers—Item Difficulty (Tests)

This study evolved from a practical field situation that dictated an item format change. The item type in question is a variety of the multiple true-false item, widely used in state and municipal civil service examinations. Items are produced, not by combining pairs of independent true-false items, but as a means of salvaging not quite adequate four-choice multiple items. The original items may have no right answer: two, three, or four right answers; or one or two ambiguous or nonplausible responses. Items of this type were developed for use in a national testing program for automotive mechanics. After review by a number of test specialists and mechanics, it was decided that many items were faulty. A format variation was developed which seemed to be more clear cut, informal, and easier to read and understand. The revised items were used in a test battery. In practical terms, the overall effect of

changing item format was to make the test items easier by an amount that would make mean percent correct scores higher by less than one percent. The real effect was to eliminate protests about the test questions. (RC)

Identifiers—\*Test Theory

Empirical Bayes point estimates of true score may be obtained if the distribution of observed score for a fixed examinee is approximated in one of several ways by a well-known compound binomial model. The Bayes estimates of true score may be expressed in terms of the observed score distribution and the distribution of a hypothetical binomial test. The latter distribution is found by use of the compound binomial approximation formula and from relationships which exist between Bayes estimates and unconditional probabilities of observed score. Empirical Bayes point estimates are obtained by use of the sample observed score distribution. (Author)

This handbook provides the practicing educational and career counselor with basic information about a college's policy regarding credit by examination, particularly the College Level Examination Program (CLEP). CLEP is a national program that is readily available to the general public. It is designed to measure knowledge acquired outside the formal educational setting. Growing numbers of college entrants are being awarded credit before attending their first class for results of the CLEP tests taken around the time of college entrance. A counselor working with a client who wishes to gain recognition for educational achievement, life experience, independent study, or other form of nonclassroom learnings will find a number of concurrent and continuing opportunities available at the colleges contained herein. Many of the colleges listed offer innovative and exceptional programs of study that are designed to meet the needs of today's student. The 1975 supplement is also included. (Author/DEP)

Note—10p.; Paper presented at the Annual Meeting of the Psychonomic Society (Boston, Massachusetts, November 1974)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

**Descriptors—High School Students, \*Learning Processes, Learning Theories, \*Memory, \*Organization, \*Recall (Psychological), \*Word Lists**

Sixty subjects learned four different 16-word lists in four different conditions. Within each list, every word was repeated. The four conditions were defined by a 2 (whole vs. blocked presentation) by 2 (same order vs. random order repetition) factorial design. An unexpected final free recall followed the immediate free recall of the fourth list. It was found that significantly more reminiscence was observed in the whole-random condition, suggesting that initially imposed organization hindered the subsequent reorganization. (Author)

Identifiers—\*Armed Services Vocational Aptitude Battery

The Armed Services Vocational Aptitude Battery (ASVAB), developed by the Department of Defense, is a test geared toward career planning. This instrument has proved useful to other populations as well as the military. This is especially true for high school students, who during their final years of school must decide on what educational or vocational line to pursue. This document relates some of the research done with the ASVAB in cooperation with a high school career guidance program. The results of a survey of students in the guidance program and a history of the relationship of the Board of Cooperative Educational Services (BOCES) and the ASVAB are discussed. (DEP)

This guide was designed to help elementary school faculties begin a cycle of evaluation, revision, implementation, and change which can coincide with other evaluation cycles, such as Educational Quality Assessment (EQA) testing or longrange planning, if desired. The processes described in the general procedures section are suggestions; situation. This document is generally cognitive in nature because knowledge with understanding is still a primary reason for basic education. Attempts to "open" or humanize education as well as to involve the community in the schools, however, must also be considered in any self-study. This guide reflects those attempts by including (1) a special section on the evaluation of experimental organizational, instructional, and special subject programs; (2) items in all sections

on affective education, individualizing instruction and using discovery, inquiry and exploration techniques with children; and (3) comprehensive sections which examine the entire school program from different viewpoints. The open-ended commendations and recommendations summaries allow all participants to place proper emphasis on what each considers the most important findings of the study. (Author/BJG)

Descriptors—Alternative Schools, \*Educational Alternatives, \*Elementary Education, \*Parent Attitudes, Questionnaires, \*School Surveys

Identifiers—\*Minneapolis Public Schools, Minnesota (Minneapolis)

The majority of the parents answering the survey preferred program characteristics that fell between the most traditional-structured and the most flexible-open types of educational programs. The majority of parents also preferred that: parents and students be involved in school decisions; the curriculum include required courses, specific courses in basic skills, courses to meet the specific needs of their child, and work on feelings and attitudes; several teachers be available to their child, and that teachers do most or all of the teaching; children have some responsibility for their own learning; their child progress through a subject at the same speed as others, but be given extra work or help if she or he progresses faster or slower than others; the work environment be quiet and orderly, with some student freedom to move about and talk; the learning environment include both active and passive learning opportunities, equal emphasis on competition and cooperation, some participation in group projects with other children, and some activities in the community; and their child work, play and study with students of the same age or grade, or within one or two years younger or older than their child. Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Minneapolis Public Schools, Minnesota (Minneapolis)

The intent of the Urban Environmental Studies Curriculum Project, funded by an ESEA Title III grant, was to develop and implement curriculum for an urban oriented environmental studies program within Special School District 1, Minneapolis Public Schools which would utilize the environment, involve students in investigations and experiences to build an understanding and appreciation of their city and natural environments, and develop a basis for objective clarification of values in areas crucial to the environment. This report lists project identification, project objectives, activities which were used to implement each objective, and evaluation procedures used to determine the extent to which each objective was accomplished. Evaluation results are also presented. Evaluation indicated that project staff has made the first step in reaching its goal by accomplishing the project's first year objectives. Therefore continued funding for the second year is recommended. (RC)

Identifiers—Pennsylvania (Philadelphia), \*Project Follow Through

This report is a non-technical summary of six major evaluation reports on the Follow Through Program in Philadelphia, 1973-74. Positive findings are presented in the areas of pupil achievement, teacher and pupil continuance and pupil absence, and supportive services and parent involvement. The Follow Through Program in Philadelphia is comprised of seven educational models: Bank Street, Behavior Analysis, Bilingual, Florida Parent Educator, Parent Implemented, Philadelphia Process and EDC (Educational Development Center). In terms of achievement based on cross sectional analysis, Total Follow Through (TFT) exceeds the Total Non-Follow Through (TNF) group in almost all test areas in kindergarten; in Total Reading, and Total Mathematics in first grade; and in Total Mathematics in third grade. The Behavior Analysis (Grades K-3) Model and Parent Implemented (Grades 1-3) Model (with only one exception on one criterion in the latter case) perform better than the TNF group at all grade levels. Comparisons between Spring 1973, and Spring, 1974 test data, although only tentative at best, indicate that overall, with the exception of kindergarten, the 1974 results show higher percentile ranks than do the 1973 results on comparable test areas. Identifiers—Minneapolis Public Schools, Minnesota (Minneapolis)

The Bryant-Anthony-Ramsey (B-A-R) Project is a desegregation/integration project aimed at assuring a smooth transition from a predominately segregated school environment to a desegregated or integrated environment. The Bryant, Anthony, and Ramsey Junior High Schools are participants in a desegregation effort that is one part of an overall desegregation plan of the Minneapolis Public Schools. These schools (B-A-R) are involved in a unique plan involving the redrawing of attendance areas and the restructuring of age group patterns. The project is a community involvement project with these objectives: developing community awareness, fostering support for the project, developing support for desegregation, teaching skills to persons interested in desegregation and/or community involvement, and reducing racism. The evaluation was conducted by means of questionnaires, visits, observations, and interviews. The groups involved included the B-A-R Advisory Committee, B-A-R student groups, school staffs, workshops participants, and people who attended B-A-R community meetings. It was recommended that the project continue its efforts in 1974-75. (RC)

Identifiers—\*Minneapolis Public Schools, Minnesota (Minneapolis)

In the spring of 1975, three alternative secondary schools in the Federation of Alternative Schools, with the help of the Minneapolis Public Schools' Research and Evaluation Department, surveyed their students. The 66-item questionnaire, which was developed to provide an overall assessment of student attitudes and information for program improvement, was completed by more than 75 percent of the students enrolled in the three schools. Results showed that more than 80 percent of the respondents indicated that their alternative school was relevant; 90 percent said their teachers understood them, liked them, were fair to them, and showed an interest in them; the majority were satisfied with how much they were learning and they learned more this year than previously; and the majority felt their school helped them in cognitive and affective learning areas. Seventeen of the items were included in a 1972 survey. 1975 students responded more favorably on all items, but several interpretation cautions were noted. If positive attitudes toward school can serve as a means to school effectiveness, alternative schools appear to have some potential for effecting the attainment of other student educational outcomes. The report presents data for the 1975 Summer Happening program and Network Schools programs at Millersville State College. Teachers' opinions toward the effectiveness of both programs are summarized and compared. The basic results of the analysis show that programs conducted in the network schools tend to be more favorably received than programs conducted at the College Summer Happening. The report also includes an evaluation model and instruments. Teacher classroom observation techniques, techniques for measuring children's attitudes, and evaluation forms for administrators are presented in the appendices. School districts are encouraged to seek training in evaluation techniques since educational accountability is upon the world of education. (Author)

Descriptors—Course Evaluation, \*Curriculum Development, \*Curriculum Evaluation, Data Collection, Decision Making, \*Educational Innovation, \*Evaluation Methods, Instructional Materials, Models, \*Summative Evaluation

After a general review of approaches to the evaluation of curriculum innovations the author presents a strategy for summative evaluation based on three related activities: (1) the intrinsic evaluation of the curriculum materials that incorporate the aims, objectives, and teaching and learning strategies of the program being evaluated; (2) a performance evaluation designed to assess the extent to which the intended outcomes of the program are achieved in action, and the level of interference from other, unintended, outcomes; and (3) a context evaluation designed to

assess the effect on the curriculum proposals of the varying conditions under which they are implemented. An outline of possible techniques and methods for each of the above activities is presented, and the paper concludes by considering the whole process in relation to the types of judgement the evaluator may be required to make. Throughout the paper a strong emphasis is placed on clarifying strategic and tactical decisions when planning curriculum evaluations, and adequate references are provided to key works of a theoretical and statistical nature.  Identifiers—Maryland

This two-day conference heard from leaders on national trends in health manpower, with particular emphasis on the granting of equivalency credit for relevant experience. Presentations were made under these areas: opening doors to health careers, national trends in allied health testing, innovative approaches to allied health equivalency testing in Maryland, and the allied health professional and health care delivery. Participants were then divided into task forces to address the more specific facets of equivalency testing; questions such as the role of licensing boards, professional associations, military experience, test design, and legal problems. The seminar was closed with the conclusions and recommendations of each task force. (RC)

 Identifiers—Cognitive Abilities Test, Iowa Tests of Basic Skills, \*Maryland Accountability Assessment Program

This initial step in establishing a program of educational accountability provides descriptive information to public officials and the general public about Maryland public schools. The Report presents the overall accountability effort of goal formulation and educational assessment on the State, local school system, and individual school levels. In this Summary, the reader will find descriptive information about: the nature of the educational accountability effort thus far; the instructional goals and objectives in reading, writing, and mathematics that have been agreed upon at the State level; demographic data for the State and local school systems; and assessment data on ability and achievement summarized at the State and local school system levels. Iowa Tests of Basic Skills were used to assess achievement, and Cognitive Ability Tests were used to assess ability. Results showed Maryland's average performance in most of the achievement skill areas was slightly below the national average; however, Maryland's average performance in the ability area showed a progressive increase through the grades. Descriptors—\*College Entrance Examinations, Higher Education, \*Medical Education, \*Medical Students, \*Test Construction

The purpose of this research is to build a test for the evaluation of the knowledge needed by medical students before entering clinical courses in medical school. The criterion for this was provided by teachers in both the pre-clinical and clinical subjects. The Pilot instrument consisted of 335 items that covered 8 sections. Each one of these sections refers to specific Pre-clinical courses. The instrument was administered to two groups of students that received different theoretical and practical training. The homogeneity and reliability of the instrument were both highly satisfactory. Statistics referring to the performance of the groups of students are reported. Interpretation of the results is attempted. (Author)

Descriptors—Multiple Regression Analysis, \*Response Mode, \*Stimuli

Identifiers—Anchoring, \*Conditional Judgements

A linear relationship was found between judgements given by 160 subjects to 7 objects presented as single stimuli (alpha judgements) and judgements given to the same objects presented with a condition (gamma judgements). This relationship holds for alpha judgements and the gamma judgements that belong to a family of constant stimulus and varying conditions (CSF). The corresponding regression coefficient, operating as a multiplier, estimates the contrast effect, i.e. it measures the degree in which the stimulus is dependent of the conditions. The independence of certain stimuli allowed to isolate an additive effect (called K) in the subjects' gamma estimations. The elimination of effect K maximized the exactness of the prediction of the gamma judgements from the conditional distribution of the alpha judgements. (Author/RC)

From the best-fit lines corresponding to sets of families of conditional judgements, the constant stimulus family and the constant condition family, both defined for a same scale object, the coordinate values of the point of intersection of both lines (indifference point) are obtained. These values are studied in relation to the mean values of the single object judgments and the conditional object judgements. Estimations are made of the variation of these coordinate values when a stimulus is dependent or independent of the conditions. (Author)

Investigations about attitudes toward mathematics carried out in the past decade were revised. The instruments used to measure attitudes toward mathematics were analysed as well as the attitudes toward different aspects of mathematics, their relation with other school subjects and their stability through time. Opinions about the influence of variables such as: teacher's attitudes, sociological characteristics and personality factors are presented. The possibility of predicting achievement in mathematics through the measurement of attitude toward this subject is discussed. The result of applying new teaching methods in order to improve existing attitudes was considered. (Author)

Identifiers—Elementary Secondary Education Act Title VIII, ESEA Title VIII, Minneapolis Public Schools, Minnesota (Minneapolis)

The Title VIII Student Support Program (SSP) of the Minneapolis Public Schools was initiated in the 1971-72 school year. This report describes activities of the project for the final (fourth) year and includes descriptions and some comparisons with the previous years. The purpose of the program is to design and implement various ways of reducing the student dropout rate for grades 7-12 at two junior high schools and two senior high

schools in inner city Minneapolis. During the course of the four year operation the program has been organized within three components: the Education Component, the Student and Family Support Component and the Work Experience Component. Since the dropout rate for American Indian students in Minneapolis schools is especially high, many of the students selected for the program are American Indians. Although improvements are evident in the three program components, the program has not shown a significant effect on the dropout pattern. Lack of attendance and tardiness still seemed to be a large factor with most students in the program regarding work programs and school attendance. (Author/DEP)

Pub Date 20 May 74

Note—34p.; In Spanish

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Cognitive Processes, Language, Logical Thinking, \*Problem Solving

The study of problem solving is made through the analysis of the process that leads to the final answer. The type of information obtained through the study of the process is compared with the information obtained by studying the final answer. The experimental technique used permits to identify the sequence of questions (tactics) that subjects ask when solving a problem. Problems may be characterized in terms of their logical structure and their manner of presentation (language). Those problems having the same logical structure (isomorphic) may be solved using the ideal tactics. Ideal tactics is not redundant, reduces uncertainty to zero, has no inversions in the order in which questions are asked and has no irrelevancies. The observer tactics may be evaluated considering "distance" to the ideal tactics. Results obtained in several studies are reported. A theoretical formulation of cognitive processes is attempted. This formulation is based on experimental data and considers two basic components: (1) logical structure, and (2) language, as well as their interaction and the influence that other variables have on cognitive processes. Identifiers—Minnesota Importance Questionnaire, Multiple Rank Order Method, Paired Comparisons Method, \*Scaling Methods, Vocational Needs

Two forms of the Minnesota Importance Questionnaire (MIQ), the multiple rank order form and the paired comparison form, were compared in terms of psychometric characteristics and user reactions. The MIQ forms were randomly administered to 290 subjects on two different occasions resulting in a complete crossing of order-by-form. The results of analysis of variance of absolute differences between first and second administration scores for the order-by-form groups, correlated t-tests between first and second administration within groups, and the analysis of scale score stability and profile stability within and between groups, demonstrate that the level of scores and shape of the score profiles for the ranked form are similar to those of the paired form. Subjects' reactions to the two MIQ forms were found to differ, with two-thirds of the

subjects preferring the ranked form. Further research exploring the comparability of the ranked form and paired form is proposed. (Author)

Descriptors—Comparative Analysis, \*Employment Programs, \*Federal Programs, Followup Studies, Income, \*Longitudinal Studies, Males, Manpower Development, Participant Characteristics, Probability, \*Program Effectiveness, \*Program Evaluation

Identifiers—\*Manpower Programs, Parnes National Longitudinal Surveys

This report provides an analysis of young men in the Parnes National Longitudinal Surveys who were enrolled in manpower programs from 1963 to 1972. It provides information on the Probability that members of the 5,225 sample would enter a manpower program, given personal and economic characteristics. The report evaluates the relationship of manpower program participation to annual earnings from 1963 to 1972 (using Social Security Administration data); and draws comparisons for different types of programs and duration of participation among the enrollees. It also makes comparisons with those in the Parnes sample who did not enroll. (Author)

Identifiers—Grade Inflation, Performance Based Grading

The purpose of this article is to deal with the following issues as they relate to educational grading policy: (1) to examine the use and misuse of grades in education; (2) to explore the use of performance based grading versus traditional grading and compare institutions using traditional grading versus those using performance based or non-traditional grading; and (3) to present an argument that normative and traditional grading policy may be adversely affecting the Office of Academic Affairs of the Florida State Board of Regents' affirmative action policy. Identifiers—Clearinghouse on Applied Performance Testing, Elementary Secondary Education Act Title V, ESEA Title V

The purpose of this conference was to share the information gathered by the Clearinghouse for Applied Performance Testing (CAPT) such as information on performance testing that could be used in public schools, and secondly, to discuss problems that must be solved, issues that should be addressed, and additional research and development needed in the area of Applied Performance Testing (APT). The presentations by the Clearinghouse dealt with the state of the art of APT, an overview of Clearinghouse activities, instructional materials developed on APT, and guidelines for the evaluation of APT materials and procedures. The invited address by Saul Livisky was presented next. This was followed by small group discussion reports on problems, issues, and needed research development in APT. In the next section individual papers are presented discussing these problems, issues, etc. Appendices contain participants in this 1975 conference, handouts accompanying the invited address, and guidelines for the evaluation of APT materials and procedures. Descriptors—Academic Achievement, Educational Finance, Educational Objectives, \*Educational Opportunities, Elementary Education, \*Elementary Schools, Mathematics, \*Models, \*Program Evaluation, Reading, School Districts, Sciences, Self Concept, Student Testing  
 Identifiers—Elementary Secondary Education Act Title V, ESEA Title V, \*Rhineland Wisconsin School District, Wisconsin (Rhineland)

The purposes of the project were: (1) to determine if equality of educational opportunity exists for students in grades K-6 in the Rhineland, Wisconsin, school district; and (2) to develop a model for elementary school program evaluation. Learner achievement of instructional objectives was accepted as the basic indicator of equality of educational opportunity. The district goals of self concept and basic skills—the latter restricted to math, science, and reading—were selected as the areas in which learner achievement would be examined. Data describing teachers' preparation, teacher instructional preferences, and amount of time spent on the subject was collected, and a cost analysis per student by school for 1974-75 was done simultaneously. This hypothesis was tested: "There will be no significant differences with references to learners' perceptions of self concept and to learner achievement in mathematics, science, and reading (at specified grade levels) across Rhineland Elementary Schools." The data essentially supports the position that equality of educational opportunity does exist in grades K-6 in Rhineland schools. A model to assist in the evaluation of elementary school programs was developed and is appended. Additional values of the study included an increased awareness of objectives related to instructor goals and a reexamination of curricular and instructional objectives. In addition, the study developed an increased awareness of a need for continual cost analysis and an increased understanding of evaluation procedures. (RC)

Descriptors—Adult Education, \*Classification, \*Comparative Education, Definitions, \*Education, \*Educational Programs, Elementary Secondary Education, Guidelines, Special Education, Statistics, \*Taxonomy

Identifiers—England, \*International Standard Classification of Education, Wales

The International Standard Classification of Education (ISCED) has been designed as an instrument suitable for assembling, compiling, and presenting statistics of education both within individual countries and internationally. It is expected to facilitate international compilation and comparison of education statistics as such, and also their use in conjunction with manpower and other economic statistics. The classification, which is essentially a dictionary of educational programs is designed for assembling data on current educational phenomena such as enrollment, teaching staff and finances as well as for statistics of the stock of educated people as obtained, for example, by a census of population. In this sense it is a multi-purpose system within which comparable data can be assembled on various features of educational systems and processes. The aims of this handbook are two fold. The first is to ensure a common interpretation of ISCED between and within countries. The second is to assist countries, states, provinces, etc., to relate their system of education to ISCED. The latter purpose is very important since in many countries there exist problems in deciding the level of education of certain courses. (Author/DEP)

Identifiers—Environmental Protection Agency Training Course

The United States Environmental Protection Agency (EPA) provided a program of training courses in the prevention, reduction, and control of water pollution for personnel of federal, state, and local governmental agencies, private industries, and universities. A triangulation approach was pursued in the instrumentation concept. That is, three evaluation instruments were developed. These were: (1) a questionnaire to be sent to the students after they had returned to their homes following completion of the course; (2) a participant observer manual in which prestructured forms were designed for making observations relative to topic sequencing, teaching techniques, content, instructors' knowledge of the subject, instructors' transfer ability, visual aids, physical facilities, and morale; and (3) a subject matter test to be used for determining student growth in number of correct responses. Eleven course variables were analyzed in light of questionnaire and participant observer data. Findings were presented for each of the variables. Another analysis related to growth in learning in terms of change in score in the pretest and post-test and the extent the students consider the learning to be valuable in helping them to do a better job and enhance their advancement. Recommendations were made. (RC)

Descriptors—\*Cloze Procedure, Cost Effectiveness, Criterion Referenced Tests, Elementary Secondary Education, \*Measurement, Norm Referenced Tests, \*Productivity, Reading Achievement, \*Reading Comprehension, \*Reading Programs, Reading Tests, Resources, School Districts, Standardized Tests, Surveys, Testing Problems, Test Validity

The first half of this report is concerned with the measurement of student achievement in reading comprehension. Following the introduction there is a brief critique of standardized, norm-referenced tests of student performance in reading. It is argued that school districts need tests that are sensitive to instructional treatments rather than more global measures of reading ability. In the section, New Measures of Student Achievement, comprehension is defined and then a multiple-choice cloze testing system is presented. In the next section of the paper the measurement of program resources is discussed. The measurement of resources utilization in units of time is offered as the most accurate, useful assessment of program resources. Finally, the work on the measurement of student achievement and program resources and methodology in productivity analyses is summarized, and a statewide survey of productivity in reading programs is proposed. The Technical Appendix provides a detailed summary of procedures, results, and survey instruments. It is written for the research specialist interested in the Main Report's conclusions. It is designed to clarify procedures and results and to present studies which will help reduce disagreement over some of the research approaches employed. (RC)

**Legitimizing Education for Individual Life Styles: School of Survival. Final Evaluation Report 1974-75.**

Minneapolis Public Schools, Minn. Dept. of Research and Evaluation.

Report No—C-74-20

Pub Date Aug 75

Note—55p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—Academic Achievement, Attendance, Educational Alternatives, \*Educational Programs, \*High School Students, Individual Differences, Life Style, \*Problem Children, \*Program Evaluation, Public Schools, Secondary Education, Student Attitudes

Identifiers—\*Minneapolis North Community High School, Minnesota (Minneapolis)

The purpose of the School of Survival (S.O.S.) is to provide an alternative educational program for 9th, 10th and 11th grade students from North Community High School whose life styles are not compatible with formal/traditional educational programs. There were six major goals for the project for 1974-75. These dealt with student participation in the educational activities of the project, students' attitudes toward school and teachers, reading, computation, work experiences, and improvement in the ability of the staff to prepare goals and objectives. A variety of activities including courses, field trips, and independent study projects were used to help the students reach the objectives. The staff were assisted by pre-service and in-service training sessions. The evaluation involved pre and posttesting in reading staff and employees, a review of the attendance records and credits earned by students, staff and employees, a review of the attendance records and credits earned by students, and a summary evaluation of each student by the project staff. The general conclusion is that the project as a whole continues to be successful. Objectives concerning attendance, credits earned, and

student attitudes were not successfully accomplished in 1974-75, however, and it was impossible to determine the success of the mathematics program. (Author/RC)

**Super Career Development Inventory (Form I); Preliminary Research and Field Trial in Brazil.**  
Pub Date 74  
Note—36p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Age Differences, Item Analysis, Norms, Secondary Education, Sex Differences, Test Reliability, \*Tests, Test Validity, \*Translation, \*Vocational Development, \*Vocational Maturity

Identifiers—Brazil, \*Super Career Development Inventory (Form I)

Super's Career Development Inventory (CDI) was adapted to Brazilian culture and applies in a sample of 1048 students of Guanabara State's high schools. Since its purpose is to observe a maturation process, the CDI was administered to the two last grades of grade school and the first two grades of high school, where the students have from seven to ten years of schooling. A test of difference of means was carried out. The differences were statistically significant between the last grade of grade school and the first grade of high school in all scales of CDI. In a breakdown by sex, the results were not very different from the total grade results. These differences must be interpreted with caution because the scores were obtained not only from different grades but also across different school systems. Only the grade school is compulsory in Brazil, so a natural selection can happen. These results did not allow the author to reach a firm conclusion about the use of CDI for Brazilian students. Some suggestions on the format of CDI's scale and on the experience provided by the schools was made. Norms provisionally established are included in the appendix. (Author)

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I, Minneapolis Public Schools, Minnesota (Minneapolis)

This report was prepared as partial fulfillment of the evaluation requirements given in the state of Minnesota's Regulations and Guidelines for Title I ESEA. Objectives for the program were given in terms of gains measured by teacher judgement and achievement tests. Results in terms of test data, will be reported at a later time. Results, based solely on needs assessment data, showed that the program failed to meet those objectives which were based on teacher ratings. The percentage of Title I eligible students who had been rated poor or serious in reading and/or math in fall 1974 and were rated one level higher in spring 1975 were from 7 percent to 31 percent below the percentage stated in the objectives. Discussion of the teacher judgment discrepancies suggest that there was no empirical basis for the expected percentages of students given in the objectives who would be rated one level higher in the spring. Descriptions of projects that were active in 1974-75 are included along with a history of the development of the overall Title I program in Minneapolis. Recommendations will not be made until the achievement test data analysis has been completed. (RC)

This document presents interview data acquired from white and black teachers and white and black parents. Among the questions dealt with are: why white teachers teach in black schools in the inner city; whether white teachers are willing to accept black leadership (i.e., the black principal); whether a majority white faculty should be assigned to a majority black school; whether racism is widespread among the majority white faculty; whether the white teacher is afraid to discipline the black student, even when the need to do so is obvious; and the extent to which white teachers can interpret the black subculture. Five papers are included, addressing issues such as the white teachers in the all-black school, some comments on the Lincoln project and problems encountered by white teachers in black schools and instruction, learning, and the problems encountered by white teachers in black schools. One paper by public school educators addresses the issue of white teachers in black schools. Firm conclusions concerning all white teachers in black schools in the inner city are held not to be possible from composite interviews. Impressions and concerns identified are: that white teachers and black students come from and live in different worlds; that there is a lack of communication between many white teachers and black teachers in black schools; and, that parents are more concerned with the quality of their children's education than the teacher's skin color. This report presents a detailed rationale and a plan for a study of the effectiveness of materials and procedures for meeting the educational needs of individual children in compensatory education programs. An introductory section addresses an overview of the policy questions to which the results of the individualized instruction study will be relevant, an outline of the distinguishing features of the proposed approach, and a discussion of alternative designs that will serve to further clarify the design that is recommended. Other sections include foci on defining and assessing program and support variables, assessing outcomes, sampling and securing the cooperation of schools, collecting data, reducing and analyzing data, project organization, staffing, schedule and references. Appendices include in-class interview-

ing, analyzing curricula, behavioral analysis of curricula, videotaping, and test reviews. The outcome of primary interest in this study is stated to be achievement in reading and mathematics, other outcomes also having been considered for inclusion. The assessment section describes the outcome measure that is recommended for assessing student achievement and the rationale for its selection. In addition, measurement of program effects on noncognitive student outcomes and on the total classroom environment is discussed. (Author/AM)

**Identifiers**—New York (Cobbleston), \*Youth Tutoring Youth Program

A case study, in-depth description, and analysis of a youth tutoring youth program are presented in this document. The approach used in preparing the study—mainly utilizing participant observation, site visits, and structured interviews—are detailed in a separate chapter. This is followed by a chapter of background information in which the community and its schools are described, along with the process by which tutors and tutees were selected and how the program was initiated. A subsequent chapter introduces the ongoing program from the point of view of a visitor. The role of the supervising teacher, the relationship with tutors, and relationship with tutees and their teachers are also examined. The lengthiest section of the report deals with the tutors and tutees themselves, focusing on them as they relate to each other in actual situations, through the use of field notes and extensive interviews. Remaining sections describe what happened to the program when its supervisor left and was replaced by a new teacher. The program described here is said to represent a good choice for a case study because it is so average. (Author/AM)

**Descriptors**—\*Bias, Content Analysis, Cultural Awareness, Cultural Differences, Cultural Pluralism, \*Discriminatory Attitudes (Social), \*Ethnic Groups, \*Evaluation Criteria, Evaluation Methods, Films, Filmstrips, \*Instructional Materials, Measurement Techniques, Minority Groups, Social Discrimination, Textbook Evaluation

**Identifiers**—Third World

The evaluative criteria described in this document are as follows: (1) criterion for analyzing ethnic bias in textbook illustrations, films, and filmstrips; (2) criterion for content analysis of text books for ethnic bias relative to cultural pluralism; and, (3) criterion for content analysis of text books for ethnic bias relative to contributions. Criterion one concentrates on whether or not Third World people are present in illustrations, films, and filmstrips and whether Third World people are portrayed as person with dignity, in leadership roles, and possessing the more distinctive physical traits of their respective ethnic groups. Criterion two evaluates instructional material relative to how well it conveys that this society was and is culturally plural. The third criterion assesses the extent to which the instructional material reflects the contributions that

Third World people have made to this society. Directions for scoring the criteria are provided, along with a series of 17 definitions of terms used in the document. When employed effectively in evaluating instructional material, this instrument is said to generate data which will reflect the blatant presence of ethnic bias and dramatize the critical need for the school curriculum to reflect the dignity and value of all people in the society. **Identifiers**—Third World

The first part of this presentation lists four basic assumptions pertaining to educating black students humanistically and discusses each in relation to its impact on the public schools' capability to educate blacks effectively and meaningfully. These assumptions are: that black students can be educated by the public schools, that schools are capable of relating humanistically to black students, that universities and colleges are capable of equipping teachers, counselors and related staff with the necessary cognitive and affective skills to educate black students humanistically, and that those holding the power of the various institutions of our society will allow anyone to humanize education for all students. This first part includes that schools as they are presently constituted can neither educate blacks effectively nor relate to them humanistically. The second part discusses some of the possible alternatives that have been used or might be used to maximize the humanistic quality of the schools' program for black students, i.e., an all black student boycott, black control of black schools, and black educators organized for change. It is emphasized that blacks and Third World people, especially, rise above rhetoric and apathy and move deliberately to establish all conditions in the educational institutions that are respective of and responsive to all learners and trainers. **Identifiers**—\*New York (New Rochelle)

Two influences that are held to produce a lack of academic motivation in mixed minority group children are identified. (1) Minority students frequently come from families that, for a variety of reasons, do not encourage academic excellence; (2) the New Rochelle school program does not compensate for this lack by offering replacement encouragement to uplift the students' self-concept and offset the debilitating effects of a motivation-less out-of-school environment. This practicum is stated to have been designed to modify these influences. It addresses itself to the development and implementation of a three-year family involvement program that would enable

parents and students to make future choices based on more adequate information and decision-making skills and provide a framework in which parents would learn improved strategies for increased interaction between the child and parents related to educational choice, thereby promoting and broadening the aspirational level of black and Italian junior high school students toward future career choices. One of the significant outcomes of this project is stated to be that it was possible to enable students to achieve self-discovery while giving them a start towards self-direction. This practicum is now a full program at a junior high school. (Author/AM)

**Identifiers**—\*Rhode Island (Providence)

In 1973, the Rhode Island Advisory Committee to the U.S. Commission on Civil Rights initiated a comprehensive project to review equal employment opportunity (EEO) in State and selected local government bodies in Rhode Island. In its project, the Advisory Committee examined employment practices and affirmative action efforts to recruit, hire, and promote minorities and women in State government and in the cities of Providence, East Providence, and Newport. Approximately 40 State and local officials were interviewed by Advisory Committee members and Commission staff. Data from Federal reports and other publications were collected and analyzed. These investigations culminated in open, public meetings held November 14-16, 1973, in the State House in Providence. Sixty-two persons, including Federal, State, and local officials and representatives of unions, community, civic, minority, and women's groups testified. At the meetings, the entire employment systems of the four governments were examined. This report summarizes the Advisory Committee's general findings and recommendations. It includes a summary of the Federal and State mandate for equal employment opportunity, a section on each government under review, and a summary of some alternative reforms for civil service systems. **Identifiers**—\*Massachusetts (Boston)

This report reviews housing, land use, employment, and transportation practices in the Boston metropolitan area as they impinge upon the opportunities of minority group persons in the inner city. It focuses upon the newer suburbs, particularly those where housing and industrial parks have been developed since the construction of Route 128. The report details the extent of racial exclusion in Boston suburbs and examines the policies and practices of Federal, State and local government, and those of private employers, the housing industry, and private citizens. The first three chapters provide general background information on the suburbs, the black minority in the city of Boston, and suburban development in the Boston area. The remainder of the report consists primarily of data presented at hearings held in

the city of Boston and in two groups of suburbs in 1970. Testimony at the hearings in Boston, Needham, and Marlborough, June 1-4, 1970, was provided by public officials of the local communities, organizations, private citizens, representatives of the State government, and professionals in fields related to metropolitan growth. The final sections of the report describe some of the relationships between State and Federal agencies and suburban development, and offer recommendations for change. (Author/JM)

**Korean Family Organization in the United States: Role and Value Conflicts in a Foreign Culture.**  
Pub Date Nov 74

Note—14p.; Paper presented at the American Anthropological Association Annual Meeting (Mexico City, Mexico, November 19-24, 1974)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage

Descriptors—\*Acculturation, \*Anthropology, \*Culture Conflict, \*Family Characteristics, \*Family Problems, \*Family Relationship, \*Family Structure, \*Korean Americans, \*Parent Child Relationship, \*Role Conflict, \*Social Change, \*Stress Variables, \*Urban Population, \*Values  
Identifiers—Georgia (Atlanta)

The purpose of this study is to investigate how Korean families with traditional family backgrounds adjust to a foreign culture and maintain the family structure in a cultural system where roles, values, and living conditions are quite different from those in Korean setting. Two major relationships are analyzed: that between wife and husband, and that between parents and children. The data for this analysis were gathered through interviewing 40 Korean families living in the Atlanta area. A separate interview with wife and husband was carried out, and the families were chosen according to occupational categories. Findings indicate that shifting of the family structure from an independent type to a joint type system seems to create role conflicts between the Korean wife and Korean husband. In the joint type, wife and husband are involved together in socio-economic activities. Furthermore, living in two cultural worlds creates a state of anomie where wife and husband do not have clear-cut expectations of each other. Communication problems in English, inability to drive by wives, differences in socio-ecological systems, degrees of acculturation by both wife and husband, stress caused by living in a foreign culture, and limited social interaction seemed to be sources of conflict for Korean families in the U.S. (Author/JM)

**Single-Parent Families: Results of Profiling Techniques in a Sample of Welfare ADC Families. Final Report.**

Office of Child Development (DHEW), Washington, D.C.

Pub Date [75]

Note—63p.; Best copy available

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—\*Behavior Patterns, \*Children, \*Family Characteristics, \*Fatherless Family, \*Individual Characteristics, \*Longitudinal Studies, \*Measurement Techniques, \*One Parent Family, \*Profile Evaluation, \*Research Methodology, \*Statistical Analysis, \*Surveys, \*Urban Youth, \*Welfare Recipients

Identifiers—New York (New York)

A longitudinal study of children and their families in Manhattan, New York City, this study comprises two samples: (1) a cross-sectional sample of 1034 families, and (2) a welfare (Aid to Dependent Children) sample of 1,000 families. The results of several profiling techniques which were conducted on the Welfare Sample are discussed. While the family and child behavior profiles have already been constructed on the Cross-sectional sample, most of the single-parent families in that sample (22 percent in total) fell into one family type. However, since the welfare sample families were predominantly single-parent in composition (74 percent), family profiling in this sample offered an opportunity to investigate types of low income single-parent families. Five welfare family types were derived. In arriving at the family typology, a program (Hierarchical Cluster Analysis) was adopted, which finds the profile of Family X over the various dimensions in constructing the profile and the score profiles of each of the other families in the sample. So

that types of families could be characterized as completely as possible, social (demographic), parental personality and marital attributes, and child-rearing practices were included as dimensions. Additionally, seven Welfare child personality types were developed from a range of child behavior items. (Author/JM)

**Violent and Antisocial Behavior: A Longitudinal Study of Urban Youth.**

Office of Child Development (DHEW), Washington, D.C.

Pub Date [75]

Note—59p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—\*Anti Social Behavior, \*Behavior Patterns, \*Children, \*Community Agencies (Public), \*Family Characteristics, \*Field Interviews, \*Longitudinal Studies, \*Mothers, \*Predictive Measurement, \*Records (Forms), \*Social Characteristics, \*Surveys, \*Urban Youth, \*Violence

Identifiers—\*New York (New York)

This study identifies the social, familial, and childhood characteristics which predict and explain the development of antisocial behavior. It also examines the extent to which violent antisocial behavior presents a distinct entity with its unique etiological processes. Several major studies which purportedly attempted to identify the causes and explain the development of antisocial behavior and/or its expression in criminal behavior were seen to be methodologically limited. This study is considered to overcome these difficulties in several ways. It is based on a random sample drawn from the community and representing a cross section of the population. Information was collected in a survey interview from all mothers. As indicated by a later search of records, with the exception of a small minority (two percent of the cases), this interview preceded the child's labeling as a 'delinquent'. This information includes both parental and child behavior. A follow-up interview provides a source of information on changes which took place and hence an opportunity to differentiate the outcome and correlates of antisocial behavior from its antecedents. Finally, antisocial and violent behavior were measured both on the basis of cumulative agency records and as reported by the mother at the time of the second interview. (Author/JM)

**An Evaluation of the Etiologic Role of Stressful Life Events in Psychological Disorders.**

Office of Child Development (DHEW), Washington, D.C.

Pub Date [75]

Note—48p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Children, \*Demography, \*Etiology, \*Family Characteristics, \*Field Interviews, \*Longitudinal Studies, \*Mental Health, \*Mental Illness, \*Physical Health, \*Predictive Measurement, \*Research Methodology, \*Stress Variables, \*Surveys, \*Urban Youth

Identifiers—New York (New York)

Despite the growing accumulation of studies attesting to the association between life events and illness, either physical or mental, a number of critical methodological and conceptual issues are considered not to permit any clear answer to the basic questions regarding the importance of the role these events play in the etiology of such disorders. In an effort to address these issues, this study focuses on the overall level and types of disturbed behaviors shown by children who differ with respect to the life events which intervened between the original and follow-up interviews with their mothers in the course of a longitudinal study. Given this and the array of sociodemographic and familial variables on which the children have also been assessed and which permit examination and control for various competing hypotheses, the etiologic role of life events for psychological disorders is deemed to be determinable. The life events studied are limited to those outside of the child's and adolescents' control and/or independent of his psychiatric condition to prevent contamination between the two sets of variables. The stressfulness of life events are examined both in terms of change and undesirability-desirability. Groups clearly dif-

ferentiated as to type and number of events are studied to ascertain the risks attached to exposure to different event types. (Author/JM)

**Shared Accountability: A Pilot Program for Improving Education in the District of Columbia Public Schools through Community and Professional Involvement.**

District of Columbia Public Schools, Washington, D.C. Dept. of Research and Evaluation.

Pub Date Jun 75

Note—38p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*Community Involvement, \*Educational Accountability, \*Educational Assessment, \*Educational Development, \*Educational Improvement, \*Management by Objectives, \*Pilot Projects, \*Professional Personnel, \*Program Development, \*Program Effectiveness, \*Public Schools

Identifiers—District of Columbia

The goals of this project are to assist schools in developing community ranked educational goals, to assess needs (i.e., to determine how well community ranked educational goals are being met), and to determine who among a number of groups are responsible for carrying out the goals as viewed from the local schools level. The concept of shared accountability used is considered to imply a willingness of the parties involved to go on record as to their respective impact on responsibility for the learning process and student success. The search for materials and techniques to be used in developing the model program, along with site selection and arrangements for implementation are reviewed. Implementation of the program is examined in terms of three parts corresponding to the goals. Each part describes the process of implementing the results and possible uses of data. Valuable experience and information is held to have been gained from the process of implementation itself and also new insights into the uses of the process. It is shown that the process of implementation encourages participation within the school/community, and that it creates a momentum which can be channeled into followup activities such as a management plan to develop more efficient utilization of resources. Several tables and appendices accompany the report. (Author/AM)

This document reports on the results of the Latino Task Force, chartered for the purpose of identifying the mental health problems of the Latino community, identifying potential causes and evaluating the relevance and effectiveness of existing mental health services, in order to formulate viable recommendations for community mental health research and training. Topics focused on are: the sources and nature of Latino problems, Latino social structure, the influence of cultural conflicts and oppression on mental health, Latino psychic structure, present-day mental health service delivery systems, professional personnel and indigenous resource personnel staffing procedures, inservice training, reorientation of mental health professions, alternative training methods, curriculum, research, and accreditation. The report concludes with a set of recommendations for training of personnel that would establish an effective mental health service program, staffed with empathetic professional, paraprofessional, and indigenous personnel trained to cope with Latino mental health

requirements in a nonstress producing environment. (Author/AM)

Three empirical research-based chapters comprise this monograph. Each chapter attempts to analyze the problem addressed in such a manner that readers themselves may be induced to innovate solutions. The thrust of the monograph is to engage its audience in a collective positive spirit of innovation for the benefit of institutions that wish to better serve their clientele. The first chapter is an overview of existing health care delivery systems available to the Spanish speaking/surnamed population. Suggestions for innovations are at the level of organizational modifications for community mental health centers. The second chapter deals specifically with the instrumentation of personality assessment and the interpretation of its results. Suggestions for different ways of interpreting results when dealing with the target populations are made. Some directions for the development of more relevant tests are also suggested. The third chapter is concerned with the development of professional personnel and describes an empirical experiment on the ethnic characteristics of the therapists and the impact that such ethnic cues might have on their patients. Suggestions are made as to how best to proceed in the therapeutic relationship between patient and therapist. (Author/AM)

**Political Anthropology and the Urban School Board.**

Pub Date 74

Note—21p.; Paper presented at the Annual Meeting of the American Anthropological Association (Mexico City, Mexico, 1974)

**EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage**

Descriptors—Anthropology, \*Board of Education Policy, \*Board of Education Role, Boards of Education, Conflict Resolution, Decision Making, \*Decision Making Skills, Educational Anthropology, Educational Policy, Local Government, \*Policy Formation, Political Influences, Political Issues, Political Science, Problem Solving, Public Policy, School Policy, Social Science Research, \*Urban Schools

Identifiers—New York (New York)

Attention to the politics of education particularly as operated within urban school boards using the concept of elite-arena councils is drawn in this paper. A brief summary of the data and the political-anthropological concepts used to analyze the data, conclusions and recommendations based on those data, and their analysis are presented. The analysis is seen to recommend changing the political structure of education governance in New York City toward a more arena-type council. One structure for accomplishing this would be to submerge education totally in the city government. Since total submergence of education into urban city government is held to be politically and culturally impractical, a second method is suggested that accomplishes the same goal by developing a structure that places education parallel with, and in some elements fused with other urban government structure. Based on data collected by three separate boards from 1967 to 1970, it is concluded that the structure of the New York City educational

governance system is not only elite but incapable of producing policy in response to the multifaceted demands of the pluralistic culture of the city. A design for restructuring the governance system is proposed. This paper is said to demonstrate that political anthropological concepts can be fruitfully employed in understanding this important area of American politics. (Author/AM)

Descriptors—Eating Habits, Foods Instruction, Government Role, \*Health Conditions, \*Health Education, Health Needs, Health Occupations Education, Health Programs, Health Services, \*National Programs, \*Nutrition, Nutrition Instruction, Policy Formation, Program Evaluation, \*Public Health, Public Policy, Special Health Problems

Focusing on America's self-knowledge about its nutritional health, this report deals with the availability of nutrition evaluation and counseling to individuals and the adequacy of the national nutrition monitoring system. Bureaucratic and political problems of applying nutritional health considerations to food policy are also examined. Nutrition education outside the medical setting, the status of nutrition research, and the nutritional quality and safety of food are topics left to further inquiry. Among the topics discussed in the introduction are the diseases of overabundance, undernutrition, nutrition knowledge, food production and nutrition policy, and control of nutrition policy. Chapter 1 shows that the medical profession has been extremely slow to take nutrition seriously. Chapter 2 discusses the failure to establish an effective nutrition monitoring system in the United States and the consequences of this failure. Chapter 3 describes the random efforts of HEW to coordinate nutritional health policy. Recommendations are made for areas covered in each chapter. (Author/AM)

Identifiers—National Institute of Education, NIE, \*Suburban Migration

The emphases of this paper are identification of system mechanisms and processes employed to achieve and enhance racial resegregation in education, placing an understanding of these mechanisms and processes within the context of the national desegregation efforts, presentation of the rationale for the National Institute of Education including resegregation as a program effort within the Desegregation Studies Unit, review of current research findings and analyses in the areas of resegregation, and presentation of NIE priorities in this area. Some of the processes which facilitate resegregation are considered to be white flight, the disproportionate use of suspensions and expulsions against minority students, tracking, grouping on a racial basis, the use of test scores, and the mechanism of pushing out minority students and educators from the school system. Key researchable questions in the areas of white flight, suspensions and expulsions, and testing, tracking, and ability grouping are noted. (Author/AM)

Identifiers—\*California

This evaluation of Project Special Elementary Education for the Disadvantaged (SEED) sought to assess the impact of SEED instruction upon students enrolled in disadvantaged schools (grades three to six) in four major study areas: mathematics achievement, interest in math and other school subjects, motivation, and self concept. In addition, the teacher inservice training provided by the SEED Specialists was evaluated. Each of the evaluation instruments used was administered on a pre and post basis to students participating in the SEED program and to students in a control group. The present study revealed that the impact of Project SEED on achievement in mathematics was generally favorable for students who were in the program for a two-year period; however, the relative gain for students who had been in the program for only one year was less favorable. Measures of interest and motivation yielded only a few significant findings and these were not consistently in favor of the experimental treatment for any grade level or treatment group. Similarly, the findings for the measure of self image did not yield evidence of a substantial and consistent treatment effect. The inservice training for teachers was found to be quite extensive. In general, it did not prepare teachers for implementing SEED by themselves. (Author/JM)

Identifiers—\*Michigan

Chapter 3 of the State School Aid Act was enacted to improve achievement in the basic cognitive skills of low-achieving pupils in Michigan. The program provided funds and considerable program discretion for local school districts with high concentration of low achieving children in the grades K-6. These districts received funds for a three-year program; 1973-74 was the third year, to improve achievement in reading and mathematics for these pupils. This report contains information regarding district expenditures and pupil achievement during 1973-74, discusses pupil achievement over a two-year period, and contains data on the expected growth for pupils evaluated with norm-referenced tests. The report addresses the question of success in terms of the level of accomplishment attained in Chapter 3 programs. An analysis of test results indicated that the actual achievement for Chapter 3 pupils exceeded the expected achievement gains if the pupils had been in regular school programs. This analysis also indicated that the 1973-74 achievement was higher than in 1972-73. It is recommended that local school districts further analyze the needs of the 8,016 students (7.1 percent of

the 112,500 stuoents) in Chapter 3 who showed no achievement during 1973-74, and modify the delivery system to provide better assistance for these pupils. (Author/JM)

This report begins with a demographic profile. Among the topics discussed are marital status and household composition, female heads of household, general income analysis, the earnings gap within occupations and industries, participation of women in the labor force and characteristics of women workers over the lifespan. The report then focuses on Public Assistance: Aid to Families with Dependent Children (AFDC). This section includes an overview of AFDC and Work Incentive Program (WIN). Also discussed are selected welfare problem areas and status of welfare reform legislation. The report continues with an examination of Women and Work: The Impact on Poor Women of Federal Manpower Programs. Federal Child Care Legislation: History, Status, and Prospects is the next focus of this report. The report ends with a discussion of Income Maintenance: The Elderly Poor. Topics examined here include social security, private pension plans, pension rights of spouses, and legislative reform of the private pension system. The report includes seven tables and three appendices. The first appendix includes 33 tables. Appendix 2 tabulates Aid to Families with Dependent Children: Recipients of Money Payments and Amounts of Payments, by State, December 1973. Appendix 3 is a Chronology of Selected Federal Labor Legislation. (JM)

**Identifiers**—\*Arkansas (Delta Region)

In November 1971, the Arkansas State Advisory Committee to the United States Commission on Civil Rights conducted a two-day open meeting in West Memphis, Arkansas, to examine the problems of black people living in the Delta region of Arkansas. More than 40 people were invited to express their views concerning the problems of black people living in the Arkansas Delta. Issues related to the political participation of blacks in local and State government were discussed, and the administration of justice as it relates to black citizens in the Delta was examined. Also discussed was the manifold economic and social welfare problems of blacks living in the region. The present document is a report of the principal findings of the open meetings and subsequent investigations. The contents of the report include an introductory section, findings and recommendations, appended communications and Arkansas statutes, and three chapters, entitled respectively: The Economic and Social Welfare Conditions of Blacks in Eastern Arkansas, Political Participation of Blacks in the Arkansas Delta, and The Administration of Justice in the Arkansas Delta. **Identifiers**—Civil Rights Act 1964

In October 1970, the commission published its first of three across-the-board evaluations of the Federal Government's effort to end discrimination against American minorities. In February 1972 the commission chairman and the director of the Office of Management and Budget (OMB) agreed that the commission would provide OMB with a summary of Federal civil rights activities, highlighting progress and citing deficiencies in enforcement programs. The commission's staff director in September 1972 provided the OMB director with a report covering the activities of more than 25 Federal agencies and departments with significant civil rights responsibilities. The commission herewith publishes the document sent to OMB. Minor editing has been performed, but no substantive changes have been made in the report as delivered to OMB. This report was prepared in the same manner as other commission studies of the Federal enforcement effort. Detailed questionnaires were mailed to the agencies in July, interviews were held with Washington-based civil rights and program officials in July and August, and documents and data supplied by the agencies were analyzed. The report covers the activities of the agencies from October 1971 to July 1972. Sex discrimination is not covered in this report, it is stated, as the commission's jurisdiction did not include sex discrimination at the time of the report. (Author/JM)

**Descriptors**—Childhood Attitudes, \*Identification (Psychological), Individual Characteristics, Minority Group Children, Morale, Negro Attitudes, Primary Education, \*Primary Grades, \*Racial Attitudes, Racial Integration, Role Per-

ception, \*School Integration, Self Concept, \*Self Concept Tests, Self Esteem, Self Evaluation, Student Attitudes

This study investigates two hypotheses: (1) that black children experience more conflict over their racial identity than white children, and (2) that black children are less likely to identify with occupational role models than are white children are investigated in this study. Drawings of a person by 167 black and 156 white primary school children are analyzed for indicators of (1) acceptance of racial identity (drawing a person who is clearly one's own race); (2) conflict over racial identity (failing to color in the face of figure drawn); and (3) identification with an occupational role model (drawing a figure whose occupation is apparent). As predicted, the figures drawn by blacks looked more like blacks than those drawn by whites. This is said to be suggestive of a new acceptance of racial identity on the part of black children. Black children also showed greater conflict over their racial identity and less frequent identification with occupational role models than whites. Twenty-eight of the black children participated in a second phase of the study, which is considered to confirm the validity and reliability of the draw-a-person test as a measure of acceptance of racial identity, and which investigates intergroup attitudes. The effect of school desegregation on black children is explored in both phases of the research. It is concluded that desegregation may be more easily accomplished in the very early school years than in later years when race has assumed more importance. (Author/AM)

The main objective of this study was the development of an evaluation and reporting system that would provide information considered to be meaningful to those involved at the local, district, state, and federal levels. Subobjectives are to determine the amount and type of evaluation information needed at each level to assess the ability and willingness of education agencies to report the information desired by higher levels, and to devise evaluation techniques and procedures which could be implemented in Title I settings. The evaluation and reporting system was presented to appropriate personnel in nine State Departments of Education and to an advisory panel representing additional local and state agencies. Attitudes toward the system are reported as very favorable and are interpreted as indicators of success in achieving the study's objectives. A followup project has been initiated that will involve, among other things, further refinement of the system developed. Ways of extending its flexibility have been identified, and work is in progress to enhance both the utility and acceptability of the system. Presently, the prognosis is seen to appear excellent in that the system will be widely adopted in the next few years resulting in vastly improved Title I evaluation and reporting practices. Tables providing raw data and appendices containing the instruments and scales used are included. (Author/AM)

On behalf of the California Legislature's Joint Committee on Reorganization of Large Urban Unified School Districts, Arthur D. Little, Inc. has been working since November 1969 to produce information which the joint committee can use in proposing responsible, research based legislation in accordance with its charter. In the first volume of this report are three major sections: (1) introduction—a brief discussion of the purpose of the study and of the way it was carried out; (2) summary—an overall summary of the results of the study including major conclusions and recommendations; (3) presentation and discussion of research findings—the results of integrating all of the field work, research tasks, and discussions in a comprehensive documented report. It deals with criteria for district reorganization, the need for district reorganization, and the description and evaluation of various alternative forms of reorganization in large urban unified school districts. (Author/JM)

Identifiers—National School Lunch Program, School Breakfast Program, Special Milk Program

The status of school food service in 150 cities with populations of 100,000 and over for fiscal year 1971 is covered in this report. It consists of six sections: general information on all schools in the national school lunch program, schools with other and no food service, schools in low income areas, schools in the school breakfast program, and schools in the special milk program. Numbers of school and of children are shown by elementary and secondary grades and by a combination of both. Schools with only the special milk

program have not been included in the category of schools having a food service. According to data collected, 2,146 schools in these large cities do not participate in the National School Lunch Program, 491 being located in low income areas. Of these, 386 are elementary and 105 are secondary. The report is considered to be of value to cities for comparing performance and exchanging ideas for building student participation in the program. Identifiers—National School Lunch Program, School Breakfast Program, Special Milk Program

This report covers the status of school food services in 152 cities with populations of 100,000 and over for fiscal year 1972. It consists of six sections: general information on all schools, schools in the national school lunch program, schools with other and no food service, schools in low income areas, schools in the school breakfast program, and schools in the special milk program. Numbers of schools and of children are shown by elementary and secondary grades and by a combination of both. Private schools are not included in this survey nor in comparison data for the previous year. In comparison with 1971, the total number of schools included in the survey shows a gain of 2.1 percent while the number of schools in low income areas over the same period shows 0.4 percent. The number of schools in the National School Lunch Program shows a 6.5 percent increase, and the total number of schools with lunch programs shows an increase of 5.5 percent. Another reported positive change is reflected in the 20 percent decrease in the number of schools with no food service. The total number of schools in the breakfast program increased by 22.8 percent with the special milk program experiencing the smallest percentage increase of any of the programs. Of the 5,139 schools identified as low income only 5.4 percent do not have food service. Availability of the National School Lunch program for elementary schools was 88.6 percent 92.6 percent for secondary schools, and 95.5 percent for children in low income areas. (Author/AM)

Identifiers—National School Lunch Program, School Breakfast Program, Special Milk Program

This report covers the status of school food services in 152 cities with populations of 100,000 and over for fiscal year 1973. It consists of six sections: general information on all schools, schools in the national school lunch program, schools with other and no food service, schools in low income areas, schools in the school breakfast program, and schools in the special milk program. Numbers of schools and of children are shown by elementary and secondary grades and by a combination of both. A 44.5 percent gain in the number of schools included in this survey is accounted for by the inclusion of many private schools which were not reported during the previous years. Since the report does not specifically

separate public schools from private schools for the two years, comparisons between 1972 and 1973 are not made. Although the large increase in the number of schools not offering a food service program to their students may be attributed to the inclusion in the tabulation for 1973 of many private schools which do not have food service, the total number of children with access to a lunch program increased from 1972 to 1973. Over 77 percent elementary school children, 86.7 percent secondary, and 88.5 percent children in low income area schools have access to the National Schools Lunch Program. Higher participation rate in low income area schools is accounted for by the fact that most of the lunches are served free or at a reduced price. (Author/AM)

Identifiers—National School Lunch Program, School Breakfast Program, Special Milk Program

The status of school food services in 152 cities with populations of 100,000 and over for fiscal year 1974 is reported here. It consists of six sections: general information on all schools, schools in the national school lunch program, schools with other and no food service, schools in low income areas, schools in the school breakfast program, and schools in the special milk program. Numbers of schools and of children are shown by elementary and secondary grades and by a combination of both. The total number of children with access to a lunch program increased slightly from 1973 to 1974. Lunch programs are available to 86.5 percent of all the school children. The National School Lunch Program is offered by 87.5 percent of the schools in low income areas as compared with 64.8 percent of the schools in other areas. In addition to being more likely to have this program in their schools, the children in low income areas participate in the lunch program at a higher rate than the other children. Higher participation rate in low income areas is accounted for by the fact that most of the lunches are served free or at a reduced price. (Author/AM)

Identifiers—National School Lunch Program, School Breakfast Program, Special Milk Program

The status of school food services in 152 cities with populations of 100,000 and over for fiscal year 1975 is covered in this report. It consists of six sections: general information on all schools, schools in the national school lunch program, schools with other and no food services, schools in low income areas, schools in the school breakfast program, and schools in the special milk program. Numbers of schools and of children are shown by elementary and secondary grades and by a combination of both. The total number of children with access to a lunch program is 95.3 percent. A decrease of 5,921 schools from the 1974 figures is the result of private schools not being included in the present survey. Almost 92.6 percent of the elementary school children, and

96.5 percent of the secondary school children have access to the National School Lunch Program. The School Breakfast Program is available to 32.3 percent of the elementary school children and 21.4 percent of the secondary school children. Elementary school children participate at a much higher rate than secondary school children. The Special Milk Program is about equally accessible to children attending both elementary and secondary schools. (Author/AM)

Descriptors—\*Changing Attitudes, Cultural Factors, Group Relations, Humanistic Education, \*Human Relations, Human Relations Programs, Interpersonal Relationship, \*Racial Attitudes, Racial Characteristics, Secondary Education, Self Concept, Social Attitudes, Suburban Schools, \*Urban Education, \*Urban Environment, Urban Schools, Urban Slums, Urban Youth

Identifiers—Kentucky (Louisville)

Evaluation research of the human relations component of a larger project that attempts to bridge the black-white cultural gap in the Louisville school system is the basis of this paper. The overall purpose of this major component is to enhance positive attitudes toward intercultural, racial, and ethnic relations and understandings through curriculum content and by humanistic teaching methods and not necessarily by direct teaching about attitudes and understandings themselves. The project includes the experimental treatment of an elective social science course in urban sociology at two high schools—a 100 percent black inner city school, and a 99 percent white upper middle class suburban school. Control groups for the quasi-experimental design are regular social science courses at the two schools. Instruments administered include a personality inventory, a self-concept scale, and a racial and ethnic attitude questionnaire. It is concluded that a general approach, while potentially effective in changing attitudes will do so in unpredictable ways, and that even positive changes in attitudes and understandings must be differentiated from liking or accepting perceived race characteristics. It is suggested that attitudes be looked at one at a time, examined situationally, and then followed-up on an item-by-item basis. (Author/AM)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Illinois (South Holland)

Thirteen objectives of the program and analyses of each in terms of procedure, evaluation, the status of procedure, and status of the evaluation are listed in this report. The objectives are: the establishment of a community relations program to promote two-way communication between school board, administration, teachers, students, and parents; the maintenance, expansion, and promotion of the operation of the citizens' advisory council; the extension of the adult-parent and student information program; the development of approaches, techniques, and programs designed to facilitate the realization of high parent and student educational aspirations; providing human relations opportunities and activities leading to improved racial understanding making parents active child advocates; opportunities for staff and administration inservice training;

staffs' utilization of special design teaching aids; staff and administration involvement in professional enrichment activities; provisions for a wide variety of opportunities and media designed to build positive self-concepts and promote better ethnic and racial understanding of diverse cultural backgrounds; compilation and use of student learning profiles; the initiation of a widespread program of dissemination within the district; dissemination within the local educational agency. Statistics on population growth, social characteristics, population distribution, employment and income, and ethnic groups are presented in this report. Among the highlights of the report are the following findings: the population grew by three-fourths of one percent during 1974, a slightly higher rate than 1973 but substantially lower than the 1970 rate; half of today's wives under 25 expect to have a two-child family, whereas one-fourth of the wives in the upper thirties expect to have two children and one-fourth expect to have three; women with no high school training have one or two more children than college graduates; an increasing proportion of households are found to be maintained by a young unmarried adult; school enrollment has increased substantially at all levels except elementary school; close to half of the employed Americans are working in clerical, craft, or operative jobs; the highest rates of unemployment in 1974 were those for workers in the entertainment and recreation services and construction industries; the ratio of black to white family income has been declining as the proportion of families with two or more earners especially those with the wife in the paid labor force has decreased for blacks but increased for whites and, that as compared with whites in 1974, blacks and persons of Spanish origin had less education, were less likely to have voted, had a higher rate of unemployment, and had a larger proportion of employed persons who were blue-collar workers. Identifiers—Nevada, Paiutes, Peru (Trujillo), Texas (Dallas)

This book analyzes in detail the various economic and socioeconomic factors that affect deprived urban youth in five cultures. Various possible hypotheses and variables that influence youth to enroll in school, participate in the labor force, or remain inactive are measured. Among the selected variables that are examined are: enrollment aspects; labor force participation; inactive

status; sources of entrepreneurship of deprived youth; nutritional determinants of deprived youth; determinants of deprived youth's utilization of medical facilities; and, cultural differences of deprived urban youth. An overview chapter examines in a non-statistical manner the conclusions reached, and weights their importance and implications for urban deprived youth. A final chapter on policies and programs studied past economic programs designed to aid the youth in his urban environment. Both the strong points and shortcomings of past programs are exposed in a discussion of alternative programs and policy recommendations to move the deprived urban youth into the mainstream. A discussion of the social cost implications of overlooking this vast reserve of future supply of human capital is also included. A major finding is that the social and psychological attitudes that mold a youth's view towards life play a larger role than economic factors in his decision to work or not. (Author/AM)

Descriptors—Change Agents, \*Change Strategies, Consortia, \*Cooperative Planning, Educationally Disadvantaged, \*Educational Problems, Interagency Cooperation, \*Metropolitan Areas, Minority Group Children, Municipalities, School Community Cooperation, School Integration, \*Urban Education, Urban Schools, Urban Teaching

Identifiers—Suburban Migration, Urban Migration

Some of the current thinking on planning and effecting improvements in education in the big cities is together under four major chapters in this publication. A section on major developments, problems, and needs addresses such issues as accelerated rate of change, crisis confrontations and brush fire techniques, and unanticipated consequences of change. Four issues (educational leadership in the mainstream of society, dilemmas in big city education, recent developments and insights, and next steps) are included under a section on problems and challenges of big city education. Sub-issues such as migration of the disadvantaged, quality of education amid the process of ethnic desegregation of schools, accountability, and effective governance are also treated here. A section on preparing to meet the challenges and needs focuses on cooperative arrangements between groups, organizations, and agencies, planning and change, bringing schools closer to the people, and recognizing and removing constraints. The final section addresses emerging roles and relationships and discusses state education agencies, consortia of local administrators, institutions of higher learning, and intra-governmental efforts. It is concluded that cooperation throughout the entire governance system will continue to develop and improve the quality of the education programs. (Author/AM)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Pennsylvania (Erie), Project Erie Urban Network School

Information about the Erie Urban Network School Project as it has been functioning for the past two years is provided in this report.

Designed (1) to meet the needs of the inner city child by aiding the professional staff through inservice, and (2) to understand the child, the community, the educational techniques best suited for him, this project employs a humanistic approach in an effort to foster a positive self image, and a positive attitude toward learning and responsible behavior. Various program objectives are cited such as those designed to acquaint teachers with current and relevant educational studies and techniques, to develop in teachers the ability to prescribe a learning approach that is individualized, and to assist teacher competency in encouraging creativity. Several sections cover such topics as inservice sessions, parental involvement, mini-courses, bucket brigade, scheduling, college programs, discipline programs, interstate conferences, and the testing program. A list of participating project schools is also included. After evaluation of the project at two of the schools, project expansion to other public inner-city schools is recommended. Effective communication among the teachers, parents, and students involved in this Project is considered to (1) foster an improved attitude and (2) display social improvement of the students in their interaction with their teachers and peers. Identifiers—California, Job Corps Programmed Learning System, Neighborhood Youth Corps, NEP, New Educational Programs, NYC

This research study reports on the effectiveness with which the New Educational Program (NEP), a modification and refinement of the Job Corps Programmed Learning System, can provide effective learning experiences for underachieving adolescents and adults in various settings, including two juvenile detention facilities, a ninth grade class of underachievers, an MDTA skills center, and two out-of-school Neighborhood Youth Corps Programs (NYC). Program achievement is measured by achievement tests, quality of participation, and other outcomes indicative of achievement. The results vary depending upon the site, but some significant measure of success is achieved in all sites. One the average, students gain 9 grades in reading and 7 grades in math during their first three months. The best results are reported from one of the NYC programs in which the gain is 1.9 grades in reading and 2.12 in math after nine months' participation. About 45 percent of the students in the NYC program either use NEP credits to gain a high school diploma, or have passed the GED while enrolled in this program. This project is found to be an effective educational component in a variety of programs concerned with academic underachievers. The curriculum changes made based on experience in the unmodified NEP version are found to increase the NEP's effectiveness. (Author/AM)

Progress Report on Implementation of Desegregation Plans.

Tennessee Higher Education Commission, Nashville.

Pub Date 12 May 75

Note—36p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage

Descriptors—\*College Integration, Faculty Integration, \*Higher Education, Integration Methods, \*Integration Plans, Negro Students, Personnel Integration, Race Relations, \*Racial Composition, \*Racial Integration, Trend Analysis

Identifiers—\*Tennessee (Nashville), Tennessee State University, University of Tennessee

Describing the major developments since January 1974 within the larger 1969-1974 context, this document focuses particular attention to changes in enrollment and faculty composition between the Fall of 1973 and of 1974. Between 1973 and 1974, enrollment of black students increased from 10.7 percent to 11.9 percent of total enrollment in Tennessee's public colleges and universities. There is progress toward better racial distribution of students as indicated by the increase in white enrollment at the State University, and increases in black students' total student body at other institutions. Although the total number of black faculty increased from 345 to 360, their proportion remains the same because of the relatively larger increase in white faculty. There is progress toward desegregation of faculties, but it is apparent that progress toward desegregation of administrative staffs has been less than in the areas of student enrollment and faculty composition. Substantial progress is seen in the Nashville segment of public higher education, as indicated by the increase in white enrollment at Tennessee State University, continued substantial enrollment of blacks at University of Tennessee at Nashville, continued improvement in faculty mix, substantial improvement in the composition of the administrative staff, and the employment of a black administrator. Appended tables include racial composition of personnel, faculties, and student enrollment. (Author/AM)

Identifiers—Essex County College, New Jersey, Passaic County Community College

Organizational change within two public predominantly black populated, two-year community colleges in New Jersey is examined in this comparative case study, in light of their individual institutional allocation of public resources to meet the educational and social needs of educationally and economically disadvantaged black urban students. The colleges' allocation of resources are determined by identifying supportive services, personnel hiring practices, and curricular revisions which reflect the needs of the colleges' black student majority. Student retention rate and placement success are also studied. Each institution is viewed separately and comparisons are made. Findings and analyses based on a historical research method indicate that the two institutions have adapted differently in their adjustment from predominantly white institutions to predominantly black institutions, and that organizationally only one college is responsive to change in the areas outlined in the study. Two major conclusions are that internal and environmental dynamics definitely determine the extent to which institutions respond to change, and that institutions that fail to change organizationally to adjust to black student needs also tend to fail to provide necessary educational services to their communities at large. Groups, Methods, Metropolitan Areas, Mexican Americans, \*Motivation, \*National Norms, Negroes, Puerto Ricans, Regional Schools, Sex Differences, Social Attitudes, \*Social Influences, \*Student Attitudes, Suburban Schools, Success Factors, Urban Schools

The present study is the fourth and last in a series that specifically deals with the nations' schools, student achievement, and students' attitudes toward life. This volume employs new methods and categories of analysis to re-examine certain earlier findings such as the lack of any appreciable relationship between achievement level and having a family from which neither parent is absent and the greater independent role of family background factors in a students' achievement. The role of two previously neglected variables -- that of sex and school attendance in either a metropolitan or non-metropolitan area -- in achievement and motivation is also explored. Earlier reported findings are seen to be substantially confirmed, extended, and made more specific in this report. The study shows that influences on student achievement tend to resolve themselves into attitudinal and motivational factors and social class factors, with the latter assuming the most important. Neither ethnicity, sex, nor regional differences account greatly for the source of variance in student achievement. Ethnically related variations in achievement and motivation are not considered to arise from anything inherent in the ethnic groups themselves and the crucial factor suggested is each group's experiences as a group, including the school attended. The most important achievement of these studies is deemed to lie in the documentation and quantification of the entanglement of influences in a child's education. (Author/AM)

Pupperty in Compensatory Education.

Seminole County Board of Public Instruction, Sanford, Fla.

Pub Date 73

Note—54p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage

Descriptors—Art Activities, \*Compensatory Education Programs, Creative Art, Creative Development, \*Creative Expression, Economically Disadvantaged, Educationally Disadvantaged, Elementary Education, Language Programs, \*Minority Group Children, \*Pupperty, Self Concept, Self Expression, \*Theater Arts

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, Florida (Seminole County)

The purpose of this manual is to serve as an instrument for those interested in using pupperry with economically and/or deprived youngsters for the purpose of improving self expression, self-image, and communication. That his form of creative expression improves coordination, memorization skills, listening skills, and creativity are suggested. Various types of academic learning that can occur with the use of pupperry are listed, such as the encouragement of research where the child needs additional information about a character or story, the concretization of experiences, and expansion of concepts. Plays used in pupperry may be based on experience, literature, the child's imagination, and other areas of interest. They can be peer or teacher created, and found in books of plays or on pupperry. Music can also be incorporated into a pupperry program. Among the major skills attributed to working with puppets is increased opportunities for social amenities, with improvements in poise, self-esteem, and leadership. Other skills that are developed include improved sewing ability, and improved ability in stage construction, carpentry, painting, and measuring. A history of pupperry, factors providing motivation for the use of puppets, and the construction of various puppets, the stage, and the stand are described in the manual. (Author/AM)

Do Bilingual Education Programs Inhibit English Language Achievement? A Report on an Illinois Experiment.

Pub Date May 73

Note—30p.; Paper presented at the Seventh Annual Convention - Teachers of English to Speakers of Other Languages (San Juan, Puerto Rico, May 9-13, 1973)

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—Achievement Gains, \*Achievement Rating, \*Bilingual Education, Bilingual Schools, Bilingual Students, Comparative Analysis, Early Childhood Education, English (Second Language), Minority Group Children, Primary Education, Program Effectiveness, \*Program Evaluation, \*Second Language Learning, \*Spanish Speaking

Identifiers—\*Chicago (Illinois)

The English language achievement of 213 Spanish speaking students in grades K-3, who receive English as a Second Language (ESL) instruction in the context of a bilingual program, is compared to that of 104 similar students who receive ESL instruction within the traditional school program, in order to probe whether enrollment in a bilingual program retards the learning of English as a second language. ESL achievement, as measured by listening and reading comprehension tests, is compared through ANOVA and partial correlation analysis with a quasi-experimental evaluation design. Analysis of data indicates that students learning English in a bilingual program learn just as much English as students learning it through ESL classes within a traditional curriculum. Because the amount of measured English achievement in kindergarten and first grade is found disappointing compared to the substantial achievement measured in second and third grades, two questions are raised - that of the effectiveness of language instruction in K-1 and that of the appropriateness of the techniques used to measure achievement on these levels. Although the study needs replication with other age groups and other languages, the implication derived from the study is that half-day bilingual programs do not inhibit English language achievement in primary-aged children. **Guidelines for Assisting Districts in Planning and Implementing Early Childhood and Basic Skills Development Programs, 1975.**

Florida State Dept. of Education, Tallahassee.

Pub Date 75

Note—34p.

**EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage**

Descriptors—\*Administrator Guides, \*Basic Skills, Coordination, Demonstration Programs, \*Early Childhood Education, Educational Specifications, Flow Charts, Guidelines, Preschool Education, Program Administration, Program Descriptions, Program Development, Program Guides, \*Program Planning, Regional Planning, Skill Development

Identifiers—Early Childhood Basic Skills Development Program, Florida (Tallahassee)

A summary of requirements and provisions of early childhood and basic skills programs and a framework for and the requisites of thorough and systematic planning which can be held accountable for what the student learns are provided in this document. A plan that clearly establishes criteria for what needs to be done and why, the actual planning model, involvement in planning, and a flow chart of major planning activities are discussed. A list of twelve key planning tasks for the programs are noted. This includes the re-examination of the overall framework of the existing provisions for planning in each school and in the district. Another section specifies portions of the law and offers suggestions for assisting districts and schools to implement the intent of the new legislation for developing and improving programs for children or for adults. Areas that are covered here are advisory groups, instructional programs, personnel, educational policy, individualized diagnostic instruction, staff development and inservice training, the use of parents in the classroom and in home visitation, and parent education. Extensive coordination and cooperation being considered to be required for the formation and implementation of the program, this document purportedly provides a form of practical assistance and direction in accomplishing Florida's educational goals. Identifiers—\*Supplemental Skill Development Program, Virginia (Richmond)

This demonstration project provides intensive instruction in reading and mathematics to selected fifth graders in the 1974-75 year and for selected fifth and sixth graders in 1975-76, in order to raise the reading and mathematics performance of underachievers to a level commensurate with measured ability. Aimed at the intermediate teacher in Virginia who is participating in the reading element of the program, this document contains reading activities that are the product of a combination of ideas from many school divisions, many classrooms, and teachers who have identified and shared teaching and learning experiences which they consider to be most promising in teaching reading. After briefly addressing program strategies, diagnostic teaching, teaching tips, and learning activities, six major sections focus on word analysis, vocabulary, literal comprehension, interpretative comprehension, critical comprehension, and study skills. The objective that a given activity will accomplish is stated for each category included in the sections. Some school divisions have developed both pre-and post-tests to accompany the entire set of thirty reading objectives. Although specific items matching specific objectives are delineated in the appendices, individual pre-and post-tests are considered to be needed for each objective to be used to test each pupil's existing level of development. Identifiers—Supplemental Skill Development Program, Virginia (Richmond)

This demonstration project provides intensive instruction in reading and mathematics to selected fifth graders in the 1974-75 year and for selected fifth and sixth graders in 1975-76 in order to raise the reading and mathematics performance of underachievers to a level commensurate with measured ability. The sharing of learning activities in mathematics, which teachers have found effective for underachievers, is the main purpose of this resource. The document supports the theory that a sound curriculum in mathematics for elementary schools is characterized by both mathematical content and an approach to teaching consistent with the best available knowledge of learning in children. Its main focus is on activities used in teaching children about operations on whole and fractional numbers. The learning activities included give instructional suggestions for each of the 35 minimal objectives specified for the program. The importance of the teacher's recognition of four types of errors is emphasized for eventual diagnosis and remediation of failure. Brief guidelines for both diagnosis and remediation are provided. Also offered are some suggested methods of motivating low-achieving pupils; namely, extrinsic and intrinsic motivators. The importance of record keeping in individualized instruction is also stressed and forms included here facilitate the individual monitoring of pupil progress. (Author/AM)

Identifiers—Supplemental Skill Development Program, Virginia (Richmond)

Produced for use by school administrators, supervisors, and teachers involved in the supplemental skill development program, this handbook provides assistance to school divisions who wish to implement it at the local level. The program is characterized by intensive individualized instruction in reading and mathematics to underachieving fifth and sixth graders. Minimal objectives, thirty for reading and thirty-five for mathematics, give direction to pupil learning. An integral part of the regular instructional program, this project also calls for parental involvement. A section describing the administration and supervision of the program at the state level addresses the role of the state department of education, action program strategies, criteria for selection of pupils in the program, and program objectives and funding. A similar section focusing on the implementation of the program at the school division level addresses the role of the local school division, the selection of pupils for program participation, the design and execution of the local program plan, the administration of a specified testing program, the expenditure of allocated funds, the instructional program, and record keeping. A section on the evaluation component notes that since the program has the dual purpose of accomplishing the objectives, and demonstrating the pilot effort aspect of the project, evaluation includes provisions for assessment of both program practices and pupil progress. Appendixes include objectives, sample class record sheets, and a plan form. (Author/AM)

Identifiers—\*Colombia (Bogota)

The research for this paper was concentrated in a poor barrio in Bogota, Colombia. The Paper discussed learning in a poor urban community using the ethnographic example of a small community to illustrate the larger socio-political impact of the implication of the United States' policy and position for Colombia. The account is considered to be highly personalized and based upon a participant-observation approach, supplemented with survey data. A later section of the paper discussed language learning at a major Colombian educational institution. The contrast between language learning at the major institution and that in the poor community is the substance of the paper. Six approaches to the anthropological study of education are discussed and followed in combination in the paper: (1) education as an instrument for socialization or enculturation; (2) education as the culturally different aspects of a society in terms of its language, conceptual style, behavior, and learning processes; (3) education as a ritual of series of "rites de passage"; (4) education as the differential patterns marking the degree and depth of participation by people in the educational process; (5) education as out of school instruction provided by institutions of all kinds; and, (6) education viewed from a diversity of management perspectives. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Texas

This handbook, the production of which was funded under the 1965 Elementary Secondary Education Act Title I, offers techniques and suggestions for developing a well organized parental involvement program with emphasis on the migrant Mexican American parent. The team approach, which includes the principal, teacher, parent, visiting, community aide, and others, is focused upon. Some activities discussed are parent teacher conferences, parental, workshops, advisory committees, home visits, and parent education activities. A parental involvement program is viewed as a partnership arrangement among parents, school, and community. The program's main goals and objectives are: (1) to develop rapport among migrant parents, school personnel, and community by increasing interpersonal contacts; (2) to increase interest and knowledge among migrant parents about the education of the children; (3) to involve all school personnel in the development of an effective parent-school-community involvement program; (4) to enhance the migrant parents' and school personnel's knowledge of local, State, and Federal Agencies, and other organizations that may improve the socio-economic status of the migrant; and, (5) to promote and involve migrant parents in all types of educational opportunities available. Identifiers—Special Summer Food Service Program for Children

The Special Summer Food Service Program for Children is one of several programs for the feeding of children administered by the Food and Nutrition Service (FNS). The program is designed to feed during summer vacation, children from areas having poor economic conditions or high concentrations of working mothers. It is authorized through fiscal year 1975. It provides Federal assistance through State educational agencies or Service regional offices for financing non profit food services operated by approved service institutions (called sponsors) at approved feeding sites. GAO's review of the program included visits to six large cities, one each in California, Illinois, Michigan, New Jersey, New York and Pennsylvania. Among the reports' findings and conclusions are the following: the program's effectiveness is difficult to assess because the Service and State agencies have not identified the total number of children who were eligible nor their location; the summer program apparently has achieved rather limited coverage, especially in areas other than the largest cities; and, problems which limited participation include vagueness in the law and regulations as to the extent of coverage desired, lack of strong support for an essentially voluntary program, and Federal and State funding limitations, resulting in a large proportion of allocated funds not spent. The cards in this file are representative samples of the types of activities developed by teachers involved in a Title I funded learning center of multi-cultural classroom activities for elementary school students. The five cultures that are studied are those of blacks, Asian Americans, native Americans, Mexican Americans, and Anglos. A multi-media approach is used in the classroom, and the activities described on these cards are part of a program which includes films, filmstrips, tapes, field trips, etc. Activities are divided into five areas: reading and language arts, cooking, arts and crafts, math, and music and dance. Listed under these five areas are thirty-eight activities, some of which include puzzles, types of poetry, how to make groundnut soup, early American recipes, food for the pioneers, African beads, Indian pottery, Japanese carp kits, Oriental block prints, counting triangles, the limbo dance, the Mexican national folk dance, the China pobana costume, and others. Descriptors—Administrator Role, Basic Skills, \*Criterion Referenced Tests, Educational Accountability, \*Elementary Education, Elementary School Supervisors, Elementary School Teachers, \*Individualized Instruction, Program Evaluation, \*Reading Programs, School Administration, Student Needs

Identifiers—\*Arkansas, Elementary Secondary Education Act Title I, ESEA Title I

The project discussed here was an outgrowth of a Title I, Elementary Secondary Education Act cooperative project involving nine Arkansas school districts. Initiated during 1971-72 school year, the cooperative's first two years focused on developing and field testing procedures for conducting district wide assessment of needs, program planning, and program evaluation. During the 1973-74 school year, these procedures were applied. That year's results served as a basis for further development and refinement during 1974-75. The purpose of this report is to describe the project activities implemented during 1974-75 and to present the evaluation results. The project utilized the Continuous Assessment Reading Design (CARD), a criterion-referenced assessment instructional program. The assessment component is designed to measure the specific skill needs of pupils, who have demonstrated an ability to perform at instructional levels kindergarten through six in the reading materials or basal series currently in use in their school district. The tests provide teachers with immediate and specific information about the pupils' reading skill strengths and weaknesses. Since each test item is keyed to a performance objective, the items missed by a pupil yield a profile of skill needs in the form of performance objectives. (Author/JM)

Identifiers—\*New York

Chapter 241 of the Laws of 1974 provides for aid to elementary and secondary education for 1974-75. This legislation contains departures from previous aid legislation. New criteria are introduced for calculating the "total aidable pupil units" which a district can claim. The new criteria are considered to reflect an effort to provide additional funds to school districts more equitably on the basis of specific pupil educational needs. Districts which receive aid for pupils with special education needs, with handicapping conditions, with severely handicapping conditions or in occupational education programs are required to prepare plans and submit annual reports to the State Education Department. The materials included in this document have been developed to assist district officials to understand and to carry out these new responsibilities, as follows: (1) general background information on Chapter 241; (2) specific planning, evaluation, and reporting instructions; (3) definitions which will enable district officials to identify pupils with special education needs and pupils with handicapping conditions, and definitions which will be applicable to occupational education; and, (4) the names and phone numbers of State Education Department officials to call for answers to questions about any facet of the special weighting provision. Identifiers—Minnesota (Roseville), \*Project Focus Dissemination

The Focus program deals with those students who perform well below their capacity socially and/or academically. It has as its main goal to decrease the incidence of alienation among these youth, the staff, and the community. Sub-goals include the reduction of alienation and improvement of self-concept, an increased access to desirable social roles, and the reduction of negative labeling. Since most Focus students are seen to be deficient in the basic academic skills and positive social development, the emphasis in each discipline is directed toward meeting the individual educational and social needs of each student. The philosophical basis of the Focus approach is broken down into seven briefly discussed interrelated components: caring, the setting of expectations, structure, individualization, responsibility, reinforcement, and evaluation. An area of emphasis in the program is the State funded work experience component in which work experiences are provided for each student, giving them an accurate view of the responsibilities and realities of employment. The Focus program is stated to be significantly different from other mini-school concepts dealing with the alienated student -- the family group atmosphere or small group interaction, noted to be the backbone of the program. The materials included in this document were prepared for the inservice training of Adoption Site personnel by the staff of Project Focus, a Developer/Demonstration site funded by the U.S. Office of Education under Elementary Secondary Education Act Title III. The document is designed to be used as a complete Training Manual. During the past three years, 1971-74, the Focus program as part of the Roseville Youth Development Project has directed its attention and efforts toward the identification and alteration of those features of a suburban school system that impede and obstruct positive youth development. The program has developed, implemented, evaluated, and disseminated strategies designed: (1) to provide socially acceptable and personally gratifying roles for all youth, particularly those most prone to the development of delinquency patterns and criminal careers; (2) to reduce student feelings of alienation, rejection, and powerlessness; (3) to provide appropriate success oriented learning alternatives; (4) to provide alternatives within the context of a public school system that improve the institutional services to adjudicated delinquents; and, (5) to recommend changes in school policies and procedures to reduce disaffection throughout the system. Identifiers—\*Indiana (Indianapolis)

The first part of this report descriptively compares black and white students with respect to various outcomes such as effort, academic performance, aspiration, and racial opinion change, and examines whether students of given racial groups differ in behavior depending on the school which they attend. Interrelationships between the various outcomes are explored. Data indicate that blacks do not differ greatly from whites with respect to academic effort or absence from school, that blacks and whites are similar with respect to educational and occupational aspirations, and that they differ greatly in achievement

scores and grades. The second part of the report considers the associations between each of the outcomes in the school and each of several sets of factors which are seen to account for variations in each outcome. These sets of possible explanatory factors are interracial interaction, student characteristics, home background, school situation, and student goals, beliefs and interests. Analysis of the data deals with each racial group separately and emphasizes the differences among individual students. Since the data on which the report is based is four years old, the descriptive findings are not held to necessarily reflect the current situation. Yet the observed general patterns and the issues they raise are still relevant. (Author/AM)

Identifiers—New York (New York), Open Corridors Program

This bulletin describes the work of the City College Advisory Service to Open Corridors, a program committed to changing schools in ways that will better support children's own spontaneous patterns of learning. In Part I, advisors describe in their own words how they proceed to educate themselves for the advisory role they undertake and how they work with teachers and children, administration, parents, and community. The facts and figures of advisors' efforts in a single district are reported in Part II, culled from their memos and logs. This material analyzes certain areas of advisor functioning presented in such broad categories as child development, reading-language arts, open education implementation, and workshops with para-professionals. The major area of advisory work, the work with individual teachers in the classroom and in personal conference, is not included here. In Part III, the spread of program philosophy and expertise, through the Advisory Circle of former advisors who have gone on to new assignments, is described. These former advisors have found ways of incorporating their advisory experience into the new situation. The future role of the advisory, especially in the context of the program's present crisis, is the subject of the essay in Part IV. (Author/AM)

\*Neighborhood Improvement, Social Responsibility, Urban Renewal

Identifiers—\*California (Oakland), Oakland Chinatown

Some historic aspects of Chinese settlement in the San Francisco Bay area are examined in this document and the impact of inner city development on ethnic neighborhoods, particularly in Oakland's Chinatown is discussed. Some developmental side effects are noted, as well as the benefits of ethnic concentration when the latter is the result of choice. Also presented is the challenge of providing neighborhoods with a stronger voice in land-use decisions and insuring that the community leaders who wield political influence actually defend the interests of residents they claim to serve. Finally, it is suggested that residents, public officials, and private investors take a new look at Chinatown. It is concluded that new legislation and innovative programs may not be needed and that the crucial element necessary to enhance the vitality of Chinatown is a clearer vision of its role in inner city revitalization. Since the decision of key actors such as lenders, landlords, realtors, appraisers, city planning staff, community leaders, and other combine to determine the market value, attractiveness, and livability of a neighborhood, the task of neighborhood preservation and rehabilitation involves the cooperation, persuasion, and sharing of a common vision of the future among these parties. Identifiers—Hawaii State University System, Roosevelt University

The admissions process to post secondary schooling is examined, and the complex of academic, financial, geographic, and motivational barriers to access that are currently being overcome are identified in this dissertation. The objectives are to analyze and discuss various topics and to use them to illuminate institutional policies and practices to increase their understanding, how they evolved and the forces at work in setting them, and how they affect their institutions. Two case studies, Roosevelt University in Chicago and the State of Hawaii University System, are utilized to illustrate and explain the process and the barriers, while discussing concepts such as merit, equality, excellence, liberty, and justice. Methodology employed includes a historical and sociological analysis, interviews, and case studies. The results of the study are: a display of open admissions and how it works; an illustrated definition of the process; an examination of earlier philosophies of access and the differences between Land-Grant attempts at expanding access and more recent efforts, and a further understanding of the various processes of access to schooling and its benefits. It is concluded that, to some extent, the opening of admissions represents a state of mind, a philosophy of access, and not a specific occurrence. (Author/AM)
